**Section 332 Report**

Report on Defense Business System Modernization  
FY 2005 National Defense Authorization Act, Section 332

**This report Does Not Include Investments that are Classified as a National Security System (NSS)**

**If you have any question regarding NSS Investments please Call 703-695-3938 or email [osd.Pentagon.dod-CIO.mbx.dcio-ra-rpb@mail.mil](mailto:osd.Pentagon.dod-CIO.mbx.dcio-ra-rpb@mail.mil)**

Introduction

This report fulfills the requirement of 10 USC 131, Section 2222, "Defense business systems: Architecture, Accountability, and Modernization," subsection (h), "Budget Information," of each defense business system program for which funding is proposed in the FY 2018 IT budget.

The DoD's Select Native Programming Data System for Information Technology (SNaP-IT), DoD IT Portfolio Registry (DITPR), and Defense Business Council (DBC)/Investment Review Board certification data was used as the basis for reporting the information required under subsection (h). SNaP-IT is also the same application that collects and assembles the information required in support of the IT budget request submitted to Congress under section 1105 or title 31, for fiscal year 2018.

Section 332 defines Defense Business Systems in a slightly broader context than does SNaP-IT. Section 332 definition includes "IT and IA Infrastructure used to support business activities" while SNaP-IT categorizes both Infrastructure and IA as separate investment types. Within the DoD, the Enterprise Information Environment Mission Area (EIEMA) supports both warfighting and business systems and is not readily severable into business vs. warfighting infrastructure; similarly IA initiatives and investments in the EIEMA (such as Public Key Infrastructure) support both warfighting and business domains. Hence, the SNaP-IT definition of "Business Applications" is the basis for reporting the "Defense Business Systems" as defined in section 332.
