| As the host unit at Andersen Air Force Base (Joint Region Marianas), Guam, the 36th Wing has an expansive mission that relies on the Team Andersen concept to provide the highest quality peacetime and wartime support to project global power and reach from our vital location in the Pacific. Andersen is home to the 36th Wing, Air Mobility Command's 734th Air Mobility Support Squadron, Naval unit Helicopter Sea Combat Squadron Twenty Five (HSC-25) and several other tenant organizations. Andersen Air Force Base will also support elements of III Marine Expeditionary Force (1st Marine Aircraft Wing units). |                                              |      |     |              |                                                       |                      |                |                                     |     |                   |

| Facilities will be designed to meet or exceed the useful life specified in DoD Unified Facility Criteria. Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                              |                           |                                      |                        |
| <b>11. Requirement:</b> <u>1,933 m2</u> <b>Adequate:</b> <u>0 m2</u> <b>Substandard:</b> <u>0 m2</u><br><b>PROJECT:</b><br>This project constructs a low rise combined indoor HITT and dining facility at the North Ramp.<br><b>(New Mission)</b><br><b>REQUIREMENT:</b><br>The 2009 Guam International Agreement was amended in October 2013 between the United States Government and the Government of Japan. The agreement outlines the realignment of Marine Corps forces to reduce the United States military footprint on Okinawa, including the relocation of forces from Japan to Guam. The Guam Master Plan was completed in June 2014 to ensure all operational, base support, training, and quality of life requirements and support facilities and infrastructure were identified and sited. A dining and HITT facility is required to support active duty personnel that will be working at North Ramp.<br><b>CURRENT SITUATION:</b><br>There are limited facilities at NSA AAFB North Ramp that can accommodate these requirements. The majority of the active duty personnel that will be working at North Ramp will be UDP, and therefore require support facilities within walking distance.<br><br>This project is not sited in a 100-year flood plain.<br><b>IMPACT IF NOT PROVIDED:</b><br>This project is critical in providing dining and training facilities for PCS and UDP units that will operate at AAFB North Ramp. Units/activities will not vacate their current facilities on Okinawa until new replacement and support facilities in Guam have been completed, inspected, accepted, and out-fitted. Failure to complete this project on time may delay or prevent relocation from occurring. |                                              |                           |                                      |                        |

Category Code<br>42122                    | 7. Project Number<br>P290 | 8. Project Cost (\$000)<br>52,270           |                        |
| <p>Constructs two open partially covered operations pads with lightning protection system (LPS), grounding and electrical service - one stuff/unstuff pad, and one ordnance pad. The two pads will be constructed of Portland cement concrete (PCC) slabs on grade, partially covered by roof overhang covers constructed of reinforced concrete roof slabs supported by reinforced concrete beams, columns and foundations.</p> <p>Constructs an ammunition rework and overhead shop.</p> <p>Built-in equipment includes built in grounded assembly tables.</p> <p>This project will provide Anti-Terrorism/Force Protection (AT/FP) features and comply with AT/FP regulations, and physical security mitigation in accordance with DoD Minimum Anti-Terrorism Standards for Buildings. User Generated Unit Costs were used for this project and include the cost of features to meet the minimum DoD AT/FP standards. The magazines will be designed to resist sympathetic detonation from blast pressures generated from adjacent magazines.</p> <p>Special costs include post construction contract award services (PCAS), geospatial surveys and mapping, and Guam gross receipts tax.</p> <p>Operations and Maintenance Support Information (OMSI) is included in this project.</p> <p>Site preparation includes clearing and grubbing, earthwork, temporary sediment and erosion control, construction of earth berms and disposal of soil below new construction footprint.</p> <p>Paving and site improvements consists of roadway reconstruction of B and C avenues, road resurfacing of Ninth and Fifteenth Streets, concrete aprons, security fencing and gates, and landscaping.</p> <p>Electrical utilities include primary and secondary distribution systems, transformers, connection for portable back-up, emergency generator and telecommunications distribution.</p> <p>Mechanical utilities include foundation wall drains, shallow depressions, and swales for storm water disposal.</p> <p>Environmental mitigation includes natural and cultural resource mitigation, to include direct and programmatic mitigations required by the Record of</p> |                                              |                           |                                             |                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                              |                           |                                             |                        |

| <b>REQUIREMENT:</b><br>The 2009 Guam International Agreement was amended in October 2013 between the United States Government and the Government of Japan. The agreement outlines the realignment of Marine Corps forces to reduce the United States military footprint on Okinawa, including the relocation of forces from Japan to Guam. The Guam Master Plan was completed in June 2014 to ensure all operational, base support, training, quality of life requirements, support facilities and infrastructure were identified and sited. The Military Munitions Annex to the Guam Joint Military Master plan was completed in June 2009, it was used as a supplement to the Guam Master Plan. The annex identifies and reduces explosives safety risks from military munitions.<br><br>This projects is required to meet the munitions storage and assembly operations to meet the Marine Corps mission on Guam. |                                              |                           |                                             |                        |
| <b>CURRENT SITUATION:</b><br>USMC munitions storage and assembly operations are currently conducted afloat and at USMC bases located on Okinawa, Japan. The United States and Japanese governments have bilaterally agreed to relocate USMC units from                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                              |                           |                                             |                        |

| <p>Okinawa to Guam. Basic Facility Requirements for Category Code Number 421-22 and 216-10 were established in October 2016 to provide adequate capacity to store retail ammunition at the installation, which includes Class V(W) [Ground] and Class V(A) [Aviation] ordnance for both Aviation Training Relocation (ATR) and non-ATR requirements. The USMC currently lacks the facilities necessary to meet the requirements.</p> <p>This project is not sited in a 100-year flood plain.</p> <p><b>IMPACT IF NOT PROVIDED:</b></p> <p>Units/activities will not vacate their current facilities on Okinawa, Japan until new replacement and support facilities in Guam have been completed, inspected, accepted and out-fitted. Failure to complete this project on time may delay or prevent the relocation from occurring.</p> |                                       |                           |                                             |                        |

| <p>conditioning or ventilation system, telecommunication systems to support unclassified and classified networks that deliver voice, video, collaboration, and building management services. Building telecommunication systems include include Secret Internet Protocol Router Network (SIPRNET), infrastructure for Intrusion Detection System and infrastructure for Access Control System.</p> <p>This project will provide Anti-Terrorism/Force Protection (AT/FP) features and comply with AT/FP regulations, and physical security mitigation in accordance with Department of Defense (DoD) Minimum Anti-Terrorism Standards for Buildings.</p> <p>Special costs include Post Construction Contract Award Services (PCAS), geospatial surveys and mapping, and Guam gross receipts tax.</p> <p>Operations and Maintenance Support Information (OMSI) is included in this project.</p> <p>DoD and Department of the Navy principles for high performance and sustainable building requirements will be included in the design and construction of the project in accordance with federal laws and Executive Orders. Low Impact Development (LID) will be included in the design and construction of this project as appropriate.</p> <p>Site preparation includes site clearing, green waste recycling and management, earthwork and temporary erosion/sediment control, overexcavation and removal of pesticide contaminated soils.</p> <p>Electrical utilities include primary and secondary distribution systems, area lighting, grounding, Lightning Protection System (LPS), connection for portable back-up emergency generator, transformers and telecommunication infrastructure.</p> <p>Mechanical utilities include a water distribution system, fire hydrants, sanitary sewer, septic tank and effluent disposal system, storm water depressions and swales.</p> <p>The project demolishes existing Building #9100, 230.77 M2 (ordnance operations building). Building #9100 cannot be economically renovated and will be demolished to provide space for the new construction.</p> <p>Environmental mitigation includes natural and cultural resource mitigation,</p> |                                              |                           |                                   |                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                              |                           |                                   |                        |

| <p>to include direct and programmatic mitigations required by the Record of Decision, Biological Opinion (BO)and Programmatic Agreement. Soil testing, remediation and mitigation for Unexploded Ordnance and Munitions and Explosives of Concern are included in the project.</p> <p>Facilities will be designed to meet or exceed the useful service life specified in DoD Unified Facility Criteria. Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                              |                           |                                   |                        |
| <p><b>11. Requirement:</b> <u>1,103 m2</u> <b>Adequate:</b> <u>0 m2</u> <b>Substandard:</b> <u>0 m2</u></p> <p><b>PROJECT:</b></p> <p>Constructs an inert storage facility and an ordnance operations building to meet USMC ordnance handling requirements.</p> <p><b>(New Mission)</b></p> <p><b>REQUIREMENT:</b></p> <p>The 2009 Guam International Agreement was amended in October 2013 between the United States Government and the Government of Japan. The agreement outlines the realignment of Marine Corps forces to reduce the United States military footprint on Okinawa, including the relocation of forces from Japan to Guam.</p> <p>The Guam Master Plan was completed in June 2014 to ensure all operational, base support, training, quality of life requirements, support facilities and infrastructure were identified and sited. The Military Munitions Annex to the Guam Joint Military Master plan was completed in June 2009, it was used as a supplement to the Guam Master Plan. The annex identifies and reduces explosives safety risks from military munitions.</p> <p>This project is requiried to meet the USMC munitions maintenance and assembly operations on Guam.</p> <p><b>CURRENT SITUATION:</b></p> <p>USMC munitions maintenance and assembly operations are currently conducted at bases located on Okinawa, Japan. The United States and Japanese governments have bilaterally agreed to relocate USMC units from Okinawa to Guam. The USMC currently lacks the facilities necessary to meet the requirements on Guam.</p> <p>This project is not sited in a 100-year flood plain.</p> <p><b>IMPACT IF NOT PROVIDED:</b></p> |                                              |                           |                                   |                        |

| <p>Constructs an Automated Multipurpose Machine Gun Range (MPMG), on the Live-Fire Training Range Complex at Northwest Field. The project consists of a multi-lane machine gun range (MGR) with multiple target emplacements in each lane. The targets will be a mix of the following: single stationary infantry target (SIT) emplacements, double SIT emplacements, moving infantry target emplacements, and stationary armored target emplacements.</p> <p>Additional structures in support of the MGR include a range control tower, an ammunition distribution point, and an enclosed-covered bleacher area. Facilities will be pre-cast concrete or cast-in-place concrete, low-rise facilities with slab on grade foundations, reinforced concrete roofing, windows, mechanical and electrical systems.</p> <p>The facilities will provide Anti-Terrorism/Force Protection (AT/FP)</p> |                                              |                           |                                       |                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                              |                           |                                       |                        |

| <p>features and comply with AT/FP regulations, and physical security mitigation in accordance with DoD Minimum Anti-Terrorism Standards for Buildings.</p> <p>Special costs include Post Construction Contract Award Services (PCAS), Guam Gross Receipts Tax, and geospatial surveys and mapping.</p> <p>Operations and Maintenance Support Information (OMSI) is included in this project.</p> <p>Department of Defense (DoD) and Department of the Navy (DoN) principles for high performance and sustainable building requirements will be included in the design and construction of this project in accordance with federal laws and Executive Orders. Low Impact Development (LID) will be included in the design and construction of this project as appropriate.</p> <p>Site preparation includes clearing, grubbing, and a temporary green waste recycling facility.</p> <p>Paving and site improvements include access roads, parking for six Medium Tactical Vehicle Replacements, gravel roads, gravel parking for approximately 10 vehicles, sidewalks and ramps, bleachers, security fencing and gates, "range hot" flag pole, trash enclosure, signage, landscaping and site demolition. In addition, two monitoring wells, drainage spillway, drainage culvert and headwalls, drainage swales and ditches, and sedimentation/infiltration basin will be included in the project.</p> <p>Electrical utilities consist of primary and secondary underground electrical distribution, area lighting and pad-mounted transformers. Targets will be controlled from the range control tower by a hardwired communication system.</p> <p>Environmental mitigation includes natural and cultural resource mitigation, to include direct and programatic mitigations required by the Record of Decision, Biological Opinion and Programmatic Agreement. Archaeological monitoring will be included in this project. Cleanup of contaminated sites within the range footprint is also included in this project.</p> <p>Unexploded ordnance and munitions and explosives of concern clearance are also included in this project.</p> <p>Facilities will be designed to meet or exceed the useful service life</p> |                                              |                           |                                       |                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                              |                           |                                       |                        |

| <p>specified in the DoD Unified Facility Code (UFC). Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                              |                           |                                       |                        |
| <p><b>11. Requirement:</b> <u>2 EA</u> <b>Adequate:</b> <u>0 EA</u> <b>Substandard:</b> <u>0 EA</u></p> <p><b>PROJECT:</b></p> <p>Constructs a multi-lane MPMG Range, a range control tower, ammunition distribution point, covered bleachers and utilities and site work.</p> <p><b>(New Mission)</b></p> <p><b>REQUIREMENT:</b></p> <p>The 2009 Guam International Agreement was amended in October 2013 between the United States Government and the Government of Japan. The agreement outlines the realignment of Marine Corps elements to reduce United States military footprint in Okinawa, including the relocation of forces from Japan to Guam. The Guam Master Plan was completed in June 2014 to ensure all operational, base support, training, quality of life requirements, support facilities, and infrastructure were efficiently identified. The majority of the MCB Guam northern area is undeveloped and requires significant site improvements, grading, earthwork, utility infrastructure, fencing and roadways to support construction. The range will meet training requirements for weapons system qualification for service rifles, automatic rifle, light, medium and heavy machine guns, sniper rifles and grenade launchers and is critical for sustainment of Common Skills and Military Occupational Specialty based Training and Readiness requirements and will ensure that combat readiness for USMC personnel on Guam.</p> <p><b>CURRENT SITUATION:</b></p> <p>Currently, Guam does not have an MPMG Range to accommodate the anticipated sustainment level of Common Skills and MOS based Training and Readiness throughput requirements as a result of USMC active duty personnel relocating to Guam.</p> <p>This project is not sited within a 100-year flood plain.</p> <p><b>IMPACT IF NOT PROVIDED:</b></p> <p>Weapons training and qualification are essential components of Marine Corps readiness. Without a proper training range capable of meeting training requirements, Marine Corps readiness will be severely impacted. Units/activities will not vacate their current facilities on Okinawa, Japan until new replacement and support facilities in Guam have been completed, inspected, accepted and out-fitted. Failure to complete this project on time may delay or prevent the relocation from occurring.</p> |                                              |                           |                                       |                        |

|                                                                                                                                       |                                              |                           |                                       |                        |

