C12 STANDARD INTEGRATED COMMAND POSTS (SICPS)	2393	0	0	0	0	0	0	0	2393
C29 CENTRALIZED TECHNICAL SUPPORT FACILITY (CTSF)	11057	11571	11921	12172	12461	12862	13224	0	85268
C34 ARMY TAC C2 SYS ENG	12931	28211	10824	17541	3179	188069	243808	0	547124
C39 TACTICAL OPERATIONS CENTERS (TOCS)	5031	6488	10918	4250	4332	0	0	0	44472
C3A ARMY AIRBORNE COMMAND & CONTROL SYS (A2C2S)	34240	22910	7995	6986	6572	0	0	0	78703

**A. Mission Description and Budget Item Justification:** The umbrella program to exploit automation technology for the conduct of combat operations is the Army Tactical Command and Control System (ATCCS) program which is a component of the Army Battle Command System (ABCS). The ATCCS program provides automation in the five battlefield functional areas (BFAs) with the following specific systems: (1) Maneuver Control System (MCS); (2) Effects and Fires Command and Control Systems (EFCCS); (3) All Source Analysis System (ASAS) for Intelligence/Electronic Warfare; (4) Forward Area Air Defense Command, Control and Intelligence System (FAADC2I); and (5) Combat Service Support Control System (CSSCS). To provide an overall technically sound, cost effective, and operationally responsive approach, the design and development of ATCCS must be accomplished on a total systems basis. The ATCCS Engineering Program, more commonly known as Systems Engineering and Integration (SE&I), provides the required overall systems engineering to assure integrated Army tactical command and control and the utilization of common hardware and software throughout the five ATCCS nodal systems. This program element also includes the Central Technical Support Facility (CTSF) which provides a single technical "center of mass" for software checkout and physical system integration. The Common Hardware and Software projects provide common products to customers to meet their developmental and fielding needs. The Tactical Operations Centers (TOCs) project designs and develops the TOCs that form the structural backbone of the Army's digitized fielding concept. Starting in FY04 this program includes funding for the SICPS program which was previously funded in project C12 in FY03. The Army Airborne Command & Control (A2C2S) provides the avionics system required to horizontally and vertically integrate the battlefield. These systems support the Legacy to Objective transition path of the Transformation Campaign Plan (TCP).

PROJECT

**323**

COST (In Thousands)	FY 2003 Actual	FY 2004 Estimate	FY 2005 Estimate	FY 2006 Estimate	FY 2007 Estimate	FY 2008 Estimate	FY 2009 Estimate	Cost to Complete	Total Cost
323 COMMON HARDWARE SYSTEMS	18117	6453	6446	6514	6786	7078	7354	0	85646

**A. Mission Description and Budget Item Justification:** Project D323 Common Hardware Systems (CHS): CHS is the program through which the Army builds its integrated efforts for tying together the Army Battle Command Systems (ABCS). The project provides a vehicle (contract) through which customers can acquire state-of-the-art common hardware components/system operating software and associated peripherals to meet developmental and fielding needs. This project provides a ruggedized information technology line to over 80 Army and DoD customers. CHS provides worldwide repair, maintenance and logistic support through regional support centers (RSCs). The CHS program is instrumental in digitizing the battlefield. This program supports the Current-to-Future transition path of the Transformation Campaign Plan (TCP).

<b>Accomplishments/Planned Program</b>	<b>FY 2003</b>	<b>FY 2004</b>	<b>FY 2005</b>
Continue management of the acquisition and delivery of CHS-2 and CHS-3 equipment in support of customer requirements	3156	5145	5646
Continued follow-on contract requirements effort (CHS-3)	1513	0	0
Continue supporting customers testing efforts with CHS equipment	300	300	300
ABCS System Engineering and Integration efforts	648	0	0
CHS-3 follow-on contract awarded (Non-Recurring Engineering costs)	12000	0	0
Continue CHS technology insertion	500	1008	500
<b>Totals</b>	<b>18117</b>	<b>6453</b>	<b>6446</b>

