## Description:

ORDNANCE SUPPORT EQUIPMENT provides funds for the procurement of equipment, material and Ordnance Alterations to improve combat effectiveness and logistic supportability for gun and mission planning systems, and ancillary support equipment.

P40A - 1/ The Naval Fires Control System (NFCS) is an automated mission planning and coordination system for the Naval Surface Fire Support (NSFS) System. It automates shipboard land attack battle management duties to be interoperable and consistent with joint C4ISR systems. The system significantly improves the Navy's ability to support forces ashore. These improvements provide enhanced capabilities and reduce total ownership costs by improving reliability and supportability of in-service systems. This system also reduces manning requirements for Naval Surface Fire Support missions.

[P40A - 2 / NV039 Night Vision Devices]: Procures new Night Vision Devices (NVD) for ships and shore sites. Provides replacement of NVD and NVD Test Equipment.

[P40A - 2 / NV051 OSS Production Improvement]: Procures various Product Improvements for MK46 Optical Sight Systems (OSS)/MK20 Electro-Optical Sight System (EOSS) on DDG 51 and CG 47 Class ships. The Optical Sight System (OSS) is an integral element of the MK 34 Gun Weapon System. These improvements provide enhanced force protection capabilities, improve availability to address increase in Fleet underway operations, and reduce total ownership costs by improved reliability and supportability of in-service equipment systems. System and component improvements include: Mod 0 Technical Refresh, upgrade of Daylight Imaging Sensor (DIS) Field of View, system power supplies, Mod 0 console / monitor upgrade, system obsolescence replacement and component level product improvements.

| <b>Description:</b><br>The Naval Fires Control System (NFCS) is an automated mission planning and coordination system for the Naval Surface Fire Support (NSFS) System. It automates shipboard land attack battle management duties to be interoperable and consistent with joint C4ISR systems. The system significantly improves the Navy's ability to support forces ashore. These improvements provide enhanced capabilities and reduce total ownership costs by improving reliability and supportability of in-service systems. |                    |                |                                           |                     |                    |                      |                                                                        |                                        |                |                            |                    |               |

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

## Description:

This program provides for the procurement of equipment, materials and Ordnance Alterations (ORDALTs) to improve combat effectiveness and maintain logistic supportability of Gun Computer System (GCS) and Optical Sight Systems (OSS) and procures Night Vision devices.

[P40A / NV039 Night Vision Devices]: Procures new Night Vision Devices (NVD) for ships and shore sites. Provides replacement of NVD and NVD Test Equipment.

[P40A / NV051 OSS Production Improvement]: Procures various Product Improvements for MK46 Optical Sight Systems (OSS)/MK20 Electro-Optical Sight System (EOSS) on DDG 51 and CG 47 Class ships. The Optical Sight System (OSS) is an integral element of the MK 34 Gun Weapon System. These improvements provide enhanced force protection capabilities, improve availability to address increase in Fleet underway operations, and reduce total ownership costs by improved reliability and supportability of in-service equipment systems. System and component improvements include: Mod 0 Technical Refresh, upgrade of Daylight Imaging Sensor (DIS) Field of View, system power supplies, Mod 0 console / monitor upgrade, system obsolescence replacement and component level product improvements.