**12. Supplemental Data:**

A. Estimated Design Data:

1. Status:
 

|                                                          |                  |
|----------------------------------------------------------|------------------|
| (A) Date design or Parametric Cost Estimate started      | 12/2016          |
| (B) Date 35% Design or Parametric Cost Estimate complete | 05/2017          |
| (C) Date design completed                                | 12/2018          |
| (D) Percent completed as of September 2017               | 35%              |
| (E) Percent completed as of January 2018                 | 60%              |
| (F) Type of design contract                              | Design Bid Build |
| (G) Parametric Estimate used to develop cost             | Yes              |
| (H) Energy Study/Life Cycle Analysis performed           | No               |
2. Basis:
 

|                                      |     |
|--------------------------------------|-----|
| (A) Standard or Definitive Design    | No  |
| (B) Where design was previously used | N/A |
3. Total Cost (C) = (A) + (B) = (D) + (E):
 

|                                            |          |
|--------------------------------------------|----------|
| (A) Production of plans and specifications | \$7,792  |
| (B) All other design costs                 | \$6,399  |
| (C) Total                                  | \$14,191 |
| (D) Contract                               | \$11,584 |
| (E) In-house                               | \$2,607  |
4. Contract award: 03/2019
5. Construction start: 04/2019
6. Construction complete: 01/2024

B. Equipment associated with this project which will be provided from other appropriations:

**JOINT USE CERTIFICATION:**

The Director Land Use and Military Construction Branch, Installations and Logistics Department, Headquarters Marine Corps certifies that this project has been considered for joint use potential. Unilateral Construction is recommended. This Facility can be used by other components on an as available basis; however, the scope of the project is based on Department of the Navy requirements.

| <p>Naval Base Guantanamo Bay is on the front lines of the battle for regional security and protection from drug trafficking and terrorism, and protection for those who attempt to make their way through regional seas in un-seaworthy craft. The base protects the ability of US Navy and Coast Guard ships to operate in the Caribbean area with supplies and support for their operational commitments. Naval Base Guantanamo Bay has become the host to the Detainee Mission of the War on Terrorism following the September 11, 2001 terrorist attacks. The base has a unique posture in the Western Hemisphere in that it is the oldest US base outside the continental U.S. and the only one in a country that does not enjoy an open political relationship with the United States. Base also maintains: U.S. treaty obligations, a naval base for refueling ships, the fence line surrounding the base and the international shipping channel through Guantanamo Bay. Additional missions include the maintenance of a forward presence near the Windward Passage to the Caribbean and port facilities, naval airfield and staging areas on the base in support of U.S. contingency operations in the Caribbean.</p> |                                              |                      |         |                                                       |     |              |                                     |                        |     |                  |

| Constructs a lined municipal solid waste landfill with leachate management as part of a municipal solid waste management facility. Project includes an operations facility, a fully enclosed recycling, sorting and staging facility with conveyors and picking station, and lined sewage beds, all compliant with the Overseas Environmental Baseline Guidance Document (OEBGD). The facility will be capable of managing all solid waste generated |                                              |                           |                                                     |                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                              |                           |                                                     |                        |

| <p>at Naval Station Guantanamo Bay (NSGB), including but not limited to 58,000 tons/year of municipal solid waste, construction and demolition (C&amp;D) waste, asbestos, pipes, telephone poles, scrap metal, industrial wastes, scrap tires and combustible fuels.</p> <p>This project will provide Anti-Terrorism/Force Protection (AT/FP) features and comply with AT/FP regulations, and physical security mitigation in accordance with Department of Defense (DoD) Minimum Anti-Terrorism Standards for Buildings.</p> <p>Built-in equipment includes a metals recovery plant and picking station, a combustible liquid burner, an industrial tire shredder, combustible liquid filtration systems with associated above-ground storage tanks, wood grinder, an air compressor, diesel stand-by generator, a weigh scale and a vehicle/scrap metal crusher.</p> <p>Special Costs include Post Construction Contract Award Services (PCAS). Special costs also include third party commissioning.</p> <p>Operations and Maintenance Support Information (OMSI) is included in this project.</p> <p>DoD and Department of the Navy (DON) principles for high performance and sustainable building requirements will be included in the design and construction of the project in accordance with federal laws and Executive Orders. Low Impact Development will be included in the design and construction of this project as appropriate.</p> <p>Site preparation includes site clearing, and preparation and grading for landfill.</p> <p>Paving and site improvements include gravel, access road improvements and development, grading, parking, roadways, curbs, sidewalks, landscaping, fencing and signs to enclose the expanded complex to existing UFC standards. Site development will also include groundwater monitoring wells, gas monitoring probes, and necessary storm water drainage in accordance with a storm water management plan, and barrier litter fences.</p> <p>Mechanical utilities include water line, groundwater monitoring well, lift station, fire hydrant and gas monitoring probes.</p> <p>Environmental mitigation includes archeological and natural resource</p> |                                              |                           |                                                     |                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                              |                           |                                                     |                        |

| <p>violation of the OEBGD. Used cooking oil falls under the definition of Petroleum, Oil, and Lubricants (POL) in the OEBGD. POL products are required to be containerized and their release to the environment prevented per standards.</p> <p>The installation currently operates under a one year waiver to the OEBGD granted by the United States Southern Command (USSOUTHCOM) initially on 6 January 2016 and renewed in January 2017. USSOUTHCOM approval states the waiver may be extended annually as long as the installation continues to work towards a compliant solution by September 2021 per the agreed upon Plan of Action and Milestones.</p> <p>This project is not sited in a 100-year flood plain.</p> <p><b>IMPACT IF NOT PROVIDED:</b></p> <p>If an OEBGD compliant on-site solid waste management solution is not implemented, the current waiver from USSOUTHCOM will be terminated leaving NSGB without a means to handle municipal solid waste. The municipal solid waste will accumulate in an uncontrolled fashion potentially resulting in a severe public health hazard. An on-site solution is required per the OEBGD.</p> <p>The scrap tire stockpile will continue to grow, potentially representing a significant risk to the environment and public health. These risks arise from the potential fire hazard as well as the breeding ground for mosquitoes, which can carry numerous viruses (West Nile, Zika, etc.). Additionally, tire fires can be easily ignited by lightning or inadvertent sparks/flame from nearby air curtain incinerators and heavy equipment.</p> |                                              |                           |                                                     |                        |
| <b>12. Category Code<br>61070                    | 7. Project Number<br>P001 | 8. Project Cost (\$000)<br>43,950                               |                        |
| <p>Construct an addition to the existing headquarters building that include a Command Operations Center (COC), SCIF spaces, planning rooms, conference rooms, restrooms, common areas, kitchen, and break room. The building addition will be reinforced concrete, reinforced concrete slab and floors, structural steel framing, and standing seam metal roof.</p> <p>This project will provide Anti-Terrorism/Force Protection (AT/FP) features and comply with AT/FP regulations and physical security mitigation in accordance with Department of Defense (DoD) Minimum Anti-Terrorism Standards for Buildings.</p> <p>Built-in equipment includes elevators, uninterrupted power supply, lockers, fire suppression system, raised access flooring, emergency generator, and a diesel fuel tank.</p> <p>Special costs include Post Construction Contract Award Services and temporary facilities that will be constructed or purchased to be used as work around spaces for personnel and command and control functions temporarily displaced during the project work.</p> <p>Operations and Maintenance Support Information (OMSI) is included in this project.</p> <p>Department of Defense and Department of the Navy principles for high performance and sustainable building requirements will be included in the design and construction of the project in accordance with federal laws and Executive Orders. Low Impact Development will be included in the design and construction of this project as appropriate.</p> <p>Facilities will be designed to meet or exceed the useful service life specified in DoD Unified Facility Criteria. Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.</p> |                                              |                           |                                                                 |                        |

| <b>REQUIREMENT:</b><br>Provide adequate facilities to support command and control operations for MARFOREUR/AF Command Staff, G-2, G-3, G-5 and G-8 personnel. MARFOREUR/AF provides the only continually-assigned Marine component in support of U.S. European Command (USEUCOM) and U.S. Africa Command (USAFRICOM) missions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                              |                           |                                                                 |                        |
| <b>CURRENT SITUATION:</b><br>The current building was constructed in 1938. Major building components have deteriorated beyond their efficient useful life. Work spaces are inadequate and in poor condition causing overcrowding and cramped work spaces. The facility does not provide the required space for the unit's core mission of Top Secret/Sensitive Compartmented Information planning functions and command and control capability in support of USEUCOM and USAFRICOM's ongoing operations and contingency plans.<br><br>Architectural components such as doors, window frames, floors and ceilings are cracked, loose, missing, broken or not functional. Stairwell railings require repairs in order to satisfy current safety codes. The roof is deteriorated and leaking in several places. Plumbing in restrooms require frequent repairs. Flows through water supply lines and heating lines are restricted due to calcified build up. The electrical system is not reliable with frequent power outages. Distribution panels, feeder cables, light fixtures, outlets, transformers do not meet current code. |                                              |                           |                                                                 |                        |
| <b>IMPACT IF NOT PROVIDED:</b><br>The building will continue to deteriorate to the point of failure. Personnel will continue to have to work in inadequate, antiquated, and overcrowded spaces negatively impacting morale, productivity, safety and the overall mission.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                              |                           |                                                                 |                        |

| <p>Department of Defense and Department of the Navy principles for high performance and sustainable building requirements will be included in the design and construction of the project in accordance with federal laws and Executive Orders. Low Impact Development will be included in the design and construction of the project as appropriate.</p> <p>Facilities will be designed to meet or exceed the useful service life specified in DoD Unified Facilities Criteria (UFC). Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                              |                           |                                                |                        |
| <b>11. Requirement:</b> <u>2,790 m2</u> <b>Adequate:</b> <u>0 m2</u> <b>Substandard:</b> <u>0 m2</u><br><b>PROJECT:</b><br>Constructs SCIF spaces within the Aviation Support Center built by GOJ to provide a new TOC.<br><b>(Current Mission)</b><br><b>REQUIREMENT:</b><br>A TOC is required to support U.S. Pacific Command, U.S. Pacific Fleet, and U.S. Seventh Fleet assigned tasks. It shall provide various command, control, communications, computers, intelligence, surveillance and reconnaissance systems to support maritime commanders with the capability to plan, direct, and control the tactical operations of maritime patrol and reconnaissance aircraft, naval expeditionary forces, and other units within their respective areas of responsibility. Additionally, the TOC is a key component of the Navy command and control system that enables U.S. and Japanese Maritime Self Defense Force Anti-Submarine Warfare (ASW) interoperability and ultimately mission execution. This facility will house operations for Patrol and Reconnaissance Wing One Detachment, Kadena; Naval Communications Detachment, Kadena; Mobile Tactical Operations Center, and Naval Oceanography ASW Detachment.<br><b>CURRENT SITUATION:</b><br>The TOC is currently located in an old US Air Force communications building (Building #3678), which was intended to be temporary when the TOC was moved there in 1996 until a new facility could be built. The new facility was delayed until 2016 when the Aviation Support Center was constructed by GOJ as part of the Special Action Committee on Okinawa (SACO) new Navy ramp construction at Kadena Air Base. The TOC cannot move into the new building until the SCIF spaces are built.<br><br>The project is not located in the 100-year flood plain. |                                              |                           |                                                |                        |

| <b>10. Description of Proposed Construction:</b><br>Funds to be utilized under Title 10 USC 2807 for architectural and engineering services and construction design in connection with military construction projects including regular program projects, exceptional authority construction (including unspecified minor construction) projects, land appraisals, and other projects as directed. Engineering investigations, such as field surveys and foundation exploration, will be undertaken as necessary.                                                                                                                                                                                                                                                              |                                              |                           |                                       |                        |
| <b>11. Requirement:</b><br><b>PROJECT:</b><br>Planning and design funds.<br><b>(Current Mission)</b><br><b>REQUIREMENT:</b><br>All projects in a military construction program presented for approval must be based on sound engineering and the best cost data available. For this reason, design is initiated to establish project estimates in advance of program submittal to the Congress. Based on this preliminary design, final plans and specifications are then prepared. These costs for architectural and engineering services and construction design are not provided for in the construction project cost estimates except in those where Design/Build contracting method is used.<br><b>CURRENT SITUATION:</b><br>N/A<br><b>IMPACT IF NOT PROVIDED:</b><br>N/A |                                              |                           |                                       |                        |
| <b>12. Supplemental Data:</b><br>A. Estimated Design Data:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                              |                           |                                       |                        |

### Assumptions:

- 1) All Costs shown include SIOH and Contingency
- 2) Project is Design Bid Build with award in July 2019
- 3) Major Elements of Work are Breakwater/Causeway/Mole/Channel, Dredging, and Utilities
- 4) Breakwater/Causeway/Mole/Channel - 24-Month Duration
- 5) Dredging - 24-Month Duration
- 6) Dredge work overlaps with Pier and Utilities work.
- 7) Utilities - 24-Month Duration

## PROJECT SPENDING PLAN

Project: FY19 MCON P224; Causeway, Boat Channel & Turning Basin; NAVWPNSTA Seal Beach; Seal Beach, California

PA (\$000): \$117,830

As of January 2018

## PROJECT SPENDING PLAN

Project: FY19 MCON P001; Master Time Clocks & Operations Facility; Naval Observatory, District of Columbia

PA (\$000): \$115,600

As of January 2018

## PROJECT SPENDING PLAN

Project: FY19 MCON P001; Master Time Clocks & Operations Facility; Naval Observatory, District of Columbia

PA (\$000): \$115,600

As of January 2018

Note 1: -Assumes appropriation is enacted no later than mid-December of the program year.

Note 2: -Assumes project is fully funded and funds are available to the Contracting Officer for obligation no earlier than July 2019 in order to award the construction contract in August 2019.

Note 3: Assumes that the following critical elements are performed in a timely manner;

- Relocation of the clocks by the government (Times Services)
- Secret Service review and approval of security measures for construction activities

### P001 Master Time Clocks & Operations Facility; Naval Support Activity Wash; Naval Observatory, District of Columbia

## PROJECT SPENDING PLAN

Project: FY19 MCON P310; Dry Dock #1 Superflood Basin; Kittery, Maine

PA (\$000): \$109,960

## PROJECT SPENDING PLAN

Project: FY19 MCON P199 Aircraft Maintenance Hangar; Cherry Point MCAS, North Carolina

PA (\$000): \$133,970

As of January 2018

Our assumptions are:

- 1) Assumes appropriation is enacted no later than mid-December of the program year.
- 2) Assumes funds are available no later than February of the program year to accommodate the funding and acquisition timelines.

