EXHIBIT R-2, RDT&E Budget Item Justification		DATE:	February 2004
APPROPRIATION/BUDGET ACTIVITY		R-1 ITEM NOMENCLATURE	
RESEARCH DEVELOPMENT TEST & EVALUATION, NAVY /BA-5		0605013N Information Technology Development	
<p>2901 This RDT&E Project supports, in part, Navy Secretariat staff level efforts in the areas of paperless acquisition and information technology, acquisition strategic planning and business management, and other acquisition reform areas such as knowledge management. In 1997, a Deputy Secretary of Defense directive was issued calling for paper-free acquisition processes by 1 January 2000. While the Department of the Navy has made significant strides toward this goal, additional capabilities and continued support are required. Effective, 1 October 2004, the ASN(RD&A) transferred this project to the Program Executive Officer (PEO) for Information Technology (IT).</p> <p>Increase in FY 2005 in support of DON's "Mid-Range Plan", which was designed to realize OSD's goal of achieving a clean audit of Defense Department financial statements.</p> <p>NCIS is the Department of Navy component with primary responsibility for law enforcement, counterintelligence, and security policy matters. NCIS has primary investigative and counterintelligence jurisdiction within the DON, and exclusive investigative jurisdiction in non-combat matters involving actual, potential, or suspected terrorism, sabotage, espionage, and subversive activities. Terrorist events in the recent past - including the bombing of the USS Cole and the September 11th attacks on the United States - have necessitated a concerted effort to improve NCIS' ability to fuse, analyze and disseminate terrorist threat information. A 3-month study identified critical deficiencies in the NCIS infrastructure which impact on the organization's ability to support the fleet. Significant weaknesses included an insufficient ability to pull, fuse and disseminate threat data; perform predictive analysis; and reliance on unsuitable equipment essential to mission performance. The study resulted in 11 discrete areas of concern. Specific aspects addressing RDT&E requirements within three of these portfolios (Multiple Threat Alert Center (MTAC), Data Modernization & Analytical Tools, and Threat Planner) are attached in Tab R-2a.</p> <p>2903 NAVAIR IT - Configuration Management Information System (CMIS) Program is DoD's standard software system for complete and integrated configuration management (CM) of weapon systems from acquisition to disposal. Funding is budgeted to support the services of rehosting and testing of COTS upgrades to ensure objective performance of CMIS is achieved. Naval Aviation Logistics Data Analysis Integrated Data Environment (NALDA IDE) provides a central Navy aviation logistics database and Management Information System (MIS) compliant with Computer Aided Logistics Support (CALS) and Defense Information Infrastructure Common Operating Environment (DIICOE) for making improved decisions affecting aircraft logistics acquisition, readiness, safety, configuration management, and logistics/engineering support for the CNO Air Warfare Division. Funding is budgeted to support the services of system migration from legacy systems into NALDA IDE.</p> <p>2904 This is not a new start. These funds were moved from O&M,N to RDT&E,N due to Congressional (HAC) direction and subsequent OUSD(C) guidance to adjust Information Technology (IT) budgeting. This program includes the funding for Information Technology (IT) support at NAVSEA HQ. This includes modifications/enhancements to IT systems within Headquarters such as Ships Configuration Logistics Support Information Systems (SCLSIS), Command Document Management System (CDMS) and Integrated Class Maintenance Plans (ICMP). The Task Force Web (TFW) is responsible for the development of the infrastructure needed for the Web Enabled Navy. The Web Enabled Navy is currently researching, developing and implementing a overall plan to web technologies to create integrated and transformational information exchange for the Navy. The goal is to better enhance the Navy's capability to perform combat/mission support in a fully mobile, joint environment for both deployable and non-deployable units. Through Web enabling technologies, Navy personnel will have the ability to tailor the information flow and information access to meet their requirements. This funding also supports modification to existing software, hardware changes, contractual program management and technical support to modify/enhance the NAVSEA HQ systems and infrastructure. The NAVSEA HQ network infrastructure architecture requires the development, analysis and testing of IT prototypes, such as Remote Access and Data Management. Also supported is software development and upgrades for IT systems and infrastructure, to include COTS software packages/systems; developmental testing and initial operational test and evaluation required prior to system acceptance/approval.</p>

