| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | -           | -       | -       | -                                                            | -           | -             | -               | -       | -                                                                              | -       | -           | -          |
| Description:<br>The Ship Signal Exploitation Equipment (SSEE) Inc F (All Variants) Program will provide strike groups with Information Operation (IO) / non-kinetic capabilities and the subsequent ability to exploit Signals Of Interest (SOI) by providing a state-of-the-art system which detects, acquires, and collects data on any potential threat.<br><br>[SSEE Increment F(V)1/2 Systems (Ship)] Unit Price Cost for SSEE Increment F(V)1/2, (V)7/8 and SSEE Modifications have been updated to account for current procurement plan.<br><br>Procurement UPCs for SSEE Increment F (all variants) and SSEE Modifications are based on contracted quantity discounts; SSEE OPN procurements are awarded with SSEE SCN, FMS and Coast Guard System procurements to achieve the best value for the government.<br><br>The FY19 SSEE Increment F(V)1/2 Procurement contract award includes a total of 6 systems (5 OPN and 1 SCN ) resulting in a UPC of \$8.153M. The FY18 SSEE Increment F(V)1/2 Procurement contract award includes a total of 7 systems (6 OPN,1 SCN) resulting in a UPC of \$7.888M.<br><br>[SSEE Increment F(V)7/8 (TCS) Below Deck and Core] SSEE Increment F(V)7/8 Tactical Cryptologic System (TCS) is a scalable, modular variant of SSEE Increment F that allows configuration to meet platform mission requirements. SSEE Increment F(V)7/8 (TCS) leverages SSEE Increment F common software, training, and logistics. SSEE Increment F(V)7/8 (TCS) consists of infrastructure (Topside Antennas) which are permanently installed on 41 Unit Level ships. The Below Deck Core system includes a modular component to all Mission Tailorable upgrades to increase capabilities. The modularity and scalability of SSEE Increment F(V)7/8 (TCS) is delivered using Engineering Change Proposal (ECP). The Next Generation Chassis modifications provide enhanced data processing and greater exposure to existing system services while meeting constricting size, weight, power, and cooling requirements. |             |         |         |                                                              |             |               |                 |         |                                                                                |         |             |            |

**Footnotes:**

<sup>(6)</sup> The FY19 SSEE Increment F(V)1/2 Procurement contract award includes a total of 6 systems (5 OPN and 1 SCN ) resulting in a UPC of \$8.153M. The FY18 SSEE Increment F(V)1/2 Procurement contract award includes a total of 7 systems (6 OPN,1 SCN) resulting in a UPC of \$7.888M.

<sup>(7)</sup> Tactical Cryptologic System (TCS) Infrastructure procurements are comprised of the antenna infrastructure and core hardware components. TCS Infrastructure is permanently installed on (41) Unit Level platforms. The Unit Level platforms pull from the TCS Below Deck and Core system rotatable pool when deploying.

**Description:**

SSEE Modifications is a classified Navy tactical signals intelligence frequency extension capability that will be integrated into Ship Signal Exploitation Equipment (SSEE) systems. This capability provides simultaneous detection, collection, processing, Information Operations and display of communication intelligence data from hostile, high threat and adversary platforms in select frequency ranges that are not prosecuted or countered today. It includes the Graywing subsystem which is an advanced common data link system that will be integrated into SSEE Increment E and Increment F systems. It is a critical component of "Ballistic Missile Defense, Executive Committee, Anti-Submarine Warfare, Chief of Naval Operations, Executive Board Information Operation (IO) Countermeasure Red Flash" (details held at a higher classification level).

| <p><b>Description:</b></p> <p>Engineering Change Proposal (ECP)/Obsolescence procures Commercial Off-The-Shelf/Non-Developmental Item (COTS/NDI) equipment to replace obsolete and end-of-life (EOL) equipment for the Ship's Signal Exploitation Equipment (SSEE) Increment F (All Variants) program. ECP incorporates Pre-Planned Product Improvements (P3I) for the acquisition and localization of the latest Signals of Interest (SOI) and Information Operations (IO). ECP maintains and improves upon SSEE Increment F's (All Variants) capability and relevance within a rapidly evolving threat environment. ECP equipment will be used to enable SSEE Increment F(V)7/8 (TCS) to meet its scalable and modular capacity.</p> <p>[Blade Replacement Kits] Procurement of Blade Replacement Kits to address IBM/Lenovo server replacement (Lenovo servers are being sold to foreign owners). These kits are able to support system Technical Refresh, Windows 10 operating system compliance and replace obsolete parts.</p> |                    |                |                |                     |                                                                     |                      |                        |                |                |                                                                                                                    |                    |               |

**Description:**

1U030: Automatic Identification System (AIS) is required for safety of navigation for all surface ships and submarines. AIS is a maritime Very High Frequency (VHF) communication system, which allows ships to exchange navigation, ship identification, and cargo information machine-to-machine via VHF transponder. The AIS capability provides Navy ships with the ability to rapidly identify and track commercial shipping, which significantly increases the Navy's ability to distinguish between normal and suspicious merchant ships headed towards United States and allied ports around the globe. AIS provides critical track data to the Common Operational Picture (COP) on surface ships, AN/BYG-1 Combat System on submarines, Global Command and Control System-Maritime (GCCS-M) on Force level ships, and Global Command and Control System-Joint (GCCS-J) at Fleet Maritime Operations Center (MOC)s for publishing AIS data to the Maritime Domain Awareness (MDA) Data Sharing Community of Interest. The AIS submarine configuration provides an interface to the AN/BYG-1 Combat System and Encrypted AIS capability that is currently not available on other AIS variants. This capability dramatically improves the Combatant Commanders' situational awareness and MDA data sharing capabilities in support of regional engagement, and tracking efforts against potential maritime terrorism threats. Funds will procure and install AIS systems for Navy ships, submarines and shore sites consisting of a combination of modified Commercial Off-The-Shelf (COTS) and government/commercial software, such as omni-directional VHF, Global Positioning System antennas, AIS transponders, displays and associated cables, servers, power supplies, laptop computers, junction boxes, switches and radio frequency couplers. Without this configuration of AIS, Navy submarines will not be able to see encrypted AIS track data and will increase the risk of collisions.

[P40A / Combat Workstation - Procurement]: The combat workstation is a ruggedized Panasonic Toughbook (CF-54) that provides AIS message data for mission planning.

| <p>*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                             |                    |                                               |                       |                                              |                                                                                      |                                              |                                              |                                              |                                              |
| <p><b>Justification:</b></p> <p>The Navy increased the AIS program budget to begin design/integration efforts to field the AIS capability on Nuclear Command, Control, and Communications (NC3) mission capable Ohio class (SSBN) submarines. The need for AIS system is especially important for SSBN submarines, which have limited maneuverability during strategic patrol. The AIS Submarine configuration provides situational awareness (to include encrypted AIS message traffic from US Coast Guard vessels) to the SSBN Commanding Officer during time constrained ascents to communications depth, thereby significantly reducing the risk of a close-aboard contact situation which has occurred in the past, impacting the already limited resource of these SSBN submarines.</p> <p>Additional funding is to implement United States Fleet Forces Command (USFFC) Comprehensive review recommendations for adding an AIS Workstation in Combat Information Center (CIC) on Surface Ships. An AIS Workstation in CIC will allow AIS data to be correlated with information from other sources such as RADAR in CIC resulting in improved situation awareness and mission planning capability. Non-recurring cost associated with network and shipboard certification requirements. Updating the AIS architecture to integrate an additional AIS Workstation into the Combat Information Center (CIC) will include Non-Recurring Engineering (NRE) costs associated with the Ship Modernization process such as Engineering Change and Ship Change documentation, Interactive Electronic Technical Manual (IETM) updates, etc. There are 26 Ship Class drawings that need to be updated to detail where and how the new laptop will be installed in CIC, to include how it will be mounted and interface definitions for network, power, etc. The new laptop is an added interface to the AIS architecture that requires End to End Integration testing and AI SIT network validation testing and an updated ATO.</p> <p>The FY19 funds provide for the procurement of five AIS submarine systems and forty-four Combat Workstations and associated Design Services Allocation; integration testing to support AIS installations on SSBN class submarines and installation funding for two submarines. The AIS Cyber hardening effort begins in FY19. Since this modernization effort is required on all platforms, it requires ship class drawings for 26 different classes of ships. The Cyber Ship Alteration (SHIPALT) effort in FY19 is non-recurring.</p> <p>In FY19 funding was realigned from OPN BLI 2361 AIS to OMN 1C1C (Combat Communications and Electronic Warfare) to properly fund integration and sustainment of a cyber hardening capability for AIS.</p> <p>AIS procurement unit cost has increased from FY18 to FY19 due to material cost increases. The material cost of the nickel connector components of the AIS system increased from \$10k to \$20k. The only other material alternative that meets EMC/EMI requirements are Stainless Steel connectors at a much higher cost.</p> |                                             |                    |                                               |                       |                                              |                                                                                      |                                              |                                              |                                              |                                              |

