<sup>\*</sup> FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

#### A. Mission Description and Budget Item Justification

The Community Data Center (CDC) researches, designs, builds, tests, demonstrates, and evaluates an innovative system to analyze a significant portion of the DoD's and partner network traffic for anomalous network behavior using unique techniques and processes. This unique analysis capability addresses the massive data overload associated with analyzing network traffic and raw data, and significantly improves the ability of the DoD to operate, defend, and protect its networks. The CDC research achieves the goal of operating, defending, and protecting the network, by using augmented and sessionized network traffic, non-traditional approaches, advanced IT algorithms, and the compiled expertise of cyber operators, analysts, investigators, and defenders to develop a near-real-time "top down" ability to view and analyze the network for the discovery, identification, and analysis of anomalous patterns of activity not humanly detectable, that could represent illegal or improper behavior, and are significant threats to the network.

## **Change Summary Explanation**

This funding supported Audit Management, Continuous Monitoring Risk Scoring and the CDC for preventing insider threat activities. The funding was used to construct the data integration, correlation, reduction, and analysis capabilities within the CDC supporting the audit event analysis and log aggregation as well as the Cross Domain Enterprise Solution defensive requirements.

### A. Mission Description and Budget Item Justification

The Community Data Center (CDC) researches, designs, builds, tests, demonstrates, and evaluates an innovative system to analyze a significant portion of the DoD's and partner network traffic for anomalous network behavior using unique techniques and processes. This unique analysis capability addresses the massive data overload associated with analyzing network traffic and raw data, and significantly improves the ability of the DoD to operate, defend, and protect its networks. The CDC research achieves the goal of operating, defending, and protecting the network, by using augmented and sessionized network traffic, non-traditional approaches, advanced IT algorithms, and the compiled expertise of cyber operators, analysts, investigators, and defenders to develop a near-real-time "top down" ability to view and analyze the network for the discovery, identification, and analysis of anomalous patterns of activity not humanly detectable, that could represent illegal or improper behavior, and are significant threats to the network.

B. Accomplishments/Planned Programs (\$ in Millions)	FY 2012	FY 2013	FY 2014
Title: Information Systems Security Program	5.248	0.000	0.000
Fy 2012 Accomplishments: Funding improved CDC, Audit Management and Continuous Monitoring Risk Scoring data aggregation and analytics to help reduce the risk of "insider threats". The funds designed and developed information exchange and system interfaces to existing data feeds, design, develop and implemented a capability for detecting pre-defined malicious insider activities performed by users or administrators in near real time by using attack patterns based on log and log like data.  Market research and an analysis of the current DISA tools revealed the current Audit Management tool could be modified to satisfy the requirements (to prevent insider threat activities). Steps to modify the tool were initiated by leveraging the existing contracts and tools.			
FY 2013 Plans: The decrease of -\$5.248 from FY 2012 to FY 2013 is due to one-time funding received in FY 2012.			
Accomplishments/Planned Programs Subtotals	5.248	0.000	0.000
