| Flyaway Unit Cost ( <i>\$ in Dollars</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | -                  | -              | -                                             | -                   | -                  | -                    | -                                                                                 | -              | -              | -                          | -                  | -                 |
| Gross/Weapon System Unit Cost ( <i>\$ in Dollars</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | -                  | -              | -                                             | -                   | -                  | -                    | -                                                                                 | -              | -              | -                          | -                  | -                 |
| <p><b>Description:</b></p> <p>The FY 2019 funding request was reduced by \$.068 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.</p> <p>VM301 - AIRCRAFT CARRIER TACTICAL SUPPORT CENTER (CV-TSC):<br/> The AN/SQQ-34 Aircraft Carrier Tactical Support Center (CV-TSC) program provides increased situational awareness to the Carrier Strike Group (CSG) in support of force protection, primarily in the area of ASW. Through the integration of off-board sensors and signal, data and display processors, the AN/SQQ-34 is utilized in detecting, classifying, and localizing threats. An integrated element of the Carrier Combat System, the AN/SQQ-34 supports the tactical deployment of embarked ASW and Surface Warfare (SUW) assets. The program provides technical refreshes to legacy AN/SQQ-34 systems on all Carriers and shore sites in support of Fleet introduction and shipboard integration of the MH-60R Multi-Mission Helicopter. Upgrades to legacy systems will enable exchange of sensor, tactical and imagery data with the MH-60R initially and eventually with P-8 and Triton Unmanned Aircraft Systems (UAS) aircraft. It completes the Kill Chain by linking sensor platform to sensor controllers and the ASW/SUW commanders. In order to support multiple MH-60R Multi-Mission Helicopters, the Common Data Link (CDL) will also be upgraded. CDL is the Navy Aircraft Carrier ultra wide-band, digital, secure data link, comprised of radio equipment that provides configuration-controlled and standardized wide-band, digital, and secure communication paths between multiple reconnaissance sensors and their users. Initially, a single User Interface Group (UIG) upgrade to CDL will be fielded in concert with CV-TSC/MH-60R deployments, providing a single MH-60R/aircraft link.</p> <p>VM401 - SURFACE SONAR WINDOWS AND DOMES:<br/> AN/SQS-26/53 Sonar Dome Rubber Windows (SDRW) are installed on CG47 and DDG51 class ships. This program provides emergency replacement, wire-reinforced, pressurized rubber acoustic windows and attachment hardware, which experience failure due to corrosion, fatigue, and impact damage. The SDRW significantly improves the surface ship sonar performance by reducing flow-induced self-noise and by providing increased source level receiving and sensitivity resulting from reduced attenuation. This program provides production engineering in support of technical evaluations, failure analysis, implementation of the in-water one-side backscatter X-ray program, Government Furnished Equipment (GFE) refurbishments, and field service engineering; and complete engineering design work and material tests. This program also provides drawings, configuration management information, new design and fabrication technology, incorporation of lessons learned and required testing, and construct sub-element to confirm single-stage cure.</p> <p>VM601 - UNDERSEA WARFARE DECISION SUPPORT SYSTEM (USW-DSS)<br/> USW-DSS provides an integrated, near-real time, net-centric ASW Command and Control (C2) capability across multiple surface platforms and critical shore sites. USW-DSS provides a critical C2 capability for the Sea Combat, Theater USW (TUSW), and ASW Commanders, and enables the ability to plan and conduct USW operations, alignment of sensors for exploitation of the environment, allocation of resources,</p> |                    |                |                                               |                     |                    |                      |                                                                                   |                |                |                            |                    |                   |

