This administration has not addressed FY 2003-2007 requirements. All FY 2003-2007 budget estimates included in this book are notional only and subject to change.

(U) **A. Mission Description**

Milstar is a joint service program to develop and acquire extremely high frequency (EHF) satellites; a satellite mission control segment; and new or modified Army, Navy, and Air Force communication terminals for survivable, jam-resistant, worldwide, secure communications to strategic and tactical war fighters. Milstar I Satellites 1 and 2 have a low data rate (LDR) payload that supports strategic and tactical forces with emphasis on highly survivable, minimum essential communications. Milstar II Satellites 3 through 6 have both LDR and medium data rate (MDR) payloads with increased tactical capabilities, including higher data rates to mobile forces and nulling that will neutralize close-in enemy jammers. Satellite 3 did not reach its proper orbit and the satellite was placed in its final non-interference orbit and shutdown. Advanced EHF (AEHF) is the follow-on system to Milstar. OSD approved a new AEHF acquisition strategy in May 2000 (see PE 63430F) to mitigate constellation risk due to the loss of the Milstar 3 satellite. Milstar satellite 4 was launched successfully on 27 February 2001. Milstar satellites 5 and 6 will launch in FY02 and FY03. Milstar Terminals are funded under Program Element 0303601F.

(U) **FY 2000 (\$ in Thousands)**

(U) \$270,441 Milstar II

(U) \$0 Continued preparation of Satellite 4 for delivery

(U) \$0 Continued Satellite 4 integration and test

(U) \$0 Continued Satellite 5 integration and test

(U) \$0 Continued Satellite 6 LDR and MDR payload integration and test, and start of satellite integration and test

(U) \$27,052 Milstar I/II Satellite Engineering

(U) \$0 Continued Satellites 1 and 2 on-orbit operations support

(U) \$0 Provided Satellite 4 pre-launch support

(U) \$0 Continued LDR and MDR technical support

(U) \$21,009 Automated Communications Management System (ACMS)

(U) \$0 Continued software Build 2 incremental development

(U) \$0 Continued maintenance of fielded software Build 1

Lockheed Martin was awarded a sole source contract to develop 6 Milstar protected communication satellites. The first two LDR satellites were launched in FY94 and FY95. Satellite 3 launch in FY99 was to provide the first LDR/MDR on-orbit capability, but the satellite did not reach its proper orbit due to a Centaur upper stage failure. Satellite 4 was launched successfully on 27 February 2001. The last 2 LDR/MDR satellites 5 and 6 will be launched in FY02 and FY03.