## PROJECT SPENDING PLAN

Project: FY19 MCON P235; Flightline Utility Modernization; Cherry Point MCAS, North Carolina

PA (\$000): \$106,860

As of January 2018

- 1) Assumes appropriation is enacted no later than mid-January of the program year.
- 2) Assumes funds are available no later than February of the program year to accommodate the funding and acquisition timelines.

## PROJECT SPENDING PLAN

| Jun-21     |                 | \$105,520  |                     | \$105,520  | \$1,233        | \$105,520  |

### Assumptions:

- 1) All Costs shown include SIOH and Contingency
- 2) Project is DBB with award in April 2019
- 3) Estimated construction completion date is based on one construction contract award.
- 4) U.S. Army Corp of Engineers is considering awarding the construction in two contracts vice one (one contract for the magazines and one contract for the motor transfer facility and rail line). Their draft schedule reflects one construction contract award.
5. Outlay curve would change if the project is awarded with two contracts that run in parallel.

**PROJECT SPENDING PLAN**

Project: FY19 MCON P822 D5 Missile Motor Reciept/Storage Facility; Hill AFB, Utah

PA (\$000): \$105,520

As of January 2018

**P-822 D5 Missile Motor Reciept/Storage Facility; Hill AFB, Utah**

## PROJECT SPENDING PLAN

**PROJECT:** FY19 MCON P735; Machine Gun Range; Joint Region Marianas, Guam

**PA (\$000):** \$141,287

## PROJECT SPENDING PLAN

**PROJECT:** FY19 MCON P735 Machine Gun Range; Joint Region Marianas, Guam

**PA (\$000):** \$141,287

**As of :** January 2018

### Assumptions:

- 1) Appropriation is enacted no later than mid-December of the program year.
- 2) Project is fully funded and funds are available to the contracting officer for obligation no earlier than February 2019 in order to award construction contract in March of 2019.
- 3) Section 7 and other environment cleanup secondary construction contracts are awarded no later than Mar 2019.
- 4) Section 7 and other environment cleanup by secondary construction contract is completed by Mar 2020.
- 5) Construction contractor is able to obtain required permits by Mar 2020.

**DEPARTMENT OF THE NAVY**

**FY 2019 MILITARY CONSTRUCTION PROGRAM**

**EUROPEAN DETERRENCE INITIATIVE (EDI)**

**Requirement**

The Department of the Navy supports the President's European Deterrence Initiative (EDI) to help increase the capability and readiness of U.S. allies and partners. A key enabler for contingency options is sufficiently robust infrastructure at key locations to support military activities.

| <b>10. Description of Proposed Construction:</b><br><p>Constructs a pre-engineered metal building with concrete spread footings, concrete slab on grade, concrete and insulated metal-panel exterior walls, and metal-panel roofing. The facility will be used for frozen, refrigerated, and dry storage, inbound and outbound ship cargo, and logistical office space.</p> <p>This project will provide Anti-Terrorism/Force Protection (AT/FP) features and comply with AT/FP regulations, and physical security mitigation in accordance with Department of Defense (DoD) Minimum Anti-Terrorism Standards for Buildings.</p> |                                              |                           |                                                              |                        |

| <p>NSA Souda Bay will continue to experience inefficiencies in storage, handling, and transportation of materials required by Navy units operating in the Eastern Mediterranean, by Joint forces operating in strategic contingencies and exercises, and for day-to-day supply operations. Materials stored in humid warehouses without climate control will continue to experience spoilage. Operations will continue to be exposed to higher security risks, costs, and delays associated with transporting goods from off-site facilities. Without official agreements in place, use of the existing facilities could be rescinded by Greece at any time.</p> |                                       |                           |                                                              |                        |

| <p>accordance with Department of Defense (DoD) Minimum Anti-Terrorism Standards for Buildings.</p> <p>Special costs include Post Construction Contract Award Services(PCAS). Special costs also include temporary facilities for Air Operations and administrative personnel during construction, hazardous material survey, and third party commissioning.</p> <p>Operations and Maintenance Support Information (OMSI) is included in this project.</p> <p>Department of Defense and Department of the Navy principles for high performance and sustainable building requirements will be included in the design and construction of the project in accordance with federal laws and Executive Orders. Low Impact Development (LID) will be included in the design and construction of this project as appropriate.</p> <p>Site preparations includes site clearing, excavation, grading, and demolition of existing concrete apron and site utilities.</p> <p>Paving and site improvements include asphalt paving, concrete apron, sidewalks and pavers, landscaping, and LID.</p> <p>Demolition includes Building #6 Air Ops Supply (5,616 SF), Building #5 Air Ops (14,862 SF), Building #22 Air Terminal (4,188 SF) and Building #34 Canopy (2,511 SF) to clear the site for this project. Temporary facilities (T-13, T-16 and T-24) will also be demolished as part of this project.</p> <p>Facilities will be designed to meet or exceed the useful service life specified in DoD Unified Facility Criteria (UFC). Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.</p> |                                              |                           |                                                              |                        |

| <p>This project will consolidate the installation's core air operations and air transportation functions by providing facilities which can fully support increases in throughput traffic. NSA Souda Bay is a key USTRANSCOM Joint Deployment and Distribution Enterprise node to support missions in Eurasia, the Middle East, and Africa.</p> <p>The air passenger terminal needs to be able to process at least 30,000 passengers per year and support one wide-body passenger aircraft (approximately 300 passengers and baggage/gear) and four wide-body cargo aircraft at a time. In addition to passenger related functions, air operations use the terminal for various command and control functions.</p> <p><b>CURRENT SITUATION:</b></p> <p>The existing air passenger terminal was built in 1959, with two major additions to the building in 1995 and 2002. The facility is seismically unsafe. The existing facility cannot support all air operations functions and does not have the required visibility to the flightline for monitoring of activity.</p> <p>The existing warehouse facility used for handling, processing, and storing cargo that is being transported to and from aircraft is undersized. These functions are currently performed outdoors and exposed to weather.</p> <p>This project is not sited in a 100-year flood plain.</p> <p><b>IMPACT IF NOT PROVIDED:</b></p> <p>The existing dysfunctional and undersized facilities will continue to create operational constraints and inefficient air passenger operations. Passengers and personnel will continue to be exposed to higher risk of injury because of seismic deficiencies. Air cargo capabilities will continue to be extremely limited, with no surge capabilities for exercises, emergencies or contingencies. Air cargo requirements will continue to exceed the available space while greatly jeopardizing turn-around time-lines and efficiencies as automated cargo handling systems cannot be installed within the undersized facility. Cargo will be stored outdoors on the flightline. Supplies to support transient aircraft will continue to be stored in a non-secure rubber building. Resupply of aircraft will take additional time due to the poorly designed support infrastructure.</p> |                                              |                           |                                                              |                        |                                                     |         |                                                          |         |                           |         |

| JOINT USE CERTIFICATION:<br>The Regional Commander certifies that this project has been considered for joint use potential. Unilateral Construction is recommended. This Facility can be used by other components on an as available basis. However, the scope of the project is based on Navy requirements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                              |                           |                                                              |                        |                  |                  |                  |  |                     |               |                     |                     |                            |     |      |       |                                |     |      |       |                                   |     |      |       |                              |     |      |     |

| <p><b>10. Description of Proposed Construction:</b></p> <p>Constructs a pre-engineered single-bay wash hangar to house one P-8A aircraft. The facility will include steel-framed construction insulated steel sidings and roof and concrete foundation and floors.</p> <p>Renovates existing taxiways to accommodate P-8A aircraft. Existing taxiways and shoulders will be widened.</p> <p>Constructs an austere unaccompanied housing facility to accommodate 70 personnel. Berthing modules are intended for variable occupancy based on rank. The facility will be a multi-story steel framed building with reinforced concrete foundation and brick veneer in a style compatible with existing quarters in the area.</p> <p>Constructs a concrete aircraft parking apron that supports powered on and off operations for two P-8A aircraft.</p> <p>Constructs an automatic taxi-through, treadle operated, and fresh water deluge system aircraft rinse facility, with automatic controls, water storage reservoirs, and pumping station.</p> <p>Renovates existing runways to accommodate P-8A aircraft. Runway thresholds will receive full-depth concrete pavement and subbase replacement.</p> <p>Constructs a one-story pre-engineered metal building line shack facility.</p> <p>Constructs one-story masonry aerial engineering flight building.</p> <p>This project will provide Anti-Terrorism/Force Protection (AT/FP) features and comply with AT/FP regulations, and physical security mitigation in accordance with DoD Minimum Anti- Terrorism Standards for Buildings.</p> <p>Special costs include Post Construction Contract Award Services (PCAS) and temporary site dewatering.</p> <p>Operations and Maintenance Support Information (OMSI) is included in this project.</p> <p>Department of Defense (DoD) and Department of the Navy (DON) principles for high performance and sustainable building requirements will be included in the design and construction of the project in accordance with federal laws and Executive Orders. Low Impact Development (LID) will be included in the</p> |                                              |                           |                                                |                        |

Category Code<br>21104                    | 7. Project Number<br>P312 | 8. Project Cost (\$000)<br>79,130              |                        |
| <p>Existing airfield pavements were designed to support much lighter and smaller fighter aircraft. Introduction of the heavier and larger P-8A aircraft to the airfield will reduce the life of the pavement. Existing taxiways are of sufficient structural capacity P-8A aircraft; however, they do not meet width requirements. Additionally, there is an earthen embankment along the north taxiway where the transverse slope exceeds limits, increasing risk of part of an aircraft coming in contact with the embankment.</p> <p>The existing parking apron and the alternative parking area (Taxiway Lima) are not of sufficient size to provide proper clearances for a P-8A aircraft to power into and out of their designated parking spots.</p> <p>There is no post-flight aircraft rinse facility or maintenance/wash hangar of sufficient size and configuration to support routine and unscheduled maintenance of P-8A aircraft during extended duration deployments. These facilities are required to mitigate accelerated aircraft corrosion from low-level over-water operations after each flight and protect maintenance personnel from extreme wind and weather conditions during maintenance evolutions.</p> <p>There are not sufficient quarters to accommodate the additional personnel associated with extended duration deployments, and due to its remote location options for off-base lodging are extremely limited.</p> <p>The project is not sited within a 100-year flood plain.</p> <p><b>IMPACT IF NOT PROVIDED:</b></p> <p>Failure to upgrade the runway threshold will result in a significant increase in the rate of runway pavement deterioration due to the movement of the much heavier and larger P-8A aircraft over the threshold. Significant damage caused by P-8A aircraft movement may require closing down the runway for a substantial period to perform necessary repairs, resulting in severe harm aircraft operations. Unless taxiways are widened, P-8A aircraft will have to back-taxi along the runways, significantly extending the period of time the runway will be closed to take-offs and landings. Access to the parking apron will continue to be restricted resulting in P-8A aircraft having to park on Taxiway Lima, which requires the aircraft to be parked nose to tail. This alternative parking area is not wide enough for aircraft to taxi past each other, causing unnecessary movement of aircraft and operational delays.</p> <p>The inability to provide lodging for a full detachment of flight crews and</p> |                                              |                           |                                                |                        |

| <p>construction of this project as appropriate.</p> <p>Site preparations include demolition of existing concrete and asphalt pavement.</p> <p>Paving and site improvements include taxiway and apron striping, mooring eyes for aircraft tie-downs, grounding points, and paving runway shoulders.</p> <p>Electrical utilities include replacing taxiway lighting systems.</p> <p>Mechanical utilities include repairing the storm water drainage system servicing the taxiways and apron.</p> <p>Facilities will be designed to meet or exceed the useful service life specified in DoD Unified Facility Criteria. Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                              |                           |                                       |                        |
| <b>11. Requirement:</b> <u>232,236 m2</u> <b>Adequate:</b> <u>0 m2</u> <b>Substandard:</b> <u>0 m2</u><br><b>PROJECT:</b><br>Upgrade existing aircraft taxiways and parking apron to allow sustained operations of the P-8A Poseidon Aircraft and other aircraft.<br><b>(New Mission)</b><br><b>REQUIREMENT:</b><br>Full depth pavement replacement and subgrade upgrade is required to strengthen taxiways and key aprons to accommodate P-8A operations. The existing taxiways and parking aprons will experience accelerated deterioration from P-8A operations due to the aircraft's weight and wheel loads.<br><b>CURRENT SITUATION:</b><br>NAS Sigonella is a main hub for maritime patrol, intelligence surveillance and reconnaissance, and strategic lift operations in the EURAFSWA area of operation in support of Fleet steady state and contingency requirements. All taxiways are in poor condition. The parking apron designated for P-8A parking is in very poor condition especially near the new P-8A hangar and wash rack. In addition, the parallel taxiway does not have operational taxiway lights, increasing risk to airfield operations.<br><br>This project is not located in a 100-year flood plain.<br><b>IMPACT IF NOT PROVIDED:</b> |                                              |                           |                                       |                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                              |                           |                                       |                        |

| <p>Without the new taxiway and apron improvement, pavement conditions will aggressively deteriorate due to the heavy load imposed by the P-8A aircraft. Airfield operations will incur considerable risk for all joint forces using the airfield. After two years of continuous P-8A operation, the pavement condition for all taxiways and apron is projected to be very poor. This scenario will result in very limited airfield operation and possibly runway closure due to inability of aircraft to taxi from the runway to the parking aprons. Airfield limitation or closure negatively affects required steady state and contingency missions hosted by NAS Sigonella.</p> |                                              |                           |                                       |                        |

| <p>Constructs a one-story reinforced concrete structure with insulated concrete walls finished with stucco, steel-framed clay tile roof, and shallow foundation system. The facility will house port operations and will include a small craft maintenance high-bay area, boatswain locker, workshops, storage areas, oil spill response area, hazardous supply and hazardous waste storage area, administrative space, bunk rooms, multipurpose training room, and a tower for view of the port and bay. The facility also incorporates space for Spanish port operations, including</p> |                                              |                           |                                                     |                        |