| (1) FY19 funding supports the procurement of one SEAWOLF submarine and four submarine class systems for Ship, Submersible, Ballistic, Nuclear (SSBN)submarines. AIS procurement unit cost has increased from FY18 to FY19 due to material cost increases. The delta in per unit installations costs is driven by the switch in procurements from AIS (V)3 system installed on Los Angeles Class submarines to the AIS (V)9 system that is required for installation on Ohio Class submarines. The higher cost of the AIS (V)9 system is largely due to a recent 100% cost increase in price for the nickel connectors that are required to meet submarine EMI/EMC requirements. The only other material alternative that meets EMC/EMI requirements are Stainless Steel connectors at a much higher cost. |       |                |                  |            |                   |                                                                               |            |                   |                  |            |                   |                  |            |                                                                        |                  |            |                   |                  |            |                   |
| (2) In FY19, AIS will be updating the architecture to integrate an additional AIS Workstation into the Combat Information Center (CIC) will include Non-Recurring Engineering (NRE) costs associated with the Ship Modernization process such as Engineering Change and Ship Change documentation, Interactive Electronic Technical Manual (IETM) updates, etc. The new laptop is an added interface to the AIS architecture that requires End to End Integration testing and AI SIT network validation testing and an updated ATO.                                                                                                                                                                                                                                                                       |       |                |                  |            |                   |                                                                               |            |                   |                  |            |                   |                  |            |                                                                        |                  |            |                   |                  |            |                   |
| (3) Design Services Allocation (DSA) and Installation costs vary depending on the submarine class and hull being installed on and the location of the installation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |       |                |                  |            |                   |                                                                               |            |                   |                  |            |                   |                  |            |                                                                        |                  |            |                   |                  |            |                   |
| (4) Prior to the first Seawolf class install in FY20, the Ship Alteration (SHIPALT) 4515 drawings will be modified in FY19 to reflect the changes to the SAAB R5 transponder and their modifications that have been incorporated into the AIS system since the SHIPALT drawings were drafted in 2011.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |       |                |                  |            |                   |                                                                               |            |                   |                  |            |                   |                  |            |                                                                        |                  |            |                   |                  |            |                   |

<sup>(5)</sup> The AIS Cyber hardening effort begins in FY19. Since this modernization effort is required on all platforms, it requires ship class drawings for 26 different classes of ships. The class drawings will also be updated to include detail where and how the new laptop will be installed in Combat Information Center (CIC), to include how it will be mounted and interface definitions for network, power, etc. The Cyber and CIC Ship Alteration (SHIPALT) effort in FY19 is non-recurring.

| Gross/Weapon System Unit Cost (\$ in Dollars)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | -           | -       | -                                                     | -            | -           | -                                                                         | -                                   | -                   | -       | -       | -           | -          |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |         |                                                       |              |             |                                                                           |                                     |                     |         |         |             |            |
| The FY 2019 funding request was reduced by \$.193 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |             |         |                                                       |              |             |                                                                           |                                     |                     |         |         |             |            |
| Cooperative Engagement Capability (CEC) significantly improves Battle Force Anti-Air Warfare (AAW) capability by coordinating all Battle Force AAW sensors into a single, real-time, composite track picture capable of fire control quality. CEC distributes sensor data from each ship and aircraft, or cooperating unit (CU), to all other CUs in the battle force through a real-time, line of sight, high data rate sensor and engagement data distribution network. CEC is highly resistant to jamming and provides accurate gridlocking between CUs. Each CU independently employs high capacity, parallel processing and advanced algorithms to combine all distributed sensor data into a fire control quality track picture which is the same for all CUs. CEC data is presented as a superset of the best AAW sensor capabilities from each CU, all of which are integrated into a single input to each CU's combat weapons system. CEC significantly improves our Battle Force defense in depth, including both local area and ship defense capabilities against current and future AAW threats. Moreover, CEC provides critical connectivity and integration of over-land air defense systems capable of countering emerging air threats, including land attack cruise missiles, in a complex littoral environment.                       |             |         |                                                       |              |             |                                                                           |                                     |                     |         |         |             |            |
| CEC consists of the Data Distribution System (DDS), the Cooperative Engagement Processor (CEP), and Combat System modifications. The DDS encodes and distributes ownship sensor and engagement data and is a high capacity, jam resistant, directive system providing a precision gridlocking and high throughput of data. The CEP is a high capacity distributed processor that is able to process force levels of data in near real-time. This data is passed to the ship's combat system as high quality data for which the ship can cue its onboard sensors or use the data to engage targets without actually tracking them. The Navy has begun implementation of a Pre-Planned Product Improvement (P3I) approach to modify the current equipment to meet reduced size, weight, cost, power and cooling objectives. This P3I approach also supports continuity for interoperability improvements and program protection, as well as supporting open architecture initiatives and comms independence. P3I will provide hardware which complies with Category 3 Open Architecture Core Environment (OACE) standards with rehosted existing software, which will be fielded fleet-wide to allow affordable replacement of obsolete computing system components and eliminate dependencies on "closed" equipment, operating systems, and middleware. |             |         |                                                       |              |             |                                                                           |                                     |                     |         |         |             |            |
| A family of antennas approach will be used to satisfy CEC requirements with lower life cycle costs (procurement, installation, and maintenance) and reduced weight (on mast and below deck). These antennas enable future capability as well as providing a solution extensible to additional platforms. A competitive contract for Common Array Block (CAB) antenna development and production was awarded late FY13. CEC is planned for shipboard installations at various Naval and commercial shipyards aboard CG/CG Mod, DDG/DDG Mod, CV/CVN, LPD, LHD, DDG 1000, and LHA ship classes during scheduled ship availability periods and at land based test sites (LBTS).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |         |                                                       |              |             |                                                                           |                                     |                     |         |         |             |            |

| Line Item MDAP/MAIS Code: N/A                                                                                                                                                                                                                                                                                     |                                                       |                                                                           |
| [P40A / UC002 - AN/UYQ-70 DISPLAY]: This is a sunk cost to fund the procurement of the AN/UYQ-70 display system for use and integration with the CEC system.                                                                                                                                                      |                                                       |                                                                           |
| [P40A / UC004 - ECP/KIT PROCUREMENT]: These funds are for the procurement and installation of Engineering Change Proposals (ECPs)(AN/USG-2 to AN/USG-2B upgrades/AN/USG-2A to AN/USG-2B upgrades) Field Change Kits to address CEC parts obsolescence associated with interfacing systems on multiple platforms.  |                                                       |                                                                           |
| [P40A / UC005 - NON-RECURRING DEPOT COST]: This is a sunk cost to establish a depot for the CEC system.                                                                                                                                                                                                           |                                                       |                                                                           |
| [P40A / UC006 - VISUAL INTERACTIVE SIMULATED TRAINING APPLICATION (VISTA) TRAINING]: This is a sunk cost to fund VISTA training related to the CEC system.                                                                                                                                                        |                                                       |                                                                           |
| [P40A / UC008 - SUPPLY SUPPORT]: This is a sunk cost for Supply Support for the CEC system.                                                                                                                                                                                                                       |                                                       |                                                                           |
| [P40A / UC011 - SIGNAL DATA PROCESSORS (SDP) BACKFITS (LBTS)]: Funds are for the procurement of Signal Data Processors (SDP) backfits at Land Based Test Sites (LBTSS). There are no installation costs associated with these procurements because the installations will be performed by employees at the LBTSS. |                                                       |                                                                           |
| [P40A / UC013 - AN/USG-2B HARDWARE CONVERSION KITS (AN/USG-2)]: Funds are for the procurement of AN/USG-2B hardware conversion kits for the CEC AN/USG-2 system configuration.                                                                                                                                    |                                                       |                                                                           |
| [P40A / AN/USG-2B HARDWARE CONVERSION KITS (AN/USG-2)]: FY 19 - Added procurement quantity of 5 units for Mode 5 IFF Acceleration                                                                                                                                                                                 |                                                       |                                                                           |
| [P40A / UC014 - AN/USG-2B HARDWARE CONVERSION KITS (AN/USG-2A)]: Funds are for the procurement of AN/USG-2B hardware conversion kits for the AN/USG-2A CEC system configuration.                                                                                                                                  |                                                       |                                                                           |
| [P40A / UC015 - AN/USG-2B HARDWARE CONVERSION KITS (LBTS)]: Funds are for the procurement of AN/USG-2B hardware conversion kits for CEC Land Based Test Sites.                                                                                                                                                    |                                                       |                                                                           |
| [P40A / UC830 - PRODUCTION ENGR. SUPPORT]: These funds are for production engineering support for CEC systems.                                                                                                                                                                                                    |                                                       |                                                                           |
| [P40A / UCCA1 - CONGRESSIONAL ADD]: These are Congressional add funds.                                                                                                                                                                                                                                            |                                                       |                                                                           |
| [P3A / UC001 - COOPERATIVE ENGAGEMENT TRANSMISSION PROCESSING SET (USG-2/2A/2B)]: These funds are for the procurement of CEC to backfit CG, DDG, CV/CVN, and LHD ship classes, as well as Land Based Test Sites (LBTSS).                                                                                          |                                                       |                                                                           |
| [P3A - 2 / UC003 - PAAA BACKFIT KITS]: These funds are for the procurement of Planar Antenna Array Assembly (PAAA) backfit kits.                                                                                                                                                                                  |                                                       |                                                                           |
| [P3A - 3 / UC009 - SIGNAL DATA PROCESSOR (SDP) BACKFITS (AN/USG-2)]: Funds are for the procurement of Signal Data Processors (SDP) backfits.                                                                                                                                                                      |                                                       |                                                                           |
| [P3A - 4 / UC010 - SIGNAL DATA PROCESSORS (SDP) BACKFITS (AN/USG-2A)]: Funds are for the procurement of Signal Data Processors (SDP) backfits for AN/USG-2A equipment.                                                                                                                                            |                                                       |                                                                           |
| [P3A - 5 / UC012 - COMMON ARRAY BLOCK (CAB) ANTENNA - SHIPBOARD]: Funds are for the procurement of Common Array Block (CAB) antennas for shipboard AN/USG-2B systems.                                                                                                                                             |                                                       |                                                                           |

