(U) Intelligence-related Activities

(U) Misuse of the U.S. SigINT System. While teaching a class on analyzing communication networks, the instructor purposely entered the phone number of his friend, who was neither a U.S. person nor living in the United States. The instructor was counseled on the restrictions on NSA authorities and was mandated to attend training on USSID SP0018, which he completed in July 2007.

2. (U/FOUO) Intelligence Oversight Inspections. During this quarter, the Office of Inspector General (OIG) reviewed various intelligence activities of the NSA/CSS to determine whether they were conducted in accordance with applicable statutes, Executive Orders, Attorney General procedures, and Department of Defense and internal directives. With few exceptions, the issues presented were routine and indicated that the operating elements understand the restrictions on NSA/CSS activities.

(U/FOUO) Although is diligently working to improve its Intelligence Oversight program, procedures fall short of the minimum required to ensure that all employees receive required intelligence oversight training. Although the understanding of NSA authorities in relation to collection, minimization, and dissemination is poor, no intelligence oversight-related concerns were noted within operations. Intelligence oversight training is not managed effectively or efficiently, and no internal controls ensure training compliance. At best, the procedures to make certain that the right people receieve the required training are confusing and difficult to track. The NSA/CSS Inspector General will track these deficiencies and will relay in a future report when they are rectified.

3. (U) Substantive Changes to the NSA/CSS Intelligence Oversight Program. Nothing to report.

4. (U) Changes to NSA/CSS published directives or policies concerning intelligence, counterintelligence, or intelligence-related activities and the reason for the changes. Nothing to report.