| <p>completion of the new facility. Hazardous building material testing and abatement will be required prior to general demolition.</p> <p>Facilities will be designed to meet or exceed the useful service life specified in DoD Unified Facility Criteria (UFC). Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                              |                           |                                                     |                        |
| <p><b>11. Requirement:</b>    <u>4,407 m2</u>    <b>Adequate:</b>    <u>0 m2</u>    <b>Substandard:</b>    <u>0 m2</u></p> <p><b>PROJECT:</b></p> <p>Constructs a port operations building and a ship services support building for the Forward Deployed Regional Maintenance Command (FDRMC).</p> <p><b>(Current Mission)</b></p> <p><b>REQUIREMENT:</b></p> <p>Naval Station Rota requires facilities for intermodal management of port operations which coordinates multi-modal access for military aircraft, vehicles, and ordnance movement between the port and airfield, to meet DON and NATO ship requirements, and to improve coordination with Spanish port and NATO operations.</p> <p>The FDRMC requires facilities to support maintenance of four Ballistic Missile Defense capable Aegis destroyers.</p> <p><b>CURRENT SITUATION:</b></p> <p>Naval Station Rota is a tenant within Spanish base Naval de Rota and all port related operations need host nation approval requiring daily coordination. U.S. Navy port operations are conducted in six buildings on Pier 1 and segregated from Spanish port operations. Current facilities do not have an unobstructed view of the harbor and entrance channel, which hinders coordination of operations and increases safety and security risks.</p> <p>Building #189 was built in 1960. It has severe maintenance issues, water leaks, and lacks a fire alarm. Building #215 is a World War II-era Quonset hut. It has settlement problems and holes in the metal walls from corrosion. Port operations utilizes the majority of Building #555 for maintenance and storage. FDRMC utilizes the remainder of the facility as well as temporary facilities positioned at the waterfront. The building will be within the explosive arcs and will require hardening to continue to be used for its current functions.</p> <p>This project is not sited in a 100-year flood plain.</p> |                                              |                           |                                                     |                        |

| <b>IMPACT IF NOT PROVIDED:</b><br><p>As ship traffic into this port increases, the intermodal management and coordination of increased traffic will be further hindered by the deteriorated port operations infrastructure. Port operations will continue to operate in facilities with major maintenance issues and without the benefit of a 360 degree view of the busy harbor.</p> <p>Spanish and DON port operations and FDRMC personnel will remain in violation of Explosive Safety Quantity Distances (ESQD). Additional FDRMC personnel will not have available facilities meeting ESQD criteria and will not be allowed to be sited within the waterfront, jeopardizing the viability of current maintenance availability period and directly affecting operational readiness and required availability tempo.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                       |                           |                                                     |                        |                                                     |         |                                                          |         |                           |         |                                            |     |                                          |     |                             |                  |                                              |     |                                                |     |                                   |    |                                      |     |                                            |         |                            |       |           |         |              |         |              |       |                           |                     |                           |              |                             |     |      |    |

| <b>10. Description of Proposed Construction:</b><br>Funds to be utilized under Title 10 USC 2807 for architectural and engineering services and construction design in connection with military construction projects in the European Deterrence Initiative (EDI) Program. Engineering investigations, such as field surveys and foundation exploration, will be undertaken as necessary.                                                                                                                                                                                                                                                                                                                                                                                      |                                              |                           |                                            |                        |
| <b>11. Requirement:</b><br><b>PROJECT:</b><br>Planning and design funds.<br><b>(Current Mission)</b><br><b>REQUIREMENT:</b><br>All projects in a military construction program presented for approval must be based on sound engineering and the best cost data available. For this reason, design is initiated to establish project estimates in advance of program submittal to the Congress. Based on this preliminary design, final plans and specifications are then prepared. These costs for architectural and engineering services and construction design are not provided for in the construction project cost estimates except in those where Design/Build contracting method is used.<br><b>CURRENT SITUATION:</b><br>N/A<br><b>IMPACT IF NOT PROVIDED:</b><br>N/A |                                              |                           |                                            |                        |
| <b>12. Supplemental Data:</b><br>A. Estimated Design Data:<br>1. REQ: 8,900 SM    ADQT: None    SUBSTD: 11,600 SM                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |                                                  |                                                         |                                    |  |
| <p><b>Project:</b> Construct new ordnance magazines at Pohang AB for USMC forward-staged aviation ordnance. Primary facilities include (34) 7-bar Earth Covered Magazines (ECM). Supporting facilities include electrical utility service, access roads, site preparation, storm water drainage, perimeter security fencing, deep foundation system and demolition of existing magazines. <b>CURRENT MISSION.</b></p> <p><b>Requirement:</b> The USMC maintains forward stored aviation ordnance at Pohang AB in support of theater operational plans.</p> <p>This project directly supports operational requirements for USMC aircraft to "Fight Tonight" thus this requirement supports USFK Commander's Strategic priority 1. Deter/Defend.</p> <p>This project will modernize the magazines to current standards resulting in a net decrease in magazine footprint by area with an increase in magazine storage by volume and explosive weight capacity. The project will consolidate all of the U.S. magazines to a single site which can be enclosed by a security fence providing internal Munitions Storage Area (MSA) access control. The consolidated magazine footprint will reduce the explosive safety quantity distance arcs thereby reducing the total number of exposed sites encumbered by the MSA. The project will create a safe haven which currently does not exist.</p> <p><b>Current Situation:</b> The ordnance is currently stored in a MSA that is comprised of (35) undefined ECMs and (15) Above Ground Magazines (AGM). The (50) US magazines are collocated in the MSA with (49) ROK magazines.</p> <p>Use of the MSA is provided to USMC under a Memorandum of Understanding (MOU) between ROK, Ministry of National Defense (MND) and the U. S. Department of Defense (DoD) dated 1988. FASC Task 3244A is in the process of updating the MOU and property agreements for use of Pohang AB.</p> <p>Four broad issues exist with the MSA.</p> <ol style="list-style-type: none"> <li>1. The conditions of the individual magazines are poor. The magazines were built in 1967 and are not in compliance with current approved magazine designs. Additionally, the magazines are subject to numerous maintenance issues that have resulted in seven ECMs not being utilized due to safety and security concerns.</li> <li>2. Developable space that does not impact operations within MSA is limited. Generally, the capacity of the magazines is limited by Net Explosive Weight (NEW) and not physical space which requires the use of more magazines to support the ordnance load plan than would be required if they met current designs. Recently, the ROK Navy constructed two magazines in the vicinity of U.S. magazines that violate the inter-magazine distances thereby preventing use of two additional U.S. magazines.</li> <li>3. The MSA operates under a Chief of Naval Operations (CNO) exemption. A Munitions Risk Assessment (MRA) was conducted in June 2015 identifying the potential risk of damage to infrastructure, facilities (civilian homes, industrial buildings, and agriculture), and personnel amounting to more than \$29 million.</li> <li>4. The ROKMC has identified intent to construct eleven new ROK magazines in the MSA. Given the current U.S. magazine footprint, the ROK magazines will be constructed on a site that will expand the combined Explosive Safety Quantity-Distance (ESQD) arcs to encompass the ROKMC training and education group campus thereby significantly increasing the explosive safety risk of the entire MSA. Alternative sighting can only be achieved by reducing the U. S. footprint.</li> </ol> |  |                                                  |                                                         |                                    |  |

**Impact If Not Provided:**

U. S. forward staged munitions will continue to be stored in the existing magazines. The foot print of the U. S. magazines will continue to restrict ROKMC storage capacity growth resulting in an expansion of the total explosive safety risk for the MSA. Magazines that are no longer usable due to safety and encroachment will continue to be unusable.

**ADDITIONAL:**

1. This project has been considered for joint use potential. This facility will be available for use by other components.
2. This project is located on an enduring installation which will be retained by United States Forces Korea for the foreseeable future. FASC Task 3244A is in negotiation and will include real estate agreements that will provide USFK with joint or exclusive use real estate to support construction of new magazines in the MSA.
3. The possibility of Host Nation funding has been addressed. Funds from Host Nation programs are available to support this requirement. All known alternatives were considered during development of this project. No other feasible alternative could meet mission requirements. Therefore, an economic analysis was not needed or conducted.
4. Explosive safety site approval is required prior to construction of this project. No portion of the proposed facility is intended for Republic of Korea personnel exclusive or primary use.
5. Supporting facilities costs exceeds 25% of the primary facility due to the significant earthworks associated with developing the site to support the primary facilities.

| <p><b>10. DESCRIPTION OF PROPOSED CONSTRUCTION:</b></p> <p>Utilize host-nation funding to construct an indoor training pool facility at the location of the existing outdoor swimming pool that meets the requirements of NAVMED P-5010-4, Chapter 4 Swimming Pools and Bathing Places.</p> <p>The project includes a 25 meter, 4-lane pool with water filtration/ recirculation system, earth anchors, metal structural frame enclosure and concrete pile foundations. An indoor training pool is provided as an appropriate facility at commands where training requirements demand aquatic capabilities and year-round use of a weather protected facility. The project includes site improvements such as retaining walls, fencing, paving, walkways and utilities.</p> <p>The indoor training pool is designed to be structurally independent of, yet aesthetically compatible with the adjacent gymnasium (S-829). The training pool consists of a high-bay open structure with a climate</p> |  |                                                          |                                                  |                                          |              |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                          |                                     |

PROJECT TITLE :<br><b>INDOOR TRAINING POOL</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                          | 4. PROJECT NUMBER<br><b>N19R950</b> |
| <p>controlled environment for the aquatic training operations. The indoor pool enclosure will house a 25 meter 4-lane pool, filtration/pump room, pool equipment storage and an office for the pool management staff. The filtration/pump room houses a recirculation system that supplies a sanitary body of water for the pool. The filter equipment consists of pumps, filtration and treatment equipment and a surge tank located below the surface level of the pool water.</p> <p>The pool ranges in depth from 1 meter in the shallow area to approximately 6 meters in the deepest. The training program requires a 4.5 meter high training platform and a 6 meter deep diving pool area. Lane lines and signage that guides swimmers with alerts when approaching the 6 meter water depth will be provided.</p> <p>A proper overflow gutter and/or a skimmer will be provided to remove floating debris and oils. In consideration of future maintenance for repair or replacement of pipes, pipe pit is designed allowing physical access by maintenance personnel and will also reduce the risk of unnecessary removal of the concrete slab.</p> <p>COMFLEACT Chinhae has a known record of sub-soil radon content. Radon mitigation techniques will be adopted per NAVRAMP Guidebook for Naval Shore Installations. Both active and passive mitigation methods will be incorporated including passive barrier, sub-slab suction system and vertical suction stack.</p> |                                                          |                                     |

| <b>PROJECT:</b> Construct an indoor training pool facility. (New Mission)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                          |                                     |
| <p><b>REQUIREMENTS:</b></p> <p>The indoor training pool is required to meet the sailor's Physical Readiness Testing (PRT)/ Personal Fitness Assessment (PFA), Second Class Swimmer's Certification, spot certifications on Search and Rescue (SAR) training, and Explosive Ordnance Disposal (EOD)/ Sea, Air, Land (SEAL) use. These training tests and certifications can only be conducted in a standard 25 or 50 meter swimming pool, with a 25 meter 4-lane pool being suitable for the existing site's condition.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                          |                                     |
| <p><b>CURRENT CONDITION:</b></p> <p>The existing pool is approximately +21 meter in length, 1.5 to 2.6 meter in depth, and is insufficient to support the requirements associated with the training program for Second Class Swimmer's Certification. It also does not meet the depth requirements for PRT/PFA certification. Because of this, the training program has been conducted off-base in commercial facilities or Republic of Korea (ROK) Navy facilities. For the Dive/SEAL training and certification program, personnel are required to travel to Sasebo, Nagasaki to accomplish the training and certification program.</p> <p>Considering the typical operation of outdoor pools, the facility can only operate from Memorial Day to Labor Day thus limiting the opportunity to perform training during off seasons.</p> <p>The existing outdoor pool was constructed in 1991 for recreational purpose mainly. The existing pool shows evidence of aging and deterioration and is routinely losing its body of water, aside from natural evaporation and splash-out. This indicates pool leakage is happening over time, which requires continuous monitoring, maintenance and repair.</p>                                                                                                                                                                                                                                                                          |                                                          |                                     |
| <p><b>IMPACT IF NOT PROVIDED:</b></p> <p>If this project is not provided, the current inadequate facility will not support fitness training and certification requirements. It is not viable to continuously use off-base facilities for training and certification needs. The existing pool was designed for recreation and exercise purpose and does not meet the demand for training criteria.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                          |                                     |

**This exhibit is submitted in response to House Report 115-188, “The Military Construction, Veterans Affairs, and Related Agencies Appropriations Bill, 2018”, page 28, which states: “*Parking issues at DOD facilities - Military construction budget constraints are negatively affecting the ability of the Department of Defense to address urgent parking requirements at certain U.S. military installations. The lack of parking is a safety issue and a detriment to the well-being of the employees, both civilian and military. The committee is concerned that many DOD facilities in the Departments inventory do not have sufficient parking to meet installation requirements. Furthermore, these deficiencies can contribute to traffic congestion and are serious problems on base. The Committee is concerned that the Department does not have a coherent strategy to address the growing parking requirements at installations that have significant growth. For example, Fort Meade, which already was home to the National Security Agency (NSA), became the headquarters for the newly formed U.S. Cyber Command in 2010. By 2011, the Defense Information Systems Agency, which handles the Pentagon’s IT and communications needs, had moved onto the base. In 2005, the base had just over 33,500 employees. Today it has about 57,000, more than double the numbers of the workers at the Pentagon. As a result of this growth, parking at Fort Meade has become a serious issue. Therefore, the Secretary of Defense is directed to submit to the Committee with the fiscal year 2019 military construction budget request: an updated list of unfunded requirements for parking facilities, access control points, and road construction at DOD facilities that have serious parking, access, and road congestion issues. Finally, the Secretary is further directed to submit, with the fiscal year 2019 military construction budget request, a list of how those requirements will be incorporated into their construction requests for fiscal years 2019 through 2023.*”**

DEPARTMENT OF THE NAVY  
FAMILY HOUSING – FY 2019 BUDGET ESTIMATE  
NARRATIVE SUMMARY

The Department of the Navy (DON) request supports the operation, maintenance, leasing, privatization oversight, and construction for military family housing worldwide. This DON request reflects the Department's commitment to provide adequate homes to service members and their families. To achieve this goal, the DON must balance the revitalization of inadequate homes with the proper maintenance and upkeep of existing housing inventory, keeping it comparable to modern-day industry standards.

This budget estimate emphasizes utilizing whole-house improvement and replacement for family housing construction. The program's goal is to increase the useful life and livability of homes, ensure they are up to Department of Defense standards, making them more energy efficient and cheaper to maintain.

