A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION: Project 0164: Combat Systems Integration/Strike Force Interoperability: CNO MSG DTG 021648Z May 1998 assigned COMNAVSEASYSCOM (SEA 06) central responsibility for interoperability; directing the development of policy and architecture for Strike Force warfare systems engineering, implementation of a common warfare systems engineering process. Furthermore, SEA 06 provides top level direction and execution for certification and assessment which support capability and quality for ships and submarines. SEA 06 has responded with processes and tools to include: establishment of a force-level warfare systems engineering process, stewardship of the introduction of C5I modernization and improvement into the Fleet Response Plan (FRP) configuration management and certification process per FFC MSG DTG 032037Z May 04, and force-level interoperability assessment using the Distributed Engineering Plant (DEP) land-based testing tool. This project funds the core elements required to execute FFC direction. This project funds: Strike Force (SF) requirements engineering and analysis. SF configuration management through the Fleet Response Plan (FRP), shore based testing and Platform Integration Testing (PIT) certification of operational computer systems in a test environment similar to their ultimate shipboard operational environment, and Interoperability Assessments (IA) which is a prerequisite for operational Certification of the Strike Force configuration prior to deployment. Force Certification of deploying Strike Force configurations is accomplished through the utilization of the Navy's Distributed Engineering Plant (DEP), which provides operational configurations for all Naval combat systems located at multiple (15) Navy & Industry land-based sites located across the country and connected via ATM networking technology. The DEP provides the only opportunity for comprehensive interoperability testing of combat system and C4I configuration items prior to shipboard delivery for operational use in surface combatant platforms and battle group units. It is a Fleet Forces Command requirement that all Strike Forces undergo Interoperability Assessments (IA) in the DEP prior to deployment. Further, the DEP provides the mechanism to support the Navy's participation in the Joint Distributed Engineering Plant (JDEP) as well as the coalition forces through the Combined Forces Battle Laboratories (CFBL) to allow for assessments of both Joint and Coalition interoperability. Through the implementation of the Fleet Response Plan (FRP), the Navy has made considerable improvements in Naval Force Interoperability. Interoperability Assessemnts (IA) testing in the Distributed Engineering Plant, has identified recurring interoperability problems, which have then been prioritized into 21 main categories by Strike Group Commanders and their staffs. SEA 06 has prioritized possible interoperability fixes and coordinated with combat system managers to identify the fix path to resolve critical interoperability problems for near term fielding as an interim path to achieving the Navy's combat systems way ahead. DEPSECDEF Guidance issued in October 2001 directs the Services to resolve interoperability problems in legacy combat systems by FY08 and develop metrics to evaluate operational improvements associated to those corrections. In accordance with this direction, the Navy is implementing a plan to fund Common Network Interface (CNI) upgrades to existing legacy COTS hardware on Navy LHAs and develop common interoperable software compliant with the Navy's OA standards to integrate the data from ship's sensors, external links, and FORCEnet sources into an operational picture for the warfighter and an output to the legacy weapons control system.

**A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION (Continued):**

Project 0164 Combat Systems Integration/Strike Force Interoperability:

Additionally, this project funds Navy's implementation of improvements to specific combat systems as required to correct interoperability problems as necessary to achieve a Single Integrated Air Picture (SIAP). The Joint community has established guidelines for problem corrections, to be addressed in incremental Blocks designed to improve the SIAP. A SIAP is the product of fused, near-real-time and real-time data from multiple sensors to allow development of common, continuous, and unambiguous tracks of all airborne objects in the surveillance area. This effort is funded in PE 0603879N in FY05 and beyond.

Project 9356/9357/9527/9530/9531/9532: Directed Energy related efforts:  
These Congressional adds fund directed energy and electric weapons development efforts.

Project 9529: Context Adaptable Autonomous & Remote Unmanned System Operation:  
This Congressional add funds research of Advanced Undersea Vehicle (UUV) human/system interaction technologies.