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.  
 Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**  
 Funds are to procure hardware and provide associated support for the CEC system. Requirements are driven by planned procurements of CEC for LHD 2-6, Planar Antenna Array Assembly (PAAA) antennas, and Signal Data Processor (SDP) backfit kits. Increase to FY 18 requirements are to procure hardware in alignment with Fleet Modernization Procurement and Installation Plan for CEC Backfit to CG, DDG, CVN, and LHD ship classes as well as Land Based Test Sites (LBTS). Funding increase to support additional FY 19 requirements to accelerate procurement and installation of hardware required for Mode 5 Identification Friend/Foe (IFF) capability to the Fleet by 2020.

**UNCLASSIFIED**

**Footnotes:**

<sup>(7)</sup> This will be a competitively awarded contract 3Q FY17 with options in FY18.

<sup>(8)</sup> The last option year under the current CEC Production contract was FY14. Two additional option years have been added to the contract for FY15 and FY16.

<sup>(9)</sup> Procurement of this equipment transitioned to a new Production contract starting in FY15.

<sup>(10)</sup> 2016 - Option Year 1 of DRS Production Contract

<sup>(11)</sup> 2017- Option Year 2 of DRS Production Contract

<sup>(12)</sup> 2018- Option Year 3 of DRS Production Contract

<sup>(13)</sup> The last option year under the current CEC Production contract was FY14. Two additional option years have been added to the contract for FY15 and FY16.

<sup>(14)</sup> Procurement of this equipment transitioned to a new Production contract starting in FY15.

<sup>(15)</sup> 2016 - Option Year 1 of DRS Production Contract

<sup>(16)</sup> 2017 - Option Year 2 of DRS Production Contract

<sup>(17)</sup> 2018 - Option Year 3 of DRS Production Contract

<sup>(18)</sup> The last option year under the current CEC Production contract was FY14. Two additional option years have been added to the contract for FY15 and FY16.

<sup>(19)</sup> Procurement of this equipment transitioned to a new Production contract starting in FY15.

**Description:**

Strike Group Anti-Air Warfare (AAW) Improvement. These funds are for the procurement of CEC to backfit CG, DDG, CV/CVN, and LHD ship classes, as well as various Land Based Test Sites (LBTs).

[COOPERATIVE ENGAGEMENT TRANSMISSION PROCESSING SET (USG-2/2A/2B)] Increases in cost to the USG-2B system from FY 16 to FY 18 is attributed to procuring a new type of hardware - a Common Block Array (CAB) Antenna vice PAAA antenna for LHD class ships in FY 18.

| Description:<br>Strike Group Anti-Air Warfare (AAW) Improvement. The PAAA Backfit Kit procurements will be replaced with Common Array Block (CAB) - Shipboard Antenna procurements commencing in FY16. PAAA Backfit Kits are installed on CG, DDG, CVN, LPD, and LHD ship classes<br><br>[PAAA BACKFIT KITS] The 2 PAAA antennas being procured in FY15 and 1 PAAA being procured in FY16 will replace 3 older SBAA antennas currently in the Fleet. These SBAAAs are very expensive to maintain and some of the parts are becoming obsolete. PAAA Backfit Kits are installed on CG, DDG, CVN, LPD, and LHD ship classes |             |         |         |                                                                           |             |               |                 |         |                                                               |         |             |        |

**Description:**

Strike Group Anti-Air Warfare (AAW) Improvement. Funds are for the procurement of Signal Data Processors (SDP) backfits in alignment with Fleet Modernization Procurement and Installation Plan for CEC Backfit to CG, DDG, CVN, and LHD ship classes

[SIGNAL DATA PROCESSORS (SDP) BACKFITS (AN/USG-2)] Prior Year and FY12 includes funding to procure AN/USG-2B hardware conversion kits. A new cost code (UC013) was created and the funding for the hardware conversion kits has been realigned to this cost code for FY13-18.

**Footnotes:**

<sup>(23)</sup> A new cost code (UC013) was created and the funding for the hardware conversion kits has been realigned to this cost code for FY13-18. Funds are for the procurement of Signal Data Processors (SDP) backfits in alignment with Fleet Modernization Procurement and Installation Plan for CEC Backfit to CG, DDG, CVN, and LHD ship classes. FY 19 - Added procurement and installation quantity of 5 units for Mode 5 IFF Acceleration. Increased installation costs in FY 19 as a result of higher shipyard costs due to Firm Fixed Priced Contract cost structure.

<sup>(24)</sup> The last option year under the current SDP-S Production contract is FY16. Planning to award a competitive follow-on contract in FY17.

<sup>(25)</sup> A competitive follow-on contract action is in process with an expected award date of 3Q FY2017.

## Footnotes:

<sup>(26)</sup> Funds are for the procurement of Signal Data Processors (SDP) backfits for AN/USG-2A equipment in alignment with Fleet Modernization Procurement and Installation Plan for CEC Backfit to CG, DDG, CVN, and LHD ship classes. First Delivery from Competitively awarded May 2017 contract in will be November 2018.

<sup>(27)</sup> The last option year under the current SDP-S Production contract is FY16. Planning to award a competitive follow-on contract in FY17.

<sup>(28)</sup> A competitive follow-on contract action is in process with an expected award date of 3Q FY2017.

| <b>Footnotes:</b><br><sup>(29)</sup> The unit price of the CAB increased by approximately \$400K from the PB-16 budget starting in FY17. This increase is driven by the requirement to procure 1 new Environmental Control System Controller (ECSC) for each CAB that is procured. Removed Procurements in FY 17 and Installation costs for FY 18 and FY 19 due to congressional mark in FY 17 (4.069M) |            |                                       |           |                                       |           |                                       |           |                                       |           |                                                                                  |                            |                                       |           |                                             |                        |                                       |           |                                       |           |                                                                                                 |           |                                       |           |                                       |           |                |           |           |           |           |            |

| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | -           | -       | -                                      | -            | -           | -                                                                       | -       | -                                   | -       | -       | -           | -          |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |             |         |                                        |              |             |                                                                         |         |                                     |         |         |             |            |
| <p>The Naval Tactical Command Support System (NTCSS) is a multi-function program designed to provide standard tactical support information systems to various afloat and associated shore-based fleet activities. The mission is to provide the full range of responsive tactical support Automated Data Processing (ADP) hardware and software in support of the management of information, personnel, material and funds required to maintain and operate ships, submarines, and aircraft. NTCSS is to provide an efficient management of afloat tactical support data, through the use of standardized hardware and software, to meet the mission support information management requirements for force sustainment.</p> <p>NTCSS incorporates the functionality of the Shipboard Non-Tactical ADP Program (SNAP) systems, the Naval Aviation Logistics Command Management Information System (NALCOMIS), and the Maintenance Resource Management System (MRMS).</p> <p>SNAP is an automated information system that supports organizational level maintenance, supply, financial and administrative functions on afloat units, at Marine Aviation Logistics Squadrons (MALs) and at associated shore activities. SNAP improves equipment supportability and maintainability and thus readiness through: improvement in the accuracy of maintenance, supply, financial and related support data maintained and reported by the ship; and acceleration of management report preparation and data transmission. The scope of SNAP includes approximately 300 sites.</p> <p>NALCOMIS is an automated, real time, interactive, management information system that provides a modern management tool for day-to-day management of aircraft maintenance at the organizational and intermediate levels. NALCOMIS automates management of the aviation repairables inventory, providing nose-to-tail tracking through the repair and operations cycles. The scope of NALCOMIS includes 66 aviation intermediate maintenance activities located afloat (CVN/LHA/LHD/MALS), at Naval Air Stations (NAS), and approximately 326 Navy and Marine Squadrons.</p> <p>MRMS is an automated information system that supports ship intermediate maintenance management of the Atlantic and Pacific Fleets. MRMS supports Type Commands, Group Commanders, Area Coordinators, Readiness Support Groups, Submarine Squadrons, Ship Repair Facilities, and various Intermediate Maintenance Activities, both afloat and ashore, for budgeting, planning, production and analysis of ship maintenance. MRMS improves ship readiness through improved maintenance and ship repair management, information resource management, and maintenance data processing. The scope of MRMS includes approximately 16 shipboard and 65 shore based intermediate and maintenance and planning activities.</p> <p>DY005, Ship Set Equipment Upgrades procures afloat ruggedized, commercial-off-the-shelf (COTS) computing equipment, which includes servers to support the NTCSS application and database, personal computers (PCs) that will interface with the servers for maintenance and supply transactions, and printers to display output. COTS software, which includes the operating system, comes loaded on the servers and PCs.</p> |             |         |                                        |              |             |                                                                         |         |                                     |         |         |             |            |

**Remarks:**

Provides ADP system upgrades and NTCSS-Optimized software to Battle Group and unit level ships.

Application subsystems include financial/inventory management, organizational and surface maintenance management, and administrative information systems support. NTCSS procurements will also provide ship capabilities for displaying and storing Computer-aided Acquisition and Logistics Support (CALS) initiative information (digitized engineering drawings, automated technical manuals, etc.).

(†) indicates the presence of a P-5a

**Footnotes:**

(1) Quantity changes from year to year are driven by fact-of-life changes to ship maintenance availability schedules. The average unit cost fluctuation is primarily attributed to variance in system configuration requirements for each NTCSS platform type. For example, a NTCSS DDG hardware suite consists of 1 server, 16 desktop workstations and 7 printers while a NTCSS SSBN hardware suite consists of 2 servers, 12 desktop workstations, 20 laptop workstations and 10 printers. The average procurement cost (hardware, software, integration, and engineering support) for a unit level ship (DDG/CG/LSD) is approximately \$50K while the average procurement cost for a submarine (SSBN) is approximately \$70K. FY18 will procure: 5 CG, 4 CVN, 25 DDG, 1 LCC, 1 LHA, 1 LPD, 1 LSD, 4 MCM, 4 SSBN and 4 SSN hull types. FY19, by comparison, will procure: 7 CG, 5 CVN, 30 DDG, 1 LCC, 6 LHD, 3 LPD, 3 LSD, 3 MCM, 5 SSBN and 7 SSN hull types.

**Description:**

Application subsystems include/financial/inventory management, organizational and surface maintenance management, and administrative information systems support. NTCSS procurements will also provide ship/shore capabilities for displaying and storing Computer-aided Acquisition and Logistics Support (CALS) initiative information (digitized engineering drawings, automated technical manuals, etc.).

**Footnotes:**

<sup>(2)</sup> Quantity changes from year to year are driven by fact-of-life changes to ashore site availability schedules. The variance in unit cost between fiscal years is attributed to the composition of ashore site configurations that NTCSS will be procuring and installing in any given fiscal year. For example, a NTCSS Navy Aviation Squadron (OMA) hardware suite consists of 4 laptop servers, 4 detachment systems

| <p>(for deployment) and 2 squadron printers. The Marine Aviation Logistics Squadron (MALS) ashore sites utilize an NTCSS Virtual Environment (VE) configuration, which allows for the consolidation of multiple systems under a single procurement and installation. A NTCSS MALS hardware suite consists of an IMA rack, 6 laptop servers, 110 laptop workstations, 15 detachment systems (for deployment), 35 IMA printers and 49 squadron printers. The average procurement cost (hardware, software, integration, and engineering support) for an OMA ashore site is approximately \$50K while the average procurement cost for a MALS ashore site is approximately \$650K. FY18 will procure 5 Naval Air Stations, 2 MALS, 31 OMA, 18 SPECWAR and 2 Training/Support sites. FY19, by comparison, will procure 4 Naval Air Stations, 2 MALS, 41 OMA, and 2 Training/Support sites.</p> |                                                                                |                                                                                                                             |

## Description:

The Advanced Tactical Data Link Systems (ATDLS) funds the Time Division Multiple Access family of Link 16 terminals including the Multifunctional Information Distribution System - Low Volume Terminal, Multifunctional Information Distribution System - Joint Tactical Radio System, Joint Tactical Information Distribution System (JTIDS) and the Tactical Digital Information Link - Joint (TADIL-J) message standard databases resident in the Command & Control Processor (C2P)/ Common Data Link Management System (CDLMS). ATDLS also funds the Command and Control Processor (C2P) Technology Refresh, Next Generation (NG) C2P (NGC2P) upgrades to meet LHD combat system upgrades, Link-22 capability upgrades, Link 16 terminal upgrades and replacements, Link 16 antenna replacements, Link Monitoring Management Tool, and other ATDLS integration.

Command and Control Processor (C2P) Technology Refresh Full Systems Ship/Shore (DR003): C2P computer processing boards are obsolete and have antiquated software code with no industrial base support. Technology refresh is required for C2P software modernization.

Command and Control Processor (C2P) Amphibious Assault Ship (LHD) Upgrades (DR003): Changes to LHD combat systems starting in FY13 will require NGC2P/CDLMS upgrades in order to maintain critical data link functions including simultaneous processing of Link 11, Link 16 and Joint Range Extension (JRE).

Link 16 Upgrade Kits Ship/Shore (DR012): U.S. Navy surface ships Link 16 JTIDS terminals and Multifunctional Information Distribution System on Ship (MOS) terminals not replaced by MOS Mod by 2025 will be implemented with Frequency Remapping (FR) and Crypto Modernization (CM) mandated upgrades. The product improvement will bring the Link 16 terminals in compliance with the Department of Defense / Department of Transportation Memorandum of Agreement (31DEC02) and updated National Security Agency approved cryptographic algorithms.

Link 16 MOS Modernization (MOS MOD) Replacement Ship/Shore (DR012): All US Navy ships with legacy MOS and JTIDS terminals will have Link 16 terminals replaced with modernized MOS terminals to address legacy Link 16 terminal obsolescence and enable the implementation for future enhancements brought by the MIDS Joint Tactical Radio System (MIDS-J) terminals. MOS Mod units will transition to the use of MIDS-J Current Multi-Netting (CMN) terminal vice MIDS Core terminals.

Link 16 Antenna Replacement (DR012): Existing obsolete dedicated Link 16 shipboard antenna will be replaced.

Link 16 MOS Terminal Controller Central Processing Unit (TC CPU Update): TC CPU update is required to address obsolescence issue in the TC CPU as well as provide mandated transition to Windows 10 operating system. Will be fielded on all MOS equipped ships.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

## Justification:

The FY 2019 funding request was reduced by (\$1.023) million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

Advanced Tactical Data Link Systems (ATDLS) procure command and control equipment for both shipboard and shore units including the Multifunctional Information Distribution System on Ship (MOS) Modernization (MOD) Terminals, Link 16 Network Program Antennas, Command and Control Processor (C2P) hardware and software, and Link Monitoring Management Tool (LMMT) hardware and software to address Air Defense System Integrator (ADSI) obsolescence issues.

FY2019: Budget control decrease from FY2018 to FY2019 due to the conclusion of the ATDLS Training (multi-year effort).

**Description:**

Command and Control Processor (C2P) Technology Refresh Full Systems Ship: C2P computer processing boards are obsolete and have antiquated software code with no industrial base support. Technology refresh is required for C2P software modernization. Additionally, C2P configuration is not shock qualified. Full Systems upgrades are required to achieve 901D shock certification.