**B. Other Program Funding Summary:** Not applicable for this item.

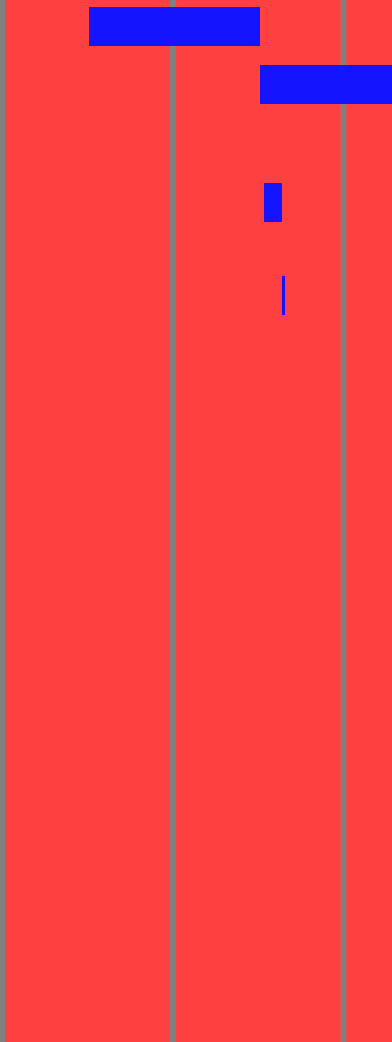

**C. Acquisition Strategy:** The overall goal is to improve interoperability and lower life cycle costs by standardizing battlefield command and control (C2) automation through centralized buys of non-developmental items (NDI), standardized protocols and reusable commercial common software. This project provides a coherent migration strategy for ABCS systems through the use of technology insertion.

334 COMMON SOFTWARE	14201	25533	21006	32197	26121	21868	24335	Continuing	Continuing

**A. Mission Description and Budget Item Justification:** Project D334 Common Software (CS): Common Software is the program through which the Army procures, develops, integrates and tests common software products and/or modules and/or components for both the Army and Joint Services through the Common Operating Environment (COE). The CS project provides state-of-the-art software technologies and functionality that is used by numerous Army systems thereby eliminating the need for similar independent development and duplication of effort. The CS program is a cornerstone in the Army's digitization efforts that includes work covering web based management tools under the Information Dissemination Management-Tactical (IDM-T) system. This system supports the Current to Future transition path of the Transformation Campaign Plan (TCP).

<u>Accomplishments/Planned Program</u>	FY 2003	FY 2004	FY 2005
Continue the development, acquisition management and delivery of CS and Commercial-Off-The-Shelf (COTS) products in support of Army and Joint Service customer requirements. Continue to achieve enhanced levels of interoperability by defining, testing and implementing software technologies that are provided to the warfighter. CS products will bridge current to future force technologies in support of the Future Combat System (FCS) and the Army's way ahead.	864	6813	7154
Continue: execution of the Common Software technology and reuse program; supporting customer integration and testing; the exploration and evaluation of new software technologies in support of the overall CS program; and developing, upgrading and delivery of DII COE products into Army and Joint Service systems. The CS products released to the Army and Joint Programs are also used in support of the US/Allied coalition efforts.	3484	15977	13852
Information Dissemination Management - Tactical (IDM-T) effort. The IDM-T is one of the CS products that provides the Army's input into the Global Information Grid (GIG). This product is GIG compliant. The IDM-T will provide information management and transport services of critical situational awareness data for commanders and their staff.	4291	2000	0
ABCS System Engineering and Integration Efforts	210	0	0
Integrate the Army's Advanced Warfare Environment's commercial 3D display technology development to support command and control modernization initiatives.	5352	0	0

**C. Acquisition Strategy:** The overall goal is to improve software development, integration and interoperability, and to lower life cycle costs by providing common software products to the Army, Joint Services, and Coalition efforts. The CS program is designed to increase both horizontal and vertical interoperability while reducing development, integration and testing resources. This strategy will be realized through defined Application Program Interfaces (APIs), standardized protocols, reusable software and standard commercial products. The CS program plans to partner with and provide products to the Future Combat System (FCS).