| Line Item MDAP/MAIS Code: N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                        |                                                                            |
| <p>optimization of operations and risk, and vulnerability assessment. It provides USW Commanders with an expanded net-centric USW capability across CSG platforms (CVNs, CG/DDGs, and Integrated Undersea Surveillance System (IUSS)) as well as supporting shore nodes to include Theater Surface Combatants (TSC), Training, Naval Oceanographic Processing Facility (NOPF), and Commander Task Force (CTF). This program procures and installs USW-DSS on CSG platforms and supporting shore nodes via permanent ship alterations (SHIPALTs). In FY 2009 USW-DSS transitioned to a software application hosted on the Integrated Shipboard Network System (ISNS) and in FY 2014 started installing as part of the Consolidated Afloat Network and Enterprise Services (CANES). Workstation procurements are required to support the ISNS and CANES configured ships as well as shore nodes. USW-DSS capability is phased to effectively deliver software improvements to the warfighter. The current software version, Build 2 Release 3 (B2R3), will continue to field until the follow-on Build 3 (B3) is fielded in FY 2019. In FY 2021, non-recurring engineering effort will begin to field Theater Anti-Submarine Warfare (ASW) upgrades to USW-DSS systems, with the integrated Common Operational Picture (COP), to shore nodes operating in the multi-level security environment.</p> <p>YEAR-TO-YEAR BUDGET CONTROL COMPARISON:<br/>- FY 2017 (\$7.163M) to FY 2018 (\$13.653M) increase (\$+6.490M) is driven by the requirement for improvements and tech refreshes of USW-DSS to avoid obsolescence and improve reliability and maintainability. The tech refresh includes all USW-DSS/UYQ-100 hardware Technical Insertion (TI)-08 baseline afloat and shore sites, including Surveillance Towed Array Sensor System (SURTASS) ships, Theater commands, support nodes, and Tactical Training Equipment (TTE).<br/>- FY 2018 (\$13.653M) to FY 2019 (\$10.134M) decrease (\$-3.519M) is driven by the reduced (as compared to FY 2018) requirement for the USW-DSS program's procurement of shore site, tactical trainer, and tech refresh upgrades in FY 2019.</p> <p>[P40A / VM301 - AIRCRAFT CARRIER TACTICAL SUPPORT CENTER (CV-TSC)]: VM301 - AIRCRAFT CARRIER TACTICAL SUPPORT CENTER (CV-TSC)</p> <p>[P40A / CV-TSC Technology Insert/Refresh &amp; ECP Implementation]: VM301 - CV-TSC Technology Insert/Refresh &amp; ECP Implementation: Consists of Engineering Change Proposals (ECPs) and hardware/software changes/upgrades to previously fielded and in-production AN/SQQ-34 systems. Funding used to implement ECPs to correct deficiencies identified through Fleet use; upgrade unreliable components; replace obsolete components; and address Information Assurance (IA) issues.</p> <p>[P40A / VM401 - SURFACE SONAR WINDOWS AND DOMES]: VM401 - SURFACE SONAR WINDOWS AND DOMES</p> <p>[P40A / Surface Sonar Windows and Domes]: VM401 - Surface Sonar Windows and Domes: Procure SDRWs, shipping fixtures, and fairing angles for emergency replacement on CG 47 and DDG 51 class hulls.</p> <p>[P40A / Production Support]: VM401 - SDRW Production Support: Funding is provided for production engineering in support of technical evaluations, failure analysis, implementation of the in-water one-side backscatter X-ray program, Government Furnished Equipment (GFE) refurbishments, and field service engineering; and complete engineering design work and material tests. This program also provides drawings, configuration management information, new design and fabrication technology, incorporation of lessons learned and required testing, and construct sub-element to confirm single-stage cure.</p> <p>[P40A / VM601 - UNDERSEA WARFARE DECISION SUPPORT SYSTEM (USW-DSS)]: VM601 - UNDERSEA WARFARE DECISION SUPPORT SYSTEM (USW-DSS)</p> <p>[P40A / Carrier Strike Group (CSG) Shipsets]: VM601 - USW-DSS/Carrier Strike Group (CSG) Shipsets: Consists of the complete USW-DSS (hardware, software, and support equipment).</p> <p>[P40A / Backfit To Post-OPEVAL]: VM601 - USW-DSS/Backfit To Post-OPEVAL: Consists of updates to existing USW-DSS Build 2 Release 3 systems in the Fleet with changes dictated by the FY 2013 OPEVAL of USW-DSS Build 2 Release 3.</p> <p>[P40A / ISNS to CANES S/W Shipsets]: VM601 - USW-DSS/ISNS/CANES S/W Shipsets: Consists of USW-DSS Build 2 Release 3 software load onto ISNS/CANES platforms. Include updates from ISNS to CANES as well as new CANES software and workstation suites. Schedule is dependent upon/coordinated with ISNS/CANES fielding.</p> <p>[P40A / Shore Sites and Tactical Trainers]: VM601 - USW-DSS/Shore Sites and Tactical Trainers: Consists of USW-DSS post-OPEVAL Build 2 Release 3 shore/lab assets and Tactical Training Equipment systems, which are full hardware/software suites. USW-DSS Build 3 will be loaded on all training and shore site nodes beginning in FY 2019.</p> |                                        |                                                                            |