<p>2905 This non-acquisition category program provides funds for continued (but less risky) R&D for broader application of advanced technologies to transition successful 6.3 research proof-of-concept demonstrations into operational use. Development of prototype systems to support and/or improve operational requirements of manpower and personnel sponsors is the primary goal of this Engineering Development Program. The 6.5 R&D Program features the use of a broad range of technologies from cognitive science and ability testing techniques, mathematical modeling and optimization, statistical and econometric forecasting, intelligent systems, data visualization, data mining, simulation, decision support systems, and new database and communications configuration.</p> <p>Electronic Military Personnel Record System (EMPRS) is an electronic document/image based system that serves as the repository for all Department of Navy (DoN) official military personnel record images. It supports retired, active, and reserve military personnel in the functional areas of selection board operations, casualty management, mobilization, and other military personnel management functions. EMPRS supports over 180 statutory and administrative selection boards annually providing over 12 million service record images, covering promotions, assignments, and retention. Additionally, it provides the Navy with the capability to meet the statutory requirement to maintain permanent personnel records for a period of 75 years. After 75 years, Navy permanent records are provided to National Archives and Records Administration and become public records. Current Acquisition Strategy is a two-phased approach to Technology Refresh (TR) EMPRS and achieve Milestone C designation, followed by actions to reengineer the system commencing with Business Process Reengineering (BPR). The TR system, which will achieve Milestone C, will result in the disposal of the legacy system and the beginning of sustainment on the new system. The reengineering system scope will be expanded to include data and image archival to support the N1 Architecture and Single Integrated Human Resource Strategy (SIHRS). EMPRS was authorized to commence TR in March 2003.</p> <p>2907 COMNAVRESFOR IT: Funding is provided to modernize legacy software programs (e.g., COBOL, FORTRAN, etc.) and flat-file databases with fourth-generation language software and relational database architectures. Web-enabling enhancements for several programs is provided.</p> <p>JALIS: This system provides an airlift data collection and analysis system for the purpose of airlift and aircraft management. JALIS supports the objectives and strategies presented in the DoD Transportation Corporate Information Management (CIM) Strategic Plan and Enterprise Integration (EI) Implementation Strategy as directed for DoD transportation management responsibilities in the USTRANSCOM Joint transportation CIM Center (JTCC) Abbreviated Integration Decision Paper (IDP) for the JALIS.</p> <p>NOW: This system will improve order writing capability for Active Duty Special Work (ADSW) recall and Presidential Selective Reserve Call-Up (PSRC) for unified and Fleet CINCSs and speed of Reservist response with timely receipt of orders and travel arrangements. Reserve retention will improve as Reservists can submit their own orders and check its status.</p> <p>TFMMS: This system is a classified system. It is the Navy's single authoritative source of activity data and military and civilian manpower data including requirements and end strength authorizations.</p> <p>3026 ERP Convergence - The Navy Converged ERP Program was developed in response to the need to transform Navy business practices as expressed by the Chief of Naval Operation's vision in Sea Power 21 and the OUSD (Comptroller) Business Management Modernization Program (BMMP). The charter of the Navy Converged ERP Program is to merge four existing pilots (SIGMA, SMART, NEMAS and CABRILLO) into a single system that will be implemented across the Navy enterprise to enable:</p> <ul style="list-style-type: none">- Coherent Fleet focus that will optimize logistics functions between afloat units and shore infrastructure- Reliable and timely financial and management information for effective decision making,- End-to-end product management and improved interoperability for standardized processes.

