Note

The Joint Light Tactical Vehicle (JLTV) program, Project number 3209 is transitioning to BA 04 PE 0605812M beginning in FY 2013.

A. Mission Description and Budget Item Justification

This PE supports the demonstration and validation of Marine Corps Ground/Supporting Arms Systems for utilization in Marine Air-Ground Expeditionary Force amphibious operations. This program is funded under Demonstration & Validation because it develops and integrates hardware for experimental tests related to specific ground weapon system.

B. Program Change Summary (\$ in Millions)	FY 2012	FY 2013	FY 2014 Base	FY 2014 OCO	FY 2014 Total

# FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
## The FY 2014 OCO Request will be submitted at a later date												
A. Mission Description and Budget Item Justification												
The Anti-Armor Weapons System-Heavy (AAWS-H) program, working in concert with the U.S. Army, will develop and integrate technology improvements into the Improved Target Acquisition System (ITAS) to meet Increment II system requirements as jointly agreed. Improvements will center on integration of sight image enhancements, far-target location accuracy improvements, traversing unit upgrades/improvements, battlefield networking communications capability and a laser designation capability.												
B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)									FY 2012	FY 2013	FY 2014	
Title: Contractor conducted systems integration and qualification Articles:									0.638	0.570	0.587	
									0	0	0	
FY 2012 Accomplishments: Completed qualification of Saber far-target location accuracy improvements. Supported contractor development and qualification of Saber traversing unit improvements.												
FY 2013 Plans: Assess improvements to the Saber laser subsystem to integrate/upgrade and qualify a laser marking and/or designation capability for supporting arms missions.												
FY 2014 Plans: Assess improvements to the Saber system to integrate a battlefield network interface and integrate Target Detection upgrades.												
Title: Provide engineer and technical support Articles:												
FY 2012 Accomplishments: Provided continued Army program management office engineering and test support for the far-target location accuracy improvements and for the integration of traversing unit improvements.									0.297	0.269	0.274	
FY 2013 Plans:									0	0	0

# FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
## The FY 2014 OCO Request will be submitted at a later date												
A. Mission Description and Budget Item Justification												
Shoulder-Launched Multipurpose Assault Weapon II (SMAW II). Marine Expeditionary Forces will employ the Shoulder-Launched Multipurpose Assault Weapon II (SMAW II) across the spectrum of conflict, under all environmental conditions, to destroy a variety of ground targets. This requirement relates to The Concept for Future Military Operations on Urbanized Terrain, dated 25 July 1997, which requires Marine units to possess the capability to rapidly breach urban structures in order to facilitate and enhance their mobility in an urban environment. The SMAW II will support the Joint Operating Concept, Major Combat Operations via the Force Application Joint Functional Concept.												
The solution to the Follow-on-to-SMAW (FOTS) requirement is the SMAW II system. The mission of the SMAW II is to provide short-range assault fires in support of infantry forces attacking fortified positions and urban structures under all field and environmental conditions. This includes employment under Mission Oriented Protective Posture (MOPP) IV Level CBRN conditions. SMAW II will be developed in two distinct blocks. Block 1 of the SMAW II system consists of a new SMAW launcher, which will be physically and functionally compatible with all current SMAW ammunition variants, and a Multipurpose (MP) Fire-From-Enclosure (FFE) SMAW round. Block 2 of the SMAW II system will be the addition of a Wall Breaching (WB) FFE round and a Common Practice (CP) FFE round.												
During FY12, the development of Block 1 continued. During FY13, the Qualification of Block 1 will be completed and Low Rate Initial Production will commence. During FY13, the development of Block 2 will commence. During FY14, Pre-Full Rate Production of Block 1 will commence and the Qualification of Block 2 will be completed. In FY15, Full Rate Production of Block 1 FFE Round will continue.												
B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)									FY 2012	FY 2013	FY 2014

# FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
## The FY 2014 OCO Request will be submitted at a later date												
Note												
Twenty two prototypes, per vendor, awarded in FY12 and will be delivered in FY13. Additonal hardware requirements for Engineering and Manufacturing Development (EMD) include trailers, ballistic hulls, and kits (including armor).												
The FY11 NDAA directed the Services to separate the JLTV program into distinct program elements to provide Congress with increased transparency and allow for more effective oversight. Transition of funding from PE 0603635M to the new JLTV PE 0605812M is effective beginning in FY13.												
A. Mission Description and Budget Item Justification												
Funding supports the development and testing of the JLTV Family of Vehicles (FoV), which is a joint program between the Army and the Marine Corps. The JLTV goal is a FoV capable of performing multiple mission roles that will be designed to provide protected, sustained, networked mobility for personnel and payloads across the full Range of Military Operations. JLTV objectives include increased protection and performance over the current fleet; minimizing ownership costs by maximizing commonality, fuel efficiency, reliability; and maintaining effective competition, throughout the lifecycle. Commonality of components, maintenance procedures, training, etc., among vehicles is expected to be inherent in FoV solutions across mission variants to minimize total ownership cost. Unique service requirements have been minimized.												
B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)									FY 2012	FY 2013	FY 2014

B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)									FY 2012	FY 2013	FY 2014
Awarded multiple Engineering and Manufacturing Development (EMD) contracts to deliver JLTV Mission Role Variants and systems engineering activities in support of progression to MS B decision and RFP development.											
Title: GFE Procurement to Support Product Development and Testing Articles:									1.763 0	0.000	0.000
FY 2012 Accomplishments: Procured GFE items required to support EMD prototype integration efforts.											
Title: Test and Evaluation Events & Analysis Articles:									1.453 0	0.000	0.000
FY 2012 Accomplishments: Supported Milestone B preparations, prepared Test and Evaluation Master Plan (TEMP) as well as detailed test plans, and conduct coupon testing.											
Title: ILS and Facilities Documentation/Analysis and Support Engineering Articles:									0.640 0	0.000	0.000
FY 2012 Accomplishments: Continued the development of logistical documentation, supported Milestone (MS) B preparations, GFE management, and provided oversight to programmatic and contractual issues related to logistics.											
Title: Program Management Support Articles:									4.860 0	0.000	0.000
FY 2012 Accomplishments: Continued support of program operations and planning activities. Key events included source selection activities, EMD contract awards, and attainment of MS B.											
Accomplishments/Planned Programs Subtotals									45.138	0.000	0.000

APPROPRIATION/BUDGET ACTIVITY 1319: <i>Research, Development, Test & Evaluation, Navy</i> BA 4: <i>Advanced Component Development & Prototypes (ACD&P)</i>	R-1 ITEM NOMENCLATURE PE 0603635M: <i>Marine Corps Grnd Cmbt/</i> <i>Supt Sys</i>	PROJECT 3209: <i>Joint Light Tactical Vehicle</i>
<p><u>D. Acquisition Strategy</u></p> <p>JLTV is a Joint Services program with the U.S. Army and Marine Corps as the two main components. The Navy anticipates procuring JLTV vehicles upon successful Low Rate Initial Production (LRIP) testing.</p> <p>The program will use an evolutionary approach to deliver capabilities in increments based on program priorities. All technologies entering the current EMD phase shall be no less than Technology Readiness Level 6 to achieve Capabilities Development Document (CDD) requirements.</p> <p>Increment I will produce two Mission Role Variant (MRV) configurations (Combat Tactical Vehicle - CTV & Combat Support Vehicle - CSV) and four mission packages (General Purpose, Heavy Guns Carrier, Close Combat Weapons Carrier, and Utility). EMD vendors will fabricate representative mission packages from both MRVs, which the Government will fully test during EMD.</p> <p>Through a full and open competition, the program anticipates awarding up to three fixed price contracts for the EMD phase. Unless future market research identifies a valid non-EMD vendor capable of delivering the required capabilities, there will be a down-select from the EMD contractors to enter into the Production and Deployment phase. The down-select will result in a fixed price type contract with a base LRIP quantity, LRIP options, full rate production options, and a Technical Data Package option.</p> <p><u>E. Performance Metrics</u></p> <p>Milestone Reviews</p>