| Line Item MDAP/MAIS Code: N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                        |                                                                            |
| <p>[P40A / USW-DSS Tech Refresh]: VM601 - USW-DSS Tech Refresh: Funding is for hardware/software technology upgrades to previously fielded USW-DSS/UYQ-100 hardware Technical Insertion (TI)-08 baseline afloat and shore sites, including Surveillance Towed Array Sensor System (SURTASS) ships, Theater commands, support nodes, and Tactical Training Equipment (TTE).</p> <p>[P40A / Engineering Changes (ECs)]: VM601 - USW-DSS/Engineering Changes: Consists of Engineering Change Proposals (ECPs) and hardware/software changes/upgrades. Funding will be used to support Reliability, Maintainability, and Availability (RM&amp;A) modifications, correct deficiencies identified through Fleet use, and upgrade of unreliable components.</p> <p>[P40A / System Technical Support]: VM601 - USW-DSS/System Technical Support: Funding is for the USW-DSS program Software Support Activity efforts in performing the following functions: generation/assessment of Software Problem Reports (SPRs)/Software Trouble Reports (STRs); responding to Fleet software change requests; Configuration Management (CM); software Quality Assurance (QA); software installation automation; and software recovery support.</p> <p>[P40A / Production Support]: VM601 - USW-DSS/Production Support: Consists of on-site engineering support; CANES Integrated Product Team (IPT) Support; Information Assurance (IA) certification support; production quality assurance; system sustainability support; Integrated Logistics Support (ILS) product updates/support; status reporting and technical briefings; program office support; and all other production support efforts directly related to delivery of USW-DSS to both ISNS/CANES and ultimately the Fleet.</p> <p>[P40A / CANES S/W Shipsets]: VM601 - CANES S/W Shipsets: Consists of initial loads of the post-OPEVAL USW-DSS Build 2 Release 3 software suite on new CANES ships, which includes changes dictated by the FY 2013 OPEVAL of USW-DSS Build 2 Release 3. Schedule is dependent on/coordinated with CANES fielding. Prior Years reflect ISNS software shipsets.</p> <p>[P40A / Theater ASW Build Out]: VM601 - Theater ASW Build Out: Non-recurring engineering effort required to incorporate/field Theater Anti-Submarine Warfare (ASW) upgrades to USW-DSS systems, with the integrated Common Operational Picture (COP), to shore nodes operating in the multi-level security environment. Upgraded systems will include laboratory, tactical, and training shore nodes.</p> |                                        |                                                                            |

## Justification:

### YEAR-TO-YEAR BUDGET CONTROL COMPARISON:

- FY 2017 (\$7.163M) to FY 2018 (\$13.653M) increase (\$+6.490M) is driven by the requirement for improvements and tech refreshes of USW-DSS to avoid obsolescence and improve reliability and maintainability. The tech refresh includes all USW-DSS/UYQ-100 hardware Technical Insertion (TI)-08 baseline afloat and shore sites, including Surveillance Towed Array Sensor System (SURTASS) ships, Theater commands, support nodes, and Tactical Training Equipment (TTE).

- FY 2018 (\$13.653M) to FY 2019 (\$10.134M) decrease (\$-3.519M) is driven by the reduced (as compared to FY 2018) requirement for the USW-DSS program's procurement of shore site, tactical trainer, and tech refresh upgrades in FY 2019.