<p>3038 The DoN Electronic Business (eBusiness) Operations Office was established on 1 October 2000 to serve as a catalyst for implementing and integrating DON eBusiness efforts, and harnessing emerging uses of electronic business (both from within the whole of government as well as private industry), and making DON processes more efficient and effective. The Office provides a consistent and integrated management approach and facilitates the evolution to future technological solutions, a center of eBusiness innovation for the Navy and Marine Corps. The DON eBusiness Operations Office, as chartered by the Secretary of the Navy, is responsible for acting as the DON center for innovation as well as managing card programs and selected electronic transaction systems.</p> <p>3054 Navy Web Enabling: This effort supports VCNO initiative of 28 Aug 2000 directing all programs to move rapidly to a web-enabled environment. Web-enabling the Navy applications will allow afloat and ashore users to access the applications from any workstation with a web browser. This provides the foundation for synchronized data replication allowing labor intensive tasks to be moved ashore from ships and expeditionary units.</p> <p>9046 Maintenance Data Warehouse - The development of the Decision Knowledge Programming for Logistics Analysis and Technical Evaluation (DECKPLATE) program is the next generation data warehouse for aircraft maintenance, flight and usage data.</p> <p>9088 SPAWAR ITC Enterprise Management: Funding will be used to support enterprise level reengineering, systems migration and web enablement of Manpower and Personnel (M&P) legacy systems. This includes creation and integration into enterprise architectures, and preparing these systems for integration with the Defense Integrated Military Human Resources System (DIMHRS) platform and PeopleSoft architecture. Congressional adds were received in prior years. Program does not require follow-on funding and have no maintenance and sustainment requirements.</p> <p>9089 Long Distance Learning: The focus of the Workforce Learning Community project is to construct a Career Development System for the government civilian workforce. The Career Development System will provide individualized pathways for government employees to attain upward mobility in selected career paths. Deliverables for the project are an Organizational Assessment, Career Development System, and Job Task Analysis, including pathways to attain common KSTs and job-specific KSTs. Congressional adds were received in prior years. Program does not require follow-on funding and have no maintenance and sustainment requirements.</p> <p>9090 Total Fleet Support System - This project will provide the Shared Data and Real Time Knowledge Management elements of the Distance Support/Anchor Desk Program. This effort includes funding for Information Technology Development (ITD) support for the Distance Support (DS) integration focused on reducing Fleet support cost. This includes program management and technical support, enhancements and integration of ITD system, software, hardware changes, within the (DS) capabilities. It includes software development and upgrades for ITD systems and software, and COTS software.</p> <p>9253 Web Centric Network Warfare (WECAN): Congress appropriated funds to provide continued development of Web Centric ASW Net (WECAN). WECAN is a web based software tool for USW/ASW collaborative planning and execution based upon Commercial Off The Shelf (COTS) technologies and products that allows users to discuss immediate and tactical operational concerns such as vulnerability analysis, battle group coordination, and threat discussions.</p>

Multiple Threat Alert Center (MTAC): The Post Cole Secretary of the Navy Antiterrorism/Force Protection Task Force identified the need for NCIS to enhance the Multiple Threat Alert Center (MTAC). The MTAC provides key antiterrorism/force protection products in response to Fleet tasking and is critical to Fleet protection during the current Global War on Terrorism. This project provides funding for the development of an IT system to track the movement of NCIS special agents deployed in advance of DoN in-transit units. The ability to track and communicate with these agents is necessary in order to forward threat data to these forward deployed agents and to task them to respond to emerging threats. Funding is required for equipment and contractor support to modify COTS software. FY2004 \$400K Contractor systems engineering and software development staff (two man years) for development of "Agent Overwatch" system to track location and communications connectivity with worldwide deployed Special Agents. \$325K Hardware and software for Agent Overwatch capability. FY2005 \$2,088K Agent Overwatch Contract Support. Contractor support is required to provide support contractors for the IT and AV systems in the MTAC as well as hardware /software maintenance agreements. \$777K Agent Overwatch Hardware and Software. The hardware/software support for the MTAC is the maintenance, upgrade and lifecycle management of the computer workstations, network components, and audio/video systems. \$153K Agent Overwatch Training.

Data Modernization & Analytical Tools:
NCIS data collection, filtering, and analysis infrastructure is unable to handle the increased flow of terrorism investigative and threat reporting of the Post 9/11-Global War on Terrorism era. NCIS must revitalize its infrastructure and its data and investigation management capabilities to effectively counter current terrorist threats. The three main components of this portfolio investment are data modernization, knowledge management, and investigation management.

The FY04 effort is a 100% contractor based requirement to modernize legacy data collection and the integration of that data. Also included are equipment purchases to acquire the necessary storage capacity. Continuation of this contractor support at a reduced level will be required in the outyears to periodically update and enhance systems, as well as equipment improvements. The cost associated with Data Modernization and Analytical Tools include contractor support for the integration of legacy data as well as the integration of commercial-off-the-shelf (COTS) analytical tools/licenses for data analysis, correlation/collaboration, taxonomies/ontologies, evidence extraction, geo-coding of data, and data visualization. Additional hardware for processing and data storage will be required as data is collected and aggregated as well as the deployment of analytical tools. Training support will be required for government analysts and information technology personnel in the operation and maintenance of systems.

