(U) A. MISSION DESCRIPTION AND BUDGET ITEM JUSTIFICATION:

- 1. Total Force Administration System (TFAS) (formerly HRDP) will be used by commanders, staffs and individual Marines (active, reserve, retired), conducting centralized and decentralized processing of payroll and personnel administration information. This centralized database assists decision-making by providing improved quality of life services to the Marines. TFAS will integrate and share information between the Marine Corps Total Force System (MCTFS) and other databases such as the Personnel Evaluation System and the Manpower Order Writing System.
- 2. Marine Corps Enterprise Information Technology Services (MCEITS) will provide an overarching portfolio of capabilities to deliver "Power to the Edge" for the Marine Corps. Born from an effort to establish a Continuity of Operations Plan (COOP) of HQMC Automated Information Systems (AIS), MCEITS will realign the existing USMC environment of applications, databases, networks, and facilities into an integrated architecture and programs to deliver new information technology capabilities based on a common infrastructure and shared services. MCEITS is a unifying framework of both the Net-Centric Enterprise Services (NCES) to be delivered, and the infrastructure and systems which must be deployed to enable delivery of those services. Initially it will encompass the Operational, Technical and Systems architectures of the garrison environment. However, ultimately it will extend to transform Command and Control (C2) both in garrison and in the deployed environment. Combined with policy, procedure and standards provided by HQ-USMC C4, it will allow us to finally achieve architectural standardization, consolidated management, and seamless interoperability of, and access to, the data residing in our currently fielded applications (business and tactical), and significantly reduce the complexity of future capabilities. MCEITS will provide the Marine Corps with the Information Technology tools that will allow for decision superiority now and in the future.
- 3. Defense Messaging System (DMS) is an OSD-mandated program that replaced the Automatic Digital Network (AUTODIN) in 30 September 2003. DMS expands writer-to-reader connectivity, support, and message security services. Organizations are able to create, edit, send, receive, read, and process organizational and individual messages, secured with end-to-end protection, direct from desktop terminals/personal computers in their workspaces. Future changes to DMS will provide message drafters and releasers a web interface and centralize the DMS functions including FORTEZZA security services.
- 4. Marine Corps Recruiting Information Support Systems (MCRISS) is an electronic based system to automate administrative procedures for the recruiting substation (RSS) recruiter. This customized automated system, centered around procedures in the Volume I, Guidebook for Recruiters, will dramatically improve efficiency and effectiveness in this area. Furthermore, Military Entrance Processing Command (MEPCOM) requires Marine Corps recruiting to provide information in electronic format only.
- 5. Models (formerly HRDP) is designed to manage acquisition of information technology capabilities for the modernization of processes supporting the lifecycle of Marines, from recruiting, accession, promotions, separations, retirements, performance evaluations. Efforts supported must include thorough review and analysis of business processes, re-engineering processes where technology can be leveraged for improvements. The funding in Models will provide the techical solution for process improvement, and will strategically align manpower systems/functional process modules with the C4 architecture.
- 6. Marine Corps Training, Exercise, and Employment Plan (MCTEEP) is a Windows-based, Marine Corps developed scheduling tool, identified in the Commandant's Planning Guidance (CPG) to standardize the "TEEP" process.
- 7. Ammunitions Budget Management System (ABMS) provides the Program Manager for Ammunition staff with the tools and functionality for the preparation of the budget submission, incorporating information sent to and received from the Joint Munitions Command (JMC) or any other contracting agency that is responsible for computing this data. The scope of this effort is to set forth the requirements and efforts for developing and testing revisions that will reduce the time and effort of budget submissions.

TFAS - The operational Data Store Enterprise (ODSE) will serve as the primary database for TFAS. The acquisition strategy is to leverage the evolutionary acquisition approach, whereby functionality is incrementally added as requirements are specified. As a systems integration effort, TFAS does not replace, but provides access to legacy systems. Access will provided to Marines at the appropriate level of authority to view, change and input selected information.

DMS: DMS is a Joint ACAT1AM program. It is ASD (C3I) - mandated. Each year Joint Inter-Operability Testing Center (JTIC) runs on Operational Test assessment on DMS software version, maintenance releases. The fund support Marine Corps Operations Test Activity (OTA). Marine Corps participation is vital to ensuring the Marine Corps implementation of DMS is interoperable with all DOD CINCs/Services/Agencies.