| Flyaway Unit Cost (\$ in Dollars)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | -           | -       | -                                  | -            | -           | -             | -                                                                      | -                               | -       | -       | -           | -          |
| Gross/Weapon System Unit Cost (\$ in Dollars)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | -           | -       | -                                  | -            | -           | -             | -                                                                      | -                               | -       | -       | -           | -          |
| Description:<br>Ship Missile Support Equipment provides procurement and installation support to address fleet requirements for AEGIS Weapons System, Ships Self Defense System (SSDS), Vertical Launch System (VLS), NATO Seasparrow, Rolling Air Missile System (RAMS) Guided Missile Launcher System (GMLS), and Anti-Ship Missile Decoy System NULKA.<br><br>[P40A / NATO SEASPARROW]: The NATO SEASPARROW Surface Missile System (NSSMS) is a shipboard Self-Defense Missile System. In addition to the standard mission of Anti-Air and Anti-Surface Defense (AAW, ASUW), NSSMS is designed to protect ship and crew from a variety of inbound threats, including Anti-Ship Cruise Missiles (ASCM), Fast Attack Craft/Fast Inshore Attack Craft (FAC/FIAC), Low Velocity Air Threats (LVAT), and a wide range of asymmetrical threats (e.g. Unmanned Aerial and Surface vehicles, small Rigid Hull Inflatable Boats, etc).<br><br>Primary operations consist of acquiring targets either manually using radar search or Electro Optic/Infrared capability, or automatically via external or internal designations, generation of fire-control quality track data for engage ability determination, launcher control and missile initialization, queuing of other weapons (e.g. Rolling Airframe Missile) via the Ship Self Defense System (SSDS) or AN/SWY 3/5 Combat System, RIM-7H/M/P SEASPARROW missile and RIM-162D Evolved SEASPARROW Missile (ESSM) firing, target illumination for Missile Guidance and Visual Kill/Survive and Battle Damage Assessments.<br><br>NSSMS provides manual or fully automatic operation with provisions for operator intervention or override from the time of target designation to missile away. The legacy NSSMS configuration consists of Fire Control and Launcher Systems comprised of 2-4 Directors, a distributed computing network, Transmitter Group, 3-5 Operating Consoles, and 1-2 Eight-Cell missile Launchers which employ the surface launch variant of the Sparrow and ESSM. The RIM-7 and RIM-162 missiles use semi- active guidance with target illumination provided by the shipboard MK 9/95 fire control systems. NSSMS MK 57 Mods 12 and higher (ESSM capable) are integrated with the SSDS and become part of the SSDS MK 2 Combat System on CVN 68, LHA 6 and LHD 7-8 class ships. Starting with the Ford Class (CVN 78), the Guided Missile Launching System (GMLS) is segmented from the MK 57 and interfaces directly to the SSDS Combat System; the CVN 78 effort is referred to as NSSMS Objective Configuration OC Phase 1 (OCP 1).<br><br>NSSMS Objective Configuration Phase 2 (OCP 2) consists of the segmenting the MK 9 Track Illuminator System (TIS) to interface directly to with SSDS Combat System, as well as eliminating all MK 57 watch stations. This watch station elimination dramatically reduces system life cycle costs for hardware, software, manning, training and maintenance and obsolescence requirements, also allowing the Navy to divest of RIM-7 and associated infrastructure. Recent SSDS FRB activity has also created an incentive to consider MK 9 performance improvements opportunities.<br><br>MK 29 modernization efforts address a variety of issues with the legacy MK 132 above deck launcher equipment, including achieving the desired Grade A shock qualification, solving missile loading/loader beam safety issues, missile environmental issues and future ESSM compatibility. |             |         |                                    |              |             |               |                                                                        |                                 |         |         |             |            |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <b>Program Elements for Code B Items:</b> | <b>Other Related Program Elements:</b>                                        |
| <p>The NSSMS is a NATO Cooperative Project with 12 participating Governments; Australia, Belgium, Canada, Denmark, Germany, Greece, Norway, The Netherlands, Portugal, Spain, Turkey and the United States. The NSSMS and associated systems of the Cooperative Project were developed, produced and are supported under Department of Defense (DoD) International Memorandums of Understanding (MOU).</p> <p>Funding provides for (1) equipment modernization, (2) NATO SEASPARROW Objective Configuration (OC) program consisting of segmenting and automating MK 9 Track Illuminator System interfacing directly to the SSDS Combat System, and (3) Stalker Long Range Electro-Optic Sensor System.</p> <p>The MK 57 NSSMS continues to be evolved to provide credible ship self defense. These equipment modernization upgrades will result in the ability of the MK 57 System to support future mission requirements. NSSMS MK 57 Mods 12 and higher (ESSM capable) are integrated with the SSDS and become part of the SSDS MK 2 Combat System.</p> <p>The NATO SEASPARROW OC program consists of segmenting and automating the MK 9 Track Illuminator System (TIS) interfacing directly to the SSDS Combat System, eliminating all MK 57 watch stations, reducing system hardware, providing annual cost avoidance/savings, avoiding non-recurring engineering associated with integrating with CDS/CPS and allowing the Navy to divest of RIM-7 and associated infrastructure. Recent SSDS FRB activity has also created an incentive to consider MK 9 performance improvements opportunities. MK 132 Modernization (above deck launcher portion of MK 29 GMLS) allows for the upgrades necessary to address a variety of issues with this legacy equipment, including Grade A shock deficiencies with the current design when employed with ESSM, missile loading issues, missile environmental issues and future ESSM capability. The FY13 funding allocation on the Solid State Transmitter (SSTx) funding line is earmarked to support MK 9 improvements/modernization being driven by the FY12 SSDS combat system wholeness FRB/FLCIP initiate. The funding will be used to procure 1 set of MK 9 improvements/modernization related qualification hardware and associated engineering efforts. In contrast, the SSTx funding shown for FY14 and out will be used to procure production SSTx units.</p> <p>Stalker Long Range Electro-Optic Sensor System is a modular, portable and form/fit replacement for the MK 6 LLLTV mounted on NATO radar director (stabilized platform) providing 360 degree coverage satisfying ROE. It is able to detect, classify, ID, &amp; assist in intent determination supporting "24/7" NAV, INTEL &amp; AT/FP in addition to SUW, AAW and ASMD. Stalkers will be upgraded with the addition of Active/Passive Dual Imaging Sensor (AP/DIS IR). This improvement to Stalker will improve environmental performance via active/passive Short Wave IR. The Stalker system will further improve maritime target identification with increased range and resolution at night and through haze penetration/clutter reduction. This effort is in response to the NAVCENT Counter Swarm Urgent Operational Need (UON) to combat Fast Attack Craft/Fast Inshore Attack Craft (FAC/FIAC).</p> <p>[P40A - 2 / RAM GMLS]: Rolling Airframe Missile (RAM) - MK 49 Guided Missile Launching System (GMLS): RAM is a cooperative program with the Federal Republic of Germany, produced under a series of production MOUs/MOAs (the latest was signed on 19 March 2013) executed between the U.S. and the Federal Republic of Germany.</p> <p>The MK-31 Guided Missile Weapon System (GMWS) is a lightweight, quick-reaction, high firepower missile system designed to provide anti-ship missile defense. The system is comprised of a MK-44 Guided Missile Round Pack (GMRP) and the MK 49 GMLS, which holds 21 RAM missiles. The 21-round launcher is compatible with various platforms ranging from large USN aircraft carriers to Littoral Combat Ship (LCS). This system is designed to counter high density anti-ship, cruise missile raids and provide for ship survivability with accurate terminal guidance, proven lethality and no fire control illumination dependence.</p> <p>Funding profile directly supports final installations and associated efforts of RAM Mod 3 upgrades on LSD class ships in accordance with ships installation/availability schedule. Installation funding includes DSA planning and actual installation costs. Without this upgrade the Ship Self Defense System (SSDS) on these ships will only be able to fire RAM in manual mode.</p> <p>[P40A - 3 / Ship Self Defense System]: The Ship Self Defense System (SSDS) is the core combat system control element for the Quick Reaction Combat Capability (QRCC) in aircraft carriers and amphibious assault ships to defend against Anti-Ship Cruise Missiles (ASCM). SSDS integrates a diverse set of fire control loop sensors and weapons, and C4I systems for each ship class (CVN68/78, LHA6, LHD1, LPD17, and LSD41/49 ship classes). SSDS MK2 provides the capabilities for integrated air and missile defense, multi-warfare situational awareness, combat direction, and joint interoperability via the Cooperative Engagement Capability (CEC) and Tactical Digital Information Link (TADIL)-J (Link 16). SSDS MK2 is being fielded with the new construction carriers (CVN78 class) and amphibious ships (LHA6, LPD17 classes). SSDS MK2 is replacing the Advanced Combat Direction System (ACDS) in the LHD1 class, and SSDS MK1 in the LSD 41/49 class, as fleet modernization initiatives.</p> <p>SSDS MK2 integrates new combat system warfighting capabilities and improvements on phased basis via Advanced Capability Builds (ACB), Technology Insertion (TI), the Fire Control Loop Improvement Project (FCLIP), and Far-Term Interoperability Improvement Project (FTIIP). New hardware Technology Insertion baselines are required every four years to refresh the Commercial-Off-The-Shelf (COTS) assemblies to sustain system production and to support the incorporation of new ACB capabilities. Each individual ship is planned for a Technology Insertion upgrade on an eight year interval to replace obsolescent COTS hardware and support the fielding of the ACB capabilities.</p> |                                           |                                                                               |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Program Elements for Code B Items: | Other Related Program Elements:                                        |
| <p>SHIP SELF DEFENSE SYSTEM (SSDS) MK 1 provides ship self defense capabilities against Anti-Ship Cruise Missiles (ASCM) for LSD 41/49 class ships. It integrates several existing stand-alone sensor and Anti-Air Warfare weapons systems to provide an automated detect-to-engage capability against low flying, high speed ASCMs with low radar cross sections in the littoral environment. System design emphasizes physically distributed non-developmental items, commercial standards and computer program reuse in an open system architecture computer network. It includes a command table that uses components of the Navy's AN/UYQ-70 standard display for human-system interface, commercially available local area network access units and circuit cards, and commercially available fiber optic cabling. SSDS MK 1 requires a COTS obsolescence technology refresh and transitioned to an SSDS MK2 Open Architecture Computing Environment (OACE) beginning with FY10 procurement for shore sites.</p> <p>SHIP SELF DEFENSE SYSTEM (SSDS) MK 2 provides Advance Combat Direction System (ACDS) functionality and SSDS MK1 capabilities with additional weapon and sensor elements. It is integrated with Cooperative Engagement Capability (CEC) and tactical data links to provide joint interoperability for Aircraft Carriers and Amphibious Ships. It provides enhanced capabilities for Force Protection against air, surface, and subsurface threats using both own-ship and remote data in support of the Anti Air Warfare (AAW) Capstone Requirements. SSDS MK2 increases operational capabilities, improves combat readiness and Strike Group and Expeditionary Strike Group interoperability. SSDS MK 2 equips back-fit LHDs and CV(N)s with an upgraded Combat System Display, Automatic Status Board (ASTABS), Remote ASTAB Controllers, peripheral control stations and Advanced Sensor Distribution System (ASDS), as well as, the SSDS MK 2 computing equipment. Prior year procurement of SSDS MK 2 equipment included shore-based SSDS MK 2 equipment and full combat system suites for the Ship Combat System Center (SCSC), Wallops Island, Virginia; maintenance and operator training equipment at the Center for Surface Combat Systems (CSCS), Dam Neck, Virginia; and an equipment suite for the Self Defense Test Ship (SDTS) and the SSDS MK2 System Integration Lab (SIL), Raytheon IDS, San Diego. COTS obsolescence technology refresh kits are funded for SSDS MK 2 in FY15-FY20. This P-1 line item supports various Commercial Off The Shelf (COTS) based systems used within the combat system. FY15-FY20 COTS Conversion Kits are planned for CVNs, LPDs, LHDs, and LSDs, and COTS Upgrade Kits are planned for the shore sites used for SSDS software development/maintenance, training, and Combat System integration and certification testing. The COTS Tech Refresh conversion kits will support Navy Open Architecture computing environment standards to facilitate software reuse. FY13-FY15 kits are based on a Technology Insertion-12 (TI-12) configuration. FY16-FY20 are based on a TI-16 configuration. Starting in FY14, the Integrated Combat System Test Facility, at Naval Surface Warfare Center Dahlgren, is designated as an SSDS MK2 test facility for SSDS MK2/Combat System Certification testing. FY15-FY20 includes COTS Conversion Kits, equipment upgrade kits and support equipment for this facility. The budget cost estimate for the procurement and installation of the kits varies depends on the specific ship class (CVNs, LPDs, LSDs, LHAs, and LHDs), the existing configuration of the ship or shore site. The cost estimates for individual COTS conversion kits and their associated installation costs are included in the footnotes of exhibit P3A (for UQ005B).</p> <p>[P40A - 4 / AEGIS Support Equipment]: Provides equipment procurement and installation support for AEGIS Shore Facilities and Shipboard Upgrades to AEGIS Cruisers and Destroyers required to maintain the readiness of the AEGIS Weapon System in support of Combatant Commanders requirements.</p> <p>L7001: Provides funding to procure and maintain special test equipment (Adaptive Diagnostic Electronic Portable Test Set(ADEPT)/Radiation Probes) to support Maintenance and Troubleshooting efforts for the AEGIS Weapon System on Deployed Units and Critical shore sites.</p> <p>L7003: Provides funding to procure and maintain IWSL Weapons System and support infrastructure to support fleet issues resolution within the AEGIS Weapon System.</p> <p>L7006: Provides funding to procure and maintain SCSC Weapons and Combat systems and support infrastructure to support fleet training requirements and integration and test efforts required to complete Weapon and Combat System Certification.</p> <p>L7007: Provides funding to procure and maintain SCSC Weapons and Combat systems and support infrastructure to support fleet training requirements for the AEGIS Weapon System.</p> <p>L7011: Provides funding to address fleet hardware issues related to equipment obsolescence, high failure, or to reduce maintenance costs and improve the readiness of the AEGIS Fleet.</p> <p>L7600: Provides funding to complete installation of ORDALTS and other Ship Changes designed to improve the readiness of the AEGIS Combat System.</p> <p>[P40A - 5 / Vertical Launch Systems]: The MK-41 Vertical Launching System (VLS) is a surface combatant missile launching system, designed to store, select and launch various STANDARD Missile configurations, TOMAHAWK, Tactical TOMAHAWK, EVOLVED SEASPARROW (ESSM) and Vertical Launch ASROC (Anti Submarine ROcket) (VLA) missiles. The MK-41 VLS significantly improves missile capacity, flexibility, multi-mission capability, reaction time and rate of fire and is designed to be adaptable to present and future weapon systems. Current configurations are: two 61 cell launchers, forward and aft, for 22 TICONDEROGA (CG 47) Class Cruisers beginning with CG-52; one 61 cell aft and one 29 cell launcher forward for 28 ARLEIGH BURKE (DDG 51) Class Destroyers; and one 64 cell launcher aft and one 32 cell launcher forward for 34 DDG 51 FLT IIA ships.</p> <p>The OPN requirements procure Engineering Change Proposals/Ordnance Alterations (ECP/ORDALT) and funds sustaining engineering support for Fleet investigations and safety issues. Funds are required for Fleet operational availability, capability, safety and survivability. There are no significant increases or decreases in this program.</p> |                                    |                                                                        |

| <p>[P40A - 6 / Maritime Integrated Planning System - MIPS]: Maritime Integrated Air and Missile Defense (IAMD) Planning System (MIPS) is an automated air and missile defense planning tool that supports Joint Force Maritime Component Commander operational level of war air defense planning by automatically and optimally allocating ship stationing options in support of Ballistic Missile Defense (BMD) or Anti-Air Warfare (AAW).</p> <p>MIPS contains United States Army Patriot and Terminal High Altitude Air Defense models to ensure synergistic allocation and positioning of maritime units in relation to other joint units, providing optimized mutual defense of selected defended assets, against selected BMD and AAW threats. FY 2012 was the first year OPN was used for the MIPS Program; to provide technology refresh to existing hardware.</p> <p>Fourteen (14) MIPS are currently planned for procurement, with two (2) ship-based installations, ten (10) shore-based installations, and one (1) Environmental Qualification Test (EQT) system. The ship classes that will receive MIPS are CVN and LCC class ships. The ten (10) shore-based systems will be installed at various predetermined locations.</p> <p>[P40A - 7 / ANTI SHIP MISSILE DECOY SYSTEM]: The Anti-Ship Missile Decoy Program covers a family of decoys and the equipment to deploy them. It is an essential element of the Anti-Ship Missile Defense tactics to counter the threat of enemy homing missiles. NULKA is a joint program with Australia, and is currently in service with the Australian, Canadian, and United States Navies. NULKA consists of Decoy Launching System (MK 53) and Offboard Active Decoy (MK 234). This line contains various equipment and subsystems for a system which will provide the capability to defeat the effectiveness of hostile Anti-Ship cruise missiles. NULKA has been installed on the CG 47, DDG 51, FFG 7, LSD 41, and LSD 49 Classes in prior years. Installation on CVNs began in FY14 and will be installed on nine carriers. The DLF-3B (MK 59) decoy systems responded to an urgent operational need by providing an initial limited interim decoy capability to the Fleet. The Advanced Decoy Architecture Project (ADAP) is EW payload developed under an ONR program that is a replacement for the current payload on the Nulka decoy. The ADAP payload provides an advanced Electronic Warfare (EW) transmitter and increased signal processing capability.</p> |                                    |                                                                        |

**Footnotes:**

<sup>(1)</sup> NSWC Port Hueneme provides installation oversight support as the In-Service Engineering Activity (ISEA) for the RAM GMLS system.