FY 2004

- \$1,117K Contractor Support - Electronic data collection and integration of all-source data from worldwide network of NCIS staff and collection sources.
- \$1,000K Modernization of legacy data collection and storage systems.
- \$1,000K Increased fusion and sharing of all-source data (law enforcement, DOD/military).
- \$770K Implementation of NCIS data storage and access systems for seamless and intuitive worldwide access; predominantly via web systems.
- \$513K Integrate commercial tools for analytical tasks.

FY2005

- \$1,200K Contract Support - Electronic data collection and integration of all-source data from worldwide network of NCIS staff and collection sources.

Threat Planner: The NCIS Threat Planner is a web-based push/pull intelligence product delivery system designed for use by operational commanders in the fleet. Some unified commands are experimenting with similar capabilities to deliver intelligence and security information. NCIS has also been coordinating with PACOM which is testing the Area Security Operations Command and Control (ASOCC) and Homeland Security Command and Control Systems. The concept of the NCIS Threat Planner was a result of these collaborations and the NCIS Modernization Study. The cost of the NCIS Threat Planner includes the use of contractors to develop a concept of operations, develop the system architecture and initial operating capability with a limited number of fleet users. Hardware and software costs include the procurement of both production and development servers as well as software licenses for database software, mapping software and other commercial web-based software. Additionally in the first year the development of a training program for Fleet users. \$625K Hardware and Software \$1,748K Contract Support for Design & Implementation \$271K Training

A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

The **Configuration Management Information System (CMIS) Program** is DoD's standard software system for complete and integrated configuration management (CM) of weapon systems from acquisition to disposal. CMIS efficiently manages all product structure data, including complex interrelationship between assemblies and subassemblies, technical documentation and the parts that comprise the item. CMIS is designed to manage and control configuration data to support the DoD business processes. Accurate, complete and accessible configuration data is critical to the successful operations of DoD weapon systems or tracked assets. Mission readiness, and operational capabilities are enhanced by CMIS, as instant consistent integrated configuration data is readily available to operators, maintainers and logistics personnel. This system is a CM tool available DoD wide to support all potential customers. CMIS provides users with a common database infrastructure to ensure compatibility, quality, and consistency of CM processes and provides configuration managers and analysts the validated CM information necessary for accurate maintenance, spare procurements, reliability and safety analysis, and mission readiness. Funding is budgeted to support the services of rehosting and testing of COTS upgrades to ensure objective performance of CMIS is achieved.

Naval Aviation Logistics Data Analysis Integrated Data Environment (NALDA IDE) provides a central Navy aviation logistics database and Management Information System (MIS) compliant with Computer Aided Logistics Support (CALS) and Defense Information Infrastructure Common Operating Environment (DII COE) for making improved decisions affecting aircraft logistics acquisition, readiness, safety, configuration management, and logistics/engineering support for the CNO Air Warfare Division. The Office of the Secretary of Defense (OSD) has certified NALDA as the central Naval Aviation upline Integrated Logistics Support (ILS) data system. NALDA currently provides users with critically needed data access and analysis of maintenance, operations, safety, supportability, and readiness information. Funding is budgeted to support the services of system migration from legacy systems into NALDA IDE, and for development of the NALDA IDE data warehouse.

(U) E. ACQUISITION STRATEGY:											
<p>The CMIS Program used Joint Logistics Systems Center (JLSC) funds to evolve CMIS to Software Release 5.0. At this point, in June 1998 CMIS was transferred to the Navy as executive agent and NAVAIR as program manager. Program Budget Decision 401 transferred joint funding from JLSC to NAVAIR to continue evolving CMIS. The CMIS Program Manager continues to evolve the program to keep pace with cost, Military Standards, and evolving commercial standards. Various contractors using competitively awarded contracts have supported the program. Currently, Intergraph Corporation is the CMIS integration contractor selected through a competitively awarded IDIQ contract.</p>