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

(f) indicates the presence of a P-5a

**Footnotes:**

- (1) (1.1) Programs Completed Under This P-1 Line Item in Prior Years. Includes \$4.807M for the VM201 Acoustic Communications (ACOMMS) and Depth Sounders program that was completed in FY 2016.
- (2) (2.1) VM301 - CV-TSC Technology Insert/Refresh & ECP Implementation: Consists of Engineering Change Proposals (ECPs) and hardware/software changes/upgrades to previously fielded and in-production AN/SQQ-34 systems. Funding used to implement ECPs to correct deficiencies identified through Fleet use; upgrade unreliable components; replace obsolete components; and address Information Assurance (IA) issues.
- (3) (3.1) VM401 - Surface Sonar Windows and Domes: Procure SDRWs, shipping fixtures, and fairing angles for emergency replacement on CG 47 and DDG 51 class hulls.
- (4) (3.2) VM401 - SDRW Production Support: Funding is provided for production engineering in support of technical evaluations, failure analysis, implementation of the in-water one-side backscatter X-ray program, Government Furnished Equipment (GFE) refurbishments, and field service engineering; and complete engineering design work and material tests. This program also provides drawings, configuration management information, new design and fabrication technology, incorporation of lessons learned and required testing, and construct sub-element to confirm single-stage cure.
- (5) (4.1) VM601 - USW-DSS/Carrier Strike Group (CSG) Shipsets: Consists of the complete USW-DSS (hardware, software, and support equipment).
- (6) (4.2) VM601 - USW-DSS/Backfit To Post-OPEVAL: Consists of updates to existing USW-DSS Build 2 Release 3 systems in the Fleet with changes dictated by the FY 2013 OPEVAL of USW-DSS Build 2 Release 3.
- (7) (4.3) VM601 - USW-DSS/ISNS/CANES S/W Shipsets: Consists of USW-DSS Build 2 Release 3 software load onto ISNS/CANES platforms. Include updates from ISNS to CANES as well as new CANES software and workstation suites. Schedule is dependent upon/coordinated with ISNS/CANES fielding.
- (8) (4.4) VM601 - USW-DSS/Shore Sites and Tactical Trainers: Consists of USW-DSS post-OPEVAL Build 2 Release 3 shore/lab assets and Tactical Training Equipment systems, which are full hardware/software suites. USW-DSS Build 3 will be loaded on all training and shore site nodes beginning in FY 2019.
- (9) (4.5) VM601 - USW-DSS Tech Refresh: Funding is for hardware/software technology upgrades to previously fielded USW-DSS/UYQ-100 hardware Technical Insertion (TI)-08 baseline afloat and shore sites, including Surveillance Towed Array Sensor System (SURTASS) ships, Theater commands, support nodes, and Tactical Training Equipment (TTE).
- (10) (4.6) VM601 - USW-DSS/Engineering Changes: Consists of Engineering Change Proposals (ECPs) and hardware/software changes/upgrades. Funding will be used to support Reliability, Maintainability, and Availability (RM&A) modifications, correct deficiencies identified through Fleet use, and upgrade of unreliable components.
- (11) (4.7) VM601 - USW-DSS/System Technical Support: Funding is for the USW-DSS program Software Support Activity efforts in performing the following functions: generation/assessment of Software Problem Reports (SPRs)/Software Trouble Reports (STRs); responding to Fleet software change requests; Configuration Management (CM); software Quality Assurance (QA); software installation automation; and software recovery support.
- (12) (4.8) VM601 - USW-DSS/Production Support: Consists of on-site engineering support; CANES Integrated Product Team (IPT) Support; Information Assurance (IA) certification support; production quality assurance; system sustainability support; Integrated Logistics Support (ILS) product updates/support; status reporting and technical briefings; program office support; and all other production support efforts directly related to delivery of USW-DSS to both ISNS/CANES and ultimately the Fleet.
- (13) (4.9) VM601 - CANES S/W Shipsets: Consists of initial loads of the post-OPEVAL USW-DSS Build 2 Release 3 software suite on new CANES ships, which includes changes dictated by the FY 2013 OPEVAL of USW-DSS Build 2 Release 3. Schedule is dependent on/coordinated with CANES fielding. Prior Years reflect ISNS software shipsets. Beginning in 2018, Build 3 will replace Build 2 Release 3.