<sup>(2)</sup> These funds provide for GMLS production support, systems engineering, logistics, Ship Change Designs (SCD), Engineering Change Proposals (ECP), ship drawings for ORDALT instructions as well as information assurance (IA) compliance and safety and Interactive Electronic Technical Manuals (IETM). RAM ECP funds in FY15-FY17 are for the Ethernet upgrade which provides replacement of the Legacy Fiber Distributed Data Interface (FDDI) Combat System interface with an Ethernet Combat System interface. The Ethernet interface is required for the RAM launcher to operate the SSDS MK Capstone Combat System. This upgrade will allow RAM to operate on LHD class ships that have been upgraded with Capstone SSDS MK2 Combat Systems. LHD self defense will suffer without RAM integration as these ships will only be unable to fire either RAM Block 1 or RAM Block 2 missiles in manual mode.

<sup>(3)</sup> Production support increases due to IA, Obsolescence and Safety Support.

<sup>(4)</sup> Provides for procurement and installation of critical RAM system improvement and safety ORDALTs

**Footnotes:**

<sup>(6)</sup> Provides equipment procurement and installation support for AEGIS Shore Facilities and Shipboard Upgrades to AEGIS Cruisers and Destroyers required to maintain the readiness of the AEGIS Weapon System in support of Combatant Commanders requirements. Combat System Procurements: L7001: Special Tools & Test Equipment L7003: Computers, Displays, and Simulators for Integrated Warfare Systems Laboratory (IWSL) at Dahlgren, VA L7006: Weapon/Combat System Equipment for Surface Combat System Center (SCSC) at Wallops Island, VA L7007: Weapon/Combat System Equipment for AEGIS Readiness Training Center (ATRC) at Dahlgren, VA L7011: AEGIS Weapon System Procurements to support Ship Change Documents L7027: AEGIS Software License Procurements to support Shore Facilities and In-Service Ship L7600: AEGIS Installation support for approved ship changes

<sup>(7)</sup> Plan to eliminate Integrated Warfare System Laboratory (IWSL) in FY15

<sup>(8)</sup> FY15 to FY16 increase is to meet AEGIS TI-16 Combat System Hardware suite procurement timeline following OPNAV ACB16 requirements validation, and support AEGIS ACB16 fleet certification requirements, fleet training exercises, and introduction at the Land-Based Test Sites. FY15 to FY16 increase is to meet AEGIS TI-Next Procurements to support AEGIS ACB Next Hardware requirements.

<sup>(9)</sup> FY15 to FY16 Increase to procure AEGIS TI-16 Hardware to support AEGIS ACB16 technician and operator training requirements and fleet introduction. FY17 to FY19 Increase to procure AEGIS TI-NEXT Hardware to support AEGIS ACB NEXT technician and operator training requirements and fleet introduction.

<sup>(10)</sup> FY15 to FY16 increase to resolve higher number of ORDALTS required to address Fleet COTS DMS issues on Fielded AEGIS Weapon System.

<sup>(11)</sup> FY15 to FY16 increase to support the installation and checkout of AEGIS BL 7.2 Switch and SPY Sidewall Capacitors on DDG 91-103.

(†) indicates the presence of a P-5a

**Footnotes:**

(13) VV001: Procurement of MK 53 Decoy Launching Systems. VV002: Procurement of MK 234 NULKA Decoys. VV003: Engineering Changes and Logistics Support - Funding will procure Engineering Change Proposals (ECPs)/ORDALT Kits to ensure future tactical suitability and viability of NULKA and to address obsolescence, quality assurance, reliability, safety, Electromagnetic Interference (EMI), and diminishing manufacturing source issues. Additionally, funding will provide for updating Logistics including decoy and special purpose test equipment maintenance, provisioning, transportation, and training school support as required. VV830: Production Engineering support to the MK 234 NULKA Decoy. VV831: Procurement of the commercially available DLF-3B decoy systems. A ship system consists of 6 decoys, 6 launch tubes, 2 spare decoys, and 1 control panel. VV832: Procurement of DLF-3B Decoys/Spares. VV833: Logistics and Production support for DLF-3B systems. Equipment Installation: Funding is for the installation of NULKA Decoy Systems, Fleet Modernization Program installs, and installation of equipment at shore facilities.

(14) VV002: Additional funding in FY16, FY17 and FY18 is due to the increased quantity of Nulka decoys being procured.

(15) VV004: ADAP Payload. FY16 funding is for the procurement of ADAP payloads.

**Description:**

[TRANSMITTER UPGRADE (SSTX)] The MK 91 NATO SEASPARROW Re-Architecture Program will integrate NSSMS into SSDS MK 2 architecture to provide an additional layer of ship missile defense. The upgrade will eliminate the analog point to point architecture and other deficiencies resident to the existing MK 57 NSSMS, as well as allow for full exploitation of ESSM. In addition to the reduction in manning realized by RNSSMS, the SSTx Ordnance Alteration (ORDALT) will reduce NSSMS Cost of Ownership for the fleet. The FY13 funding allocation on the SSTx funding line is earmarked to support Mk9 improvements/modernization being driven by the FY12 SSDS combat system wholeness FRB/FLCIP initiate. Production lead time for SSTx upgrade kits is 24 months. Once completed the kits are sent to Raytheon Technical Services Company (RTSC) where existing cabinets are overhauled/upgraded. This process takes another 12 months. Total time to produce an upgraded SSTx is 36 months.

[ESSM ORDALT] The objective of this ORDALT is a cost-effective solution to protect CVNs IAW the Navy's Maritime Force Protection (MFP) program for ships self defense against the future threat of evolving ASCMs. The Navy's MFP plan calls for these platforms to carry ESSM to provide the required Probability of Raid Annihilation (PRA). The ESSM ORDALT to the GMLS MK 29 provides a low cost modification to the current trainable launcher. In conjunction with ESSM, this modification will meet performance requirements for all cited ship classes through the mid-term scenario as defined in the CAPSTONE requirements and the 1999 Report to Congress.

| <b>Footnotes:</b><br>(16) The Transmitter group consists of 2 transmitters and 2 IRPs. Production lead time for IRPs is 17 months and 36 months for the transmitters, which included 24 months production time for the kits and 12 months to install the kits. Shipboard installation will be completed at the end of the 36 month period. SSTXs are currently installed on three of the six LHD 1 Class ships. These ships only require a IRP, SLC and ESSM ORALT. |            |                                |           |                                |           |                                |           |                                |           |                                                                               |           |                                |           |                                |                                  |                                |           |                                |           |                                                            |           |                                |           |                                |           |                |           |           |           |                                 |            |  |  |  |  |  |  |  |  |

<sup>(17)</sup> The ESSM group is shown in quantities as 1 shipset but consists of 2 ESSM Ordalts and 2 System Launcher/Controllers (SLCs). The ESSM Group will be installed with the Transmitter group as one system for installations in FY 17, FY 19 and FY 21.

<sup>(18)</sup> Delivered transmitters kits are sent to RTSC where existing cabinets are overhauled/upgraded with transmitter production kits. This process takes another 12 months until available for install in ship. Total time to produce an upgraded SSTx is 36 months.

| Description:<br>The Rolling Airframe Missile is a lightweight, quick-reaction, high firepower missile system designed to provide anti-ship missile defense. The system (MK-31 GMWS) is comprised of a MK-44 Guided Missile Round Pack (GMRP) and the MK 49 Guided Missile Launching System (GMLS), which holds 21 RAM missiles. The 21-round launcher is compatible with various platforms, ranging from large USN amphibious assault ships to Littoral Combat Ship (LCS). This system is designed to counter high density anti-ship, cruise missile raids and provide for ship survivability with accurate terminal guidance, proven lethality and no fire control illumination dependence.<br><br>Procurement and installation of RAM MK 49 GMLS critical ORDALTS on CVN, LSD, LPD, LHA, and LCS class ships. |             |         |         |                                                                        |             |               |         |         |                                                                  |         |             |        |

| <sup>(19)</sup> MOD 1 to MOD 3 procurements shown in prior years were procured under BLI 5238 and are being installed under BLI 5231 due to the LSD schedule and rephrasing. FY16-FY20 procurements are for Tech Refresh/Safety/IA ORDALTS. Installation costs are associated with Mod 1 to Mod 3 ORDALT installs as well as Tech Refresh/Safety/IA ORDALT installations. Installs noted below reflect ship sets (QTY 2 per ship): FY15: 1 MOD 1 to MOD 3 ORDLAT install; FY16: 3 MOD 1 to MOD 3 ORDALT installs; FY17: 1 MOD 1 to MOD 3 ORDALT install and 2 Ships Tech Refresh/Safety/IA ORDALT Installs; FY18: 1 MOD 1 to MOD 3 ORDALT install and 4 Ships Tech Refresh/Safety/IA ORDALT Installs; FY19: 4 Ships Tech Refresh/Safety/IA ORDALT Installs; FY20: 1 MOD 1 to MOD 3 ORDALT install and 3 Ships Tech Refresh/Safety/IA ORDALT Installs; |            |                                       |                                       |                                       |                                                                               |                                       |                                       |                                       |                                       |                                                                         |                                       |                                       |                                       |                                       |           |           |                |                |           |                |           |                |           |           |           |                |           |           |           |           |            |

**Description:**

SSDS MK 2 Commercial Off The Shelf (COTS) obsolescence technology refresh kits are funded in FY15-FY20. This P-1 line item supports several variations of COTS based systems used within the combat system. FY15-FY20 COTS Conversion Kits are planned for CVNs, LPDs, LHDs, and LSDs, and COTS Upgrade Kits are planned for the shore sites used for SSDS software development/maintenance, training, and Combat System integration and certification testing. The COTS Tech Refresh conversion kits will support Navy Open Architecture Computing Environment (OACE) standards to facilitate use of commercial software and reuse of application software. FY13-FY15 kits are based on a Technology Insertion-12 (TI-12) configuration. FY16-FY20 are based on a TI-16 configuration. The budget cost estimate for the procurement and installation of the kits varies depends on the specific ship class (CVNs, LPDs, LSDs, LHAs, and LHDs), the existing configuration of the ship or shore site. The cost estimates for individual COTS conversion kits and their associated installation costs are included in the footnotes in this exhibit P3A (for UQ005B).