<p>A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:</p> <p>S2904 This is not a new start. These funds were moved from O&M,N to RDT&E,N due to Congressional (HAC) direction and subsequent OUSD(C) guidance to adjust Information Technology (IT) budgeting This program includes the funding for Information Technology (IT) support at NAVSEA HQ. This includes modifications/enhancements to IT systems within Headquarters such as Ships Configuration Logistics Support Information Systems (SCLSIS), Command Document Management System (CDMS) and Integrated Class Maintenance Plans (ICMP). The Task Force Web (TFW) is responsible for the development of the infrastructure needed for the Web Enabled Navy. The Web Enabled Navy is currently researching, developing and implementing a overall plan to web technologies to create integrated and transformational information exchange for the Navy. The goal is to better enhance the Navy's capability to perform combat/mission support in a fully mobile, joint environment for both deployable and non-deployable units. Through Web enabling technologies, Navy personnel will have the ability to tailor the information flow and information access to meet their requirements. This funding also supports modification to existing software, hardware changes, contractual program management and technical support to modify/enhance the NAVSEA HQ systems and infrastructure. The NAVSEA HQ network infrastructure architecture requires the development, analysis and testing of IT prototypes, such as Remote Access and Data Management. Also supported is software development and upgrades for IT systems and infrastructure, to include COTS software packages/systems; developmental testing and initial operational test and evaluation required prior to system acceptance/approval.</p> <p>S9090 Total Fleet Support System - This project will provide the Shared Data and Real Time Knowledge Management elements of the Distance Support/Anchor Desk Program. This effort includes funding for Information Technology Development (ITD) support for the Distance Support (DS) integration focused on reducing Fleet support cost. This includes program management and technical support, enhancements and integration of ITD system, software, hardware changes, within the (DS) capabilities. It includes software development and upgrades for ITD systems and software, and COTS software.</p> <p>S9258 Navy Readiness Response Center - Congressional Add funding provided to improve fleet support processes by reducing fleet workload and improving the shore support infrastructure. Specifically these funds will be used to assess Navy troubled systems and develop processes for assisting the fleet in expedient resolution of these systems.</p> <p>S9259 Conditioned Based Maintenance - Congressional Add funding provided to provide research and development efforts for pursuing Condition Based Maintenance (CBM) enabling technologies IAW processes emerging from commercial markets and develop those resources and procedures to transition these CBM enabling technology products into the maintenance and logistic processes and Fleet tools that are under the cognizance of the Navy Distance Support Program.</p> <p>S9409 Wireless Sensor Technologies - Congressional Add provided for research and development efforts for pursuing Wireless Sensor Technology as a Condition Based Maintenance (CBM) enabling technology in support of the Navy Distance Support program. The technology will be developed to meet DOD requirements for encryption of wirelessly transmitted data certified to FIPS 140-2 as well as support joint services interoperability encryption profiles.</p>

<p>A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Electronic Military Personnel Record System (EMPRS) is an electronic document/image based system that serves as the repository for all Department of Navy (DoN) official military personnel record images. It supports retired, active, and reserve military personnel in the functional areas of selection board operations, casualty management, mobilization, and other military personnel management functions. EMPRS supports over 180 statutory and administrative selection boards annually providing over 12 million service record images, covering promotions, assignments, and retention. Additionally, it provides the Navy with the capability to meet the statutory requirement to maintain permanent personnel records for a period of 75 years. After 75 years, Navy permanent records are provided to National Archives and Records Administration and become public records. Current Acquisition Strategy is a two-phased approach to Technology Refresh (TR) EMPRS and achieve Milestone C designation, followed by actions to reengineer the system commencing with Business Process Reengineering (BPR). The TR system, which will achieve Milestone C, will result in the disposal of the legacy system and the beginning of sustainment on the new system. The reengineering system scope will be expanded to include data and image archival to support the N1 Architecture and Single Integrated Human Resource Strategy (SIHRS). EMPRS was authorized to commence TR in March 2003.</p>

E. ACQUISITION STRATEGY:											
<p>The requirements imposed by the Department of Defense (DoD) Acquisition Management Framework guidelines and EMPRS Key Performance Parameters (KPPs) have not been satisfied to enable EMPRS to move to Acquisition Milestone C. Present EMPRS technology, both software and hardware, does not meet requirements for information assurance, system availability, reliability, interoperability, and maintainability. The EMPRS single step acquisition plan includes a Technology Refreshment (TR) of the current system using Commercial Off The Shelf (COTS) technology that will correct known deficiencies and enable EMPRS to move to Milestone C. The proposed TR project will also bring EMPRS in compliance with current directives and will support the Deputy Chief of Naval Operations, Manpower and Personnel (N1) Single Integrated Human Resources Strategy (SIHRS), and make it forward compatible with the Navy Marine Corps Intranet (NMCI) architecture. The technology refreshment will provide an integrated document storage and records management solution with system failover capability. EMPRS was authorized to commence TR in March 2003.</p>

A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: This non-acquisition category program provides funds for continued (but less risky) R&D for broader application of advanced technologies to transition successful 6.3 research proof-of-concept demonstrations into operational use. Development of prototype systems to support and/or improve operational requirements of manpower and personnel sponsors is the primary goal of this Engineering Development Program. The 6.5 R&D Program features the use of a broad range of technologies from cognitive science and ability testing techniques, mathematical modeling and optimization, statistical and econometric forecasting, intelligent systems, data visualization, data mining, simulation, decision support systems, and new database and communications configuration. * L1822 is included as part of the L2905 Budget Control

(U) A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

Funding is provided to modernize legacy software programs (e.g., COBOL, FORTRAN, etc.) and flat-file databases with fourth-generation language software and relational database architectures. Web-enabling enhancements for several programs is provided.