The DON's family housing operations request indicates the minimum funding needed to provide military families with adequate housing either through the private community or in government quarters. This funding request predominantly supports "must fund" requirements including utilities, lease contracts, service contracts, and maintenance necessary for the daily operations and upkeep of DON homes.

The DON budget request represents a program that balances modernization of inadequate units and proper sustainment of the current inventory within fiscal constraints.

|                                                           |            |
|-----------------------------------------------------------|------------|
| FY 2019 Budget Request                                    | \$419,117  |
| FY 2018 Program Budget                                    | \$411,964  |
| FY 2018 Annualized Continuing Resolution (CR) Adjustments | (\$19,720) |
| Total FY 2018 PB Request with Annualized CR Adjustments*  | \$392,244  |

Purpose and Scope

This program provides for the support of military family housing functions within the Department of the Navy.

Program Summary

Authorization is requested for:

- (1) The performance of certain construction summarized hereafter; and
- (2) The appropriation of \$419,117
  - (a) to fund this construction; and
  - (b) to partially fund certain other functions already authorized in existing legislation.

A summary of the funding program for Fiscal Year 2019 follows (\$000):

| <u>Program</u>                   | <u>Navy</u>    | <u>Marine Corps</u> | <u>DON Total</u> |

**NOTE:**

1 - The Facility Condition Index (FCI) represents the ratio of the estimated maintenance and repair requirements (M&R) to Plant Replacement Value. M&R requirements consist of that work necessary to ensure that a constructed asset is restored to a condition substantially equivalent to the originally intended and designed capacity, efficiency, or capability. FCI is expressed as a percentage between 100% (no deficiencies) to 0% (every building component/system deficient - most likely uninhabitable).

2 - Condition Assessments are conducted on a rolling basis. As results are received, condition ratings are updated. This can result in homes previously identified as "Adequate" being re-rated as "Inadequate" and vice versa.

**Explanation of Navy's Housing Investment Strategy**

Beginning in 2017, the Navy, at the direction of OSD, began utilizing the Sustainment Management System (SMS) to calculate the condition index of its family housing units. As a result of this conversion to a new asset management program, the Navy saw substantial increases in the number of homes considered to be adequate, with the EOY adequacy percentage jumping from 78% as of EOY16 to 92% as of EOY17. From FY 2018 to FY 2023, the Navy will address an additional 625 inadequate homes through various methods. This reduction is offset by a corresponding growth of 776 inadequate homes, based on modeled degradation, over the same period. However, based on current investment, the Navy is able to maintain the OSD goal of 90% of our homes as adequate over the entire FYDP.

| NOTE:<br>1 - The Facility Condition Index (FCI) represents the ratio of the estimated maintenance and repair requirements (M&R) to Plant Replacement Value. M&R requirements consist of that work necessary to ensure that a constructed asset is restored to a condition substantially equivalent to the originally intended and designed capacity, efficiency, or capability. FCI is expressed as a percentage between 100% (no deficiencies) to 0% (every building component/system deficient - most likely uninhabitable). |                        |         |         |         |         |         |         |

| NOTE:<br>1 - The Facility Condition Index (FCI) represents the ratio of the estimated maintenance and repair requirements (M&R) to Plant Replacement Value. M&R requirements consist of that work necessary to ensure that a constructed asset is restored to a condition substantially equivalent to the originally intended and designed capacity, efficiency, or capability. FCI is expressed as a percentage between 100% (no deficiencies) to 0% (every building component/system deficient - most likely uninhabitable). |                           |            |            |            |            |            |            |

<sup>1</sup> Beginning in 2017, the Navy, at the direction of OSD, began utilizing the Sustainment Management System (SMS) to calculate the condition index of its family housing units. As a result of this conversion to a new asset management program, the Navy saw substantial increases in the number of homes considered to be adequate, with the EOY adequacy percentage jumping from 78% as of EOY16 to 92% as of EOY17.

**NOTE:**

1 - The Facility Condition Index (FCI) represents the ratio of the estimated maintenance and repair requirements (M&R) to Plant Replacement Value. M&R requirements consist of that work necessary to ensure that a constructed asset is restored to a condition substantially equivalent to the originally intended and designed capacity, efficiency, or capability. FCI is expressed as a percentage between 100% (no deficiencies) to 0% (every building component/system deficient - most likely uninhabitable).

2 - Condition Assessments are conducted on a rolling basis. As results are received, condition ratings are updated. This can result in homes previously identified as "Adequate" being re-rated as "Inadequate" and vice versa.

| NOTE:<br>1 - The Facility Condition Index (FCI) represents the ratio of the estimated maintenance and repair requirements (M&R) to Plant Replacement Value. M&R requirements consist of that work necessary to ensure that a constructed asset is restored to a condition substantially equivalent to the originally intended and designed capacity, efficiency, or capability. FCI is expressed as a percentage between 100% (no deficiencies) to 0% (every building component/system deficient - most likely uninhabitable). |                           |            |            |            |            |            |            |

<sup>1</sup> Other Inventory Gains/Losses includes the addition of 768 new units being constructed by the Government of Japan in Iwakuni in support of Global Restationing.

<sup>2</sup> The Marine Corps conducts forward-looking assessments to project the requirement for improvements. These requirements are used to ensure adequate funding is available to prevent excessive units from becoming inadequate. Additional homes with a facility condition index below 80% (poor/failing condition) are not identified until the year of the projected requirement and remain inadequate only if renovations are not accomplished by the required date.

SEC.2202. FAMILY HOUSING

(a) CONSTRUCTION AND ACQUISITION.—Using amounts appropriated pursuant to the authorization of appropriations in section 2204(a) and available for military family housing functions as specified in the funding table in section 4601, the Secretary of the Navy may construct or acquire family housing units (including land acquisition and supporting facilities) at the installation or location, in the number of units, and in the amounts set forth in the following table:

Navy: Family Housing

| State | Installation | Units                           | Amount       |
|-------|--------------|---------------------------------|--------------|
| Guam  | NSA Andersen | Family Housing New Construction | \$83,441,000 |

(b) PLANNING AND DESIGN.—Using amounts appropriated pursuant to the authorization of appropriations in section 2204(a) and available for military family housing functions as specified in the funding table in section 4601, the Secretary of the Navy may carry out architectural and engineering services and construction design activities with respect to the construction or improvement of family housing units in an amount not to exceed [\$4,418,000] \$4,502,000.

SEC.2203. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

Subject to section 2825 of title 10, United States Code, and using amounts appropriated pursuant to the authorization of appropriations in section 2204(a) and available for military family housing functions as specified in the funding table in section 4601, the Secretary of the Navy may improve existing military family housing units in an amount not to exceed [\$36,251,000] \$16,638,000.

SEC.2204. AUTHORIZATION OF APPROPRIATIONS, NAVY

(a) AUTHORIZATION OF APPROPRIATIONS.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 2018, for military construction, land acquisition, and military family housing functions of the Department of the Navy, as specified in the funding table in section 4601.

(b) LIMITATION ON TOTAL COST OF CONSTRUCTION PROJECTS.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variation authorized by law, the total cost of all projects carried out under section 2201 of this Act may not exceed the total amount authorized to be appropriated under subsection (a), as specified in the funding table in section 4601.

FY19 APPROPRIATION LANGUAGE

Family Housing Construction, Navy and Marine Corps

For expenses of family housing for the Navy and Marine Corps for construction, including acquisition, replacement, addition, expansion, and extension and alteration, as authorized by law, [\$83,682,000] \$104,581,000 to remain available until September 30, [2022] 2023.

Family Housing Operations and Maintenance, Navy and Marine Corps

For expenses of family housing for the Navy and Marine Corps for operation and maintenance, including debt payment, leasing, and minor construction as authorized by law, [\$328,282,000] \$314,536,000.

DEPARTMENT OF THE NAVY  
FAMILY HOUSING - FY 2019 BUDGET ESTIMATE  
CONSTRUCTION OF NEW HOUSING

(\$000)

FY 2019 Budget Request     \$ 83,441  
FY 2018 Program Budget     \$ 43,013

Purpose and Scope

This program provides for land acquisition, site preparation, acquisition and construction, and initial outfitting with fixtures and integral equipment of new and replacement family housing units and associated facilities such as roads, driveways, walks, and utility systems.

Program Summary

Authorization is requested for:

(1) Construction of new housing at Naval Support Activity Andersen, Guam and;

(2) Appropriation of \$83,441,000 to fund this construction program.

| <p>As the host unit at Naval Support Activity Andersen (Joint Region Marianas), Guam, the 36th Wing has an expansive mission that relies on the Team Andersen concept to provide the highest quality peacetime and wartime support to project global power and reach from our vital location in the Pacific. Andersen is home to the 36th Wing, Air Mobility Command's 734th Air Mobility Support Squadron, Naval unit Helicopter Sea Combat Squadron Twenty Five (HSC-25) and several other tenant organizations. NSA Andersen will also support elements of III Marine Expeditionary Force (1st Marine Aircraft Wing units).</p> |                                           |           |      |                    |                |                     |                                      |                      |     |                  |       |

DESCRIPTION OF PROPOSED CONSTRUCTION</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                  |                            |                                                            |                        |
| <p>This project proposes to construct 48 one-story duplex buildings (96 housing units total) of reinforced concrete and/or pre-cast reinforced concrete typhoon shelter/housing structures. The 48 new duplex buildings replace an equivalent number of old housing units with 82 three-bedroom and 14 four-bedroom family housing units. The new housing units are to be designed vent-less and use hot humid design principles that apply to the Guam environment. These housing unit structures are to be built with reinforced concrete foundations, concrete floors, concrete walls, and concrete sloped roofs designed for 190 MPH wind speed, exposure D, to withstand Guam's frequent typhoons. The structures will also be constructed for Zone 4 seismic conditions. As a safety issue, service members and their families will take shelter in these housing units during typhoons.</p> <p>Other safety and health design issues that will be addressed in this project are as follows: A mechanical radon mitigation system which will comply with Environmental Protection Agency (EPA) &amp; Navy Radon Assessment Mitigation Program (NAVRAMP) standards will be provided in each housing unit. Separate emergency generator hook-up for frequent and long periods</p> |                                                  |                            |                                                            |                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                  |                            |                                                            |                        |

| <p>of electrical outages caused by high winds, power outages and typhoons will be provided. This project's housing units shall be EPA certified Energy Star. The project may require chlordane abatement pending final results of soil testing. The new duplexes will provide a significant upgrade in architectural appearance and functionality over the old housing units and will adhere to the density as described in the NSA Andersen Military Family Housing Master Plan (AJJY 14-4018).</p> <p>Exterior Building Features: One car garage with corrosion resistant door opener; concrete driveway/parking; covered screened patio with storm shutters; exterior storage; entrance porch; courtyard with privacy fencing; trash enclosure with gate and trash container tie down ring; 170 mph wind speed exposure D rated garage door, exterior doors, windows, and hinged colonial style storm shutters with polycarbonate protective back sheets; wall coatings that are mildew resistant and self-cleaning; roofing elastomeric membrane system that is mold resistant and self-cleaning; incoming telephone, cable and electrical services to building shall be protected in an exterior closet; mechanical exterior equipment shall be surrounded by solid screen wall and solid gate; exterior envelope of the housing unit to have continuous vapor barrier that goes under slabs on grade, around footings, exterior walls and soffits.</p> <p>Interior Building Features: Certified Energy Star housing, Energy Star rated appliances; energy efficient air conditioning supplemented by dehumidifier; low-flow plumbing fixtures; generator hook-up connection and separate emergency electrical system; fire protection; telephone and internet outlets; cable TV pull boxes; corrosion resistant energy efficient light fixtures; ceiling fans; minimum ceiling height 9'0"; emergency back-up lighting in living/dining areas, hallways, bedrooms and kitchen; ceramic tile flooring; paperless drywall to prevent mold growth; interior spray-on foam insulation for walls and under the roof concrete slab; vertical blinds shall be used on all windows.</p> <p>Site work shall include the installation of underground utilities for water, storm, sewer, power, cable TV, telephone and streetlights. Pad mounted transformers will be stainless steel and have decorative solid concrete enclosures with solid security gates. There will be minimum grading of the sites with roof downspouts connected to the storm drainage system. The project site shall be landscaped upon completion of work and tot lots shall be provided. Provide grading, roads, driveways, sidewalks, curbs, gutters, ramps, street lights, and signage. Construct one bus shelter. Environmental mitigation will include natural and cultural</p> |                                                  |                            |                                                            |                        |

| <p>resource mitigation, which includes Section 106 requirements and archaeological monitoring, and removal and disposal of unexploded ordnance and munitions and explosives of concern.</p> <table border="1"> <thead> <tr> <th>Paygrade</th> <th>Bedrooms</th> <th>NSF</th> <th>GSF</th> <th>GSM</th> <th>Project Factor</th> <th>Cost Per GSM</th> <th>No. Units</th> <th>(\$000) Total</th> </tr> </thead> <tbody> <tr> <td>E1-E6</td> <td>3</td> <td>1,315</td> <td>1,631</td> <td>151</td> <td>2.673</td> <td>\$1,302</td> <td>82</td> <td>43,091</td> </tr> <tr> <td>E1-E6</td> <td>4</td> <td>1,573</td> <td>1,951</td> <td>181</td> <td>2.673</td> <td>\$1,302</td> <td>14</td> <td>8,818</td> </tr> <tr> <td colspan="2">Total Project Size:</td> <td>129,852</td> <td>161,056</td> <td>14,916</td> <td></td> <td></td> <td>96</td> <td>51,909</td> </tr> </tbody> </table> <p><b>11. REQUIREMENT</b><br/><u>PROJECT:</u><br/>This project proposes to construct 96 (48 duplex buildings) three and four-bedroom family housing units for junior enlisted families at NSA Andersen.<br/>(Current Mission)</p> <p><u>REQUIREMENT:</u><br/>Adequate and permanent housing facilities are required to support accompanied junior enlisted personnel and their families in Guam. This is the third phase of construction (48 one-story duplex buildings) at NSA Andersen planned to significantly upgrade the quality of family housing units available for occupancy and will bring the housing units up to acceptable standards. In addition, service members and their families will take shelter in these housing units during strong typhoons. Mechanical radon mitigation systems which will comply with EPA and NAVRAMP standards will be provided in each housing unit. Department of Defense and Department of the Navy principles for high performance and sustainable building requirements will be included in the design and construction of this project in accordance with federal laws and Executive Orders. Low Impact Development will be included in the design and construction of this project as appropriate. Facilities will be designed to meet or exceed the useful service life specified in DoD Unified Facility Criteria. Facilities will incorporate features that provide the lowest practical life cycle cost solutions satisfying the facility requirements with the goal of maximizing energy efficiency.</p> <p><u>CURRENT SITUATION:</u><br/>At the end of FY17, NSA Andersen had 574 active family housing units, of which roughly forty percent are considered inadequate. All of the existing housing was constructed in the 1960s and is outdated and undersized based on current standards.</p> |                                                  |                            |                                                            |                                                     |                        |              | Paygrade  | Bedrooms      | NSF | GSF | GSM | Project Factor | Cost Per GSM | No. Units | (\$000) Total | E1-E6 | 3 | 1,315 | 1,631 | 151 | 2.673 | \$1,302 | 82 | 43,091 | E1-E6 | 4 | 1,573 | 1,951 | 181 | 2.673 | \$1,302 | 14 | 8,818 | Total Project Size: |  | 129,852 | 161,056 | 14,916 |  |  | 96 | 51,909 |

| <p><u>IMPACT IF NOT PROVIDED:</u></p> <p>Failure to execute the project will deprive Navy Housing of 48 one-story duplexes for occupancy by active military personnel and their families. Military personnel will be forced to choose between involuntary separation from their families or accepting housing that is unsuitable for occupancy. Either choice will likely lead to poor morale and dissatisfaction with the Navy. Retention of quality personnel will be adversely affected.</p> <p><b>ADDITIONAL: Economic Alternatives Considered:</b></p> <p>A. Status Quo:</p> <p>B. Renovation/Modernization:</p> <p>C. | <p>Programming decisions are to be based on projected data line 13 columns (e) through (h) only.</p> <p>Line 12.a. columns (a) through (d) is based on official end FY 2016 I&amp;U.</p> <p>Line 12 b. PRIVATE ASSETS data is based on the results of the Final Housing Requirement and Market Analysis dated 11 September 2017</p> <p>Line 13 does not reflect potential additional requirement to provide housing for Marines relocated to Guam. The requirement to provide housing for additional Marine forces may significantly reduce the surplus or create a deficit.</p> |  |                                            |              |                                             |              |                               |              |                                            |              |