[UQ5IN FMP SHIP UNITS] For FY15, competitive build to print production contracts for unique SSDS equipment are planned.

The cost for the ship and shore site kits vary depending on the specific ship class (CVN, LPD, LSD, LHA, and LHD), the specific shore site and the existing configuration of the ship/site involved. The costs for each kit are listed below. SSDS kit funding is provided to various contractors and field activities. Production lead time for kits ranges from 9 months (for equipment COTS upgrade kits) to 15 months for system COTS conversion kits for ships and shore sites.

SSDS FY15 unit costs are:

\$5,928K for (1) LHD COTS Conversion Kit for ACDS replacement in LHD2,(see note below)

\$882K for (1) Dahlgren Shore Site Upgrade Kit for ICSTF,

\$883K for (1) Wallops Island Upgrade Kit

Total Cost for 3 units in FY15 (UQ005B) is \$7,693K.

SSDS FY16 unit costs are:

\$ 8,167K for (1) LHD COTS Conversion Kit,

\$ 6,318K for (1) LPD COTS Conversion Kit,

\$ 6,318K for (1) Dahlgren COTS Conversion Kit,

**Description:**

[DLS ORDALT KITS] Funding will procure Engineering Change Proposals (ECPs)/ORDALT Kits to ensure future tactical suitability and viability of NULKA and to address obsolescence, quality assurance, reliability, safety, Electromagnetic Interference (EMI), and diminishing manufacturing source issues. Additionally, funding will provide for updating Logistics including decoy and special purpose test equipment maintenance, provisioning, transportation, and training school support as required.  
Installation of Ordalt 73014 (\$400K) is included for the DLPP (Decoy Launch Processor Program) 6\_3 upgrade and is included in Cost Code VVINS (Installation of Equipment).

| Gross/Weapon System Unit Cost <i>(\$ in Dollars)</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | -                  | -              | -                                         | -                   | -                  | -                    | -                                                              | -                                               | -                          | -              | -                  | -              |
| <p><b>Description:</b></p> <p>The NATO SEASPARROW Surface Missile System (NSSMS) is a shipboard missile System. In addition to the standard mission of Anti-Air and Anti-Surface Defense (AAW, ASUW), NSSMS is designed to protect ship and crew from a variety of inbound threats, including Anti-Ship Cruise Missiles (ASCM), Fast Attack Craft/Fast Inshore Attack (FAC/FIAC), Low Velocity Air Threats (LVAT), and a wide range of asymmetrical threats (e.g. Unmanned Aerial and Surface vehicles, small Rigid Hull Inflatable Boats, etc.).</p> <p>Primary operations consist of acquiring targets either manually using radar search or Electro Optic/Infrared capability, or automatically via external or internal designations, generation of fire-control quality track data for engage ability determination, launcher control and missile initialization, queuing of other weapons (e.g. Rolling Airframe Missile) via the Ship Self Defense System (SSDS) or AN/SWY 3/5 Combat System, Rim-7H/M/P SEASPARROW missile and RIM-162D Evolved SEASPARROW Missile (ESSM) firing, target illumination for Missile Guidance and Visual Kill/Survive and Battle Damage Assessments.</p> <p>LHD Upgrade consists of upgrading the MK 29 Launcher to modernize the system on the LHD 8 from a NSSMS MK 57 Mod 10 to a Mod 12.</p> <p>STALKER Long Range Electro-Optic Sensor System is a modular, portable and form/fit replacement for the MK 6 Low Light Level Television (LLLTV) mounted on NSSMS radar director (stabilized platform) providing 360 degree coverage satisfying ROE. It is able to detect, classify, ID, &amp; assist in intent determination supporting "24/7" NAV, INTEL &amp; AT/FP in addition to SUW, AAW and ASMD.</p> <p>NSSMS Objective Configuration Phase 2 (OCP2) program consists of segmenting the MK 9 Track Illuminator System (TIS) to interface directly with the SSDS Combat System, as well eliminating all MK 57 watch stations. This watch station elimination dramatically reduces system life cycle costs for hardware, software, manning, training and maintenance and obsolescence requirements, also allowing the Navy to divest of RIM-7 and associated infrastructure.</p> <p>Equipment procurements that support both the NSSMS MK57 Mod 12 and OCP2 consists of the Transmitter Upgrade (SSTX) and ESSM ORDALT. Included in the procurements are the Integrated Radar Processor (IRP) and System Launcher Controller (SLC). Mk57 NSSMS has been updated over time to keep pace with the evolving Fleet threats. The NSSMS Mk57 Mod (14) replaces the legacy NSSMS Mk57 Mod 2 aboard LHDs 1-6, which includes replacing RIM 7 with ESSM. This NSSMS update, along with the SSDS Mk2 MOD (3C) replacement of the Advanced Combat Direction System (ACDS), provides a significant improvement self defense capability for LHDs (CAPSTONE upgrade).</p> |                    |                |                                           |                     |                    |                      |                                                                |                                                 |                            |                |                    |                |

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Description:**

[TRANSMITTER UPGRADE (SSTX)] The MK 91 NATO SEASPARROW Re-Architecture Program will integrate NSSMS into SSDS MK 2 architecture to provide an additional layer of ship missile defense. The upgrade will eliminate the analog point to point architecture and other deficiencies resident to the existing MK 57 NSSMS, as well as allow for full exploitation of ESSM. In addition to the reduction in manning realized by RNSSMS, the SSTx Ordnance Alteration (ORDALT) will reduce NSSMS Cost of Ownership for the fleet. The FY13 funding allocation on the SSTx funding line will support Mk9 improvements/modernization being driven by the FY12 SSDS combat system wholeness FRB/FLCIP initiate. Production lead time for SSTx upgrade kits is 24 months. Once completed the kits are sent to Raytheon Technical Services Company (RTSC) where existing cabinets are overhauled/upgraded. This process takes another 12 months. Total time to produce an upgraded SSTx is 36 months.

[ESSM ORDALT] The objective of this ORDALT is a cost-effective solution to protect CVNs IAW the Navy's Maritime Force Protection (MFP) program for ships self defense against the future threat of evolving ASCMs. The Navy's MFP plan calls for these platforms to carry ESSM to provide the required Probability of Raid Annihilation (PRA). The ESSM ORDALT to the GMLS MK 29 provides a low cost modification to the current trainable launcher. In conjunction with ESSM, this modification will meet performance requirements for all cited ship classes through the mid-term scenario as defined in the CAPSTONE requirements and the 1999 Report to Congress.

| <b>Footnotes:</b><br><sup>(3)</sup> 1 set of Mk9 improvements/modernization related qualification hardware and associated engineering efforts will be procured in FY 13 but will not be installed shipboard. The Transmitter group consists of 2 transmitters and 2 IRPs. Production lead time for IRPs is 17 months and 36 months for the transmitters, which included 24 months production time for the kits and 12 months to install the kits. Shipboard installation will be completed at the end of the 36 month period. SSTXs are currently installed on three of the six LHD 1 Class ships. These ships only require a IRP, SLC and ESSM ORDALT.<br><sup>(4)</sup> The ESSM group consists of 2 ESSM Ordalts and 2 System Launcher/Controllers (SLCs). The ESSM Group will be installed with the Transmitter group as one system for installations in FY 17, FY 19 and FY 21.<br><sup>(5)</sup> Delivered transmitters kits are sent to RTSC where existing cabinets are overhauled/upgraded with transmitter production kits. This process takes another 12 months until available for install in ship. Total time to produce an upgraded SSTx is 36 months. |                |                |                                                                |                                             |                                  |                                                        |                |

| Gross/Weapon System Unit Cost (\$ in Dollars)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | -           | -       | -                                  | -            | -           | -                                                | -       | -                               | -       | -       | -           | -       |
| Description:<br>Rolling Airframe Missile (RAM) - MK-49 Guided Missile Launching System (GMLS): RAM is a cooperative program with the Federal Republic of Germany, produced under a series of production MOUs/MOAs (the latest was signed on 19 March 2013) executed between the U.S. and the Federal Republic of Germany.<br><br>The MK-31 Guided Missile Weapon System (GMWS) is a lightweight, quick-reaction, high firepower missile system designed to provide anti-ship missile defense. The system is comprised of an MK-44 Guided Missile Round Pack (GMRP) and the MK-49 GMLS, which holds 21 RAM missiles. The 21-round launcher is compatible with various platforms ranging from large USN aircraft carriers to Littoral Combat Ships (LCS). This system is designed to counter high density, anti-ship cruise missile raids and provide for ship survivability with accurate terminal guidance, proven lethality, and no fire control illumination dependence.<br><br>[P40A / UR006 RAM MK-49 GMLS]: Provides for the annual/multi-year procurement of RAM MK 49 Launchers, 11-Round Launchers, and ECPs.<br><br>[P40A / UR006 RAM MK-49 GMLS Ethernet Interface Upgrade]: RAM ECP funds the Ethernet upgrade which provides replacement of the Legacy FDDI Combat System interface with an Ethernet Combat System interface. The Ethernet interface is required for the RAM launcher to operate the SSDS MK Capstone Combat System. This upgrade will allow RAM to operate on LHD class ships that have been upgraded with Capstone SSDS MK2 Combat Systems. LHD self defense will suffer without RAM integration as these ships will be unable to fire either RAM Block 1 or RAM Block 2 missiles.<br><br>[P40A / UR007 RAM GMLS Production Support]: Provides for GMLS production support. FY12 and FY13 Production support funds include efforts to ensure Ethernet interface availability to support SSDS Lite (LHD 1) Installation. FY14 provides production support, systems engineering, logistics, SCDs, and ship drawings for ORDALT instructions.<br><br>[P40A / UR777 RAM Engineering Services Contractor]: Provides for systems engineering, design agent services, and integration.<br><br>[P40A / UR900 RAM - CSS]: Provides for engineering and professional support services.<br><br>[P40A / URCA3 RAM MK-49 MOD 3 Launcher (Congressional Add)]: Provides for Congressional Add for RAM MK 49 Mod 3 Launcher Obsolescence/Affordability in FY10.<br><br>[P40A / WAXXX Acquisition Workforce Fund - 2009]: Acquisition Workforce Fund<br><br>[P40A / UR5IN Install of Equipment (FMP)]: Provides for installation of RAM GMLS MK-49 Launchers. |             |         |                                    |              |             |                                                  |         |                                 |         |         |             |         |

