Note

The name of this PE has changed from Army Integrated Military Human Resources System (A-IMHRS) to Integrated Personnel and Pay System - Army (IPPS-A). IPPS-A more accurately identifies the program as the military personnel and pay solution for the Army.

The FY 2016 adjustment is due to IPPS-A Increment II obtaining a Milestone B decision requiring Army to fund the program to the the Army Cost Position.

A. Mission Description and Budget Item Justification

IPPS-A Increment I (Project HR5) and Increment II (Project ED9) are both designated Major Automated Information System (MAIS) programs.

The Integrated Personnel and Pay System - Army (IPPS-A) provides the Army with an integrated, multi-Component, personnel and pay system which streamlines Army Human Resources (HR), enhances the efficiency and accuracy of Army personnel and pay procedures, and supports Soldiers and their families. IPPS-A will subsume approximately 50 Army legacy systems across the Army, Army Reserve, and National Guard, into an integrated system. IPPS-A will be a web-based tool, available 24 hours a day, accessible to HR professionals, combatant commanders, personnel and pay managers, and other authorized users throughout the Army. IPPS-A addresses major deficiencies in the delivery of military personnel and pay services and also provides internal controls and audit procedures that prevent erroneous payments and loss of funds.

Note

IPPS-A Increment II is a designated Major Automation Information System (MAIS).

A. Mission Description and Budget Item Justification

B. Accomplishments/Planned Programs (\$ in Millions)

The Integrated Personnel and Pay System - Army (IPPS-A) Increment II will deliver fully integrated personnel and pay services for all Army Components, building on the trusted database delivered by the IPPS-A Increment I program. Increment II will be able to link the personnel and pay functions for all Army personnel, eliminating duplicate data entry, reducing complex system maintenance, and minimizing pay discrepancies. IPPS-A Increment II will account for status changes between Active, Reserve, and National Guard components to ensure accurate service time minimizing impact on individual pay, credit for service, and other benefits as well as enable disciplined human resource management.

D. Addeniphomicitor lamed Programs (4 in minions)	1 1 2014	1 1 2013	1 1 2010
Title: Analysis and Design, Development, and Integration of IPPS-A Increment II	-	68.434	136.011
Description: Funding is provided for the following efforts:			
FY 2015 Plans: IPPS-A obtained a Milestone B Decision on 19 December 2014, and authority to award Engineering, Manufacturing and			
Development contract for System Integration support. IPPS-A will begin System Requirements Review, System Functional Review and Integrated Baseline Review with the System Integrator to begin Preliminary Design Review for Increment II. Major activities will include Integrated Baseline Review and continue blueprinting efforts including determination of Authoritative Data Sources, preparation activities for the DISA migration, further Business Process Re-engineering (BPR) activities to take advantage of known capabilities within PeopleSoft Human Capital Management (HCM) 9.2, support for the MilPay transition, continue legacy system analysis with the Functional Proponent and system owners, define a more robust integrated development environment, develop PeopleSoft Training, and evaluating the Risk Management Framework.			
FY 2016 Plans: IPPS-A will complete the Primary Design Review and Critical Design Review for the entire Increment and begin the design, development, integration, and testing activities for Release 2.0. Release 2.0 activities include data call from legacy systems, data analysis, data cleansing, and data conversion; design and build out the system technical architecture for IPPS-A; and configure the Enterprise Resource Planning system against functional personnel specifications. IPPS-A will also initiate critical activities

Remarks

0308610A (OMA): Funding will be used for the operations and maintenance support of IPPS-A which includes civilian salaries, program office contractor support, travel and training for program office personnel, software license renewal, and Help Desk support.

B66706000 (OPA): Funding will be used for initial system implementation and fielding of IPPS-A, to include New Equipment Training (NET) as well as procurement of hardware and software which is required to build out the infrastructure of IPPS-A Data Centers.

D. Acquisition Strategy

and Pay System - Army (IPPS-A)

On September 8, 2009, the USD(AT&L) issued an Acquisition Decision Memorandum (ADM) directing the Services to develop Service-specific integrated personnel and pay systems (IPPSs). The ADM also directed the Services to use the DIMHRS IT Investment to the maximum extent practical to develop their IPPS system from a DoD program to a Service-specific program. As a result of this decision, on October 1, 2009, the DoD Business Transformation Agency (BTA) began to transition the work done on DIMHRS to the Services. The Army G-1 and Program Executive Office Enterprise Information Systems (PEO EIS) are partnered to develop the Integrated Personnel and Pay System - Army (IPPS-A), leveraging the IT investment to the maximum extent practical. This direction will ensure the system meets Army specific requirements while also feeding a planned DoD Enterprise Data Warehouse to satisfy joint Services and Office of the Secretary of Defense (OSD) information requirements. The Army will address personnel and pay management requirements by implementing a COTS Enterprise Resource Planning (ERP) product using the Oracle PeopleSoft software and building on the DIMHRS solution delivered by BTA.