<b>B. Accomplishments/Planned Program</b>				
<b>FRP</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	7.541	6.787	5.022	5.201
RDT&E Articles Quantity	N/A	N/A	N/A	N/A
<p>FY05: Continue execution of the FRP for all Strike Groups in the deployment cycle, including: SFAO efforts, SG Change Control Process, SG Capabilities and Limitations Report and Engineering assessments. Continue configuration management for all strike groups. Continue development of AMPS and Electronic Configuration Control Board (ECCB). In any given year, 25 + Strike Groups are being evaluated in some phase of the Fleet Response Plan (FRP), Over 27 Capabilities and Limitations Documents are delivered, and over 12000 configuration change requests are processed. FY06-11: AMPS and ECCB transition to OMN</p>				
<b>Platform Certification</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	11.508	12.441	9.459	9.658
RDT&E Articles Quantity	N/A	N/A	N/A	N/A
<p>FY 04: Conducted Platform Certification Integration Testing (PIT) of Advanced Combat Direction System (ACDS) Block-0, level 10.26.X, ACDS Block-1 2.1.9, Combat Direction System (CDS) level 12.X/13.X in CV/CVN, LSD, and LHD ship classes, SSDS MK-2, Mod 0, and Command and Control Processor (C2P) upgrade. Continued planning for out-year Platform Interoperability Testing (PIT) testing. FY05-07 plans include PIT testing of Ship Self Defense System (SSDS) MK-2 Mods 1-2 combat systems and associated elements for CVN/LHD/LHA/LPD ship classes and Test Bed Validation. Continue planning for out-year Platform Integration Testing (PIT) testing to include CVN 77, LCS, LPD 17, CVN 21, Open Architecture combat systems as well as integration of new combat system capabilities.</p>				
<b>Strike Force Interoperability Certification</b>	FY 04	FY 05	FY 06	FY 07

RDT&E Articles Quantity	N/A	N/A	N/A	N/A
<p>FY04: Conducted DEP testing and data analysis of complex computer program configurations necessary to characterize Strike Force. Interoperability of deploying forces. Carrier Strike Group (CSG) Force Interoperability testing (FIT) in FY 04 supported USS JOHN F. KENNEDY CSG; USS ABRAHAM LINCOLN CSG; USS JOHN C. STENNIS CSG; USS HARRY S. TRUMAN CSG; USS NIMITZ CSG; USS THEODORE ROOSEVELT CSG; USS GEORGE WASHINGTON CSG. Conducted Interoperability Systems Engineering Tests (ISETs) for root cause determination of key interoperability problems and in support of development of new force level combat system capability. In FY05, plans include conduct Interoperability Assessment (IA) testing for USS JOHN C.. STENNIS CSG'S FY07 deployment; USS EISENHOWER CSG; USS RONALD REAGAN CSG; and USS VINSON CSG's FY07 deployment. FY06-07 plans include Interoperability Assessments (IAs) for FY08 &amp; 09 deployers as well as collaborative system testing of strike force capabilities.</p>				
<b>DEP Engineering and Operations</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	10.365	10.866	7.047	6.229
RDT&E Articles Quantity	N/A	N/A	N/A	N/A
<p>Performs systems engineering, development, test, and assessment of developmental and deploying complex combat system baselines through the use of the Distributed Engineering Plant (DEP). Organize test requirements and develop test procedures assessing root-cause interoperability issues associated with complex computer program configurations for deploying strike force groups. Conduct systems engineering to identify simulation/stimulation requirements necessary to achieve required fidelity for DEP testing at Navy laboratory sites through specific System Engineering Event (SEE). In FY04, completed integration of the Open Architecture Test Facility (OATF) and Lockheed Martin. Evaluate network requirements for distributed test events, work with other Service R&amp;D laboratories to identify system and test requirements supporting evaluation of joint system interoperability and the development of open system architecture baselines. Funds critical technical activity in force interoperability necessary to support all user communities of this important land-based test capability. i.e. acquisition; fleet; and industry. FY05: Integrate the Ship Aviation Integration Lab (NAVAIR PAX). FY06-FY07: DEP Engineering requirements to support testing retained in RD TEN and Operations requirements transition to OMN.</p>