MCRISS: Development will remain consistent with established DOD, DON, and USMC standards and policies for interoperability, security and standardization. Capitalizing on centrally located data with secure web and wireless web enabled entry.

HRDP: In accordance with Clinger-Cohen Act, business process reviews are conducted to determine the optimal business case for enhancing the family of systems. Within the HRDP family of systems, there are programs designed to fulfill requirements defined by a broad range of stakeholders within the HRDP. Acquisition strategies are in place for each defined set of requirements. The HRDP Portfolio as a whole leverages evolutionary acquisition to incrementally fulfill these requirements while keeping an integrated technical architecture as the central focus. As such, concurrent design and development will occur with functional modules of the HRDP being designed while other blocks of functionality are in the implementation and fielding process.

MCEITS: Complete system design and evaluation; achieve Milestone C; complete installation of initial GIG ES application suites and conduct testing; achieve approval for full fielding (FY06); procure equipment for full network (FY06); complete upgrades of prototype installations to approved final design (FY07-08); establish all network nodes (FY07-08). Begin technology refreshment cycle (FY09-11). It is important to recognize that as this is a multi-layered approach, RDT&E will be required in FY06 to develop that application solutions for the GIG-ES. PMC execution is in support of the infrastructure layer, (COOP/DR/Network).

MCTEEP: Competitively award a cost plus fixed fee contract in 2nd qtr FY04. R&D component of this contract will be web enabling software upgrades to further develop the capabilities of the MCTEEP variant, the M. C. Database Management Tool.

(U) E. MAJOR PERFORMERS:

TFAS

- FY05 DFAS Kansas City, MO, Verification and validation testing of software; Dec 2004.
- FY06 DFAS Kansas City, MO, Verification and validation testing of software; Dec 2005.
- FY07 DFAS Kansas City, MO, Verification and validation testing of software; Dec 2006.

DMS

- FY04 MCOTEA. Quantico, VA, Operational Test and Evaluation and Developmental Test and Evaluation testing, 3.0 and DMDS testing, Jan 2004.

 Fort Huachuca, Az, TDMS, DMS, DMDS Joint Interoperability Certifications (JIC II) exercise, Dec 03.
- FY05 MCOTEA. Quantico, VA, Operational Test and Evaluation and Developmental Test and Evaluation testing, 3.1, Proxy Solution testing, Jan 2006. Fort Huachuca, Az, TDMS, DMS Joint Interoperability Certifications (JIC) exercise, Dec 04.
- FY06 MCOTEA. Quantico, VA, Operational Test and Evaluation and Developmental Test and Evaluation testing, 3.2, Proxy AMHS, DA testing, 01/06. Fort Huachuca, Az, TDMS, DMS Joint Interoperability Certifications (JIC) exercise, 01/06.
- FY07 MCOTEA. Quantico, VA, Operational Test and Evaluation and Developmental Test and Evaluation testing, NCES/DMS, Proxy testing, 12/06. Fort Huachuca, Az, TDMS, DMS, Proxy solution Joint Interoperability Certifications (JIC) exercise, 01/07.

MCRISS

- FY04 Federal Systems Integration and Management Center (FEDSIM), Falls Church, VA, Design and development of web enabling technologies for MCRISS-NCOIC, March 2004.
- FY05 Federal Systems Integration and Management Center (FEDSIM), Falls Church, VA, Design and development of web enabling technologies for MCRISS-NCOIC, Jan 2006.
- FY06 Federal Systems Integration and Management Center (FEDSIM), Falls Church, VA, Design and development of web enabling technologies for MCRISS-NCOIC, Jan 2007.

HRDP

FY04 - This line is under portfolio management. There are various Manpower programs that are being executed. Contracting information can be provided under separate cover as it is in various capacities.

MODELS

FY05 - DFAS Kansas City, MO, Technical integration; Jan 2005.

MCEITS

- FY06 This is a new start program. Contracting information will be determined at a later date.
- FY07 Contracting information will be determined at a later date.

MCTEEP

FY04 - This line is under portfolio management. There are various Manpower programs that are being executed. Contracting information can be provided under separate cover as it is in various capacities.