JALIS: This system provides an airlift data collection and analysis system for the purpose of airlift and aircraft management. JALIS supports the objectives and strategies presented in the DoD Transportation Corporate Information Management (CIM) Strategic Plan and Enterprise Integration (EI) Implementation Strategy as directed for DoD transportation management responsibilities in the USTRANSCOM Joint transportation CIM Center (JTCC) Abbreviated Integration Decision Paper (IDP) for the JALIS.

NOW: The New Order Writing (NOW) system will integrate order writing to reduce redundancy and eliminate discrepancies, with the potential for interfaces with systems within the Department of Navy (DoN) and the Department of Defense (DoD). NOW will replace the Reserve Financial Management System (RESFMS), Reserve Integrated Management System (Order Writing Module) (RIMS(OM)), and the Inactive Duty Training Travel (IDTT). The system will interfac with the Defense Travel System (DTS), Reserve Headquarter System (RHS), Reserve Integrated Management System (Financial Management (RIMS(FM)) and Travel Systems. The system will provide SELRES with timely receipt of orders and travel arrangements. Reserve retention will improve as Reservists can submit their own orders and check its status.

TFMMS: This system is a classified system. It is the Navy's single authoritative source of activity data and military and civilian manpower data including requirements and end strength authorizations.

AAUSN IT: This RDT&E Project supports, in part, Navy Secretariat staff level efforts in the areas of paperless acquisition and information technology, acquisition strategic planning and business management, and other acquisition reform areas such as knowledge management. In 1997, a Deputy Secretary of Defense directive was issued calling for paper-free acquisition processes by 1 January 2000. While the Department of the Navy has made significant strides toward this goal, additional capabilities and continued support are required. AAUSN IT functional transferred into 62907 in FY-04.

<p>FY 2003 ACCOMPLISHMENTS: JALIS: Continued development of a Web-enabled application for airlift data collection and analysis system. Development and operational testing began. NOW: Completed development and testing of a new order writing system. TFMMS: Developed short-and-long term computer models that will forecast Navy military and civilian manpower requirements while balancing fleet manning needs.</p> <p>FY 2004 PLANS: JALIS: Business process re-engineering incorporation into new software development. TFMMS: Continue to develop short-and-long term computer models that will forecast Navy military and civilian manpower requirements while balancing fleet manning needs.</p> <p>FY 2005 PLANS: JALIS: Continue software development. Development and operational testing will commence.</p> <p>FY 2004 - 2005 PLANS: AAUSN IT: Continue Assistant Secretary of the Navy Research, Development & Acquisition (ASN(RD&A) staff acquisition and business management improvements. This includes continuing the development of the business architecture for the Universal Interface integration of DoN financial and requirements systems to one another and to Standard Procurement System (SPS, the DoD mandated contract writing software), and for Purchase Request (PR) Builder interfaces/iterative development and WAWF.</p> <p>AAUSN IT functional transferred into 62907 in FY-04.</p>

A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

Converged ERP - The Navy Converged ERP Program was developed in response to the need to transform Navy business practices as expressed by the Chief of Naval Operation's vision in Sea Power 21 and the OUSD (Comptroller) Business Management Modernization Program (BMMP). The charter of the Navy Converged ERP Program is to merge four existing pilots (SIGMA, SMART, NEMAIS and CABRILLO) into a single system that will be implemented across the Navy enterprise to enable:

- Coherent Fleet focus that will optimize logistics functions between afloat units and shore infrastructure
- Reliable and timely financial and management information for effective decision making,
- End-to-end product management and improved interoperability for standardized processes.