DEPARTMENT OF THE NAVY  
FAMILY HOUSING - FY 2019 BUDGET ESTIMATE  
CONSTRUCTION IMPROVEMENTS

(\$000)

|                        |           |
|------------------------|-----------|
| FY 2019 Budget Request | \$ 16,638 |
| FY 2018 Program Budget | \$ 36,251 |

Purpose and Scope

This program provides for improvements and/or major repairs to revitalize Department of the Navy (DON) family housing and the supporting neighborhood sites and facilities. This program is the primary vehicle for the DON to ensure that the aging inventory of homes is kept suitable for occupancy; as such, this program has a major role in maintaining a high quality of life for Navy and Marine Corps families. This program funds projects that will increase the useful life and livability of homes and neighborhoods, bring them up to Department of Defense standards, and make them more energy efficient and economical to maintain.

Program Summary

The DON will continue its emphasis on revitalization through whole-house projects, which will accomplish all required improvements and repairs at one time. Within this budget estimate, a separate DD 1391 is included for each project funded within this account.

Authorization is requested for:

- (1) Various improvements and/or major repairs to revitalize existing family housing; and
- (2) Appropriation of \$16,638,000 (\$0 for the Navy and \$16,638,000 for the Marine Corps) to fund these revitalization projects.

| <p><b>10. DESCRIPTION OF PROPOSED CONSTRUCTION</b><br/> Provides for the revitalization of family housing and neighborhood support facilities and infrastructure. Revitalization consists of alterations, additions, expansions, modernization, and major repairs. Typical work includes the revitalization of kitchens and bathrooms; upgrades and repairs to structural, electrical, and mechanical systems; repairs/replacements involving utility systems, streets and side walks, and other infrastructure; removal of hazardous materials; and enhancements to neighborhood support systems including landscaping and recreation.</p> <p><b>11. REQUIREMENT:</b> Major investments to the Department of the Navy's family housing inventory are needed to achieve current DoD standards, extend the life of the homes by arresting and correcting deterioration, reduce maintenance and utility expenses, make the homes and surrounding neighborhoods quality places to live.</p> <p><b>IMPACT IF NOT PROVIDED:</b> The Department of the Navy will have family housing inventory and supporting infrastructure which fall below Department of Defense and Navy standards for quality housing, creating a negative and adverse impact on the families who live in our homes. The Department of the Navy will not be able to reduce maintenance and utility costs and meet DOD standards in a more cost-effective approach than replacing the existing homes and neighborhoods.</p> |                                            |                              |                                                                 |                       |

| <p>REQUIREMENT (continued):<br/>of tenants, and extend the useful life of this facility another 20+ years.</p> <p>CURRENT SITUATION:<br/>Constructed in 1999, Family Housing Midrise No. 657 is showing its age and requires extensive repairs to continue providing comfortable living quarters to its overseas tenants. When this project is awarded, the facility will be 20 years into its 60-year life expectancy.</p> <p>The Architectural requirements of this project are as follows:</p> <ul style="list-style-type: none"> <li>▪ The roof of the facility must be replaced, since it is severely cracked and has deteriorated beyond economical repair. The life expectancy of similar roofing systems is estimated at 20 to 25 years.</li> <li>▪ The exterior must be repainted at the time of this project, as it will be approximately 10 years since it was last painted. Ten years is the normal life expectancy of the exterior paint in this seaside and industrial environment. The paint has rapidly deteriorated and is peeling, fading and cracking.</li> <li>▪ The main entry doors and their associated hardware must be replaced, as the existing hardware does not provide a reliable locking mechanism for building security. The door hardware is also rusting and the doors are disfigured.</li> <li>▪ The balcony rails must be replaced since they do not meet the safety requirements set forth in the IBC. For example, bar spacing is over four inches, where a small child could crawl through.</li> <li>▪ The interior must be completely repainted after the damaged and unsightly walls and ceilings are repaired and replaced with new wall tile and other surface materials. The new interior wall and ceiling surfaces will help create a new and rejuvenated environment that will greatly appeal to the tenants.</li> <li>▪ The flooring materials in all areas of the building must be removed and replaced after 17 years of severe wear. Much of the existing flooring is cracked or broken, deteriorated and worn out, stained and spotted. The cracked concrete sub-surface must also be repaired.</li> <li>▪ The substandard and outdated kitchen and bathroom cabinets must be replaced due to 17 years of heavy usage and already undergo continual repairs. Due to their age, it is also more difficult to find matching replacement parts for built-in furnishings. The existing kitchen counter-tops are made of stainless steel and severely scarred from frequent use of cutting utensils. Extensive permanent rust stains are also common. The range hoods must be replaced, as they no longer adequately or effectively exhaust the air from the cooking area. The bathroom vanities and sinks are too small for modern toiletry essentials and must be replaced with more practical fixtures.</li> <li>▪ All the interior doors and associated hardware in the facility, including closet doors and shelving show considerable damage over 20 years of frequent turnover and must be repaired and repainted.</li> </ul> |                                            |                                                           |                                     |                       |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                            |                                                           |                                     |                       |

| <p><b>CURRENT SITUATION (Continued):</b></p> <ul style="list-style-type: none"> <li>The windows must be replaced to meet revised Antiterrorism/Force Protection requirements to minimize hazards from flying debris in high-occupancy family housing.</li> </ul> <p>The Mechanical requirements of this facility are as follows:</p> <ul style="list-style-type: none"> <li>The roof top chiller unit, ventilation fans and controls no longer operate efficiently, are badly deteriorated and must be replaced.</li> <li>The roof top scuppers and drains must be replaced, as they are severely corroded and no longer function properly.</li> <li>The exhaust and ventilation systems located in both the kitchen and bathroom areas must be replaced, as they are no longer effectively recycle air at the required volume. Also the system does not contain any backflow prevention, so odors from other units often circulate through the units via vent pipes that exhaust fans are connected to.</li> <li>The existing toilet fixtures, bathtubs, showers, lavatories and kitchen sinks have not been replaced since the facility was constructed in 1999, and have exceeded their life expectancy. They are inefficient and in frequent need of repair.</li> <li>All sewage and domestic drain piping, cold and hot water piping, heating and cooling piping, sewage and domestic vent piping must be replaced. Frequent service calls to unclog drains and stop leaks indicate that the existing piping throughout the building is extremely corroded and deteriorating rapidly. The expected durable life of such piping is normally between 14 and 18 years.</li> <li>The existing floor mounted fan coil units and all associated piping must be removed and replaced with recessed ceiling mounted fan coil units. The existing fan coil units are old and no longer working efficiently. They are in constant need of repair and occupy valuable living area space.</li> <li>Elevator safety devices do not meet American Society of Mechanical Engineers safety code for elevators. The elevator's electric motors and steel cabling will be replaced since the normal life cycle of each is approximately 20 years.</li> </ul> <p>The Electrical requirements of this facility are as follows:</p> <ul style="list-style-type: none"> <li>The roof top exhaust fan controls must be replaced since they are severely deteriorated.</li> <li>The existing electrical outlets and wiring must be replaced to meet today's equipment needs. The current kitchen and bathroom outlets lack Ground Fault protection and do not meet the current Electrical Safety Code.</li> <li>The existing circuit breakers undersized for building service needs.</li> <li>Electrical outlets coverage is insufficient to meet current Electrical Codes. Power strips and extension cords are often used, creating a safety hazard.</li> </ul> |                                            |                                                           |                                     |                       |

|                                                                             |                                            |                                                           |                                     |

**CURRENT SITUATION (Continued):**

- Many areas within the individual housing units have no lighting provided. In areas where fixed lighting is provided, the lighting levels do not meet illumination standards. Existing light fixtures must be replaced with energy efficient fixtures.
- The aged fire alarm system must be replaced to meet current standards.
- The existing TV, telephone and internet access receptacles and wiring must be replaced since the current configuration does not provide adequate service or capacity to all the required areas of the facility.
- Additional TV, telephone and internet access receptacles and wiring is required to meet the current and future demand of family appliances and personal computer devices.

**IMPACT IF NOT PROVIDED:** If this project is not provided, family housing units will continue to fall short of DOD construction standards. Military personnel and their families will continue to live in an old facility that does not meet current safety code requirements and contains deteriorated or damaged furnishings and equipment that require continuous repair. The Air Station's Housing Division will continue to perform minor maintenance while furnishings, equipment and building problems continue to escalate. Quality of life and comfort of living standards will continue to degrade and compromise the Air Station's vision as the "Assignment of Choice"

**WORK PROGRAMMED FOR NEXT THREE YEARS:** None.

**ADDITIONAL:** An economic analysis has been prepared comparing the alternatives of replacement, improvement, direct compensation and status quo operation. Based on the net present values and benefits of the respective alternatives, improvement was found to be the only viable alternative to satisfy the requirement. The initial cost to improve these units is 89% of the replacement cost. Although the life-cycle costs for revitalization is 112% of the life-cycle costs for replacement, the facility, built by the Government of Japan (GOJ), will only be 20 years old when the project is awarded. Since GOJ will not replace it before its' 60-year life expectancy, replacement is not a viable alternative. This project is not eligible for Host Nation Funding. Sustainable principles will be integrated into the development, design and construction of this project in accordance with Executive Order 13123 and other applicable laws and executive orders. Anti-terrorism/force protection provisions include upgrading windows and providing other facility modifications to meet current Antiterrorism/Force Protection Standards.

| FY 2019 Budget Request | \$ 4,502 |
| FY 2018 Program Budget | \$ 4,418 |

Purpose and Scope

This program provides for working drawings, specifications and estimates, project planning reports, and final design drawings for construction projects (authorized or not yet authorized). This includes the use of architectural and engineering services in connection with any family housing new construction or construction improvements.

Program Summary

The amount requested will enable full execution of the construction program. Authorization is requested for the appropriation of \$4,502,000 (\$3,514,000 for the Navy and \$988,000 for the Marine Corps) to fund New Construction and Improvements design requirements.

**10. DESCRIPTION OF PROPOSED CONSTRUCTION:**

10 USC 2807 authorizes funding for architectural and engineering services and construction design of military family housing new construction and construction improvement projects.

**11. REQUIREMENT:** All project estimates are based on sound engineering and the best cost data available. Design is initiated to establish project estimates authorized or not yet authorized in advance of program submittal to the Congress. At the preliminary design, final plans and specifications are then prepared. The request includes costs for architectural and engineering services, turnkey evaluation, and construction design.

IMPACT IF NOT PROVIDED: Project execution schedules for Fiscal Years 2020 and 2021 will not be met. Negative impact to military members and their families as design of Family Housing homes and supporting structures will not be accomplished in a timely manner for expected delivery. This will be perceived as lack of support for our military families quality of life and will reflect poorly on the Navy.

DEPARTMENT OF THE NAVY  
FAMILY HOUSING – FY 2019 BUDGET ESTIMATE  
OPERATION AND MAINTENANCE NARRATIVE SUMMARY

(\$000)

FY 2019 Budget Request      \$230,254  
FY 2018 Program Budget      \$238,774

Purpose and Scope

This portion of the program provides for expenses in the following sub-accounts: Management, Services, Furnishings, Miscellaneous, Utilities, Maintenance, and Reimbursables.

Program Summary

Authorization is requested for an appropriation of \$230,254,000. This amount, together with estimated reimbursements of \$17,706,000 will fund the Fiscal Year 2019 program of \$247,960,000.

A summary of the funding program for Fiscal Year 2019 follows (in thousands):

|              | Appropriation Request |                  |                    |              | Reimburse-   | Total          |
|--------------|-----------------------|------------------|--------------------|--------------|--------------|----------------|
|              | <u>Operations</u>     | <u>Utilities</u> | <u>Maintenance</u> | <u>Total</u> | <u>ments</u> | <u>Program</u> |
| Navy         | 72,988                | 53,512           | 76,952             | 203,452      | 16,000       | 219,452        |
| Marine Corps | 10,686                | 6,740            | 9,376              | 26,802       | 1,706        | 28,508         |
| Total DON    | 83,674                | 60,252           | 86,328             | 230,254      | 17,706       | 247,960        |

Justification

The Department of the Navy family housing budget requests the minimum essential resources needed to provide military families with adequate housing either through the private community or in government quarters. Navy and Marine Corps installations are generally located in the high cost, coastal areas. Accordingly, the higher cost of adequate housing in these areas cause many of our military families to reside in facilities that lack even the minimal amenities expected in a home. Therefore, emphasis is placed on the proper funding of the family housing Operations and Maintenance program.