The Army will employ a hybrid solution using ERP software and Agile Development to deliver integrated personnel and pay capabilities, capitalizing on the PeopleSoft product delivered by BTA as part of the DIMHRS program. The Army plans to use current Army upgraded PeopleSoft 9.2 ERP and Oracle 12c database capabilities, along with Application Technologies outside of the core ERP to meet user requirements.

Exhibit R-2A, RDT&E Project Justification: PB 2016 Army			Date: February 2015
Appropriation/Budget Activity 2040 / 5	R-1 Program Element (Number/Name) PE 0605018A I Integrated Personnel and Pay System-Army (IPPS-A)	- 3 (umber/Name) grated Personnel and Pay System 2

IPPS-A Increment II will be developed in accordance with DoDI 5000.02, Enclosure 12 requirements and will deliver full integrated personnel and pay services for all Army Components (Active, National Guard, and Reserve), building on the trusted database delivered by the IPPS-A Increment I program. IPPS-A Increment II will consist of four releases (Releases 2.0-5.0). Each release will build upon the previous release, providing pre-defined personnel and/or pay capabilities. IPPS-A will pursue a single MS B decision at the start of Increment II and a separate Authorization to Proceed (ATP) at the start of each subsequent release. Each release will also hold separate Preliminary and Critical Design Reviews prior to the start of development and test activities. The Increment II Full Deployment Decision is anticipated at the conclusion of Release 4.0 when the system will provide integrated personnel and pay capabilities.

Release 2.0 - SIDPERS Functionality Only - Release 2.0, begins in FY15 and delivers capability in FY18, building upon Increment I capabilities and provide the functionality from Peoplesoft necessary to subsume the SIDPERS system for all ARNG locations. End-to-end Business Process development considerations will be evaluated to support various HR activities to include, but not be limited to, promotions/demotions, training requirements, member benefits, duty status, and unit level manning.

Release 3.0 - Accountability and Essential Personnel Services - Release 3.0, begins in FY16 and delivers capability in FY19, supporting accountability and essential personnel services necessary to subsume numerous legacy field systems including eMILPO and TAPDB-R. IPPS-A will establish a consolidated system that provides accountability of Soldiers and tracking of all personnel to include deployed Soldiers. It will allow Commanders in the field to access timely, accurate, and standardized personnel data for Soldiers in all components and provide a basic means to identify Soldiers who should be on the payroll. In addition to delivering most of the functions required to establish an Army-wide HR system, Release 3.0 will bring HR payroll drivers on board to enhance accuracy of pay, credit for service, and benefits. IPPS-A will serve as the authoritative data source for all personnel within the system.

Release 4.0 - Pay Services - Release 4.0, begins in FY17 and delivers capability in FY19, focusing on pay services and building upon Releases 2.0 and 3.0 to provide the basis for the fully integrated personnel and pay system. IPPS-A will incorporate pay functionality to include, but not be limited to, base pay, taxes, allowances, bonuses, allotments and leave. At deployment, Release 4.0 will serve as the authoritative data source for all personnel and pay transactions within IPPS-A and will be able to produce initial data in support of the Army's audit readiness goals.

Release 5.0 - Personnel Services - Release 5.0, begins in FY18 and delivers capability in FY20, focusing on the personnel services not yet addressed by the previous releases. Specifically, it will incorporate remaining functions related to record evaluation and retention management, along with some predominant manual activities.

Note

IPPS-A Increment I is a designated Major Automation Information System (MAIS).

A. Mission Description and Budget Item Justification

B. Accomplishments/Planned Programs (\$ in Millions)

The Integrated Personnel and Pay System - Army (IPPS-A) Increment I will provide a single, multi-Component trusted database with a single record for all Army Soldiers, and serve as a trusted data source for personnel and human resources data for the entire Army. Increment I will provide Soldiers with 24/7, web-based access to their personnel data from a single source, enabling them to better manage their careers and ensure accuracy of information through generation of new multi-Component reports, including a Soldier Record Brief. Overall, IPPS-A Increment I will provide three capabilities not currently available within the Army: consolidation of personnel data from all Components into a single, trusted source, enhanced visibility of personnel across all Components, and a Soldier Record Brief for all Army Component Soldiers (Active, Guard and Reserve).