**Description:**

The Rolling Airframe Missile is a lightweight, quick-reaction, high firepower missile system designed to provide anti-ship missile defense. The system (MK-31 GMWS), is comprised of a MK-44 Guided Missile Round Pack (GMRP) and the MK-49 Guided Missile Launching System (GMLS), which holds 21 RAM missiles. The 21-round launcher is compatible with various platforms, ranging from large USN amphibious assault ships to Littoral Combat Ship (LCS). This system is designed to counter high density anti-ship, cruise missile raids and provide for ship survivability with accurate terminal guidance, proven lethality and no fire control illumination dependence.

**Description:**

The Rolling Airframe Missile is a lightweight, quick-reaction, high firepower missile system designed to provide anti-ship missile defense. The system (MK-31 GMWS), is comprised of a MK-44 Guided Missile Round Pack (GMRP) and the MK-49 Guided Missile Launching System (GMLS), which holds 21 RAM missiles. The 21-round launcher is compatible with various platforms, ranging from large USN amphibious assault ships to Littoral Combat Ship (LCS). This system is designed to counter high density anti-ship, cruise missile raids and provide for ship survivability with accurate terminal guidance, proven lethality and no fire control illumination dependence.

## Description:

The Ship Self Defense System (SSDS) is the core combat system control element for the Quick Reaction Combat Capability (QRCC) in aircraft carriers and amphibious assault ships to defend against Anti-Ship Cruise Missiles (ASCM). SSDS integrates a diverse set of fire control loop sensors and weapons, and C4I systems for each ship class (CVN68/78, LHA6, LHD1, LPD17, and LSD41/49 ship classes). SSDS MK2 provides the capabilities for integrated air and missile defense, multi-warfare situational awareness, combat direction, and joint interoperability via the Cooperative Engagement Capability (CEC) and Tactical Data Information Link (TADIL)-J. SSDS MK2 is being fielded with the new construction carriers (CVN78 class) and amphibious ships (LHA6, LPD17 classes). SSDS MK2 is replacing the Advanced Combat Direction System (ACDS) in the LHD1 class, and SSDS MK1 in the LSD 41/49 class, as fleet modernization initiatives.

SSDS MK2 integrates new combat system warfighting capabilities and improvements on phased basis via Advanced Capability Builds (ACB), Technology Insertion (TI), the Fire Control Loop Improvement Project (FCLIP), and Accelerated Mid-Term Interoperability Improvement Project (AMIIP). New hardware Technology Insertion baselines are required every four years to refresh the Commercial-Off-The-Shelf (COTS) assemblies to sustain system production and to support the incorporation of new ACB capabilities. Each individual ship is planned for a Technology Insertion upgrade on an eight year interval to replace obsolescent COTS hardware and support the fielding of the ACB capabilities.

### SHIP SELF DEFENSE SYSTEM (SSDS) MK 1

Provides ship self defense capabilities against Anti-Ship Cruise Missiles (ASCM) for LSD 41/49 class ships. It integrates several existing stand-alone sensor and Anti-Air Warfare weapons systems to provide an automated detect-to-engage capability against low flying, high speed ASCMs with low radar cross sections in the littoral environment. System design emphasizes physically distributed non-developmental items, commercial standards and computer program reuse in an open system architecture computer network. It includes a command table that uses components of the Navy's AN/UYQ-70 standard display for human-system interface, commercially available local area network access units and circuit cards, and commercially available fiber optic cabling. SSDS MK 1 requires a COTS obsolescence technology refresh and transitioned to an SSDS MK2 Open Architecture Computing Environment (OACE) beginning with FY10 procurement for shore sites.

SHIP SELF DEFENSE SYSTEM (SSDS) MK 2 Provides Advance Combat Direction System (ACDS) functionality and SSDS MK1 capabilities with additional weapon and sensor elements. It is integrated with Cooperative Engagement Capability (CEC) and tactical data links to provide joint interoperability for Aircraft Carriers and Amphibious Ships. It provides enhanced capabilities for Force Protection against air,

| ID Code (A=Service Ready, B=Not Service Ready) : A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Program Elements for Code B Items: | Other Related Program Elements: 0604370N, 0204413N, 0603582N, 0604755N |
| <p>surface, and subsurface threats using both own-ship and remote data in support of the Anti Air Warfare (AAW) Capstone Requirements. SSDS MK2 increases operational capabilities, improves combat readiness and Strike Group and Expeditionary Strike Group interoperability. SSDS MK 2 equips back-fit LHDs and CV(N)s with an upgraded Combat System Display Suite, Automatic Status Board (ASTABS), Remote ASTAB Controllers, peripheral control stations and Advanced Sensor Distribution System (ASDS), as well as, the SSDS MK 2 computing equipment. Prior year procurement of SSDS MK 2 equipment included shore-based SSDS MK 2 equipment and full combat system suites for the Ship Combat System Center (SCSC), Wallops Island, Virginia; maintenance and operator training equipment at the Center for Surface Combat Systems (CSCS), Dam Neck, Virginia; and an equipment suite for the Self Defense Test Ship (SDTS), and System Integration Lab (SIL) at Raytheon IDS, San Diego. COTS obsolescence technology refresh kits are funded for SSDS MK 2 and SSDS MK 1 in FY14. This P-1 line item supports various Commercial Off The Shelf (COTS) based systems used within the combat system. In FY14 three COTS Conversion Kits were planned for LSDs, and COTS Upgrade Kits were planned for the shore sites used for SSDS software development/maintenance, training, and Combat System integration and certification testing. The COTS Tech Refresh conversion kits will support Navy Open Architecture computing environment standards to facilitate software reuse. FY14 kits are based on a Technology Insertion-12 (TI-12) configuration. Due to PB15 SSDS OPN BLI 5231 budget reductions, the installation of one LSD COTS Conversion Kit funded in FY15 for LSD47 is being canceled, and the LSD SSDS COTS Conversion Kit procured for LSD47 in FY14 is being redesignated for LHD2. This reduces the LHD2 SSDS MK2 COTS Conversion Kit procurement requirements in FY15 to offset the budget reductions, and provides all of the SSDS equipment required for the LHD2 SSDS MK2/Combat System AAW Capstone installation in FY16. The redesignated LSD COTS Conversion Kit will provide core SSDS COTS Conversion equipment for the LHD2 (common processor system equipment, network server group, system control consoles and command control group.) The additional SSDS MK2 COTS Conversion equipment required for LHD2 (common display system equipment, OD-220 consoles, monitors, communication panels, and combat system interface/conversion equipment) will be procured as a COTS Conversion Kit in FY15. LHD1 has been upgraded from ACDS Block 1 to SSDS MK2 in FY13. FY12 -14 includes the procurement and installation of SSDS MK2 Mod 1C, 3C, 5C equipment, and support equipment for shore sites for testing and training. Starting in FY14, the Integrated Combat System Test Facility, at Naval Surface Warfare Center Dahlgren, is designated as an SSDS MK2 test facility for SSDS MK2/Combat System Certification testing. FY14 includes COTS Conversion Kits, equipment upgrade kits and support equipment for this facility. The budget cost estimate for the procurement and installation kits varies depends on the specific ship class (CVNs, LPDs, LSDs, LHAs, and LHDs), and the existing configuration of the ship or shore site. The cost estimates for individual COTS conversion kits and their associated installation costs are included in the remarks of exhibit P3A (for UQ005B).</p> <p>AMPHIBIOUS ASSAULT DIRECTION SYSTEM (AADS) OR AN/KSQ-1 As directed by the National Security Agency as a Congressional mandate, Crypto Modernization Program funds in FY11-FY13 will be used to upgrade the system's Crypto Key Generator (CKG) from the currently used KOK-13 to the KOK-23. Integrates Enhanced PLRS (EPLRS) with NAVSTAR Global Position System (GPS) via a Global Position to form a jam/intercept resistant, command and control system which supports the surface assault ship-to-shore movement in amphibious operations. An airborne relay group extends the system range over the horizon to 100 nautical miles. By computing Position Location Information (PLI) for each participant in the EPLRS network, AADS provides the capability, in near real-time to locate, identify, track, communicate with and control all craft, vehicles and personnel in the network during operations both afloat and ashore.</p> <p>Commencing in FY15, LI 5239 was consolidated under LI 5231 in FY15 and out.</p> |                                    |                                                                        |

| *Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown. |             |       |                                          |                                                                  |                                          |                                                                           |                                          |                                          |
| Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.                                                                                                                                                                    |             |       |                                          |                                                                  |                                          |                                                                           |                                          |                                          |

**Justification:**

Ship Self Defense System provides CVNs, LPDs, LHDs, LHA6 and LSD class ships with greater capability to defend against Anti-Ship Cruise Missiles (ASCM), multi-warfare combat direction capabilities and strike group interoperability via CEC and TADIL-J.

**Description:**

SSDS MK 2 implements an evolutionary acquisition of improved ship self defense capabilities against Anti-Ship Cruise Missiles for selected Carrier/Amphibious ships by integrating existing programmed Anti-Air Warfare stand alone systems. It provides an automated reaction and multi-target engagement capability emphasizing performance in the littoral environment. Integration focuses on providing capabilities for coordinating existing sensor information, providing threat identification and evaluation, assessing defensive readiness, and recommending optimized defensive tactical response to counter single and multiple Anti-Ship Cruise Missile attacks and battle for interoperability via CEC and tactical data links.