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |             |         |                                        |              |             |                                                                                |         |                                     |         |         |             |            |
| Funding includes Global Command and Control System-Maritime (GCCS-M), the Navy fielded portions of GCCS-Joint, and Joint Automated Deep Operations Coordination System (JADOCS). GCCS-M is further delineated by Afloat and Ashore.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |         |                                        |              |             |                                                                                |         |                                     |         |         |             |            |
| GCCS-M is the Maritime implementation of the United States (U.S.) Global Command and Control System (GCCS). It provides Maritime Commanders at all echelons of command with a single, integrated, scalable Command, Control, Communication, Computers and Intelligence (C4I) system that fuses, correlates, filters, maintains and displays location, and attribute information on friendly, hostile and neutral land, sea and air forces. It takes this information and integrates it with available intelligence and environmental information to support commander decision making. It operates in near real-time, constantly updating unit positions and other situational awareness data. GCCS-M also records data in appropriate databases and maintains a history of changes to those records. System operators use the data to construct relevant tactical pictures using maps, charts, topography overlays, oceanographic overlays, meteorological overlays, imagery and all-source intelligence information coordinated into a Common Operational Picture (COP) that can be shared locally and with other sites. GCCS-M is not a weapon system, but receives data from, and interfaces with Navy integrated weapons systems. Navy Commanders review and evaluate the general tactical situation, plan actions and operations, direct forces, synchronize tactical movements, and integrate force maneuver with firepower. GCCS-M operates on General Service (GENSER) Secret networks in a variety of environments and supports joint, coalition and allied forces. GCCS-M is implemented Afloat and at Ashore fixed command centers. Increment 1 includes all GCCS-M software versions 4.0 and earlier. Increment 2 is GCCS-M 4.1. |             |         |                                        |              |             |                                                                                |         |                                     |         |         |             |            |
| [P5 / FA010 GCCS-M Afloat]: GCCS-M Afloat provides Command and Control capability to Force Level Ships (e.g., CVN Carriers, LCC Command Ships, LHA and LHD Amphibious Ships), Unit Level Ships (e.g., CG Cruisers, DDG Destroyers, MCM Mine Countermeasure Ships, LPD and LSD Amphibious Ships, FF/LCS Littoral Combat Ships, PC Coastal Patrol Ships), Submarines (e.g., SSN/SSBN/SSGN Submarines), the Software Support Activity (SSA), and the In-Service Engineering Activity (ISEA).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |             |         |                                        |              |             |                                                                                |         |                                     |         |         |             |            |
| [P5 / FA020 GCCS-M Ashore]: GCCS-M Ashore provides evolutionary systems and ancillary equipment upgrades to support Fleet Commanders, Force Anti-Submarine Warfare Commanders, Submarine Operating Authorities, Aegis Ashore Missile Defense Systems, and Technical Training Equipment Sites worldwide. GCCS-M Ashore provides systems that receive, process, display, maintain and/or assess unit characteristics, employment scheduling, material condition, combat readiness, war fighting capabilities, and positional information of own, allied, and hostile forces. GCCS-M Ashore provides the tools necessary for fleet and Shore based Commanders to execute plans, transmit tasking, and provide tactical information to subordinate forces.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |             |         |                                        |              |             |                                                                                |         |                                     |         |         |             |            |
| [P5 / FA040 GCCS (Joint) Support Equipment]: Global Command and Control System- Joint (GCCS-J) is a Department of Defense (DoD) Program of Record managed by the Defense Information Systems Agency (DISA) GCCS-J Program Management Office (PMO). The GCCS-J system requirements, software release schedule, and system fielding plan are determined by the DISA GCCS-J PMO in coordination                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |             |         |                                        |              |             |                                                                                |         |                                     |         |         |             |            |

## Justification:

The FY 2019 budget procures and installs Global Command and Control System - Joint (GCCS-J) Ashore workstations, servers, Local Area Network (LAN) hardware and software, communications equipment, and Joint Automated Deep Operations Coordination System (JADOCS), and Global Command and Control System - Maritime (GCCS-M) software, to include Windows XP eradication efforts on GCCS-M afloat platforms.

| Remarks:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                     |               |                      |                     |               |                      |                                                                                |               |                      |                     |                 |                      |                     |                                                                            |                      |                     |               |                      |
| <div>- Global Command and Control System - Maritime (GCCS-M) Afloat install quantities also include refresh units.</div> <div>- For GCCS-M software-only installations, Other Procurement, Navy (OPN) is the appropriate fund source when the GCCS-M installation is an incidental cost to the Common Computing Environment (CCE)/ Consolidated Afloat Networks and Enterprise Services (CANES) hardware installation.</div> <div>- GCCS-M unit costs are based on the average cost of all the platforms or sites installed within a given fiscal year. Unit cost variances are due to the diverse types of upgrade requirements per platform or site.</div> <div>- GCCS-M Increment 1 can deliver a software / hardware solution or a software-only solution.</div> <div>- GCCS-M Increment 2 Afloat is the final version of GCCS-M.</div> <div>- Global Command and Control System - Joint (GCCS-J) quantities represent the number of complete unit upgrades to existing systems. The cost to upgrade each unit varies based on the number of servers, computers, and monitors and the equipment configurations. The different unit sizes and configurations result in varying unit costs.</div> |                     |               |                      |                     |               |                      |                                                                                |               |                      |                     |                 |                      |                     |                                                                            |                      |                     |               |                      |

**Footnotes:**

<sup>(2)</sup> For GCCS-M Increment 1 Afloat, Increment 2 Afloat, and Increment 2 Ashore: Space and Naval Warfare Systems Command Systems Center (SPAWARSYSCEN), Pacific and Atlantic are procuring, integrating and installation agents. There are multiple hardware and software contracts awarded under each of these cost elements.

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |             |         |                                             |              |             |                                                                         |         |                                     |         |         |             |            |
| Provide systems, subsystems, and engineering change kits for minehunting, navigation, and tactical display operations by the surface Mine Countermeasure (MCM) force. Engineering change kits improve reliability and maintainability and correct deficiencies to allow equipment to perform in accordance with operational requirements.                                                                                                                                                                                                                                                                                                                                                                                                                 |             |         |                                             |              |             |                                                                         |         |                                     |         |         |             |            |
| HME Ship Systems support software integration and hardware upgrades to legacy MCM ships and software tech refresh for the Integrated Ship Control System (ISCS) on MCM Class Ships forward deployed to ensure MCM mine hunting and minesweeping capability whereas legacy sustainment is not feasible and would result in delays and obsolescence. This program also supports ship change upgrades computer workstations, replaces network switches, and replaces the operating system.                                                                                                                                                                                                                                                                   |             |         |                                             |              |             |                                                                         |         |                                     |         |         |             |            |
| The MCM Combat System Upgrades program consists of a series of incremental upgrades to the current combat system via Engineering Change Kits. The upgrades improve reliability and maintainability and correct deficiencies to allow the equipment to perform in accordance with operational requirements. This includes supportability and obsolescence Upgrade Engineering Changes of the MCM-1 Class Ship combat systems to resolve issues with the AN/SLQ-48 Mine Neutralization System, installation of Mine Environmental Decision Aids Library (MEDAL) Expeditionary Systems, and improved SSQ-94 System Trainer to MCM Ships' and integrating the SQQ-32 High Frequency Wide Band (HFWB) and SSN-2 PINS upgrade and resolves obsolescence issues. |             |         |                                             |              |             |                                                                         |         |                                     |         |         |             |            |
| The Knifefish Surface Mine Countermeasure Unmanned Undersea Vehicle (SMCM UUV) program procures Unmanned Undersea Vehicles to support clandestine mine detection capability against volume and bottom mines including buried mine detection. The Knifefish system is composed of two UUVs, batteries, launch and handling system, and other support equipment.                                                                                                                                                                                                                                                                                                                                                                                            |             |         |                                             |              |             |                                                                         |         |                                     |         |         |             |            |
| Magnetic Silencing Facility Upgrades supports hardware, auxiliary systems and support in association with the upgrade of the current aging CONUS and Outside Continental United States (OCONUS) Magnetic Silencing Facilities so the calibration of the new Open-Loop Magnetic Systems or Advanced Degaussing System ships and submarines can be accomplished for worldwide operation. The upgrade will also ensure that the ships/submarines will be able to meet OPNAV 8950.2G signature requirements and will be less susceptible to Electro-Magnetic threat systems.                                                                                                                                                                                  |             |         |                                             |              |             |                                                                         |         |                                     |         |         |             |            |

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

## Justification:

The FY 2019 funding request was reduced by \$3.9 million to account for the availability of prior year execution balances.