217 to complete management (a minimum)	1 1 2017	1 1 2010	1 1 2010
Title: Analysis and Design, Development, and Integration of IPPS-A	34.400	-	-
Description: No RDT&E Funding is requested for Increment I FY16. IPPS-A is expected to achieve official Full Deployment during FY15 and start sustainment.			
FY 2014 Accomplishments: IPPS-A Obtained a MS C in Feb 2014 and a Full Deployment Decision in April 2014. IPPS-A Increment I critical activities include loading and testing all Army Components (Active, National Guard, and Reserve) data in three waves and meets the established Full Deployment Decision exit criteria for full deployment, which is anticipated in Q2 FY2015. IPPS-A is also working the Increment II blueprinting and acquisition documentation requirements supporting a MS B decision. Major activities include: development of regulatory and statutory acquisition documentation to support Increment II Milestone B Decision; award the Increment II System Development and Integration Services contract; continue blueprinting efforts including determination of Authoritative Data Sources, preparation activities for the DISA migration, further Business Process Re-engineering (BPR) activities to take advantage of known capabilities within PeopleSoft Human Capital Management (HCM) 9.2, support for the MilPay transition, continue legacy system analysis with the Functional Proponent and system owners, define a more robust integrated development environment, develop PeopleSoft Training, and evaluating the Risk Management Framework.

Remarks

0308610A (OMA): Funding will be used for the operations and maintenance support of IPPS-A which includes civilian salaries, program office contractor support, travel and training for program office personnel, hosting service for primary and secondary data center, software license renewal, and Help Desk support.

D. Acquisition Strategy

Pay System - Army (IPPS-A)

On September 8, 2009, the USD(AT&L) issued an Acquisition Decision Memorandum (ADM) directing the Services to develop Service-specific integrated personnel and pay systems (IPPSs). The ADM also directed the Services to use the DIMHRS IT Investment to the maximum extent practical to develop their IPPS system from a DoD program to a Service-specific program. As a result of this decision, on October 1, 2009, the DoD Business Transformation Agency (BTA) began to transition the work done on DIMHRS to the Services. The Army G-1 and Program Executive Office Enterprise Information Systems (PEO EIS) are partnered to develop the Integrated Personnel and Pay System - Army (IPPS-A), leveraging the IT investment to the maximum extent practical. This new direction for the program will ensure the system meets Army specific requirements while also feeding a planned DoD Enterprise Data Warehouse to satisfy joint Services and Office of the Secretary of Defense (OSD) information requirements. The Army will address personnel and pay management requirements by implementing a COTS Enterprise Resource Planning (ERP) product using the Oracle PeopleSoft software and building on the DIMHRS solution delivered by BTA.

The Army will employ a hybrid solution using ERP software and Agile Development to deliver integrated personnel and pay capabilities, capitalizing on the PeopleSoft product delivered by BTA as part of the DIMHRS program. The Army plans to use current Army upgraded PeopleSoft 9.1 ERP and Oracle 11g database capabilities, along with Application Technologies outside of the core ERP to meet user requirements.

IPPS-A will be developed in two Increments with multiple releases. The Army will follow the new DoDI 5000.02 Defense Acquisition Program Model 3 dated 26 Nov 2013 to develop each release with the goal of fielding capabilities every year. Increment I will provide a multi-component Trusted Database with single record for all Army Soldiers. Fielding of Increment I will lay the foundation for the authoritative database in Increment II and will allow for development of Increment II functionalities. Increment I will build out the infrastructure to provide Increment II with the ability to support all three Army components with accurate and timely data needed to track the movement of Active, Reserve, and National Guard personnel from location to location in support of operational requirements. On July 29, 2011, the Deputy Chief Management Officer (DCMO) granted an ADM for IPPS-A Increment I to enter the Engineering and Manufacturing Development (EMD) phase of the acquisition lifecycle.

Increment I will deliver a Trusted Database with reporting capabilities. The Army Obtained a MS C in Feb 2014 and a Full Deployment Decision (FDD) in April 2014 and is on-track to achieve Full Deployment (FD) in Q2 FY2015.