<b>B. Accomplishments/Planned Program (Cont.)</b>				
<b>Interoperability Fixes</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	12.944	1.721	1.976	0.000
RDT&E Articles Quantity	N/A	N/A	N/A	N/A
<p>There are currently 890 unresolved unique interoperability problems identified through Strike Force Interop. Testing (SFIT), Deploying Group System Interop. Testing (DGSIT), Navy Center for Tactical System Interop. (NCTSI), SSA, TEMP 801 testing, OIF, CLF/CPF lessons learned, and CEC Opeval that have been divided into 21 categories prioritized by the Fleet. Funding is dedicated to develop and implement interoperability fixes to combat systems, and to validate and certify completed fixes at the platform and Strike Force level through land-based testing. In accordance with DEPSECDEF Guidance of Oct 2001, interoperability problem corrections are evaluated according to their ability to improve the operational performance of deploying Strike Forces. For FY 04 deployers: USS JOHN F KENNEDY Strike Force received 130 fixes that resolve Fleet's top issues. Systems impacted in FY04 include C2P, ACDS Block 0, ACDS Block 1, FFG CDS, E2C, SGS/AC and AWS 6.3. An additional 26 fixes will be available to field in FY05 that capture system level interoperability fixes, lessons learned from Operation Iraqi Freedom, and coordinated multi-system solutions of strike force interoperability problems in CEC 2.1, SSDS, E2C, AWS 6.1.7, SGS/AC and C2P/CDLMS. FY2005 funds allow for completion of the FY2004 package with fielding available beginning May 2005. FY2006: funding supports analysis and assessment methodology to identify engineering changes required to correct interoperability at the system design phase.</p>				
<b>JDEP</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	4.703	4.876	4.960	4.950
RDT&E Articles Quantity	N/A	N/A	N/A	N/A
<p>Funds Navy participation in Joint Distributed Engineering Plant (JDEP) and related land-based test events and systems engineering activities. The Defense Planning Guidance (DPG) updated for FY 2002-2007 states: the JDEP program was established as a DoD-wide effort to link existing service and joint combat system engineering and test sites. The JDEP is the lead infrastructure used for the evaluation of coordinated, joint engineering events, which include the validation of next-generation algorithms implementing the Single Integrated Air Picture (SIAP). Funds support Navy participation in JDEP approved test events and test bed improvements needed to conduct testing. FY04 included modeling &amp; simulation improvements and JCHE Phase I. FY05 Events include Tri-Service Distributed Test Event, CAAD Phase IV, JCHE Phase II, Sea-Based BMD. FY06 JDEP to support initiatives in line with OSD Joint Testing Roadmap signed 12 November 2004.</p>				
<b>OA Automated Test and Re-Test</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	N/A	N/A	8.500	0.000
RDT&E Articles Quantity	N/A	N/A	N/A	N/A
<p>Open Architecture Automated Test and Re-Test Capability: Funds added to program to support software engineering upgrades to the Distributed Engineering Plant (DEP) Laboratories to enable rapid test and re-test of Open Architecture software modules and associated improvements. Funds are needed to permit the testing of the rapid and affordable introduction of new capabilities into future combat systems.</p>				
<b>REAGAN Strike Force Interoperability</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	7.219	N/A	0.000	0.000
RDT&E Articles Quantity	N/A	N/A	N/A	N/A
<p>The USS RONALD REAGAN (CVN 76), its associated combat system, and other Strike Group (SG) upgrades, is a complex convergence of multiple platforms, systems, and sub-systems. FY04 funds were focused on completing phases II and III of a 4 phase REAGAN Strike Group Team Strategy that supports (FRP). The phase II events were designed to characterize the performance of SPQ-9B and BFTT, advanced Detect to Engage (DTE), Strike Group I/O, Link 4A/11/16, Composite Surface Tracking, and Low/Slow Flyer. Phase III events were designed to demonstrate the performance of Advance DTE, Link 4A/11/16, complete missile firings, Strike Group Track Management and SG level reporting/weapons coordination. These combined efforts are critical to finalizing the delivery of a fully mission capable REAGAN Strike Group that is interoperable with the force. Without them critical Fleet Response Plan (FRP) milestones will not be possible, resulting in a National asset deploying without a thorough and accurate assessment of I/O performance.</p>

<div style="border: 1px solid black; padding: 5px;"> Completed documentation of phase I of Strike Force Interoperability requirements documentation. In FY05, intent is to develop additional scenarios to reflect updated Strike Force Interoperability engineering requirements necessary to respond to the Fleet Response Plan (FRP). Specifically, development of multi-mission strike scenarios and evaluation of interoperability performance by establishment of levels of operational performance and systems operability. Development of these standards will be essential to the evaluation of emerging combat system capabilities, such as Open Architecture. Continue to develop data sets that can be used to apply to quantifiable and measurable Strike </div>				
<b>CNI/OA Transformation Roadmap</b>	FY 04	FY 05	FY 06	FY 07

<div style="border: 1px solid black; padding: 5px;"> Funds are for SBIR Phase III efforts to develop Common Network Interface Capabilities for theater and air missile defense.  The Common Network Interface (CNI) is a Commercial Off-The-Shelf (COTS) open interface system designed to modernize C4I and Combat Systems (C5I) on ships not programmed to receive Open Architecture (OA) upgrades. CNI is an Open Architectural Situational Awareness "machine" providing the Joint Track Manager/OATM linkage to the ACDS Block 0 in LHA/LHD. CNI upgrades the existing legacy COTS hardware and common interoperable software compliant with the Navy's OA standards to integrate the data from ship's sensors, external links, and FORCENet sources into an operational picture for the warfighter and an output to the legacy weapons control system. These operational capability improvements are achieved in a cost effective manner by using the spiral development, "build-test-build" programmatic and processes pioneered by the Acoustics Rapid COTS Insertion (ARCI) and Advanced Processing Build (APB) processes which minimizes legacy system/subsystem technical disruption. CNI ensures the upgraded ships stay current with Navy Open Architecture and Joint interoperability requirements. </div>