<p>Converged ERP - The Navy plans to award a performance based contract for the design and testing of Global Template 1.0 on a sole source basis to BearingPoint. BearingPoint has entered into teaming agreements with IBM and EDS and intends to propose them as subcontractors to ensure knowledge capture from all ERP Pilots. The contract will be for the design, configuration, and testing of all functionality proposed for Global Template 1.0, including documentation of the business processes, configuration of the COTS product to Navy business processes, integration testing and certification, and support for independent third party testing and formal acceptance testing. Contract support services will be awarded competitively.</p>

A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: The R&D funding provided is specifically for the execution of proof of concept type initiatives which are submitted by personnel from across the Department of Navy. This Office is the enabler for the Department of Navy to be in alignment with the President's Management Agenda and effectively meet the transformation challenge. Success in FY01 and FY02 was significant. Mr Mark Forman, OMB's Associate Director for IT and eGovernment, visited this Office in April and found our efforts to be a model for not only DOD but the Federal Government as a whole. Several of the pilots executed in FY01 directly related to the eGovernment strategies OMB is currently focusing on. Those pilot solutions of interest were provided to OMB for potential exportability to Other Federal Agencies. Of particular interest was a solution focused on e authentication, another focused on management of geospatial products. In FY02 the Pilot Management Group executed a DOD/VA Integration project in direct alignment with the President's Management Agenda item #14, addressing seamless sharing of key medical information once personel transition from active duty to retirement. The DOD Deputy CIO was also briefed on the efforts of the Office and will visit this Office on 5 September, a very detailed briefing is planned for the day. It is the intent of the Office to continue the success of FY01 and 02 into FY03 and out providing continued opportunity for effective ebusiness solutions to be developed, deployed and shared across the Department reducing needless duplication and continuing to meet the requirements as set forth in the President's Management Agenda.

<p>Executed 18 pilot projects. Pilot project execution consists principally of proof of concept approach. An example of a successful pilot is the Naval Collaborative Engineering Environment, an initiative of ASN (RDA) Chief Engineer Office, will provide an interface between the Naval Force systems architectures repository and the Naval tool for Interoperability Risk Assessment (NTIRA). This effort will enable collaborative capabilities between RDA CHENG and the Commander Fleet Forces Command (CFFC) for information sharing, planning and coordination on suitability of force systems architectures and resolution of known interoperability issues.</p>

<p>Remarks: The funding provided is for purposes of executing proof of concept projects by the DON eBusiness Operations Office, Pilot Management Group. The pilot submission process is ongoing with application for submission available to all DON personnel via the DON eBusiness Operations Office website. Pilots are rated and ranked on an incremental basis throughout a given fiscal year. The FY02 funding resulted 22 pilot projects and the FY03 funding resulted in 18 projects using the available R&D funding. The projects range in organizations involved including the CNO's Office, NAVSEA, NAVAIR, Marine Corp as well as BUMED. The technologies pursued are as varied as the organizations including web based, scalable metrics displays, employing COTS used by commercial airlines to collect key flight data recorder information, testing use of multi media technology to provide job aids. A similar approach is planned FY04 and out. However, due to the nature of the program, the rapid prototyping, proof of concept approach the specific projects which will be executed are not known at this time. This pilot corpus is the means by which the Department of Navy executes the transformation effort, as set forth in the President's Management Agenda in an effective and efficient means. The number of projects executed by approximately 50%.</p>

<p>A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:</p> <p>This effort supports VCNO initiative of 28 Aug 2000 directing all programs to move rapidly to a web-enabled environment. Web-enabling the Navy applications will allow afloat and ashore users to access the applications from any workstation with a web browser. This provides the foundation for synchronized data replication allowing labor intensive tasks to be moved ashore from ships and expeditionary units.</p>

<p>A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:</p> <p>To keep pace with fast moving changes in the Navy's technology, education and training must be available at more than the traditional classroom setting. This effort enhances current distance learning technology by developing a more realistic setting for education and training. Most distance learning is a one-way stream confined by bandwidth and cost. This R&D effort will bring to the Navy a secure, cost-effective technology for the more realistic "give and take" experiences in the classroom.</p>

<p>A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:.</p> <p>This RDT&E Project is a continuation of activities of the National Institute for Systems Test and Productivity (NISTP) at the University of South Florida to implement recommendations of a Defense Science Board Task Force focused on improving acquisition of software-intensive systems. The goal is to create a research and development environment, in collaboration with industry and government, to evaluate and improve both systems test, productivity tools and techniques to provide meaningful expert support to Navy systems development projects. Section 804 of the Defense Authorization Act of 2003 called for software best practices to be sought, identified, collected, cataloged and ultimately applied across the armed services. NISTP is working to provide revamped contract incentives for more</p>