FY 2019 funds the baseline program in order to outfit the current MCM Fleet with Navy's latest technology to combat Mine Warfare Countermeasures around the world. This includes the continued upgrades of SLQ-48 Mine Neutralization systems and the UISS trainers. Additionally, to meet the increased operational demand, funding will go towards the installation of the MEDAL EA Mine Warfare Planning upgrades. The increase in FY 2019 from FY 2018 is attributed to the initial procurement of Knifefish and ancillary equipment.

| <b>Remarks:</b><br>[Hardware] Unmanned Influence Sweep System (UISS) (LV080): This line item procures the training systems to support the UISS operational units procured for the Littoral Combat Ship (LCS) Mission Modules and Vessels of Opportunity (VOO). UISS consists of an Unmanned Surface Vehicle, power supply, control unit, winch, acoustic generator, magnetic tow cable, and a deploy and retrieve subsystem. UISS will provide long endurance and wide area magnetic and acoustic mine sweep capability onboard the LCS class of ships ships, from ashore, and from VOOs.<br><br>(t) indicates the presence of a P-5a |                     |               |                      |                     |               |                                                                                |                     |               |                        |                     |               |                                                                     |                     |               |                      |                     |               |                      |

**Description:**

The FY 2019 funding request was reduced by \$0.047 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

This program provides a combination of US Navy projects planned to counter the threat to amphibious landing forces from known and projected foreign land/sea mines, obstacles in the beach zone and surf zone approaches to amphibious assault areas. It is a system of systems (Countermines/Counter Obstacle, Intelligence/Surveillance/Reconnaissance/Targeting (ISR/T), Navigation/Virtual Marking/Integration, C4I/Data Fusion) that provides a full assault breaching capability. This program is an essential element to the Marine Corps Ship To Objective Maneuver Concept of Operations.

This procurement line supports the COBRA program of record, delivering COBRA systems to Navy helicopter wings to provide initial proficiency training to Navy aircrews. COBRA systems are also procured under BLI 1601 LCS Mission Modules. The 1601 COBRA systems provide the deployable combat capability to LCS mission packages.

[P5 / SW004: COASTAL BATTLEFIELD RECONNAISSANCE AND ANALYSIS (COBRA)]: The mission of the AN/DVS-1 COBRA is to conduct unmanned aerial tactical reconnaissance in the littoral battlespace for detection and localization of minefields and obstacles in the surf zone and beach zone prior to an amphibious assault. The COBRA Airborne Payload will be carried on the MQ-8B Fire Scout. This allows operators and other personnel to remain at a safe distance from the mine and obstacle belts and enemy direct and indirect fire. COBRA will be embarked in the Littoral Combat Ship (LCS) as part of the Mine Countermeasures Mission Package (MP).

COBRA provides the (ISR/T) part of the Assault Breaching System of systems. One system consists of two Airborne Mine Counter Measures (AMCM) Payloads and one Post Mission Analysis Station. Block I introduces a daytime, surface laid minefield and obstacle detection capability for the Beach Zone. Block II adds a surfzone and night (darkness) detection capability. COBRA will be a modular payload architecture of, and integrated with, the MQ-8B Fire Scout VTUAV and will serve as a "detect" sensor within the LCS Mine Warfare mission package as part of amphibious assault breaching.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

FY 2019 funding supports the baseline program which will procure one COBRA system to be integrated on the MQ-8B FIRESOUL. These systems provide the fleet with the required training assets to certify the pilots and crew to operate and maintain these systems before being deployed on the LCS.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

## Description:

The FY 2019 funding request was reduced by \$4.331 million to account for the availability of prior year execution balances.

NAVSTAR Global Positioning System (NAVSTAR GPS) provides assured and protected navigation solutions to Warfighters through supported, affordable, and integrated systems, and is the primary source of positioning, navigation and timing information for the DoD.

[P3A / (1R0013) Navigation Warfare (NAVWAR)]: NAVWAR ensures that U. S. military forces maintain access to the GPS in an electronically challenging battle space, delivers the capability to deny adversaries access to and use of GPS during military operations, and serves to preserve the peaceful use of GPS. Navy GPS Enhanced User Equipment (UE) Operational Requirements Document directs that future UE will incorporate an increased anti-jam capability. NAVWAR counters the threat by increasing resistance to intentional or unintentional interference. Sea NAVWAR Strategy comprises of 2 program increments, the first increment (near term) is to install GPS anti-jam antenna system (GAS-1) on surface platforms. The second increment (long term) is to install Advanced Digital Antenna Production (ADAP) antennas on surface platforms. The ADAP antenna improves upon GAS-1 performance by providing simultaneous dual frequency nulling, and built in test ability. Procurement and installation of anti-jam GPS antennas and modernized user equipment is required to ensure the continuation of GPS signals from space in a hostile jamming environment. The Sea NAVWAR program will equip selected ships with anti-jam GPS antennas to ensure the continued availability of GPS to support surface combat operations and provide reliable GPS and other positioning, navigation and timing data to ship-board Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR), Combat, and Weapons Systems.

[P3A - 2 / (1R019) Global Positioning System (GPS) - based Positioning, Navigation, & Timing Service (GPNTS)]: The GPS-based PNT Service (GPNTS) system is the primary PNT system for the Navy to ensure reliable PNT capability and interoperability insertion in GPS receivers and associated Command, Control, Computers, Communications and Intelligence (C4I) and combat systems in a denied environment. GPNTS provides precise PNT data required for combat, weapons, command, control, communications, navigation, and other systems, as well as providing the time synchronization critical to the network environments. GPNTS backfits current PNT/GPS systems and forward fit new platforms. GPNTS will host the Air Force GPS Directorate-developed Military GPS User Equipment (MGUE) card, allowing access to the new more accurate and secure GPS Military-Code (M-Code) signal. GPNTS provides more robust and secure GPS/PNT capabilities than is currently in the Fleet. The system provides the capability to migrate non-real time GPS data toward a Common Computing Environment (CCE) and provide a path for the integration of advanced navigation systems and sensors.

| <p><b>Description:</b></p> <p>Procurement and installation of anti-jam (AJ) Global Positioning System (GPS) user equipment and prevention equipment is required to ensure the continued utility of GPS signals from space in a hostile jamming environment. The Sea Navigation Warfare (NAVWAR) program will equip selected ships with anti-jam GPS antennas to ensure the continued availability of GPS to support surface combat operations and provide reliable GPS and other navigation sensor data to ship-board Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance(C4ISR), Combat, and Weapons Systems.</p> <p>Sea NAVWAR will procure and field dual Advanced Digital Antenna Production (ADAP) Fiber Optic Antenna Link (FOAL) antennas in FY19.</p> |                    |                |                |                                                                              |                    |                      |                        |                |                |                                                                                 |                    |                   |

| <p>installed on large surface platforms. An ADAP FOAL may range in cost from \$407K to \$465K depending on Economic Order Quantity Pricing and International exchange rates relevant at time of contract award. The components kits are procured on two separate Indefinite Delivery Indefinite Quantity (IDIQ) contracts competed annually and integrated with the ADAP by SPAWAR Systems Center, Pacific. 4)Delay in delivery of prior year procured units is due to certification issue of sub-vendor, for component of the ADAP antenna. Certification received and deliveries are on schedule and aligned with current installation plan. 5)1-2 months of integration upon receipt of ADAP Antennas.</p> |                                                                              |                                                                                 |                            |

| <p><b>Description:</b></p> <p>The GPS-based PNT Service (GPNTS) system is the primary PNT system for the Navy to ensure reliable PNT capability and interoperability insertion in GPS receivers and associated Command, Control, Computers, Communications and Intelligence (C4I) and combat systems in a denied environment. GPNTS provides precise PNT data required for many combat, weapons, command, control, communications, navigation, and other systems, as well as providing the time synchronization critical to the network environments. GPNTS backfits current PNT/GPS systems as well as serve as a forward fit for new platforms. GPNTS will host the GPS Directorate-developed MGUE card, allowing access to the new more accurate and secure GPS Military-Code (M-Code) signal. GPNTS provides more robust and secure GPS/PNT capabilities than is currently in the Fleet. The system provides the capability to migrate non-real time GPS data toward a Common Computing Environment (CCE) and provide a path for the integration of advanced navigation systems and sensors.</p> <p>GPNTS program will procure and field Low Rate Initial Production (LRIP) units in FY19.</p> |                    |                |                |                     |                                                                              |                      |                        |                |                |                                                                                                                                              |                    |                   |

