#### Note

Navy

This program element is a new start in FY 2012.

### A. Mission Description and Budget Item Justification

This element includes development of Aircraft Survivability equipment and Electronic Warfare/Countermeasures solutions for the United States Navy, United States Marine Corps and Coalition Aircraft to include studies and evaluations of current and future aircraft threats, Modeling and Simulation for improved countermeasure capabilities, and development and testing to address new and emerging threats.

B. Program Change Summary (\$ in Millions)	FY 2011	FY 2012	<b>FY 2013 Base</b>	<b>FY 2013 OCO</b>	FY 2013 Total

Project Unit 3308 Technology Development: Funds efforts that focus on the quick reaction prototyping of tactical Electronic Warfare (EW)/Countermeasures solutions for increased survivability providing friendly forces the self protection necessary for successful mission accomplishment. This program directly addresses the operational requirement of multiple airborne platforms (Strike and Assault) for optimization of EW/Countermeasure solutions across the Department of the Navy. Improved countermeasure capabilities and techniques through Modeling and Simulation, validated in subsequent field testing to address new and emerging threats, capitalize upon upgrades to Aircraft Survivability Equipment systems capabilities for Strike and Assault platforms and evaluate new Radio Frequency Countermeasure (RFCM) & Infra Red Countermeasure (IRCM) technologies.

Navy

### **D. Acquisition Strategy**

Quantity of RDT&E Articles

An EW study and vulnerability analysis will be conducted in FY 2012. The contractor and contract type will be determined as requirements evolve.

#### **E. Performance Metrics**

Successfully award a studies and analysis contract in FY 2012.

# A. Mission Description and Budget Item Justification

This project funds helicopter survivability evaluations of advanced Aircraft Survivability equipment for USMC, Navy, and Coalition Aircraft. The Missile Warning System (MWS), Laser Warning System (LWS), and Radar Warning Receiver (RWR) require periodic effectiveness and sustainability upgrades. Resources will be applied to the following areas:

- 1. Studies and Evaluations of current and future MWS/LWS/RWR Rotary aircraft threats.
- 2. MWS/LWS/RWR modeling techniques to support future hardware/software upgrades.
- 3. Evaluation of science and technology development programs in PMA-272 for transition into programs of record.
- 4. Evaluate sustainability enhancements as platforms migrate to Advanced Displays and Controls.
