Exhibit R-2, RDT&E Budget Item Justification: PB 2011 Air Force									DATE: February 2010		
APPROPRIATION/BUDGET ACTIVITY 3600: Research, Development, Test & Evaluation, Air Force BA 7: Operational Systems Development				R-1 ITEM NOMENCLATURE PE 0305221F: Network Centric Collaborative Targeting							
COST (\$ in Millions)	FY 2009 Actual	FY 2010 Estimate	FY 2011 Base Estimate	FY 2011 OCO Estimate	FY 2011 Total Estimate	FY 2012 Estimate	FY 2013 Estimate	FY 2014 Estimate	FY 2015 Estimate	Cost To Complete	Total Cost
Total Program Element	8.783	8.160	7.267	6.100	13.367	7.372	7.559	7.671	7.781	Continuing	Continuing
675197: Core Technology	8.783	8.160	7.267	6.100	13.367	7.372	7.559	7.671	7.781	Continuing	Continuing
Note FY 2011 funding totals include \$6.1M for the Overseas Contingency Operations (OCO) Supplemental Request to develop a Network Centric Collaborative Targeting (NCCT) Core Technology Ground Moving Target Indicator (GMTI) / Signals Intelligence (SIGINT) Correlator. A GMTI / SIGINT correlator for the NCCT fusion engine supports OCO real-time and forensic operations, accelerates High-Side (classified) message architecture to network OCO relevant sensor systems, and directly supports tactics, techniques and procedures (TTP) development for rapid operator use.											
A. Mission Description and Budget Item Justification Network Centric Collaborative Targeting (NCCT) is the Air Force program of record for net-centric collaborative intelligence, surveillance and reconnaissance (ISR) operations. NCCT is a networked application that uses machine-to-machine interfaces and Internet Protocol (IP) connectivity to horizontally integrate Battle Management (BM) / Command and Control (C2) / ISR assets and systems to provide timely detection, identification, and geo-location of time-sensitive and high priority targets to combatant commanders and their forces. NCCT develops and deploys the capability to automatically or manually cross-cue similar and dissimilar BM / C2 / ISR assets generating multi-source, multi-INT sensor-level data through coordinated sensor activity. This data is then rapidly correlated or fused and the results shared among the BM / C2 / ISR assets, systems and decision-making nodes. NCCT develops and refreshes software and hardware required for net-centric operations. NCCT supports Joint participant program offices with development and fielding of BM / C2 / ISR asset, system and decision-making node interfaces. Core Technology develops the hardware and software to horizontally integrate Joint and Coalition dissimilar BM / C2 / ISR assets and systems to include, but is not limited to RC-135 RIVET JOINT, C-130 SENIOR SCOUT, EC-130H COMPASS CALL, E-8C Joint Surveillance and Target Attack Radar System (JSTARS), U-2 / ASIP / Distributive Common Ground System (DCGS), Falconer Air and Space Operations Center (AOC), and national systems. Core Technology includes, but is not limited to, network management software, operator interfaces, standard network messages and formats, correlation software and data rules of interaction, NCCT multi-level security hardware and software items, and platform specific Platform Interface Modules (PIMs). Core Technology supports the Systems Integration Lab (SIL) used to test NCCT development, modification and PIM integration. This program is categorized as Budget Activity 7 because it provides for development of technologies in support of operational system development.

D. Acquisition Strategy											
The NCCT capability is maintained and baseline / incremental upgrades plus any quick reaction capabilities (QRC) developments are acquired through the 645th Aeronautical System Group (BIG SAFARI Program Office) in accordance with the BIG SAFARI Program Management Directive (PMD) and the BIG SAFARI Class Justification and Approval (J&A) document for acquisition of supplies and services using other than full and open competition criteria. The supplies and services procured by the 645th AESG under their J&A to satisfy National Security (FAR 6.302-6) or Unusual and Compelling Urgency (FAR 6.302-2) requirements are supported by the BIG SAFARI Life Cycle Management Plan (LCMP) across the full spectrum of system life cycle management from developmental engineering to system retirement ("cradle to grave" support). Due to the rapidly changing threat environment encountered during our prolonged commitment to Overseas Contingency Operations (OCO), the acquisition program manager has the authority to redirect funding as necessary to meet current stated and emerging Combatant Commander requirements.											
645th Aeronautical Systems Group (645 AESG) at Wright Patterson AFB OH, manages the Cost Plus Fixed Fee contract used to develop the NCCT Core Technology. 645th AESG will provide NCCT software and common hardware to systems and platforms designated to field this ISR capability. Individual program management offices may contract directly with their prime contractors or through the 645th AESG for integration of this ISR capability on their respective systems and platforms
