BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)							DATE: FEBRUARY 2005	
APPROP CODE/BA: PAAF/MUNITIONS & RELATED EQUIPMENT				P-1 NOMENCLATURE: ROCKETS (OVERVIEW)				
	FY2004	FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
QUANTITY								
COST (in Thousands)	\$64,633	\$34,424	\$36,302	\$57,819	\$64,605	\$65,713	\$53,714	\$61,611
<p>Description:</p> <p>1. The Air Force primarily uses rockets to mark target locations for other aircraft during combat and training operations. Rockets constitute the primary target marking munition used by forward air control aircraft, which launch this munition from reusable pods carried on aircraft pylons. The 2.75-inch diameter rocket with folding fins utilizes high explosive, white phosphorous, or target practice warheads, and is fired from either high or low speed aircraft. Three versions of the 2.75-inch rocket motor are in use: MK 4, MK 40 and MK 66.</p> <p>2. Items procured in FY06 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.</p>

<p>Description:</p> <ol style="list-style-type: none"> 1. The 2.75 inch rocket flare (HA06), used with the 2.75 inch rocket motor (HA07), provides aircraft with target illumination capability from a safe standoff distance in a hostile environment. The 2.75 inch rocket flare (HA06) consists of an ignition system, flare main parachute, drogue parachute assembly, and an integral fuze and delay assembly. Enclosed in an aluminum case, the fuze and candle igniter arming are actuated by rocket motor acceleration. The candle, when actuated, is suspended from the main chute. This warhead supports Forward Air Control operations. 2. This item is procured through the Single Manager for Conventional Ammunition (SMCA).

<p>Description:</p> <ol style="list-style-type: none"> 1. The 20 MM target practice (TP) round is used for air-to-air and air-to-ground training in the M61 aircraft gun on F-15 and F-16 aircraft. The Air Force procures various links, linking methods, and mixtures of target practice and target practice tracer ammunition depending on the specific requirement of the system and the training program. The cartridge is electrically primed and has no fuze. The 20MM projectile is a solid slug sized to match the ballistics of the 20MM combat round. The 20MM cartridge is the primary ammunition used in aircraft gun systems by the Air Force and Navy. The Air Force procures the PGU-27 TP round to provide a training capability to complement the PGU-28 high explosive incendiary combat round and ensure training is consistent with combat operations. 2. This item is procured through the Army Single Manager for Conventional Ammunition (SMCA). 3. Representative items requested in FY06 are identified on the following P-5. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

APPROP CODE/BA: PAAF/MUNITIONS & RELATED EQUIPMENT				P-1 NOMENCLATURE: CARTRIDGES (RR-188 CHAFF, 3W37)				
	FY2004	FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
QUANTITY								
COST (in Thousands)	\$13,025	\$10,690	\$6,500	\$6,500	\$6,500	\$6,500	\$6,500	\$14,273
<p>Description:</p> <ol style="list-style-type: none"> 1. The RR-188 chaff cartridge contains a payload of chaff that is dispensed during flight to meet aircrew training requirements. The functional characteristics are similar to RR-170 and RR-180 chaff countermeasures cartridges used in combat situations, however, the use of RR-170 and RR-180 chaff for training is severely limited by Federal Aviation Administration (FAA) regulations due to interference with air traffic control radar. The RR-188 provides the necessary alternative for realistic combat aircrew training since it does not interfere with air traffic control radar. 2. Like the combat chaff cartridges, the RR-188 fits into a multiple cartridge magazine (MJU-11 or MJU-15) used in any of the ALE-40 series flare/chaff dispensing systems on several types of aircraft. The chaff cartridge contains no explosive or incendiary components when the impulse cartridge is not installed. 3. This item is procured through the Navy. All prices are provided by the Navy. 4. Representative item requested in FY06 is identified on the following P-40A. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

<p>Description:</p> <ol style="list-style-type: none"> 1. The BLU-109 warhead is a 2000-pound hard target penetrator bomb. It is a penetration weapon used against bunkers, aircraft shelters, and reinforced concrete structures. The warhead is used on the GBU-10, 24, and 27 and Joint Direct Attack Munition (JDAM) weapon systems. 2. The Air Force has aligned BLU-109 procurements to keep pace with JDAM and Laser Guided Bomb (LGB) kit production. 3. Items requested in FY06 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements. 4. This item is procured through the Single Manager for Conventional Ammunition (SMCA).

