A. Mission Description and Budget Item Justification

Defense Logistics Agency's (DLA's) ability to deliver Americans the right logistics solution in every transaction requires more than successful management of the Department's wholesale supplies and suppliers. It requires supply chain excellence. Our military's ability to generate and sustain combat readiness indefinitely, anywhere on the globe requires that DLA-managed materiel flow seamlessly and as needed from the nation's industrial base to where it is ultimately used.

DLA's Small Business Innovative Research (SBIR) program seeks to solicit high-risk research and development proposals from the small business community. All selections shall demonstrate and involve a degree of technical risk where the technical feasibility of the proposed work has not been fully established. Phase I proposals should demonstrate the feasibility of the proposed technology and the merit of a Phase II for a prototype or at least a proof-of-concept demonstration. Phase II selections will be strongly influenced on future market possibilities and commercialization potential demonstrated.

A. Mission Description and Budget Item Justification

This project explores innovative concepts pursuant to Public Law 106-554 (Small Business Reauthorization Act of 2000) and Public Law 107-50 (Small Business Technology Transfer Program Reauthorization Act of 2001), which mandates a two-phase competition for small businesses with innovative technologies with a defense application as well as a commercial value. The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs will develop new dual-use technologies for possible future Defense Logistics Agency (DLA) needs. Dual-use means the technologies will be judged on their potential for future private sector investment both as a vehicle for reducing development time and cost, unit costs of new DLA technologies, and as a route to national economic growth through new commercial products. DLA will conduct the competition as well as award and manage the contracts.

The Defense Logistics Agency's SBIR/STTR investments are divided into multiple Research Areas identified from within three DLA Elements:

J3 R&D

- Advanced Battery Manufacturing (BATTNET):
- Advanced Castings and Forgings (PRO-Fast):
- Anti Counterfeiting:

J6 R&D

- TBD

DMFA

- TBD

B. Accomplishments/Planned Programs (\$ in Millions)	FY 2014	FY 2015	FY 2016	
Title: SBIR Accomplishments/Plans	5.829	-	-	
FY 2014 Accomplishments: - Continued the execution of the active Phase I and Phase II SBIR Projects, and selected eight new Phase I proposals in FY 14. The SBIR program included the BATTNET topic in the DOD-wide 2014.2 Broad Agency Announcement. Three Phase I Options were executed in FY14, providing the opportunity to compete for Phase II awards in FY2015. FY 2015 Plans:				
FT ZU13 FIGHTS.

Remarks

D. Acquisition Strategy

The SBIR acquisition process seeks to match projects with DLA's Strategic Focus Areas. The goal is to align SBIR/STTR developed technology with current and future DLA requirements. All new project execution work is solicited through the DoD SBIR Broad Agency Announcement (BAA). There are three separate solicitation periods throughout each year.

E. Performance Metrics

SBIR /STTR programs measure performance in two separate metrics

- First in terms of progression from Phasel to Phase II, to Phase III. Each successive progression is deamed a success. DLA Seeks to have a 50% progression from one Phase to the next as a minimum.
- Second in terms of the congressional definition of "commercialization," as defined by Office of Secretary of Defense Office of Small Business Programs (OSD/OSBP) Re-Authorization Policy Directive:
- -- (Investment) The process of developing products, processes, technologies, or services; and/or
- -- (Sales) The production and delivery (whether by the originating party or by others) of products, processes, technologies, or services for sale to or use by the Federal Government or commercial markets.

The Small Business Administration and OSD/OSBP assign a Commercialization Index based on progression within the Phases and reported successes
