A. Mission Description and Budget Item Justification:

<u>PLEASE NOTE:</u> This administration has not addressed FY2003-2007 requirements. All FY 2003-2007 budget estimates included in this book are notional only and subject to change.

This program element supports continued modernization of the Army's medium truck fleet. The Family of Medium Tactical Vehicles (FMTV) replaces aging M44 Series 2 1/2 ton trucks and M39 and M809 Series 5 ton trucks that are beyond their average useful life of 20-22 years. FMTV also provides a follow-on to the M939/A2 Series 5 ton truck. FMTV is required to fill 2 ½ (LMTV) and 5 ton truck (MTV) requirements, resolve operational deficiencies and operate throughout the theater as multi-purpose transportation vehicles used by combat, combat support and combat service support units. This system is designed to be rapidly deployable worldwide and operate on primary and secondary roads, trails, and cross-country terrain in all climatic conditions. The funds will support continuous product improvements, technological upgrades and new capabilities for FMTV. Funding will be used to develop a lighter dump body with improved wear characteristics; develop an improved survivability cab for the safety of the soldier; study/analyze and build/test prototype of an alternative Load Handling System (LHS); insert electrical power management/technology; improve corrosion prevention; develop an alternative propulsion system; develop active suspension system and further vehicle component improvement.

This system supports the Legacy to Objective transition path of the Transformation Campaign Plan (TCP)

FY 2000 Accomplishments

- Power Management/Technology Insertion Next Generation Electrical Architecture
- Load Handling System Development (LHS)
- 255 Dump Bed Design Initiatives
- 73 Cab Survivability Improvement

Total 1905