| K0001: American Forces Radio and Television Service (AFRTS) Program - AFRTS shipboard systems provide command information to deployed Sailors and Marines and allow for the distribution of AFRTS programming in order to provide situational awareness for forward deployed commanders with real-time news and information. The systems also provide programming to Sailors and Marines at sea worldwide as a Navy Quality of Life (QOL) initiative, staying in compliance with the Chief of Naval Operations (CNO) Shipboard Habitability Program. These systems contribute significantly to the habitability of Navy ships by providing and distributing news, command information, training, and entertainment programming using the latest technology available. These systems improve morale, combat effectiveness and retention rates of deployed personnel. All AFRTS systems use Commercial-Off-the-Shelf (COTS) equipment. Fleet Support Detachments (FSDs) are the installing agents for these systems. Each component replacement is made based on ship availability, condition of system, and is coordinated through the Type Commanders (TYCOMs). |             |         |                                        |              |             |                                                                                      |         |                                     |         |         |             |            |
| [P5 / Site CCTV - Digital/300]: K0001 - Shipboard Information, Training and Entertainment (SITE) Closed Circuit Television (CCTV) - Digital/300 - Digital/300 is the next generation of the SITE 2000/300. This system is a digitally-based replacement for the 2000/300 playback. Each system is comprised of Commercial Off-The-Shelf (COTS) components that take three to twelve months to procure. Each component upgrade/replacement is made based on ship availability, by the Fleet Support Detachments (FSDs) as the installing/replacement agents and condition of the system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |             |         |                                        |              |             |                                                                                      |         |                                     |         |         |             |            |
| [P5 / Site CCTV - Digital/400]: Shipboard Information, Training and Entertainment (SITE) Closed Circuit Television (CCTV) - Digital/400 - is the next generation of the SITE 2000/400. This system is a digitally-based replacement for the 2000/400 playback. Requires manpower of one dedicated technician and operator. Each system is comprised of Commercial Off-The-Shelf (COTS) components that take three to twelve months to procure. Each component upgrade/replacement is made based on ship availability, by the Fleet Support Detachments (FSDs) as the installing/replacement agents and condition of the system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |             |         |                                        |              |             |                                                                                      |         |                                     |         |         |             |            |
| [P5 / Site CCTV - Digital/501]: Digital/500 - is the next generation of the Shipboard Information, Training and Entertainment (SITE) 2000/500. This system is a digitally-based replacement for the 2000/500 playback. Requires manpower of two dedicated technicians and three operators. Each system is comprised of Commercial Off-The-Shelf (COTS) components that take three to twelve months to procure. Each component upgrade/replacement is made based on ship availability, by the Fleet Support Detachments (FSDs) as the installing/repair agents and condition of the system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |             |         |                                        |              |             |                                                                                      |         |                                     |         |         |             |            |
| [P5 / Circuit 27TV Upgrade]: Circuit 27TV Upgrade - Upgrade to 14TV head end only that will allow the onboard Shipboard Information, Training and Entertainment (SITE) system to distribute Television Direct To Sailors (TV-DTS), AFRTS, and pier-side cable commercial programming. Each component upgrade/replacement is made based on ship availability by the Fleet Support Detachments (FSDs) as the installing/replacement agents and the condition of the system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |             |         |                                        |              |             |                                                                                      |         |                                     |         |         |             |            |

| <b>Line Item MDAP/MAIS Code:</b> N/A<br><br><p>[P5 / Shipboard Broadcast System (SBS)]: K0001-Shipboard Broadcast System (SBS): The SBS system replaces the Shipboard Information, Training and Entertainment (SITE) 300/400/501 systems with an Internet Protocol (IP) video system. It collects and converts video content from several sources: Navy Motion Picture Services (NMPS) programming via encrypted DVDs (nDVD), Video Server, and shipboard surveillance cameras; and distributes the signals via Circuit 30 in Standard or High Definition. Each system is comprised of Commercial Off-The-Shelf (COTS) equipment that takes six to twelve months to procure. Each system upgrade is done based on ship availability by the Fleet Support Detachments (FSDs) as the installing/replacing agent and condition of the system.</p> <p>[P5 / K0830 - Production Engineering]: Supports review and approval of any production contract technical documentation or the separate development of this documentation to include: signal flow diagrams, Preventive Maintenance Services (PMS), production drawings, provisioning technical documentation (PTD), Integrated Logistic Support (ILS), Program Support Data (PSD), Allowance Parts List (APL's), and engineering in support of final design reviews.</p> <p>[P5 / K0INS - Non-FMP Installation]: Supports the installation of Shipboard Information, Training and Entertainment (SITE), TV-DTS (TV-Direct to Sailor) system onboard Navy ships. Installations are performed by Defense Media Activity Agency (DMAA) Fleet Support Detachments (FSDs) and are based on Type Commander (TYCOM) nominations.</p> |                                               |                                                                                             |

| <p><b>Description:</b></p> <p>Funding in this P-1 line provides Non-Propulsion Electronics equipment that will be installed aboard TRIDENT Class submarines as part of the Obsolete Equipment Replacement (OER) Program.</p> <p>OER Program is the replacement of existing hardware/software that, though functional, has become operationally obsolete, is no longer in production or supportable with spare parts, or has a high failure rate making them no longer cost effective to maintain. OER hardware/software changes are expected to provide significant cost savings via reduced maintenance costs and use Commercial-Off-The-Shelf (COTS) technology wherever possible as long as all technical requirements are met.</p> <p>This funding line includes performance of the required fully integrated system level testing and certification of changes to the TRIDENT Combat systems prior to installation of the changes on the ship. Integrated testing and certification provides assurance that when the changes are installed in the ship, the TRIDENT Combat system will operate as designed, allowing the ships to maintain their operational schedules and mission capabilities.</p> <p>[P40A / CCS Revision Engineering Cert/Test]: This program develops upgrades to legacy systems to maintain required interface connectivity to other Program Acquisition Resource Manager (PARM)-managed subsystems in response to PARMs modernizations, or to address obsolescence, or where mandated requirement changes (example Cyber security) drive changes to hardware or software.</p> |                    |                |                |                                               |                    |                      |                                                                                 |                                            |                |                            |                    |               |

Title represents the P-40a Title when only the P-40a Summary/Total is shown.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</p>                                                                                                                                                                                                            |                                       |             |                                               |                |                                          |                                                                                 |                                          |                                          |                                          |                                          |
| <p><b>Justification:</b></p> <p>The FY 2019 funding request was reduced by \$0.031 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.</p> <p>The increased funding in FY19 is the result of synchronizing the SSBN Legacy CCS Modernization program with the approved conjunctive SWFTS fielding plan. This provides funding for one additional install and one additional procurement in FY19.</p> |                                       |             |                                               |                |                                          |                                                                                 |                                          |                                          |                                          |                                          |

| <sup>(1)</sup> CCS Revision Engineering Cert/Test: This funding is required for software upgrades to the SSBN Ship Control System to meet data stream (heading/speed/depth) redundancy requirements driven by the Non-Propulsion Electrical Systems (NPES) network architecture changes being fielded by SSBN modernization (Submarine Warfare Federated Tactical System (SWFTS) Technical Insertion (TI)-16/18 sonar/fire control modernization).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |       |                |                |            |                   |                |            |                   |                                                                          |            |                   |                |            |                   |                                                             |            |                   |                |            |                   |
| <sup>(2)</sup> SSBN Legacy CCS Modernization: This program is critical to maintaining OHIO Class SSBN operational to the end of service life and delivery of COLUMBIA Class SSBN replacements. The program resolves Data Processing Subsystem (DPS) obsolescence issues and conjunctively supports the upgrade of the SSBN legacy CCS to the Submarine Warfare Federated Tactical Systems (SWFTS) architecture common with the SSN/SSGN classes. Collectively, the DPS and SWFTS upgrades modify Fire Control, SONAR, Voyage Management System (VMS), RADAR, Tactical Navigation, and Periscopes, and collaterally impact Ship Control, Monitoring Subsystem, and interfaces to ship sensors such as speed, depth, and Extremely High Frequency Satellite Communication navigation data. The DPS upgrade includes replacing all UYK-43 computers, DPS workstation, TRIDENT Signal Data Converters (TSDC), and the UGC-143 with a modified Electronic Control Display Unit (ECDU). The ECDU is common equipment on VA Class and planned for the COLUMBIA Class. The ECDU requires hardware and software development to interface to the Strategic Weapon System (SWS) Navigation and maintain critical Ship to SWS interface requirements. The ECDU and all the associated CCS architecture modifications are required to be installed conjunctively with SWFTS. Continued operation of the SSBN strategic mission will require the implementation of the ECDU upgrade along with the SWFTS upgrade. |       |                |                |            |                   |                |            |                   |                                                                          |            |                   |                |            |                   |                                                             |            |                   |                |            |                   |