The Fiscal Year 2019 estimated program was formulated utilizing published inflationary factors and foreign currency exchange rates. Program decreases, as compared to FY 2018, are primarily attributed to a reduction in USMC Maintenance costs, as well as the Department of Navy (DON) effort to support the OMB-directed reforms for efficiency and effectiveness that include a lean, accountable, more efficient government.

\* Per Unit Costs for certain accounts in CONUS are skewed due to the fact that these costs are not directly attributed to government-owned homes and therefore misrepresent the per unit costs for these units. Additionally, FY17-19 inventory has been adjusted to reflect the planned privatization and demolition of Ventura, CA.

\* Per Unit Costs for certain accounts in CONUS are skewed due to the fact that these costs are not directly attributed to government-owned homes and therefore misrepresent the per unit costs for these units. These costs include Housing Office Management Staff, Housing Referral Personnel and Services, and Housing Requirements Market Analyses.

DEPARTMENT OF THE NAVY  
FAMILY HOUSING - FY 2019 BUDGET ESTIMATE  
OPERATION AND MAINTENANCE - OPERATIONS

(\$000)

|                        |          |
|------------------------|----------|
| FY 2019 Budget Request | \$83,674 |
| FY 2018 Program Budget | \$81,503 |

Purpose and Scope

This program provides for expenses in the following sub-accounts:

Management - Includes direct and indirect expenses in managing the family housing program and community housing referral program. Included in this account are costs associated with housing office and community referral office personnel payroll, civilian pay increases, community liaison, training and travel of housing personnel, vehicle leasing, and costs associated with the enterprise Military Housing (eMH) information system Family Housing Module. Also included are costs associated with the Condition Assessment Program, environmental compliance studies, and housing requirements determination market analyses.

Services - Includes direct and indirect expenses incident to providing basic support services such as refuse collection & disposal, pest control, custodial services for common areas, snow removal & street cleaning.

Furnishings - Includes procuring, controlling, inventorying, managing, moving and handling, maintaining, and repairing household equipment (primarily stoves, refrigerators, washers, and dryers). In overseas and foreign locations, added furniture items (e.g., kitchen cabinets, beds, tables, and dressers) are provided on a loaner basis.

Miscellaneous - Includes payments to the US Coast Guard for Navy occupancy of Coast Guard housing.

|                                       | <u>(Dollars in Thousands)</u> |        |
|---------------------------------------|-------------------------------|--------|
| 1. FY 2018 President's Budget Request |                               | 45,538 |
| 2. FY 2018 Appropriated Amount        |                               | 45,538 |
| 3. FY 2018 Current Estimate           |                               | 45,538 |
| 4. Price Growth:                      |                               | 441    |
| a. Civilian Personnel Compensation    | 147                           |        |
| b. Inflation                          | 294                           |        |
| 5. Program Decreases:                 |                               | (460)  |
| a. Execution Adjustment               | (460)                         |        |
| 6. FY 2019 President's Budget Request |                               | 45,519 |

**RATIONALE FOR CHANGES IN THE MANAGEMENT ACCOUNT**

Price Growth in the Management account is due to Civilian Personnel Compensation and Inflation adjustments. The Program Decrease is a minor adjustment to account for year-to-year fluctuation in centrally-managed contracts in this account, such as Market Analyses, Condition Assessments, etc. which vary in cost depending on the number and location of installations that are addressed.

**IMPACT OF PRIVATIZATION:** None.

DEPARTMENT OF THE NAVY  
FAMILY HOUSING - 2019 BUDGET ESTIMATE  
OPERATION AND MAINTENANCE - UTILITIES

(\$000)

|                        |          |
|------------------------|----------|
| FY 2019 Budget Request | \$60,252 |
| FY 2018 Program Budget | \$62,167 |

Purpose and Scope

This program provides for utility services for Navy and Marine Corps Family Housing that include electricity, natural gas, propane, steam/hot water, fuel oil, water, and sewage. Utility requirements are estimated based on historic, per unit expenditures that have been adjusted for inflation and for foreign currency adjustments.

The Department of the Navy's Operation and Maintenance program aims to reduce utility consumption through whole-house improvements to improve energy efficiencies, increased management emphasis on energy conservation, and maintenance and repair projects to reduce energy consumption.

|------------------------|----------|
| FY 2019 Budget Request | \$86,328 |
| FY 2018 Program Budget | \$95,104 |

Purpose and Scope

This program provides for the maintenance and repair of Family Housing units including: service calls, change of occupancy rehabilitation, routine maintenance, preventative maintenance, interior and exterior painting, exterior utilities, grounds and family housing community facilities, and Major Repairs.

The objective of the Department of the Navy's Maintenance program is to fully fund routine and preventative maintenance necessary to keep adequate homes from falling into disrepair. The Major Repair program is utilized to focus on mechanical, electrical, or structural issues that are too large in scope or too complex to be addressed with routine maintenance funding.

Renovation and revitalization include the following: replacement of interior finishes to include flooring, doors, walls, ceiling, windows, sliding glass doors, kitchens, bathrooms and laundry rooms; upgrades to include changing lighting to LED light bulbs, electrical system, potable water system, domestic hot water system, sanitary sewer line, conduit of CATV and telephone, automatic fire sprinkler and fire alarm system; common space work will include stairways, lobbies, hallways, mechanical room and multi-purpose room.</div> |                                                   |                              |

DEPARTMENT OF THE NAVY  
FAMILY HOUSING - 2019 BUDGET ESTIMATE  
GFOQ M&R COST OVER \$35,000 PER UNIT

The Department of the Navy has been making every effort possible to control and reduce expenditures for "high-cost" GFOQ units. The Navy closely monitors all discretionary spending associated with GFOQ units. The Marine Corps has limited its high-cost GFOQ units to five units, all of which are either considered a National Historic Landmark or on the National Register of Historic Places. Both the Navy and the Marine Corps are closely evaluating maintenance and repair requests to ensure work is essential, as well as seeking ways to make these units more energy-efficient and economical to operate.

Justification

Domestic Leasing Program Summary: The domestic leasing program is authorized in 10 USC 2828 as amended, which limits the number of units authorized at any one time and specifies the maximum cost limitation.

Foreign Leasing: Leasing in foreign countries is authorized in 10 USC 2828, which limits the number of units authorized at any one time and specifies the maximum cost limitation.

Under Title 10 USC 2834, the Secretary concerned may enter into an agreement with the Secretary of State under which the Secretary of State agrees to provide housing and related services for personnel under jurisdiction of the Secretary concerned who are assigned duty in a foreign country. To the extent that the lease amounts for units of housing made available under this subsection exceed maximum lease amounts in Title 10 USC 2828(e)(1), such units shall not be counted in applying the limitations contained in such section on the number of units of family housing for which the Secretary concerned may waive such maximum lease amounts.

| 6. FY 2019 President's Budget Request |       | 62,153 |

**RATIONALE FOR CHANGES IN THE LEASING ACCOUNT**

Price Growth in the Leasing account is due to Civilian Personnel Compensation, Inflation, and Working Capital Fund adjustments. The Program Decrease is due to year-to-year fluctuation in minor repair and furnishings replacement requirements for the block lease at Naples, Italy.

**IMPACT OF PRIVATIZATION:** None.

Justification

Domestic Leasing Fiscal Year Summary

FY 2017 - No funding required. Section 802 project in Hawaii was terminated on 30 Sep 15.

FY 2018 & FY 2019 - No funding required.

Foreign Leasing Program Summary

Under Title 10 USC 2834, the Secretary concerned may enter into an agreement with the Secretary of State under which the Secretary of State agrees to provide housing and related services for personnel under jurisdiction of the Secretary concerned who are assigned duty in a foreign country. To the extent that the lease amounts for units of housing made available under this subsection exceed maximum lease amounts in Title 10 USC 2828(e)(1), such units shall not be counted in applying the limitations contained in such section on the number of units of family housing for which the Secretary concerned may waive such maximum lease amounts.

Foreign Leasing Fiscal Year Summary

The FY 2018 unit authorization consists of 8 leases provided for members in overseas locations in which the Department of State International Cooperative Administrative Support Services (ICASS) program administers the lease (Foreign Area Officer (FAO), Olmsted Scholar, School of Other Nations program and other Foreign Professional Military Education program) with the Marine Corps providing the appropriated funding. Funding in the amount of \$0.357 million is required to support these leases.

The FY 2019 unit authorization consists of 8 leases provided for members in overseas locations in which the Department of State International Cooperative Administrative Support Services (ICASS) program administers the lease (Foreign Area Officer (FAO), Olmsted Scholar, School of Other Nations program and other Foreign Professional Military Education program) with the Marine Corps providing the appropriated funding. Funding in the amount of \$0.362 million is required to support these leases.

DEPARTMENT OF THE NAVY  
FAMILY HOUSING - FY 2019 BUDGET ESTIMATE  
DEPARTMENT OF THE NAVY PRIVATIZATION SUMMARY

(\$000)

|                        |          |
|------------------------|----------|
| FY 2019 Budget Request | \$21,767 |
| FY 2018 Program Budget | \$27,587 |

Purpose and Scope

The Fiscal Year 1996 Military Housing Privatization Initiative (MHPI) included in Public Law 104-106 is an essential tool used by the Department of the Navy (DON) to eliminate inadequate housing. The Privatization Initiative permits DON to enter into business agreements with the private sector, utilizing private sector resources, leveraged by Navy assets (inventory, land, & funding), to improve, replace, and build family housing faster than could otherwise be accomplished through the traditional military construction approach. Private business entities will own, operate, and maintain housing on behalf of the DON and lease quality homes to military personnel and their families at affordable rates.

Program Summary

Currently, the DON has 41 active Public Private Venture (PPV) projects. The DON took a deliberate, measured approach in evaluating which blend of authorities would provide the desired leverage of resources with sufficient protection of the Government's resources and interests over the long-term. These 41 projects have been executed through FY 2017, totaling over 62,000 homes. This number reflects privatized housing end states. Please see the appropriate Service narrative summary and FH-6 exhibits for project-level details.

Estimated Basic Allowance for Housing (BAH) To Be Paid To Members Living In Privatized Housing

It is estimated that the Department of the Navy will pay BAH under section 403 of title 37 to members living in privatized housing the amounts of \$1,392,869 in FY 2018 and \$1,437,660 in FY 2019. The number of units of military family housing upon which these estimated payments are made is 53,341 in FY 2018 and 53,341 in FY 2019. The number of units of military unaccompanied housing upon which these estimated payments are made is 5,887 in FY 2018 and 5,887 in FY 2019.

These estimates meet the reporting requirement stipulated in 10 USC 2884 (b) (2). However, it must be noted that that is difficult to project the true cost of BAH allowances provided to members living in privatized housing. BAH allowances for members in privatized housing are not specifically tracked in budget or execution data, as these members receive the same allowances as those who live on the economy. BAH accounting data is available for only the various categories of payments (for instance, domestic with and without dependents, partial, overseas housing allowances, etc.).

DEPARTMENT OF THE NAVY  
FAMILY HOUSING - FY 2019 BUDGET ESTIMATE  
NAVY PRIVATIZATION SUMMARY

(\$000)

FY 2019 Budget Request      \$14,118  
FY 2018 Program Budget      \$17,583

Purpose and Scope

The Fiscal Year 1996 Military Housing Privatization Initiative (MHPI) included in Public Law 104-106 is an essential tool used by the Department of the Navy (DON) to eliminate inadequate housing. The Privatization Initiative permits the Navy to enter into business agreements with the private sector, utilizing private sector resources leveraged by Navy assets (inventory, land, & funding), to improve, replace, and build family housing faster than could otherwise be accomplished through the traditional military construction approach. Private entities will own, operate and maintain housing on behalf of the Navy and lease quality homes to military personnel and their families at affordable rates.

Program Summary

The Navy successfully awarded the first two Public Private Venture (PPV) projects in 1996 and 1997 at Corpus Christi/Ingleside/Kingsville, Texas, and Everett, Washington, respectively, under 1995 Limited Partnership legislative authority available only to the Navy. The Navy subsequently modified both projects to pay differential lease payments, reducing rents paid by military members and eliminating out-of-pocket expenses. The Department of the Navy (DON) took a deliberate, measured approach in evaluating which blend of authorities would provide the desired leverage of resources with sufficient protection of the Government's resources and interests over the long-term. With this approach in place, the Navy has awarded twenty-one additional projects; three in FY 2001, two in FY 2002, one in FY 2003, one in FY 2004, three in FY 2005, three in FY 2006, three in FY 2007, two in FY 2010, one in FY 2014, one in FY 2017, and one in FY 2018 for a total of 39,055 homes. Total Navy projects awarded are:

|         |                                |             |
|---------|--------------------------------|-------------|
| FY 1996 | Kingsville, TX (Kingsville I)  | 0 homes*    |
| FY 1997 | Everett, WA (Everett I)        | 0 homes**   |
| FY 2001 | Kingsville, TX (Kingsville II) | 150 homes   |
|         | Everett, WA (Everett II)       | 0 homes***  |
|         | San Diego I                    | 3,248 homes |
| FY 2002 | New Orleans                    | 936 homes   |
|         | South Texas                    | 417 homes   |
| FY 2003 | San Diego II                   | 3,217 homes |
| FY 2004 | Hawaii I                       | 1,952 homes |
| FY 2005 | Northeast Region               | 2,950 homes |
|         | Northwest Region               | 2,745 homes |
|         | Mid-Atlantic Region            | 5,744 homes |
| FY 2006 | Midwest Region                 | 1,401 homes |
|         | San Diego III                  | 4,268 homes |
|         | Hawaii III                     | 2,520 homes |
| FY 2007 | Southeast Region               | 4,673 homes |
|         | San Diego PH IV                | 3,523 homes |
|         | Midwest Region PH II           | 318 homes   |

|         |                        |           |
|---------|------------------------|-----------|
| FY 2010 | Mid-Atlantic PH II     | 31 homes  |
|         | San Diego PH V         | 257 homes |
| FY 2014 | Northwest Region PH II | 624 homes |
| FY 2017 | Mid-Atlantic PH V      | -5 homes  |
| FY 2018 | San Diego PH VI        | 86 homes  |

\* Project originally 404 homes, however all homes have since been sold.

\*\* Project originally 185 homes, however all homes have since been sold.

\*\*\* Project originally 288 homes, however all homes have since been sold.