Commencing in FY15, LI 5239 was consolidated under LI 5231 in FY15 and out.

**Description:**

SSDS MK 2 and SSDS MK 1 Commercial Off The Shelf (COTS) obsolescence technology refresh kits are funded in FY13-FY14. This P-1 line item supports several variations of COTS based systems used within the combat system. FY13-FY14 COTS Conversion Kits are planned for CVNs, LPDs, and LSDs, and COTS Upgrade Kits are planned for the Self Defense Test Ship (SDTS) and the shore sites used for SSDS software development/maintenance, training, and Combat System integration and certification testing. The COTS Tech Refresh conversion kits will support Navy Open Architecture Computing Environment (OACE) standards to facilitate use of commercial software and reuse of application software. FY13-FY14 kits are based on a Technology Insertion-12 (TI-12) configuration.

Commencing in FY15, LI 5239 was consolidated under LI 5231 in FY15 and out.

[UQ5IN FMP SHIP UNITS] FY14 unit cost details provided below:

SSDS FY14 unit costs are:

\$22,119K for (3) LSD COTS Conversion Kits, (1) of the (3) LSD COTS Conversion Kits has been redesignated for LHD2(see note below)

\$3,793K for (1) Dahlgren Shore Site Upgrade Kit - ICSTF,

\$3,792K for (1) Wallops Island Upgrade Kit.

Total Cost for 5 units in FY14 (UQ005B) is \$29,704K. Average unit cost is \$5,941K per unit. SSDS FY14 Conversion kit funding is provided to various contractors and field activities. For FY14, the network switching cabinet has been redesigned to include information assurance boundary defense devices. This equipment will be procured on a competitive build-to-print contract.

Note: Due to PB15 SSDS OPN BLI 5231 budget reductions, the installation of one LSD COTS Conversion Kit funded in FY15 for LSD47 is being canceled, and the LSD SSDS COTS Conversion Kit procured for LSD47 in FY14 is being redesignated for LHD2. This reduces the LHD2 SSDS MK2 COTS Conversion Kit procurement requirements in FY15 to offset the budget reductions, and provides all of the SSDS equipment required for the LHD2 SSDS MK2/Combat System AAW Capstone installation in FY16. The redesignated LSD COTS Conversion Kit will provide core SSDS COTS Conversion equipment for the LHD2 (common processor system equipment, network server group, system control consoles and command control group.) The additional SSDS MK2 COTS Conversion equipment required for LHD2 (common display system equipment, OD-220 consoles, monitors, communication panels, and combat system interface/conversion equipment) will be procured as a COTS Conversion Kit in FY15.

SSDS FY14 ship installation costs are as follows:

\$ 3,126K for AIT for 1 LSD kit,

\$ 2,100K for AIT for 1 LSD kit,

\$ 2,964K for 1 SDTS kit,

**Footnotes:**

- (1) The cost for the ship and shore site kits vary depending on the specific ship class (CVN, LPD, LSD, LHA, and LHD), the specific shore site and the existing configuration of the ship/site involved. See the P-3A Description for specific details.
- (2) The cost for the ship and shore site kits vary depending on the specific ship class (CVN, LPD, LHA, and LHD), the specific shore site and the existing configuration of the ship/site involved. See P-3A Description for specific details. For FY13, Long lead material contract was awarded for the procurement of network switching cabinet to support the installation required delivery date. For FY14, competitive build to print production contracts for unique SSDS equipment are planned for award.
- (3) For FY13, Long lead material contract was awarded for the procurement of network switching cabinet to support the installation required delivery date. For FY14, competitive build to print production contracts for unique SSDS equipment are planned.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

**Justification:**

L7001: Provides funding to procure and maintain special test equipment (Adaptive Diagnostic Electronic Portable Test Set(ADEPT)/Radiation Probes) to support Maintenance and Troubleshooting efforts for the AEGIS Weapon System on Deployed Units and Critical shore sites.

L7003: Provides funding to procure and maintain IWSL Weapons System and support infrastructure to support fleet issues resolution within the AEGIS Weapon System.

L7006: Provides funding to procure and maintain SCSC Weapons and Combat systems and support infrastructure to support fleet training requirements and integration and test efforts required to complete Weapon and Combat System Certification.

L7007: Provides funding to procure and maintain SCSC Weapons and Combat systems and support infrastructure to support fleet training requirements for Operation and Maintenance of the AEGIS Weapon System.

L7011: Provides funding to address fleet hardware issues related to equipment obsolescence, High Failure, or to reduce maintenance costs and improve the readiness of the AEGIS Fleet.

L7600: Provides funding to complete installation of ORDALTS and other Ship Changes designed to improve the readiness of the AEGIS Combat System.

**UNCLASSIFIED**

**Footnotes:**

- (1) FY14 Procurements focused on 400Hz Power Converters enhancements, Cooling and Air Enhancements, SPY Sidewall Capacitors, AEGIS BL 7.2 Hardware, and Shipboard Peripherals Replacement System (SPRS) Procurements all designed to improve the operational effectiveness of the AEGIS Combat System.
- (2) FY14 Increase to procure software licenses for AEGIS Land Based Test Sites and Fielded AEGIS Cruisers and Destroyers.
- (3) FY14 Increase to procure AEGIS BL 9 Equipment to support AEGIS ACB12 technician and operator training requirements and fleet introduction.

**Description:**

The Theater Mission Planning Center (TMPC) previously referred to as Tomahawk Command and Control System (TC2S) consists of Commercial and Government Off-The-Shelf (COTS/GOTS) software and COTS hardware. TMPC provides targeting, mission planning, strike planning, mission distribution, command & control, and employment capabilities for Tomahawk Land Attack Missile (TLAM). Continuous TMPC software modification decreases mission planning time and increases the quality and accuracy of each mission while reducing complexity. TMPC provides mission planning at the theater and operational levels and is designed for high rate mission planning production responsive to national strategic, operational, and tactical requirements. TMPC develops and distributes missions for the Tomahawk Missile; provides command information services for TWS; provides strike planning, execution, coordination, control and reporting, and provides Maritime Component Commanders (MCC) the capability to plan or modify conventional Tomahawk Land-Attack Missile (TLAM) missions. TMPC has evolved into scalable configurations deployed in four configurations at 180 sites: Cruise Missile Support Activities (CMSAs) (3+1 FMS), Tomahawk Strike Mission Planning Cells (TSMPCs) (3 - C5F, C6F, C7F), Carrier Strike Groups (CSGs) (16 - 10 CVN), Firing Units (FRUs) (84 Surface/56 Submarines), Fleet Training Sites and Labs (17).

Funds provide for systems engineering, testing, Independent Verification & Validation (IV&V), Security Accreditation, installation, Site Acceptance Testing (SAT), user familiarization of products and hardware to support command and control nodes. The Selective Availability Anti-Spoofing Module (SAASM) Global Positioning System (GPS) capability, workflow improvements to Mission Planning, Strike Planning & Execution and TWS Single System initiative are included in this line to transition to a Service Oriented Architecture, improve TCS "Kill Chain" planning and communications architecture and system effectiveness. Also, this funding line provides for Commercial-off-the-Shelf/Government-off-the-Shelf (COTS/GOTS) refreshment, engineering changes, software upgrades, and associated SSNs/DDGs/CGs/CVN logistics, and infrastructure to maintain compatibility and interoperability with existing and future TMPC system configurations.

Surface and Submarine Tactical Tomahawk Weapon Control System (TTWCS) is a post milestone III program executing its first major tech refresh since its 2004 IOC. The first phase of this tech refresh partially resolves processor component obsolescence. The final phase completes all hardware and software obsolescence efforts and will be fleet released in 2016. TTWCS functions include: Tasking validation (missile mission matching), planning of over the water routes, initialization, preparation and launch of BLK III/IV missiles. TTWCS reduced response time and increased operational flexibility through addition of Launch Platform Mission Planning (LPMP), and in-flight monitoring and control of Blk IV missiles. Final Phase efforts began in FY12 and consist of the completion of full TTWCS hardware technology refresh, C4I Web services interfaces and operability to be fielded in backfit firing units. In addition, funds provided to continue TTWCS viability in TTWCS v5.6 and ensure compliance with cyber security mandates, continue to address hardware obsolescence through periodic COTS hardware refresh and periodically refresh of GOTS software to address obsolescence, support migration from 32 bit to 64 bit architecture and migrate away from legacy Ada code. Finally it will allow reduction of system complexity and incorporation of critical software fixes. Program options are being identified that will enable TWS integration into future platforms. Included in those options will be changes necessary for TTWCS to ensure required functionality as the missile is modernized beginning in FY19.

