A. Mission Description and Budget Item Justification

The AIM-9X Sidewinder short-range air-to-air missile is a long-term evolution of the AIM-9 series of fielded missiles. The AIM-9X missile program provides a launch and leave, air combat munition that uses passive infrared (IR) energy for acquisition and tracking of enemy aircraft and complements the Advanced Medium Range Airto-Air Missile (AMRAAM). Air superiority in the short range air-to-air missile arena is essential and includes first-shot, first-kill opportunity against an enemy employing IR countermeasures. The AIM-9X employs several components common with the AIM-9M (fuse, rocket motor, and warhead). Anti-Tamper features have been incorporated to protect improvements inherent in this design.

AIM-9X is a Post Milestone III, Acquisition Category 1C (ACAT 1C) joint-service program with Navy lead. AIM-9X Block I concluded in FY 2011 and all funding/quantity data in the documents are associated with Block II activities.

This budget line item will fund the development, test and integration of software updates to the missile, insensitive munitions improvements and aircraft platform integration, to ensure these capabilities perform in accordance with established requirements.

This program is in Budget Activity 7, Operational System Development because this budget activity includes development efforts to upgrade systems that have been fielded or have received approval for full rate production and anticipate production funding in the current or subsequent fiscal year.

FY14 reduction of -\$2.700M for Congressional directed reduction

C. Accomplishments/Planned Programs (\$ in Millions)	FY 2013	FY 2014	FY 2015
Title: Air Intercept Missile - 9X, Product Development	5.972	11.230	25.481
Description: Continuation of Primary Hardware Development/Pre-Planned Product Improvement efforts for the AIM-9X. Includes Systems Engineering/Program management, as well as associated Governmental and contractor support required to ensure AIM-9X missile integration with threshhold aircraft platforms. Includes efforts to redesign missile components in order to resolve Block II / Block III common component obsolescence, as well as to comply with the Insensitive Munitions (IM) requirements as established by Joint Requirements Oversight Council memo dated 11 February 2009.			
FY 2013 Accomplishments: Continued support of Block II integration and Operational Test (OT) anomaly resolution. Began Software Algorithm and Code Development on version 9.4 (v9.4) Block II missile software. Studied IM alternatives and risk reduction methods.			
FY 2014 Plans: Continue support of Block II integration and OT anomaly resolution. Continue development of v9.4 Block II software and integration efforts with threshold aircraft platforms including improvements associated with the F-15C/D suite 9 OFP to utilize full capability of the Block II missile. Continue study on IM alternatives and risk reduction methods.

Remarks

Congressional language directed the program to report as a missile procurement, starting in FY2002, and not as a missile modification.

E. Acquisition Strategy

In Jun 2011 the Milestone Decision Authority (MDA) established the AIM-9X Block II missile program for entry at Milestone C and Low Rate Initial Production (LRIP). The 2366 A/B certification and Acquisition Program Baseline for AIM-9X Block II was signed 23 Dec 2011 and the Block I program was terminated. The LRIP-1 (Lot 11) contract was awarded in Sep 2011, LRIP-2 (Lot 12) was awarded in Dec 2011 and LRIP-3 was awarded August 2013. Pending MDA approval the program will award LRIP-4 in FY 2014. Full Rate Production (FRP) decision is planned for FY 2015.

F. Performance Metrics

Please refer to the Performance Base Budget Overview Book for information on how Air Force resources are applied and how those resources are contributing to Air Force performance goals and most importantly, how they contribute to our mission.