### B. Accomplishments/Planned Program (Cont.)

<b>ALDA (Advanced Laser Diode Arrays):</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	2.054	1.485	0.000	0.000
RDT&E Articles Quantity	N/A	N/A	N/A	N/A

These funds were provided by Congressional Plus Up.

**ALDA (Advanced Laser Diode Arrays):** Proj #9356 FY04 (\$2,054K) The goal of the ALDA effort is the development of 100% Duty Cycle Diode packaging with advanced cooling, and its transition to automated assembly. Previous efforts addressed the cooling of pulsed large area laser diode pump arrays using conventional bulk flowing liquid technology. 100% Duty Cycle Diode arrays are required for all DoD DPSS HEL systems in the near (3-5 year) future. In FY05 (\$1,485K) **ALDA** funding was provided to increase the demonstrated percentage of the Duty Cycle Diode packaging.

<b>LIPC (Laser Induced Plasma Channeling)</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	3.284	12.478	0.000	0.000
RDT&E Articles Quantity	N/A	N/A	N/A	N/A

These funds were provided by Congressional Plus Up.

Proj #9357 FY04 (\$3,284K) Funds were used for engineering and demonstration of miniature lasers to determine the maximum extended range and resultant effects associated with this laser guided energy. In FY 05 (\$12,478K) LIPC funding was provided to increase the range of LIPC as demonstrated in FY04.

<b>Appl. of Novel Laser Sys. on Optical Seeker</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	0.000	0.991	0.000	0.000
RDT&E Articles Quantity	N/A	N/A	N/A	N/A

These funds were provided by Congressional Plus Up.

Proj #9527 FY 05 (\$991K) funding was provided to address the effects of ultra-short laser pulses on components of imaging (focal plane) and non-imaging (reticule) based optical seekers.

<b>High Energy Laser Application Effects</b>	FY 04	FY 05	FY 06	FY 07
Accomplishments/Effort/Subtotal Cost	0.000	1.684	0.000	0.000
RDT&E Articles Quantity	N/A	N/A	N/A	N/A

These funds were provided by Congressional Plus Up.

Proj #9530 FY05 (\$1,684K) funding provides the ability to obtain crucial data for defining laser weapon effects at defined wavelengths and secondarily, provides data for solving critical problems encountered in laser beam delivery in ship manufacturing applications.

**D. OTHER PROGRAM FUNDING SUMMARY:**

Related RDT&E: Computer programs developed under these programs are tested in their integrated configuration.

- PE 0204571N (Consolidated Training Systems Development)
- PE 0205620N (Surface ASW Combat System Technology)
- PE 0603382N (Advanced Combat System Technology)
- PE 0603755N (Ship Self Defense Dem/Val)
- PE 0603658N (Cooperative Engagement Capability)
- PE 0604307N (AEGIS Combat Systems Engineering)
- PE 0604755N (Ship Self Defense - EMD)
- PE 0604518N (CIC Conversion/Common Command and Decision)
- PE 0603879N (Single Integrated Air Picture)
- PE 0605853N (CHENG)
- PE 0603925N Directed Energy and Electric Weapon Systems

Related Procurement:

OPN 296000 (ICSTF/DEP: Integrated Combat System Test Facility/Distributed Engineering Plant)

FY2004	FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
\$8.6	\$4.6	\$4.4	\$4.5	\$4.7	\$4.8	\$4.9	\$5.1

**E. ACQUISITION STRATEGY:** Not Applicable

**F. MAJOR PERFORMERS:**

Naval Surface Warfare Center, Port Hueneme, CA - Platform Integration Integration Testing/Strike Force Interoperability effort.

Naval Surface Warfare Center, Dahlgren Division, VA - Distributed Engineering Plant (DEP), Strike Force Interoperability Requirements (SFIR), and Strike Force Interoperability Operational Advisory Group (SFI OAG) efforts.

General Dynamics - Advanced Information Systems (GD-AIS) Digital Systems Resources, Inc. (DSR), Fair Lakes, VA- Prime contractor for Common Network Interface (CNI).