| *Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                 |                                |                                                  |                                                  |                                                                           |                                                  |                                                  |                                                  |
| Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                 |                                |                                                  |                                                  |                                                                           |                                                  |                                                  |                                                  |
| <p><b>Justification:</b></p> <p>Funding is required to resolve remaining TTWCS hardware/software obsolescence issues (v5.4.0.2) and continue fielding version 5.4.0. Funds also provide for integration, modernization and interoperability efforts necessary to keep pace with changes, retain capability and exploit capabilities of internal (TWS All-Up-Round missile and TTWCS) and external (Modernized Integrated Data Base (MIDB)), National Geospatial Intelligence Agency (NGA) products, Distributed Common Ground Systems (DCGS) Integrated Backbone (DIB) compliance, Future Imagery Architecture (FIA) imagery formats and Intelligence Surveillance &amp; Reconnaissance (ISR) interfaces, Network Centric Enterprise Services (NCES), Global Information Grid/Internet Protocol (GIG/IP) (V)6, FORCEnet compliance systems/interfaces to the effectiveness of the TWS, into TMPC deployed configurations. Funding supporting TTWCS is appropriately phased to complete the 1st major tech refresh since IOC in 2004.</p> <p>Additional funding is required FY16 to comply with commercial hardware/software supportability mandates, obsolescence, information assurance requirements and to maintain pace with modern computing architectures.</p> <p>Funds are also required to initiate and continue the upgrade of unsupportable and obsolete software in the Tomahawk Planning System (TPS). The current TPS software is rapidly becoming obsolete, unsupportable, and incompatible with DoD security mandates making it more susceptible to Cyber-attack. Funding also addresses the National Geospatial-Intelligence Agency (NGA) imagery format change planned for June 2018. The Tomahawk Weapon System cannot execute a mission successfully without the NGA imagery used by TMPC for precision targeting and mission planning. This line also funds the implementation of the TMPC Enterprise Network (TEN) necessary to rapidly and effectively manage the distribution of software patches to all operational sites without compromising system's Authority to Operate (ATO). Instead of funding costly site installation teams, new TMPC software releases and patches would be deployed to all operational sites electronically. The TEN would be capable of: (1) remote promulgation of security policies, Information Assurance Vulnerability Assessments (IAVA) security patches, and anti-virus definitions to keep pace with increasing IA mandates; (2) remote Configuration Management (CM) from a central location for the definition, control, distribution and implementation of official releases and configurations; (3) remote audit and help desk maintenance support for all TMPC configurations; and (4) Continuity of Operations (COOP) during site system failures or natural disasters. FY16 continues TEN implementation and the TPS rewrite upgrade.</p> |                 |                                |                                                  |                                                  |                                                                           |                                                  |                                                  |                                                  |

| <b>Footnotes:</b><br><sup>(1)</sup> Increases in the TTWCS Hardware cost code for FY16 are to address Hardware obsolescence through periodic COTS Hardware refresh.<br><sup>(2)</sup> Decrease in product improvement cost code from FY14-FY15 is associated with the transition of software development to operational test events in the laboratory and onboard ships. Increase in product improvement cost code in FY16 is due to introduction in FY12 of a 100% COTS hardware/software baseline with the introduction of v5.4.0. Consequently, additional product improvement resources are required to comply with commercial hardware/software supportability mandates, obsolescence, information assurance requirements and to maintain pace with modern computing architectures.<br><sup>(3)</sup> Procures hardware and software for installations of system upgrades at all 180 sites where TMPC systems configurations are deployed. This also includes hardware and software for the developers and the Washington Planning Center. FY16 increases initiate the deployment of TMPC 5.0.1 at the Cruise Missile Support Activities and Tomahawk Strike Mission Planning Cells .<br><sup>(4)</sup> Provides for software engineering efforts associated with the delivery of system modernization and improvements by the prime developers. The current TPS software is rapidly becoming obsolete, unsupportable, and incompatible with DoD security mandates making it more susceptible to Cyber-attack. This recode effort supports upgrades necessary to address IA requirements as well. Funding also addresses the National Geospatial-Intelligence Agency (NGA) imagery format change planned for June 2018. The Tomahawk Weapon System cannot execute a mission successfully without the NGA imagery used by TMPC for precision targeting and mission planning. In FY16 this line also funds the implementation of TEN which is necessary to rapidly and effectively manage the distribution of software patches to all operational sites without compromising system's ATO. Funding also provides software upgrades to the submarine community to specifically address system interfaces.<br><sup>(5)</sup> The decrease in FY16 is associated with costs associated with the fabrication of ship sets for SSGNs.<br><sup>(6)</sup> Decreases within the TTWCS Integrated Logistic Support cost in FY16 attributed to phased retirement of 15 CG's; FY16 did not include planned CG retirements and funding will be utilized to continue planned TTWCS software installations.<br><sup>(7)</sup> Provides systems engineering support for system design and definition requirements necessary to evaluate all functional aspects of the TMPC subsystems and workflows that directly impact strike & execution and mission planning products. It includes reviewing TWS and external interfaces for impacts resulting from design upgrades/changes within TWS and by external organizations, Independent Verification & Validation (IV&V), and security accreditation activities. The increase from FY15 funding levels to FY16 is due to increased software engineering efforts to support the TPS rewrite effort for cybersecurity.<br><sup>(8)</sup> Funds activities that directly support system upgrades requirements such as user events, requirements validation, PDR/CDR events, SW formal qualification testing, and delta training documentation. Increase in funding levels in FY16 is the result of added scope to support the TPS rewrite effort for cybersecurity.<br><sup>(9)</sup> Funds installations support associated with the deployment of new TMPC system upgrades to the CMSAs, TSMPCs, Carriers, FRUs, Labs and training sites. Increase in FY16 completes initial fielding of TMPC 5.0.1 to shore installations to include the Cruise Missile Support Activity, Pacific (CMSAPAC), and the Tomahawk Strike Mission Planning Cells (TSMPCs). FY16 funds the deployment of TMPC 5.0.1 and TMPC 6.0 software to the Fleet. |                                                                           |                                                                               |

## Description:

The MK-41 Vertical Launching System (VLS) is a surface combatant missile launching system, designed to store, select and launch various STANDARD Missile configurations, TOMAHAWK, Tactical TOMAHAWK, EVOLVED SEASPARROW (ESSM) and Vertical Launch ASROC (VLA) missiles. The MK-41 VLS significantly improves missile capacity, flexibility, multi-mission capability, reaction time and rate of fire and is designed to be adaptable to present and future weapon systems. Current configurations are: two 61 cell launchers, forward and aft, for 22 TICONDEROGA (CG 47) Class Cruisers beginning with CG-52; one 61 cell aft and one 29 cell launcher forward for 28 ARLEIGH BURKE (DDG 51) Class Destroyers; and one 64 cell launcher aft and one 32 cell launcher forward for 34 DDG 51 FLT IIA ships.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

**Justification:**

Funding for the Vertical Launch Systems program has been moved to Other Procurement, Navy (OPN) line item 5231, Ship Missile Support Equipment, beginning in FY 2015.

**UNCLASSIFIED**

**Description:**

This alteration modifies the VLS fairing to Muzzle Hatch connecting links, fairing lock bar cylinder and lock bar components with predominantly off-shelf hardware to provide increased accuracy of adjustment and eliminate potential binding and interference areas.

| <b>Description:</b><br>This alteration replaces internal glass-body electromechanical reed switches with an electronic Hall Effect switch actuated by a single pole magnetic field to provide ease of manufacture, eliminate magnet rotational positioning of present magnets, and allow use of higher reliability magnets better suited to the environment. |                    |                |                |                                                                        |                    |                      |                |                |                |                                                                               |                    |              |

| <p><b>Description:</b></p> <p>Maritime Integrated Air and Missile Defense (IAMD) Planning System (MIPS) is an automated air and missile defense planning tool that supports Joint Force Maritime Component Commander operational level of war air defense planning by automatically and optimally allocating ship stationing options in support of Ballistic Missile Defense (BMD) or Anti-Air Warfare (AAW).</p> <p>MIPS contains United States Army Patriot and Terminal High Altitude Air Defense models to ensure synergistic allocation and positioning of maritime units in relation to other joint units, providing optimized mutual defense of selected defended assets, against selected BMD and AAW threats. FY 2012 was the first year OPN was used for the MIPS Program; to provide technology refresh to existing hardware.</p> <p>Fourteen (14) MIPS are currently planned for procurement, with two (2) ship-based installations, ten (10) shore-based installations, and one (1) Environmental Qualification Test (EQT) system. The ship classes that will receive MIPS are CVN and LCC class ships. The ten (10) shore-based systems will be installed at various predetermined locations.</p> <p>[P40A / 5B001 - EQUIPMENT]: These funds are for the procurement of MIPS technology refresh hardware and software for ship and shore based installations.</p> <p>[P40A / 5B830 - PRODUCTION ENGINEERING]: The funds are for production engineering support for MIPS hardware and software.</p> <p>[P40A / 5BINS - NON-FMP INSTALLATION]: These funds are for installation of Non-Shipboard MIPS hardware at various Land Based locations.</p> |                    |                |                                           |                     |                    |                      |                                                                                           |                                        |                |                            |                    |               |

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Description:**

10 shore-based units will be procured and one unit will be used to conduct required EQT testing. The EQT shore-based unit will not be installed after testing. There are no fleet modernization program (FMP) installation costs associated with the 10 shore-based units because those installations will be performed at the shore-based sites.

**Description:**

This budget provides for the procurement of Strategic Weapons System (SWS) equipment for deployed ballistic missile submarines (SSBNs) and shore support sites to support the TRIDENT II (D5) program. Included are shipboard subsystem equipment modernization and technical refresh efforts associated with the TRIDENT II (D5) life extension program. TRIDENT II SSBN hull life has been extended, therefore extending system life to FY 2042.

| A broad range of other material support equipment must be procured for deployed SSBNs, shore installations and contractor facilities. Included within this category are general and special purpose test equipment, launcher expendables, navigation principal items, test instrumentation in support of missile flight tests, and missile checkout equipment. Amounts included within this P1 line for this category are subdivided as follows:                                                                                                                                                                                                                                                                                                               |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |
| -Launcher and Handling Equipment: This funding supports procurement of MK-74 gas generators. Funding in FY 2016 provides for gas generator production.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |
| -Fire Control Equipment: Funding in FY 2016 provides procurement of fire control auxillary support equipment as well as continued capital maintenance projects at the Naval Industrial Reserve Ordnance Plant (NIROP) in Pittsfield, MA. These projects are essential to correct environmental, safety, and energy conservation deficiencies. Funding also provides procurement of hardware for targeting. Funding supports the integration of Navy Enterprise Resource Planning (NERP) and the Advanced Inventory Logistics (SAIL) to track tactical support equipment.                                                                                                                                                                                       |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |
| -Navigation Equipment: Funding in FY 2016 provides for stable platform & housing material kits and shock isolation system kits for Electro-statically Supported Gyro Navigator (ESGN) to maintain survivability for the SSBNs. Funding is required for replacement of worn or damaged inertial test equipment used at contractors' plants to support test, evaluation, and analysis of inertial instruments.                                                                                                                                                                                                                                                                                                                                                   |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |
| -Instrumentation/Missile Test Equipment: Funding in all years provides for shore based and shipboard test instrumentation equipment in support of missile flight tests. Funding in FY 2016 provides for a refresh of the flight test and pacific range test instrumentation system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |
| -Information Technology: IT equipment acquisitions (hardware and related software) in support of the Strategic Systems Programs. IT hardware and software components that connect to SWSNET are also part of the acquisitions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |
| ALTERATIONS (FY16 \$182.808M)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |
| Alterations to non-flying tactical hardware are continuing requirements for the SWS. Requirements primarily relate to shipboard investments in Commercial-off-the-Shelf/Non-Developmental Items (COTS/NDI) SWS subsystem equipment, including periodic refresh cycles, to ensure continued reliable performance of the weapon system for its extended service life to match the OHIO Class life extention. Strategic Programs Alterations (SPALTs) also entail the application of available technology to eliminate personnel safety hazards, correct design deficiencies, maintain system effectiveness by resolving equipment operability problems, achieve logistic economies, and provide for shipboard subsystem D5 life extension modernization efforts. |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |
| Funds are required to procure alterations to the SWS launcher and fire control subsystems; to inertial, non-inertial, and ESGN navigation subsystem equipment on deployed SSBNs and installed at supporting shore facilities, including the TRIDENT Training Facility (TTF), Bangor, TTF, Kings Bay, the Ashore Navigation Center, and the Inertial System Test Laboratory; to test instrumentation used on SSBNs, support ships and at the Eastern Test Range, the TRIDENT Refit Facility (TRF), Bangor, and TRF, Kings Bay; and to missile handling equipment, missile test and readiness equipment, and surface support equipment.                                                                                                                          |                      |       |                                          |                                          |                                                                         |                                                                                               |                                          |                                          |  |