<p>Description:</p> <ol style="list-style-type: none"> 1. The BLU-122 Bomb will be used on the GBU-28 C/B Precision Guided Air-to-Surface weapon, and is an improved 5000 lb BLU-113 penetrating warhead, with a new designator of BLU-122. It will be used on the B-2 and F-15E aircraft weapon system platforms. The warhead provides deeper target penetration, increased lethality, and survivability with improved insensitive munitions characteristics. The new BLU-122, incorporated into the GBU-28, significantly enhances the Air Force's capability to destroy hardened targets. 2. Items requested in FY06 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements. 3. BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)							DATE: FEBRUARY 2005		
APPROP CODE/BA: PAAF/MUNITIONS & RELATED EQUIPMENT				P-1 NOMENCLATURE: GENERAL PURPOSE BOMBS (GBU-28C/B KIT)					
	FY2004	FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011	
QUANTITY					0	0	0	0	
COST (in Thousands)	\$0	\$12,303	\$20,087	\$20,087	\$0	\$0	\$0	\$0	
<p>Description:</p> <ol style="list-style-type: none"> 1. The GBU-28C/B is a Precision Guided Air-to-Surface weapon, that is a follow-on to the legacy GBU-28 B/B weapon. Minor modifications are being incorporated into the guidance kit to accommodate the new, improved 5000 lb BLU-113 penetrating warhead (newly designated as the BLU-122). In addition, the MIL-STD-1760 conduit is being extended to accommodate in-flight fuze reprogramming capability in the future. The guidance kit contains a guidance section, a set of aerodynamic control surfaces, a laser seeker, and the Global Positioning System/Inertial Measurement Unit (GPS/IMU). The tail kit is a set of fixed wings. The GBU-28C/B provides the B-2 and F-15E aircraft weapon system platforms with adverse weather combat capability by incorporating rapid GPS acquisition and stand-alone IMU guidance capabilities. The GBU-28C/B, coupled with the new BLU-122, significantly enhances the Air Force's capability to destroy hardened targets. 2. Items requested in FY06 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements. 3. This item is procured through the Air Armament Center, Eglin AFB, FL.

BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)							DATE: FEBRUARY 2005	
APPROP CODE/BA: PAAF/MUNITIONS & RELATED EQUIPMENT				P-1 NOMENCLATURE: SENSOR FUZED WEAPON				
	FY2004	FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
QUANTITY	320	321	332	356	376	387	395	398
COST (in Thousands)	\$116,966	\$116,571	\$120,379	\$123,437	\$132,886	\$135,609	\$138,010	\$139,518
<p>Description:</p> <ol style="list-style-type: none"> 1. Quantities reflected above do not match the P-1 exhibit, these quantities are the updated projected quantities. Due to database lock time constraints, the quantities reflected on the P-1 exhibit did not reflect the most recent contract award data. 2. The Sensor Fuzed Weapon (SFW) is a wide-area smart munition designed for use against moving and stationary vehicles. The SFW provides operational forces with the capability to achieve multiple kills per pass, in all weather conditions, day or night. The SFW (CBU-97) consists of a Tactical Munitions Dispenser (TMD) containing ten BLU-108 submunitions. Each submunition contains four warheads, a parachute assembly, altimeter, and rocket motor. The TMD opens after release from the delivery aircraft, dispensing the submunitions. The submunitions are parachute retarded and oriented nose downward. After the parachute ejects, the rocket motor fires to launch the warheads. The warheads release in a horizontal trajectory and target activate using infrared and laser sensors contained in the warhead, firing a self-forging projectile into the target. SFW has a 99 percent self-destruct capability to reduce battlefield Unexploded Ordinance (UXO). 3. The SFW (CBU-97) is compatible with the Wind Corrected Munition Dispenser (WCMD), the CBU-105. The WCMD tail kits are procured separately for dispenser munitions to correct for wind-induced delivery errors. WCMD configurations are produced to support USAF as well as Foreign Military Sales (FMS) inventory requirements.