In FY 2018, the Navy plans to award San Diego PH VI, which will convey 127 existing units and projects an end-state of 86 homes. Additionally, the Navy has awarded Mid-Atlantic PH V, which demolishes five homes located in the Runway Clear Zone at NAS Patuxent River. This will give the Navy an EOY 2018 PPV end-state of 39,055 homes. The FH-6 - Family Housing Privatization Exhibit provides further detail.

There are an additional 646 Navy homes that were privatized within another Service's project, not included in the tables. There is an Army RCI project (Presidio of Monterey) that includes the privatization of 593 Navy homes at Monterey, CA and a Marine Corps project (Atlantic Marines PH III/CLCPS Phase IV/Tri-Command Communities) that includes the privatization of 53 Navy homes at Beaufort, SC.

PPV is one of the approaches to eliminate inadequate homes. The Navy is utilizing a three-pronged approach for eliminating inadequate homes including reliance on Basic Allowance for Housing (BAH), PPVs, and traditional construction funding.

#### Estimated Basic Allowance for Housing (BAH) To Be Paid To Members Living In Privatized Housing

It is estimated that the Navy will pay BAH under section 403 of title 37 to members living in privatized housing the amounts of \$902,043 in FY 2018 and \$930,484 in FY 2019. The number of units of military family housing upon which these estimated payments are made is 31,636 in FY 2018 and 31,636 in FY 2019. The number of units of military unaccompanied housing upon which these estimated payments are made is 5,887 in FY 2018 and 5,887 in FY 2019.

These estimates meet the reporting requirement stipulated in 10 USC 2884 (b) (2). However, it must be noted that that is difficult to project the true cost of BAH allowances provided to members living in privatized housing. BAH allowances for members in privatized housing are not specifically tracked in budget or execution data, as these members receive the same allowances as those who live on the economy. BAH accounting data is available for only the various categories of payments (for instance, domestic with and without dependents, partial, overseas housing allowances, etc.).

**NOTES:**

- The date the real property is transferred (land and family housing units) to the private owner/developer, and when service members become entitled to receive Basic Allowance for Housing (BAH).
- Provide the name of the MHPI Project given to the privatization project, including the name given to integrated/grouped projects. The MHPI project name should be consistent with the MHPI project name used in the previously approved OSD/OMB Scoring report and/or subsequent notification to Congress.
- List the MHPI project location by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.
- This section relates the previously-approved OSD/OMB project scope and funding amounts contained in the scoring package and/or subsequent Notification of Funds Transfer letters to Congress.
- Provide the number of family housing units to be conveyed by installation and state to the Developer, including each installation/state incorporated into the integrated/grouped MHPI project, as previously-approved in the OSD/OMB Scoring report.
- Provide the end state number of family housing units in the inventory for each MHPI project by installation/state, including each installation/state incorporated into the integrated/grouped MHPI project.
- Provide all of the funding source information for the MHPI project as reflected in the previously-approved OSD/OMB report and consistent with the project summary details accompanying the Notification of Transfer letter to Congress, such as:
  - The amount of funds to be used for the Government's cost of the project (i.e., equity contribution, credit subsidy costs, differential lease payments, etc.).
  - The fiscal year(s) of the funding sources to be used to cover the Government's cost of the MHPI project.
  - The type of funds (e.g., FH New Construction, FH Construction Improvements, FH Improvement Funds) to be used to cover the Government's cost of the MHPI project.
  - The project(s) that are used to source the Government's cost of the privatization project.
- This section relates to the Military Departments' actual and/or current plan, which might or might not be consistent with the details contained in the previously-approved OSD/OMB Scoring report and project summary to Congress for the MHPI project due to extenuating circumstances.
- Provide the actual and/or revised planned number of family housing units conveyed to the Developer by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.
- Provide the actual and/or revised, planned number of family housing units conveyed to the Developer by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.
- Provide the total number of privatized family housing units in the inventory for each MHPI project by installation/state, including each installation/state incorporated into the integrated/grouped MHPI project.
- Provide all the "actual and/or current" funding sources used to fund the MHPI project, which might or might not be consistent with the details contained in the previous-approved OSD/OMB Scoring report and project summary (i.e., project amount, budget year of funds, source project, appropriation) to Congress for the MHPI project due to extenuating circumstances. If possible and/or available, please provide the requested funding information by installation/state.
- Provide the applicable MHPI authorities in subchapter IV of Chapter 169 in title 10 U.S.C. was used and/or proposed to be used for the privatization project. Designators are as follows:
  - 1 = 10 USC 2873 - Government Direct Loans
  - 2 = 10 USC 2873 - Loan Guarantees
  - 3 = 10 USC 2875 - Investments, such as DoD Equity Contributions in non-governmental entities
  - 4 = 10 USC 2877 - Differential Lease Payments
  - 5 = 10 USC 2877 - Conveyance or Lease of Existing Property and Facilities
- Totals of number of units conveyed, number of end state units, and funding amounts.

**RATIONALE FOR CHANGES IN THE PRIVATIZATION SUPPORT ACCOUNT**

Price Growth in the Privatization Support account is due to Civilian Personnel Compensation and Inflation adjustments. The Program Decrease is based on the Department of Navy (DON) effort to support the OMB directed reforms for Efficiency and Effectiveness that include lean, accountable, more efficient government.

DEPARTMENT OF THE NAVY  
FAMILY HOUSING - FY 2019 BUDGET ESTIMATE  
MARINE CORPS PRIVATIZATION SUMMARY

(\$000)

FY 2019 Program       \$ 7,649  
FY 2018 Program       \$ 10,004

Purpose and Scope

The Fiscal Year 1996 Military Housing Privatization Initiative (MHPI) included in Public Law 104-106 is an essential tool used by the Department of the Navy (DON) to eliminate inadequate housing. The Privatization Initiative permits the Marine Corps to enter into business agreements with the private sector to utilize private sector resources, leveraged by DON assets (inventory, land and funding), to improve, replace, and build family housing faster than could otherwise be accomplished through the traditional military construction approach. Private business entities will own, operate and maintain housing and lease quality homes to military personnel and their families at affordable rates.

Program Summary

Overall, the Marine Corps has awarded the following 20 Family Housing projects (inclusive of phases), privatizing over 23,000 units (99.6 percent of the Marine Corps United States inventory):

|         |                                                                                     |             |
|---------|-------------------------------------------------------------------------------------|-------------|
| FY 2001 | Camp Pendleton 1 (Deluz)                                                            | 712 homes   |
| FY 2003 | Beaufort / Parris Island<br>(Merged with CLCPS Phase III /<br>Atlantic Marines III) | 1,718 homes |
| FY 2004 | Camp Pendleton 2 / Quantico I                                                       | 4,536 homes |
| FY 2005 | Camp Pendleton 2 / Quantico II                                                      | 897 homes   |
| FY 2006 | Camp Lejeune / Cherry Point / Stewart I<br>(Atlantic Marines I)                     | 3,124 homes |
|         | Camp Pendleton 2 / Quantico III                                                     | 1,488 homes |
|         | Camp Lejeune / Cherry Point / Stewart II<br>(Atlantic Marines II)                   | 1,186 homes |
|         | Camp Pendleton 2 / Quantico IV                                                      | 3,160 homes |
|         | Hawaii II                                                                           | 1,175 homes |
| FY 2007 | Camp Lejeune / Cherry Point / Stewart III<br>(Atlantic Marines III)                 | 2,031 homes |
| FY 2007 | Camp Pendleton 2 / Quantico V                                                       | 253 homes   |
|         | Hawaii IV                                                                           | 917 homes   |
| FY 2009 | Mid-Atlantic Region III                                                             | 260 homes   |
| FY 2010 | Camp Pendleton 2 / Quantico VI                                                      | 139 homes   |
|         | Camp Pendleton 2 / Quantico VII                                                     | 172 homes   |
|         | Mid-Atlantic Region IV                                                              | 300 homes   |
|         | Camp Pendleton 2 / Quantico VIII                                                    | 600 homes   |
|         | Hawaii V                                                                            | 224 homes   |
| FY 2013 | Camp Lejeune / Cherry Point / Stewart IV<br>(Atlantic Marines IV)                   | 1 home      |
| FY 2015 | Hawaii VI                                                                           | 260 homes   |
| FY 2016 | Camp Pendleton 2/ Quantico IX                                                       | -118 homes  |

Seventeen of the projects (inclusive of phases) have completed their Initial Development Plans (IDPs). Over 17,300 homes have been constructed or renovated thus far under the IDPs.

All installations with privatized housing show a marked increase in resident satisfaction since privatization. Feedback from residents of existing privatized housing not only continues to be positive, particularly in areas relating to quality of services and responsiveness of property management.

The Marine Corps' PPV portfolio continues to explore energy initiatives that make fiscal sense. The Resident Energy Conservation Program (RECP) is promoting and rewarding the frugal and responsible use of energy by the residents, and continues to save the USMC PPV portfolio millions of dollars a year. Recently, the Marine Corps' PPV projects are exploring opportunities to enter into Power Purchase Agreements (PPA) utilizing solar power from panels installed on the PPV housing roofs. MCB Hawaii PPV housing already has a 5mW existing PPA. It is expected that the MCB Camp Pendleton PPV partner will be entering a 9mW in FY19 and additional efforts at Twentynine Palms and MCAS Yuma are being investigated.

The Marine Corps is constantly incorporating lessons learned from the expanding portfolio of the Department of Navy awarded projects to refine its Privatization Portfolio Management Program. Projects are developed with a business-based approach and structured to ensure rents and reasonable utilities do not exceed a service member's basic allowance for housing rate, and ensure sufficient cash flow exists to adequately operate, maintain and revitalize the inventory over the life of the 50-year business agreement.

The Marine Corps has successfully collaborated with its Naval partners and both improved the effectiveness of its portfolio management and enhanced the level of oversight provided.

#### Estimated Basic Allowance for Housing (BAH) To Be Paid To Members Living In Privatized Housing

It is estimated that the Marine Corps will pay BAH under section 403 of title 37 to members living in privatized housing the amounts of \$490,826 in FY 2018 and \$507,176 in FY 2019. The number of units of military family housing upon which these estimated payments are made is 21,705 in FY 2018 and 21,705 in FY 2019. The number of units of military unaccompanied housing upon which these estimated payments are made is 0 in FY 2018 and 0 in FY 2019.

These estimates meet the reporting requirement stipulated in 10 USC 2884 (b) (2). However, it must be noted that that is difficult to project the true cost of BAH allowances provided to members living in privatized housing. BAH allowances for members in privatized housing are not specifically tracked in budget or execution data, as these members receive the same allowances as those who live on the economy. BAH accounting data is available for only the various categories of payments (for instance, domestic with and without dependents, partial, overseas housing allowances, etc.).

NOTES:

- The date the real property is transferred (land and family housing units) to the private owner/developer, and when service members become entitled to receive Basic Allowance for Housing (BAH).
- Provide the name of the MHPI Project given to the privatization project, including the name given to integrated/grouped projects. The MHPI project name should be consistent with the MHPI project name used in the previously approved OSD/OMB Scoring report and/or subsequent report.
- List the MHPI project location by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.
- This section relates the previously-approved OSD/OMB project scope and funding amounts contained in the scoring package and/or subsequent Notification of Funds Transfer letters to Congress.
- Provide the number of family housing units to be conveyed by installation and state to the Developer, including each installation and state incorporated into the integrated/grouped MHPI project, as previously approved in the OSD/OMB Scoring report.
- Provide the end state number of family housing units by installation and state to the Developer, including each installation/state incorporated into the integrated/grouped MHPI project, as previously approved in the OSD/OMB Scoring report.
- Provide all of the funding source information for the MHPI project as reflected in the previously-approved OSD/OMB report and consistent with the project summary details accompanying the Notification of Transfer letter to Congress, such as:
  - The amount of funds to be used for the Government's cost of the project (i.e., equity contribution, credit subsidy costs, differential lease payments, etc.).
  - The fiscal year(s) of the funding sources to be used to cover the Government's cost of the MHPI project.
  - The type of funds (e.g., FH New Construction, FH Construction Improvements, FH Improvement Funds) to be used to cover the Government's cost of the MHPI project.
  - The project(s) that are used to source the Government's cost of the privatization project.
- This section relates to the Military Departments' actual and/or current plan, which might or might not be consistent with the details contained in the previously-approved OSD/OMB Scoring report and project summary to Congress for the MHPI project due to extenuating circumstances.
- Provide the actual and/or revised planned number of family housing units conveyed to the Developer by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.
- Provide the actual and/or revised, planned number of family housing end state units by installation and state, including each installation/state incorporated into the integrated/grouped MHPI project.
- Provide the total number of privatized family housing units in the inventory for each MHPI project by installation/state, including each installation/state incorporated into the integrated/grouped MHPI project, regardless if they are currently occupied or not.
- Provide all the "actual and/or current" funding sources used to fund the MHPI project, which might or might not be consistent with the details contained in the previous-approved OSD/OMB Scoring report and project summary (i.e., project amount, budget year of funds, source project, etc.).

13 - Provide the applicable MHP1 authorities in subchapter IV of Chapter 169 in title 10 U.S.C. was used and/or proposed to be used for the privatization project. Designators are as follows:

- 1 = 10 USC 2873 - Government Direct Loans
- 2 = 10 USC 2873 - Loan Guarantees
- 3 = 10 USC 2875 - Investments, such as DoD Equity Contributions in non-governmental entities
- 4 = 10 USC 2877 - Differential Lease Payments
- 5 = 10 USC 2878 - Conveyance or Lease of Existing Property and Facilities
- 14 - Totals of number of units conveyed, number of end state units, and funding amounts.

|---------------------------------------|-------------------------------|
| 1. FY 2018 President's Budget Request | 10,004                        |
| 2. FY 2018 Appropriated Amount        | 0                             |
| 3. FY 2018 Current Estimate           | 10,004                        |
| 4. Price Growth:                      | 167                           |
| a. Civilian Personnel Compensation    | 56                            |
| b. Inflation                          | 111                           |
| 5. Program Decreases:                 | (2,522)                       |
| a. Requirements                       | (2,522)                       |
| 6. FY 2019 President's Budget Request | 7,649                         |

**RATIONALE FOR CHANGES IN THE PRIVATIZATION SUPPORT ACCOUNT**

Price Growth in the Privatization Support account is due to Inflation adjustments and Civilian Personnel Compensation. The Program Decrease is due to a transition from the Initial Development Phase of the privatization projects to portfolio management.