| Flyaway Unit Cost ( <i>\$ in Dollars</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | -                  | -              | -              | -                                             | -                  | -                    | -                                                                   | -                                          | -              | -                          | -                  | -                 |
| Gross/Weapon System Unit Cost ( <i>\$ in Dollars</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | -                  | -              | -              | -                                             | -                  | -                    | -                                                                   | -                                          | -              | -                          | -                  | -                 |
| <p><b>Description:</b><br/> <b>MATCALs</b><br/> Marine Air Traffic Control and Landing Systems (MATCALs) provides for continuous, all-weather, radar/non-radar approach, departure, enroute, and tower air traffic control services to aircraft. Marine ATC provides initial, transition and sustained air traffic support for the Joint and Marine Air Ground Task Force air operations in any environment. MATCALs satisfies the operational requirements set forth by Specific Operational Requirements 34-22 of 12 Jul 1973; Remote Landing Site Tower (RLST) Operational Requirements Document (ORD) 341-88-93 of 25 Jul 1997; and Air Traffic Navigation Integration and Coordination System ORD 05-002 of 03 Dec 1992. MATCALs, with other Marine Air Command and Control Systems (MACCS) and federal agencies, provides the ability to project air combat power without regard to weather. Air Traffic Control (ATC) automation reduces air traffic controllers' traffic handling and management time, allowing more time for mission response and task accomplishment. It supports a required increase in aircraft sortie rates and contributes to extended time on target. The system provides for integration of ATC into the total MACCS. To provide this capability, MATCALs consists of 6 primary subsystems: (1) Air Traffic Navigation Integration and Coordination system (ATNAVICS) AN/TPX-31(V); (2) Tactical Terminal Communication System (TTCS) AN/TSQ-263; (3) Expeditionary Control Tower AN/TSQ-120C; (4) RLST AN/TSQ-216; (5) Tactical Air Navigation (TACAN) AN/TRN-44; (6) the Man-Portable TACAN AN/TRN-47(V)1, and various ancillary equipment. The ATNAVICS Air Surveillance Radar (ASR) Range Extension is funded to meet requirements identified in the ATC Initial Capabilities Document ICD (ICD), MROC DM 75-7007, MACC Operational Advisory Group. The gaps identified require sustainment of legacy sensor capability until such time as ATNAVICS PrePlanned Product Improvement initiatives enhance system capability to support main air base traffic density and airspace. Additionally, the positive control enabled by increased ASR range reduces separation enabling increased sortie rates. This program works with the Marine ATC Working Group identifying the requirements to implement the P3I and evolutionary product improvements as required for G/ATOR system, ATNAVICS, Expeditionary ATC Towers, and Navigational Aids that support Marine Air Traffic Control Detachments. G/ATOR is multi-role, ground-based, expeditionary radar that replaces five legacy radar systems for the Marine Air Ground Task Force. It satisfies the Marine Air Command and Control System and the Ground Counter Fire/ Counter Battery capabilities.</p> <p><b>NASMOD</b><br/> The Joint DoD/Federal Aviation Administration (FAA) National Airspace System (NAS) Modernization (MOD) program upgrades the DoD ATC systems at approach control facilities in concert with the FAA's upgrade of the National ATC System. These funds will procure ATC systems for the Navy/Marine ATC facilities. The Air Force is the DoD lead activity for the Joint Acquisition Program. The Joint Program Office is located at Hanscom AFB, MA. The NAS Mod program received a full rate production decision on 7 June 2005 and is in the production and deployment phase following Milestone C.</p> <p><b>FLEET ATC SYSTEMS</b></p> |                    |                |                |                                               |                    |                      |                                                                     |                                            |                |                            |                    |                   |

| Line Item MDAP/MAIS Code: N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                        |                                                              |
| <p>NAVAIR provides shore based ATC terminal facilities with equipment that is required in joint efforts to efficiently and safely monitor and direct military and commercial air traffic in national and international air space. Many of these systems are required to interface through automated means with the FAA. Additionally, NAVAIR has material support responsibility for Special Instrumentation Systems, and Ancillary Equipment used at Navy and Marine Corps Aviation Shore activities in the continental United States and overseas.</p> <p>Engineering Change Proposal (ECP)/Operational Capability Improvement Request (OCIR) modernization (MR069) - The ECP/OCIR program provides for the procurement and/or modification of critically needed communications, radar, displays, data processors, and other electronic systems/equipment at Navy/Marine Corps ATC facilities worldwide. ECP/OCIR procurements replace and modernize costly-to-maintain systems and equipment in order to increase ATC efficiency and safety, and reduce total ownership costs.</p> <p>UHF/VHF Antenna Upgrade (MR404) - This program procures and installs antenna, antenna towers, and antenna cables</p> <p>Communications Systems Upgrade Program (MR408) - This program procures and installs advanced commercial state-of-the-art ATC voice switching equipment.</p> <p>UHF/VHF Transceiver Replacement Program (MR440) - This program modernizes aging Navy and Marine Corps UHF/VHF Transceivers that are the central core of all ATC emergency and Fleet Area Control &amp; Surveillance Facility (FACSFAC) communications.</p> <p>Emergency Communication System (ECS) Upgrade Program (MR445) - This program modernizes obsolete and unsupportable ECS equipment. Voice Switches, Recorders, Reproducers, Uninterruptable Power Supplies, and Built-In Test Equipment will be replaced with modern, supportable components.</p> <p>Air Field Lighting Control System (AFLCS) (MR510) - This program modernizes obsolete and unsupportable AFLCS equipment which will be replaced with modern, supportable components. Funding for this effort was realigned to the Terminal Automation System (TAS) CB070 beginning in FY18. The TAS provides the functionality and meets the requirements of the airfield lighting control as prescribed in the NASMOD ORD III Airfield Automation Annex A dated 16MAR05.</p> <p>Operational Communication System (OCS)/Emergency Communication System (ECS) Air Traffic Control (ATC) Recorder replacement program (MR520), through participation in the FAA ATC recorder replacement program will replace aging and obsolete ATC OCS and ECS ATC recorders with state of the art ATC recording/reproducing technology.</p> <p>Fiber Optic Communications Intersite System (FOCIS) Upgrade Program (MR530) - FOCIS is required for Precision Approach Radar (PAR) operations and for ATC voice communications at Naval and Marine Corps ATC facilities. This program modernizes obsolete and unsupportable FOCIS equipment with modern supportable components.</p> <p>LANDING SYSTEMS</p> <p>Landing Systems budget provides funding to modernize and ensure the reliability of Precision Approach Radars (PAR), Tactical Air Navigation (TACAN) systems, Instrument Landing Systems (ILS), and other air navigation aids used by the Navy and Marine Corps.</p> <p>PAR Commercial-off-the-shelf (AN/FPN-68A) Upgrade replaces obsolete PAR systems (AN/FPN-63) continuing fleet shore based Precision Approach capability. Additionally PAR (AN/FPN-63) ECPs are required to sustain the existing systems until replacement. Those ECPs include but are not limited to the Modulator Board Upgrade, the Antenna Upgrade, the Configuration Upgrade, the Turntable Upgrade, the Fiber Optic Inter-site System (FOIS), and the Angle Voltage Generator (AVG) Upgrade.</p> <p>TACAN Ship/Shore Upgrade ECPs update old technology and extend the service life of the TACAN. The TACAN sustainment consists of the Antenna Upgrade ECP for the OE-273 antenna (nomenclature for the new antenna TBD) and the Beacon/RSCU Upgrade ECP of the AN/URN-25 which will make the upgraded Beacon an AN/URN-32.</p> <p>Instrument Landing Systems (nomenclature TBD) will provide the Navy and Marine Corps with a self-contained Precision Landing capability at selected Air Stations, to meet fleet requirements for safe aircraft recovery of aircraft equipped with ILS capability.</p> |                                        |                                                              |

| Justification:<br>MATCALs<br>FY2019 provides funding to procure Maintainability/Reliability Improvements and 1 ATNAVICS Range Extension.<br><br>NASMOD<br>The Federal Aviation Administration (FAA) began the Next Generation Air Transportation System initiative in FY2008. A major component of this capability is Automatic Dependent Surveillance Broadcast, which will provide aircraft position information to augment ground-based radar. Existing DoD Air Traffic Control (ATC) facilities interface with FAA's facilities, therefore the military must maintain interoperability and retain vital special-use airspace for combat readiness training. The DoD Advanced Automation System (DAAS) must be upgraded to meet this requirement.<br>FY2019 provides funding to procure 6 STARS Tech Refresh Upgrades, 18 TAS Tech Refresh, 497 NAS Voice System Radios, various Engineering Change Proposals (ECPs) and associated Support<br><br>FLEET ATC SYSTEMS<br>The basis for the FY2019 budget request is to continue modernizing aging Navy and Marine Corps ATC facilities and equipment in order to safely monitor and direct military and commercial air traffic in national and international air space. This equipment must continue to interface through automated means with the FAA.<br>FY2019 provides funding to procure 2 UHF/VHF Antenna Upgrades, 5 ECS Upgrades, 13 OCS/ECS ATC Recorder upgrades, various ECPs/OCIRs and associated support.<br><br>LANDING SYSTEMS<br>FY2019 provides funding to procure: 3 PAR Tech Refresh COTs, 2 ILS Upgrades, 24 TACAN Antenna Upgrades, and 14 TACAN Beacon Upgrades. |                                                                        |             |       |                                        |                                                              |                                          |                                          |                                          |                                          |                                          |