ARMY RDT&E BUDGET ITEM JUSTIFICATION (R-2A Exhibit)							February 2004			
BUDGET ACTIVITY 5 - System Development and Demonstration				PE NUMBER AND TITLE 0604818A - Army Tactical Command & Control Hardware & Softwar			PROJECT C12			
COST (In Thousands)		FY 2003 Actual	FY 2004 Estimate	FY 2005 Estimate	FY 2006 Estimate	FY 2007 Estimate	FY 2008 Estimate	FY 2009 Estimate	Cost to Complete	Total Cost
C12	STANDARD INTEGRATED COMMAND POSTS (SICPS)	2393	0	0	0	0	0	0	0	2393
<p><b>A. Mission Description and Budget Item Justification:</b> The Standard Integrated Command Post System (SICPS) program currently procures five (5) post variants, each designed to accommodate the various Battlefield Functional Areas (BFAs) and Tactical Operations Centers (TOCs) of the Army Battle Command System (ABCs) and other customers. The ABCS customers include the Army Tactical Command and Control System (ATCCS) to include Maneuver Control System (MCS), Effects and Fire Command and Control Systems (EFCCS), the Combat Services Support Control System (CSSCS), the Forward Area Air Defense Command and Control System (FAADC2), the Air and Missile Defense Planning and Control Sysem (AMDPCS), the All Source Analysis System (ASAS), and the Integrated Meteorological System (IMETS). This also supports the First Digitized Corps (FDC), First Digitized Division (FDD), Second Digitized Division (SDD) and Transformation efforts. SICPS is essential to the Army's transformation efforts, providing mobile and environmentally protected platforms for the ABCS which is a major part of the Army Chief of Staff's effort to digitize the battlefield. The current five (5) command post variants are: SICPS Tent Command Post (CP), Rigid Wall Shelter (RWS) CP mounted on the High Mobility Multipurpose Wheeled Vehicle (HMMWV), Installation Kits for the 5-Ton Expansible Van (E-Van), M577 IK to make M1068 Track CP, and the Installation Kits for the Soft Top HMMWV. The RDT&amp;E program enables the development of Large SICPS Tent, Large SICPS Shelter (LSS), and Modular Expandable Rigid Wall Shelter (MERWS). Additionally, this program develops and matures the enabling technologies required to meet the ABCS Capstone Requirements Document (CRD) and develops SICPS designs for FDC, FDD, SDD and the transformation force. The SICPS program and funding transfer to the TOCs program beginning in FY 04. This system supports the Legacy to Objective transition path of the Transformation Campaign Plan (TCP).</p>										
<b>Accomplishments/Planned Program</b>							FY 2003	FY 2004	FY 2005	
Large SICPS Tent. Continue development of an alternate configuration of the SICPS Tent Command Post. This alternate design will include a larger base module than the current SICPS tent along with the required infrastructure to facilitate Tactical Operations Center (TOC) configurations. This Large SICPS Tent will be able to be complexed together by adjoining modules and will also have the capability to interface with existing SICPS. This effort was funded under PE 64804/429 in FY 2002 (\$7728M).							2393	0	0

C29	CENTRALIZED TECHNICAL SUPPORT FACILITY (CTSF)	11057	11571	11921	12172	12461	12862	13224	0	85268

**A. Mission Description and Budget Item Justification:** Project DC29 - Centralized Technical Support Facility: The Central Technical Support Facility (CTSF) is located in Fort Hood, Texas. The CTSF provides a centralized on-the-ground capability to ensure interoperability among various digitized platforms and serves as the final integration and maturation facility for Common Operating Environment (COE). The CTSF is the Warfighters "Edge" that acts as an enabler for rapid integration of dissimilar software and hardware systems through real time, on-site integration of soldiers, contractors, testers, Program Managers and the requirements community. Also the CTSF provides a single technical "center of mass" for software checkout and system integration and provides a controlled environment with connectivity to other C4I systems either on-site or through the Army Interoperability Network (AIN) to support digital integration and fielding. This effort supports the Current to Future transition path to the Transformation Campaign Plan (TCP).

<b>Accomplishments/Planned Program</b>	<b>FY 2003</b>	<b>FY 2004</b>	<b>FY 2005</b>
Continue test planning/procedures/execution/reporting	2102	2202	2304

**A. Mission Description and Budget Item Justification:** Project DC34 - Army Tactical Command and Control Systems (ATCCS) Engineering which is also referred to as Systems Engineering and Integration (SE&I): The Air/Land Battle Doctrine requires military leaders to make sound and timely command and control decisions to direct the activities of assigned and supporting units. The umbrella program to exploit automation technology in support of this mission is the ATCCS or SE&I program. The effort to achieve horizontal integration of the ATCCS Battlefield Functional Areas (BFAs), although going on independently in each BFA, was not disciplined enough to address all connections and needs within the entire spectra of command, control and communications. Therefore, to ensure this horizontal integration effort is complete and fully automated, a significant management, systems engineering and integration effort is required. This effort supports the Army Battle Command Systems (ABCS) Version 6.30 and the Current to Future transition path to the Transformation Campaign Plan (TCP).