| ID Code (A=Service Ready, B=Not Service Ready) : A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Program Elements for Code B Items: | Other Related Program Elements: 0603570N, 0603595N, 0603561N, 0101228N, 0805376N, 0901211N |
| Installation of approved SPALTs is performed on a turnkey basis in conjunction with the procurement of equipment. Use of COTS/NDI has been initiated and is being implemented in all subsystems, wherever possible.                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                    |                                                                                            |
| The majority of the Alterations funding supports the Shipboard System Integration (SSI) program which utilizes a COTS based strategy that integrates common electronics (from Fire Control, Launcher, Navigation and Shipboard Data Recording Systems) into the fire control sub-system as well as refreshing inertial systems in order to ensure the TRIDENT II (D5) weapon system can be sustained to FY 2042 in support of OHIO Class SSBNs. Below is a description of each SSI Increment:                                                                                                                                                               |                                    |                                                                                            |
| SSI Inc 1: Provide subsystems integration into the MOD 6/7 Tech Refresh for the Fire Control System (FCS) leaving the missile and guidance system interface unchanged. Also provides Ship/Strategic Weapons Support System (SWSS) SHIPALT's for ship interfaces that comprise of power, missile tube cabling, radio room, and Fire Control (FC) cabling. Installation is accomplished during 50 day refit without missile offload.                                                                                                                                                                                                                          |                                    |                                                                                            |
| SSI Inc 2: Introduction of an integrated Shipboard Data Systems (SDS) which is comprised of Data Recording Subsystem (DRS), Maintenance Information Network (MIN), and Electronic Work Log (EWL) subsystems. The DRS legacy functionality, connectivity, equipment is unchanged. The EWL subsystem provides software upgrades and the Window 7 Operating System upgrade. Provides subsystem SPALTs for SDS and Strategic Weapons System Maintenance Information Network (SWSMIN) and refresh portable computing devices.                                                                                                                                    |                                    |                                                                                            |
| SSI Inc 4: Prerequisites are SSI Inc 1 and 2. Increment 4 provides SWS Subsystem SPALTs which includes Mod 6/7 FCS Refresh SPALT, Navigation (NAV) Radio Frequency (RF) SPALT, SDS SPALT, and Cabling SPALT. For the FC Mod 6/7 Refresh it contains the technical refresh, integration and commonality of the system. The DRS legacy software modifies the support of the new NAV/SHIP/DRS and NAV/FC interfaces and format changes. For Navigation changes, the equipment remains in NAV Center. Supplies the first technical refresh in 25 years for Navigation Aids (NAVAIDS) Electronics, frequency standard, workstation, and NAV Control Panel (NCP). |                                    |                                                                                            |
| SSI Inc 8: Prerequisite is SSI Inc 4. Increment 8 provides replacement of the 30 year old ESGN which needs a refresh of inertial technology components, replacement of the Electronic Equipment Consoles (EEC) , and updates Navigation Subsystem software to accommodate ESGN replacement navigator. Also, provides SWS subsystem SPALTs for FC and TTF NAV Lab trainers, and SDS (DRS) Software SPALT changes which are driven by data requirement changes. The SHIPALTs retain NAV Center bedplate, cabling, chilled water/ventilation, and retain electrical Power.                                                                                     |                                    |                                                                                            |
| SSI Inc 11: Launcher Initiation System (LIS) is being developed for backfit onto OHIO Class D5LE SSI Inc 1 is a prerequisite. This provides a technical refresh of 30+ year old technology to ensure long term system reliability. SHIP/SWSS SHIPALT are to replace electrical cable with hybrid fiber-optic/electrical cable.                                                                                                                                                                                                                                                                                                                              |                                    |                                                                                            |
| SSI Inc 13: Prerequisite is SSI Inc 4. Increment 13 provides Shipboard Systems Refresh for FCS, NAV, and Missile Test and Readiness Equipment (MTRE) to integrate within the subsystems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                    |                                                                                            |
| SSI Inc 15: Prerequisite is SSI Inc 13. Increment 15 provides pre-configuration and post-configuration support of Increments 8 and 11. This increment provides refresh alterations for fire control equipment, navigation, launcher, and trainer subsystems.                                                                                                                                                                                                                                                                                                                                                                                                |                                    |                                                                                            |
| Launcher and Handling Equipment: Funding provides for launcher and handling equipment alterations to address aging and obsolescence issues. Funds in FY 2016 provides major Launcher SPALT activities such as the Ejector Group Handling Equipment (EGHE) refresh. Funding in FY 2016 also provides for the LIS installation kits in the training facilities and boats.                                                                                                                                                                                                                                                                                     |                                    |                                                                                            |
| Fire Control Equipment: Funding in all years will allow for implementation of Life Cycle Cost Control (LCCC) initiatives aimed at the integration of TRIDENT II SWS subsystem equipment into the Fire Control System (FCS), leveraging off of the MK-98 Mod 4 Fire Control design to implement the first phase of TRIDENT II SSI architecture. The product of these SWS integration efforts will be implementation of an affordable design to meet all operational requirements while minimizing total ownership costs.                                                                                                                                     |                                    |                                                                                            |
| FY 2016 funding provides the following efforts:<br>- Installation of Increment 4 MOD 6 Fire Control Refresh SPALT Kit<br>- Procure SSI Increment 10 Shipboard Data System (SDS) SPALT Kits                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                    |                                                                                            |

| <p>- SSI Increment 13 Refresh/Redesign of the FCS Electronics</p> <p>Navigation Equipment: Funding in FY 2016 provides for the following efforts:</p> <ul style="list-style-type: none"><li>- Continuing testing of Navigation's software coding</li><li>- Installation and ship installation of SSI Increment 8 Kits</li><li>- Refresh/redesign of the ESGN Replacement (ESGN-R) (SSI Increment 8)</li><li>- Alteration efforts of Engineering drawings</li><li>- Conduct laboratory and at-sea testing prototype for the Inertial Navigation System (INS)</li><li>- Conduct Gyroscope Critical Design Review (CDR), Production Readiness Review (PRR) to include acceptance testing to ensure Gyroscopes specs are met</li><li>- Procure Gyroscopes for SSI Increment 8</li><li>- Initiate Production INS Design, and conduct Preliminary Design Review</li><li>- INS Production Software Test and Development Plan</li><li>- Efforts to support problem correction, fleet documenetation, system modeling and simulations</li><li>- Navigation SPALTs to the legacy ESGN to extend the service life for the fleet usage</li><li>- Independent Verification and Validation for Increment 8 efforts</li><li>- SSI Increment 13 Refresh/Redesign of the Navigation System</li></ul> <p>Instrumentation/Missile Checkout equipment: FY 2016 funding provides for Forecast Instrumentation SPALT for hardware modification to submarine instrumentation of flight systems. Funding also provides MTRE to sync with Fire Control software changes for SSI Inc 13.</p> <p>TRAINING SUPPORT EQUIPMENT (FY16 \$20.776M)</p> <p>This category provides for procurement of, and alterations to, both tactical and non-tactical equipment required at submarine training facilities to train personnel in the operation and maintenance of launcher and handling, fire control, navigation, missile checkout, and test instrumentation subsystems. Each training facility consists of an integrated family of system and unit laboratories that interface with a training simulation system to provide complete and realistic training for replacement and off-crew personnel, both officer and enlisted, as required for manning of SSBNs and shore facilities. Funding is budgeted to procure training-unique equipment required as the result of alterations to SWS tactical equipment, including those associated with D-5 life extension.</p> <p>Funds are required for software and hardware design modification, lab documentation modification, facility modification, and design and system integration, as well as procurement and fabrication of all hardware needed to support Navigation and Fire Control subsystem training at both the TTF, Bangor, and at TTF, Kings Bay. The required effort includes upgrade of the Bangor and Kings Bay Navigation and Fire Control trainers from SSI Increments 4, and 11, Integration of Fire Control SSI Increment 4 and PC Simulation, and for the development of the Virtual Strategic Weapons System (SWSD) classroom trainers. Funding also addresses the need for acquisition of upgrades to the Bangor and Kings Bay TTFs resulting from tactical changes in the TRIDENT II (D5) missile under the Life Extension (LE) program. FY16 tasks will include the SSI Increment 8 PC Simulation that updates the software to the Fire Control System network and modifies the Navigation interface, as well as the procurement of a second missile control center digital trainer at TTF Bangor. There is a gap between the existing training capacity and training requirements for SSBN crews. The shortfall in training capacity resulted in the abbreviated and diminished training for strategic weapons crews.</p> <p>NEW START (FY16 \$15.042M)</p> <p>Funding in this category is in support of the Strategic Arms Reduction Treaty (New START) signed into law on 5 Feburary 2011. New START is a nuclear arms reduction treaty between the United States and the Russian Federation which limits the number of deployed launchers. Funding in FY16 will procure support equipment and associated support for steel closure design, procurement and material support for the missile tubes.</p> |                                    |                                                                                            |