(U) PROGRAM ACCOMPLISHMENTS AND PLANS:				
1. FY 2003 ACCOMPLISHMENTS:				
<p>Developed End-to-End test tools and techniques for large-scale distributed systems based upon practical lessons learned from the Y2K effort in the Department of Defense including time critical evaluation support to the series of Navy FORCEnet Limited Objective Experiments and FORCEnet Sea Trials (These techniques grew to become a forerunner in developing applied evaluation techniques for Grid Automation.); developed and produced a working prototype software test capability to be used for a Navy Collaborative Engineering Environment (and subsequently for all of DoD) that utilizes combinations of computational intelligence tools and techniques to predict and optimize the number of test cases that should result in significant reductions in both cycle time and costs associated with testing Navy and other defense software (Applied theorem proving behavior for Navy Network Centric Warfare scenario design activities is a current focus for the tool.); delivered modular Software Test and Systems Engineering courses for DoN and other Defense Department use; development of a collection of relevant Harvard Business School style Case Studies; cross disciplinary initiatives to define metrics aimed at extending the engineering concept of Quality of Service (QOS) to a broader concept of Quality of Information (QOI) which takes both the context and meaning of content into consideration as serious metrics; and a state-of-the-art systems testing laboratory facilities and a test correlation database.</p>

A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

S9259 Conditioned Based Maintenance Enabling Technology – This is a new start. These funds have been provided to accelerate the Navy Distance Support (DS) Program's implementation of the DoD CBM Plus directive (ASN (RD&A) Memorandum "Condition Based Maintenance Plus Policy" on 27 January 2003) and the concurrent achievement of Sea Power 21 logistics and maintenance metrics in support of Fleet readiness and rapid constitution for Naval missions. This includes funding for the annual assessment of logistics and maintenance Information Technology (IT), the annual preparation and revision of the DS CBM+ Technology Roadmap, as well as, modifications and enhancements to ship and shore logistic and maintenance information systems and infrastructures. This funding supports modification to existing software, hardware changes, contractual program management and Navy organic technical support to modify/enhance the NAVSEA HQ and Naval Surface Warfare Center systems and infrastructure. The will require the development, analysis and testing of IT prototypes at contractor facilities, Land Based Test Facilities at NSWCCD Philadelphia and NSWC Crane, and aboard Navy ships. Also supported is software development and upgrades for IT systems and infrastructure, to include COTS software packages/systems; developmental testing and initial operational test, evaluation and certification required prior to system acceptance/approval.

E. ACQUISITION STRATEGY:										
<p>- The FOCUS II program is currently flight testing a WDM backbone network utilizing commercial off the shelf (COTS) components on the EA-6B. The RF portion of the system is being tested in the ICAP III laboratory at Pt. Mugu. Components developed under this effort will overcome the performance size and weight design deficiencies of commercial components to enable transition to the EA-18G in the 2008 timeframe.</p>

A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

FY04 funding has been provided through a Congressional Add to support maintenance data warehouse. The development of the Decision Knowledge Programming for Logistics Analysis and Technical Evaluation (DECKPLATE) program is the next generation data warehouse for aircraft maintenance, flight and usage data. It provides a web-based interface to a single source of information currently being stored in multiple NALDA systems. Through the use of analysis, query and reporting tools the user has the capabilities to effectively obtain readiness data in a near real-time environment, as well as, historical data for trend analysis and records reconstruction. DECKPLATE supports the mission of the warfighter who requires a single source of near real-time aviation data in which to base critical readiness decisions. This requires collecting data from authoritative sources into a data warehouse. Because the warfighter only needs to access one database, the time consuming task of collecting various pieces of data from various sources will be reduced and ultimately eliminated. This improves data quality, because it reduces the possibility of two systems providing identical data elements, but slightly different data. Data availability is improved through continuous near real-time feeds from the data sources, giving the warfighter the most current information to base decisions. In addition, this also accomplishes a reduction in legacy systems mandated by OPNAV.

<p>(U) A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:</p> <p>To keep pace with fast moving changes in the Navy's technology, education and training must be available at more than the traditional classroom setting. This effort enhances current distance learning technology by developing a more realistic setting for education and training. Most distance learning is a one-way stream confined by bandwidth and cost. This R&D effort will bring to the Navy a secure, cost-effective technology for the more realistic "give and take" experiences in the classroom.</p>