## Accomplishments/Planned Program

	FY 2003	FY 2004	FY 2005

<p><b>A. Mission Description and Budget Item Justification:</b> The Tactical Operations Centers (TOCs) program supports Army Transformation in the overall mission area of "Exercising Command and Control". The TOCs program provides commanders (at all echelons of command from battalion to corps) with integrated digitized network centric command and control facilities from which they execute battle command and make decisions based on objective data and intuitive feel for the battle. To perform these functions, the commander and his staff require command, control and communications systems integrated on mobile platforms capable of keeping pace with maneuver forces. The TOCs program provides the physical infrastructure (platforms, power, environmental control, data networks, inter-communications and video displays) capable of operating under all conditions on the modern battlefield, and provides the real-time situational understanding (Common Operational Picture) inherent in the Army Battle Command System (ABCS). Network centric TOCs are key to ensuring that information superiority and force synchronization are gained on the tactical and operational battlefield. TOCs are required for all combat, combat support and combat service support units. FY04 effort includes design, development, and testing of Command Post platforms (CPPs) and shelters for Current Force (eg. Counterattack Corps) and Stryker Brigade Combat Teams (SBCTs) that meet Army Approved ORD requirements. FY05 completes engineering and testing of CPPs and shelters and supports the integration of TOCs for Current Force and SBCTs. The SICPS program transferred to the TOCs program in FY04. Prior years depict TOCs only. SICPS prior year funding can be found in separate submission (PE 0604818A-C12). This system supports the Current-to-Future transition path of the Transformation Campaign Plan (TCP).</p>

## B. Other Program Funding Summary

	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	To Compl	Total Cost
Other Procurement Army 2 - SSN: BZ9865	41187	68997	50692	63555	50229	26781	10273	1849460	2204852

C. Acquisition Strategy: The TOC evolutionary acquisition strategy relies on non-developmental items (NDI), Commercial Off-the-Shelf (COTS), and Government-furnished equipment (GFE) to design, integrate, assemble, test, train, and field Command Post Platforms and Tactical Operations Centers (TOCs). Contracting strategy calls for full and open competition.

COST (In Thousands)	FY 2003 Actual	FY 2004 Estimate	FY 2005 Estimate	FY 2006 Estimate	FY 2007 Estimate	FY 2008 Estimate	FY 2009 Estimate	Cost to Complete	Total Cost
C3A     ARMY AIRBORNE COMMAND & CONTROL SYS (A2C2S)	34240	22910	7995	6986	6572	0	0	0	78703
<p><b>A. Mission Description and Budget Item Justification:</b> This project funds the development of an avionics system required to horizontally and vertically integrate the battlefield. Tasks in this project support research efforts in the engineering and manufacturing development phase of this system. The Army Airborne Command and Control System (A2C2S) is the Army's only airborne C2 acquisition program for a system supporting corps, division and brigade Commanders. The A2C2S enables Commanders from brigade to theatre levels, and their staffs, to traverse the battle space rapidly - maintaining situational awareness of all battlefield systems - and maintaining communications, tactical to CONUS reach back, throughout the decision continuum. The A2C2S routinely operates in linear and non-linear areas of operations, all the time providing information superiority with the common operational picture necessary for an accurate, near real-time perspective and knowledge of the situation to avoid enemy strengths while concentrating friendly assets for decisive and rapid victory. Another objective of the A2C2S program is to be the airborne first-responder for Homeland Security and disaster relief by providing a robust communications platform for emergency response coordinators of air and ground operations. It will support initial and remote scene operations center capabilities, convoy operations, and disaster coordination between state, federal, civilian and military assets. This system is critical to enhance the Battle Command Group's ability to effectively perform combat unit operations and serve as a force multiplier in the Future Force. It provides the capability to access the tactical internet to manipulate, store, manage, and analyze situational awareness information, intelligence data, mission plans, and mission progress data to support the command and control decision making process. The A2C2S will provide situational awareness and command and control by hosting Battle Command applications. In addition to line-of-sight Combat Net Radios, including Single Channel Ground Airborne Radio System (SINGARS), Advanced System Improvement Program (ASIP) and HAVEQUICK II, the A2C2S supports deep operations with non-line-of-sight radios such as High Frequency (HF) and Demand Assigned Multiple Access (DAMA) and Satellite Communications System Satellite Command (SATCOM). In addition, the system has the potential to improve the ability of state, local, and federal agencies to communicate and coordinate in a crisis environment such as hurricanes, forest fires, or terrorist incidents. This system supports the Current-to-Future transition path of the Transformation Campaign Plan (TCP)</p>

**C. Acquisition Strategy:** A competitive cost type contract was awarded in August 2001 to Raytheon. Raytheon produced two (2) prototype systems in FY03. The existing contract has options for LRIP and FRP. Milestone C is planned for March 04.
