A. Mission Description and Budget Item Justification

Technology Transfer was titled Defense Technology Transfer and Defense Technology Link (TechLink) in previous OSD budgets. This program was devolved from OSD to achieve efficiencies in program management.

The three-fold mission of Technology Transfer is: (1) integrate advanced commercial-sector technologies into Department of Defense (DoD) systems, particularly from non-traditional defense contractors; (2) convey DoD-developed technologies to industry to make these technologies available for military acquisition; and (3) establish collaborative Research and Development (R&D) projects with the private sector for cost-sharing of new dual-use technology development.

This program is in Budget Activity 4, Advanced Component Development and Prototypes (ACD&P) because efforts are necessary to evaluate integrated technologies, representative modes or prototype systems in a high fidelity and realistic operating environment.

B. Program Change Summary (\$ in Millions)	FY 2014	FY 2015	FY 2016 Base	FY 2016 OCO	FY 2016 Total

Change Summary Explanation

C. Accomplishments/Planned Programs (\$ in Millions)

The FY2016 funding request was reduced by \$0.721 million to account for the availability of prior execution balances.

Title: Technology Transfer	2.531	2.669	3.512
Description: Enhance and expand transfer of technologies between DoD and the commercial sector.			
FY 2014 Accomplishments: Promoted and brokered patent license agreements and Cooperative Research and Development Agreements (CRADAs) between DoD Labs and industry for development of technology with both commercial and military applications. Examples are multiple patent licenses to industry for DoD and commercial use of the Aortic Occlusion System for emergency treatment of non-compressible internal hemorrahging and providing assistance to a small business on the development of the Intermittent Fault Detection and Isolation System (IDIS).			
FY 2015 Plans: Continue to actively promote and broker CRADAs between DoD labs and industry for development of technology with both commercial and military applications. This activity will particularly focus on non-traditional defense contractors and is intended to help lower the expense of new defense-related technology development through cost-sharing with industry and to help DoD benefit from private-sector technology investments and innovations. Continue to actively market DoD-developed technologies to U.S. companies and establish Patent License Agreements to commercialize these technologies for both civilian and military application.			
FY 2016 Plans: Continue to actively promote and broker CRADAs between DoD labs and industry for development of technology with both commercial and military applications. This activity will particularly focus on non-traditional defense contractors and is intended to help lower the expense of new defense-related technology development through cost-sharing with industry and to help DoD benefit from private-sector technology investments and innovations. Continue to actively market DoD-developed technologies to U.S. companies and establish Patent License Agreements to commercialize these technologies for both civilian and military application.
