## A. Mission Description and Budget Item Justification

The Joint Information Operations Range (JIOR) is a closed-loop network that forms a live-fire range utilizing encrypted tunneling over existing networks to conduct training, testing, and experimentation in support of Information Operations (IO) Electronic Warfare (EW), Computer Network Attack (CNA)/Computer Network Defense (CND), and Cyberspace mission areas in a threat representative environment.

## Change Summary Explanation

FY 2013 was the first year TJS executed in PE 0303166J, Support to Information Operations Capability. Prior to FY 2013, USD(I) owned the funding and reported the information in their exhibits.

The increase in funding from FY 2014 to FY 2015 will support additional cyber events utilizing the Joint IO range as well as the deployment of tools to support faster reconfiguration and enhanced recording and playback.

<b>Description:</b> The Joint Information Operations Range (JIOR) is a closed-loop network that forms a live-fire range utilizing encrypted tunneling over existing networks to conduct training, testing, and experimentation in support of Information Operations (IO) Electronic Warfare (EW), Computer Network Attack (CNA)/Computer Network Defense (CND)), and Cyberspace mission areas in a threat representative environment.				
<b>FY 2013 Accomplishments:</b> (1) Expanded national DoD and Inter-Agency awareness and support regarding IO and cyber related activities. (2) Improved the threat representation and operational relevance of the network. (3) Improved the integration of Live, Virtual, and Constructive (LVC) simulations with other Joint training and testing communities and infrastructures. (4) Developed a long term JIOR infrastructure development, operation and sustainment management plan that supports the application of user resources allocated by JIOR stakeholders to support user activities, to include JIOR expansion and modernization and interoperability with National and DoD Cyber Ranges. (5) Improved capability to rapidly reset, regenerate, and adapt events. (6) Improved capability to provide timely assessment for evaluation. (7) Established cost-reimbursable funding construct.				
<b>FY 2014 Plans:</b> (1) Expand national DoD and Inter-Agency awareness and support regarding IO and cyber related activities (2) Improve the threat representation and operational relevance of the network (3) Improve the integration of LVC simulations with other Joint training and testing communities and infrastructures				
<b>FY 2015 Plans:</b> (1) Expand national DoD and Inter-Agency awareness and support regarding IO and cyber related activities (2) Improve the threat representation and operational relevance of the network (3) Improve the integration of LVC simulations with other Joint training and testing communities and infrastructures

<b>E. Acquisition Strategy</b> The Joint IO Range, under Joint Staff J7, manages the development and expansion of Joint IO Range capabilities to an increasing number of customers. Integration into the Joint Exercise program has allowed users to increase the use and capability of the range. Continued development of tools for the range will be required as adversarial capabilities improve.		
<b>F. Performance Metrics</b> Performance metrics are measured through internal management controls and external assessments. Performance metrics include, but are not limited to time, money, realism, and fidelity.