Description:

1. The Joint Direct Attack Munition (JDAM) program is a joint Air Force/Navy program with the Air Force as the lead service. Designated ACAT 1C, this program upgrades the existing inventory of general purpose bombs (MK-84, BLU-109/B, MK-82 and MK-83) by integrating the bombs with a guidance kit consisting of a global positioning system aided inertial navigation system (GPS/INS). JDAM provides accurate, adverse weather capability. JDAM is integrated with the B-52H, B-2A, B-1B, F-16C/D, F-14B/D, F/A-18C/D/E/F, and F-15E aircraft. Follow-on integration on the F/A-22, F-117, A/OA-10, AV-8B, and F-35 is in progress. Follow-on integration efforts are planned for the MQ-9 (Predator) and J-UCAS.

2. FY06 (Lot 10) will be GPS Selective Availability Anti-Spoofing Module (SAASM) equipped. FY06 unit pricing includes Anti-Jam, however, Anti-Jam units will be procured based on availability of funding.

3. Total Funding includes Seek Eagle.

<p>Description:</p> <p>1. Cartridge Actuated Devices/Propellant Actuated Devices (CAD/PAD), such as gas generators, initiators, Shield Mild Detonating Cord (SMDC), rocket motors, rocket catapults, etc., are used on aircraft fire suppression, emergency release and aircrew escape systems. These explosive devices have finite lives and are replaced during scheduled maintenance. Aircraft operational availability is directly impacted if replacement assets are not available to meet these "time change" requirements. Life support devices such as the Sea Water Activated Release System (SEWARS) and parachute release cartridges are essential to crew survival after ejection and are included in the CAD/PAD category.</p> <p>2. Items requested in FY06 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.</p>

<p>Description:</p> <p>1. This P-1 line funds spares and repair parts for Procurement of Ammunition, Air Force (PAAF) items. Initial spares consist of reparable components, assemblies and subassemblies, as well as consumable items required in support of newly fielded end items. Requirements are based on historical failure/demand data on similar items. Replenishment spares consist of reparable components, assemblies and subassemblies required for follow-on sustainment of end items. Munitions replenishment spare levels are based on item specific failure/demand driven computations.</p> <p>2. Items requested in FY06 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force Mission requirements.</p>

<p>Description:</p> <ol style="list-style-type: none"> 1. The LUU-1 aircraft parachute flare is an aircraft launched target marking device. Flares may be delivered/launched from high speed aircraft by use of SUU-25 flare dispensers. The pyrotechnic candle burns at the upper end, which is connected to the parachute to reduce the possibility of extinguishing on ground contact. The parachute is designed to provide a 30 feet per second rate of decent, and to snag in the top of foliage. The pyrotechnic candle produces a colored light with an average burning time of 30 minutes. This flare enhances a pilot's ability to see targets while using night vision goggles. 2. A new technical data package is being developed for this flare, which won't be available until May 05. FY05 funding was adjusted downward in consideration of the late contract award. 3. Items requested in FY06 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements. 4. COST (in Thousands)	\$15,832	\$7,750	\$17,098	\$20,060	\$20,497	\$24,960	\$23,274	\$24,340	
<p>Description:</p> <ol style="list-style-type: none"> 1. The M211 is a hermetically sealed aluminum case purged with nitrogen containing a payload of stacked special material elements which react to air. When deployed into the air stream, the special material reacts to emit an infrared signal to decoy infrared seeking missiles. This flare is required to provide the C-130 and A-10 aircraft and HH-53 and HH-60 helicopters protection against advanced air-to-air and surface-to-air infrared weapon systems. 2. Funding for FY05 was reduced in the FY05PB due to manufacturing constraints, which have since been resolved. 3. Items requested in FY06 are identified on the following P-40A, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements. 4. This item is procured through the Armament Research Development and Engineering Center (ARDEC) at Picatinny Arsenal, NJ.

