^{##} The FY 2014 OCO Request will be submitted at a later date

A. Mission Description and Budget Item Justification

This program supports the conduct of critical planning, technology and capability insertion, and system acquisition in support of Air Force space control systems and associated command and control development to meet current and future military space control needs. This funding supports the acquisition process including concept development, risk reduction, design, and demonstration. Space control systems include both offensive counterspace (OCS) and defensive counterspace (DCS) systems. OCS systems include the means to disrupt, deny, degrade, or destroy an adversary's space systems, or the information they provide, which may be used for purposes hostile to U.S. national security interests. DCS systems include both active and passive measures to protect U.S. and friendly space related capabilities (satellites, communications links, and supporting ground systems) from enemy attack or interference. This includes development efforts to prevent adversarial ability to use U.S. space systems and services for purposes hostile to U.S. national security interests. Counterspace Command and Control (C2) supports the development of command and control and mission planning capabilities in support of the fielding and employment of counterspace systems. This program is in Budget Activity 5, System Development and Demonstration, because it is conducting demonstration, engineering and manufacturing development tasks aimed at meeting validated counterspace and space control requirements.

# FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
## The FY 2014 OCO Request will be submitted at a later date												
Note												
FY12: -\$1.246M for higher priority Department requirments												
A. Mission Description and Budget Item Justification												
This effort supports concept exploration and follow-on system development of mobile/transportable counter satellite communications capabilities in the area of Offensive Counterspace. Included are: architecture engineering, system hardware design and development, software design and integration, testing and procurement of capabilities to provide disruption of satellite communications signals in response to USSTRATCOM requirements. This program is in Budget Activity 5, System Development and Demonstration, because it is conducting demonstration, engineering and manufacturing development tasks aimed at meeting validated counterspace and space control requirements.												
B. Accomplishments/Planned Programs (\$ in Millions)									FY 2012	FY 2013	FY 2014	
Title: Counter Communications System (CCS) Pre-planned Product Improvement (P3I)									14.309	12.970	12.926	
Description: Develop, integrate, test and field the CCS Pre-planned Product Improvement (P3I) program.												
FY 2012 Accomplishments: Completed integration and test of Increment 1 of the CCS P3I (CCS 10.1). Developed the Increment 1 trainer. Began concept activities for the development of Increment 2.												
FY 2013 Plans: Continuing with the CCS P3I. Delivering the Increment 1 Trainer and beginning development of the Increment 2 capability.												
FY 2014 Plans: Continue development, integration and testing of Increment 2 of the Block 10 Pre-planned Product Improvement (P3I) program (CCS 10.2).												
Title: Program Management Administration									3.573	3.392	3.351

# FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
## The FY 2014 OCO Request will be submitted at a later date												
A. Mission Description and Budget Item Justification												
The RAIDRS project performs attack detection, geolocation, reporting, characterization and mission impact assessment for US owned, operated or used space systems. RAIDRS capabilities support the National Security Strategy of the United States. RAIDRS is focused on detecting, characterizing, geolocating and reporting satellite communications (SATCOM) radio frequency interference (RFI) using currently existing Commercial-Off-the-Shelf (COTS) and Government-Off-the-Shelf (GOTS) technology. The event information provided by RAIDRS will allow operators to identify possible interference against space capabilities and enable rapid employment of protective responses. This program is in Budget Activity 5, System Development and Demonstration, because it has passed Milestone B approval and is conducting engineering and manufacturing development tasks aimed at meeting validated requirements in preparation for deployment.												
B. Accomplishments/Planned Programs (\$ in Millions)										FY 2012	FY 2013	FY 2014
Title: RAIDRS										2.954	3.300	0.000
Description: Develop, integrate, test and field the Rapid Attack Identification Detection and Reporting System (RAIDRS). RAIDRS is a counterspace system designed to identify, characterize and locate interference to SATCOM communications capabilities.												
FY 2012 Accomplishments: Continued acceptance testing and Training system development. Completed Operational Test & Evaluation (OT&E) and began the Full Operational Capability (FOC) Trainer.												
FY 2013 Plans: Complete Full Operational Capability (FOC) trainer acceptance testing.												
Title: Program Management Administration (PMA)										1.196	1.577	0.000
Description: Provides program management support activities such as technical studies & analyses, systems engineering & integration, acquisition planning & milestone preparation, business case analyses, admin support and program office travel.												
FY 2012 Accomplishments:

# FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
## The FY 2014 OCO Request will be submitted at a later date												
A. Mission Description and Budget Item Justification												
This effort supports the development of command and control and mission planning capabilities in support of the fielding and employment of Counterspace Systems. It provides for the integration and development of collaborative tools to link deployable counterspace systems with Joint Warfighting C2 systems and to enable integrated planning and execution of the counterspace mission. Developed capabilities will be integrated into current and future command and control systems. This program will leverage the Joint Execution and Tasking System for Space (JETSS) effort in the development of C2 for future space control and counterspace mission capabilities. The activity to modify and prepare JETSS technology/capability for transition to JMS is planned to occur during Spiral V. This program is in Budget Activity 5, System Development and Demonstration, because it supports the engineering and manufacturing development of counterspace and space control systems.												
B. Accomplishments/Planned Programs (\$ in Millions)									FY 2012	FY 2013	FY 2014	
Title: Joint Execution and Tasking System for Space (JETSS)									6.039	6.607	6.691	
Description: Develop a Counterspace mission planning and command and control capability to support counterspace systems space control warfighter activities.												
FY 2012 Accomplishments: Completed development of JETSS Spiral 3 Future System Planning, Deployment Planner, Federated Query and Continuity of Operations (COOP) and deployment to the Joint Space Operations Center.												
FY 2013 Plans: Continuing JETSS development with Spiral 4 future system planning development and deployment to the JSPOC. Includes Command & Control Internet Service Provider (C2ISP), Text Chat Upgrade, Rapid Text Input and Thin Client Study.												
FY 2014 Plans: Continue JETSS development with Spiral 5, which includes a tech refresh, integration into Joint Space Operations Center (JSPOC) Missions System (JMS) Service Oriented Architecture (SOA) and future system planning.												
Title: Program Management Administration (PMA)									0.875	0.951	0.962

Remarks											
D. Acquisition Strategy											
All contracts will be awarded using competitive procedures to the maximum extent possible to acquire next generation capabilities through incremental acquisitions.											
E. Performance Metrics											
Please refer to the Performance Base Budget Overview Book for information on how Air Force resources are applied and how those resources are contributing to Air Force performance goals and most importantly, how they contribute to our mission.