<p>Description:</p> <ol style="list-style-type: none"> 1. The M212 Multi-color Infrared Countermeasure Flare consists of an 8" x 1" x 1" aluminum case that possesses a receptacle for installation of an impulse cartridge. The M212 is then loaded into a MJU-11 multiple countermeasure magazine and installed into an AN-ALE-40 series countermeasure dispenser. The M212 countermeasure flare is deployed into the aircraft air stream and ignited by the hot gases and flame produced by the BBU-35 impulse cartridge. This flare is primarily used on C-130 aircraft. The M212 flare is designed to provide multi-spectrum infrared output and is used with M211 decoys and M206 flares as a cocktail mix to decoy advanced missile threats against the aircraft. 2. Items requested in FY06 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force Mission requirements. 3. COST (in Thousands)	\$6,250	\$6,300	\$6,300	\$7,500	\$7,900	\$11,400	\$8,924	\$11,548
<p>Description:</p> <ol style="list-style-type: none"> 1. The MJU-50/B is a pyrophoric decoy developed as an advanced infrared countermeasure to defeat advanced-technology missile threats. The MJU-50 is termed a "covert" decoy because of the low-level of visible light it emits during ignition and burn. This flare's light intensity minimizes aircraft exposure to enemy ground monitoring and attack, and does not blind a pilot wearing night vision goggles. The MJU-50 flare was developed for the C-130, and is used on A-10 aircraft and HH-53 and HH-60 helicopters. 2. This item is currently procured through the Ogden Air Logistics Center, Air to Surface Munitions Directorate, but will be procured through the Single Manager for Conventional Ammunition (SMCA) beginning in FY06. 3. Items requested in FY06 are identified on the following P-40A, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

<p>Description:</p> <ol style="list-style-type: none"> 1. The DSU-33B/B is a joint service doppler radar proximity sensor designed to provide airburst capability to warheads using the FMU-139A/B and FMU-152/B fuze. Airburst yields a significant increase in effectiveness for unitary warheads against surface targets such as Surface-to-Air Missiles and Anti-Aircraft Artillery. The DSU-33B/B incorporates several important operational improvements over the DSU-33A/B. These improvements include compatibility with Joint Attack Munition guided weapons, and M117 and MK-80 series general-purpose bombs. The DSU-33B/B also significantly expands the high altitude release capability for bomber attacks. In addition, the DSU-33B/B provides extended operational and service life, as well as increased ruggedness and full compatibility with Navy weapons. 2. Items requested in FY06 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements. 3. This item is procured through the Air Armament Center, Eglin AFB.

<p>Description:</p> <ol style="list-style-type: none"> 1. The FMU-152/B Joint Programmable Fuze (JPF) is a Joint AF/Navy multi-function unitary fuze developed and procured for the Joint Direct Attack Munition and other conventional inventory weapons. The Air Force is the lead service for procurement of the JPF. The FMU-152/B provides a highly reliable bomb fuze with multiple arm times, instantaneous and multiple short and long delay detonation times, hard target survivability, cockpit programmability, and increased service/shelf life. The JPF is compatible with MK-80 series guided and unguided bombs. It will replace or supplement FMU-139, FMU-143, FMU-124, and M904/M905 fuzes, and provide the next generation of fuzing capability for hard target, general purpose, and guided bombs. 2. A cockpit programmable fuze is a critical mission requirement, significantly enhancing war-fighter capability. 3. Items requested in FY06 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements. 4.