**Description:**

The Submarine Acoustic Warfare System (SAWS) program provides submarines with expendable defensive countermeasures and the systems necessary to externally launch them against torpedo and acoustic sensor threats. This program provides ongoing production of countermeasure devices needed to sustain fleet inventories, improvements to enhance the readiness and effectiveness of countermeasure devices and associated external countermeasure launcher (ECL) systems on all U.S. submarines. The expendable devices, Acoustic Device Countermeasures (ADC) are produced in two primary versions 3" ADC's are launched through the Internal Countermeasure Launcher (ICL) and 6" devices are launched through ECL Systems. An updated increased Acoustic Augmentation Support Program(AASP)SHIPALT installation cost estimate has slowed installs through FYDP and funds are shifted to accommodate increases in CSA engineering technology refresh and insertion costs, driven by ADC MK5 (NGCM) testing, and introduction in FY22-24.

WM018 - The Acoustic Augmentation Support Program (AASP) provides acoustic augmenting systems in appropriate configurations for all submarine classes (except SEAWOLF) installed as temporary equipment (TEMPALT). A permanently installed Ship Alteration (SHIPALT) configuration for VIRGINIA Class Block I/II/III design was completed in FY16 and installations will start in FY17 (delayed from FY16 because budget insufficient for installation costs). A SHIPALT for VIRGINIA Class Block IV will be developed in FY17 and installations will start in FY26, gradually phasing out the TEMPALTs on VIRGINIA Class. Reliability and refresh upgrades sustain current in-service AASP systems with new components and software updates to maintain reliability.

WM019 - The Countermeasure Set, Acoustic (CSA) program procures and supports the inboard electronic system necessary for preparing and launching 6" Acoustic Device Countermeasures (ADCs) from all 688i and newer U.S. submarines. The CSA program provides obsolescence support for legacy systems and engineering changes to accommodate modified and planned new devices, such as the ADC MK5. Four efforts are supported: (1) the "Technology Refresh" effort is designing, building, testing and certifying replacement components for obsolete CSA MK2 systems (MOD0/3/4) on 688i SSN and OHIO SSBN submarines, with the refresh occurring in FY17-FY20. (2) The "CSA MK3 Technology Insertion" effort is federating the CSA MK3 system with Submarine Warfare Federated Tactical System (SWFTS) to facilitate the ADC MK5 and Submarine Torpedo Defense Tactical Decision Aid (SubTDS TacDA) upon introduction. A phased approach was taken to allow a more efficient incremental implementation of initial capabilities. Required funding is expected to level off after ADC MK5 device fielding and address recurring upgrades with Advanced Processor Build/ Technology Insertion (APB/TI) cycles. (3) The "CSA MK4 Technology Insertion" effort replaces CSA MK2 MOD2 with CSA MK4 as a "SWFTS-federated" system on VIRGINIA Class Block I and II submarines (10 hulls) to accommodate the introduction of ADC MK5 devices. Non-recurring engineering will complete, with installs starting in FY19. (4) The fourth effort is the ongoing support of engineering issues across all CSA systems as they arise.

[P40A / WM014 6 INCH]: WM014 6 INCH - The 6" Countermeasures program procures, reworks, and refreshes ADC MK3 (torpedo countermeasure) devices, ADC MK4 (SONAR countermeasure) devices, and associated Launch Tubes in order to maintain submarine fleet countermeasure device inventory levels in accordance with the Naval Munition Requirements Process

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**  
 The FY 2019 funding request was reduced by \$0.037 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

Increase in funding request from FY18 to FY19 (~\$2 million) provides for the new MK3/4 ADC Non-Recurring Engineering support.

**Footnotes:**

- <sup>(1)</sup> Starting in FY19, LT's are included in next contract for ADC MK3 and MK4.
- <sup>(2)</sup> No new devices will be procured in FY19, due to new contract.
- <sup>(3)</sup> New ADC MK3/4 contract awards in FY19 with NRE cost for startup, including First Article Testing of \$7.2 million, based on historical expenditure on startup effort.
- <sup>(4)</sup> Starting in FY17, The program office began an effort to optimize inventory by maximizing service life extensions of expiring devices. The SLEP quantities were reduced due to a lack of suitable devices for SLEP. The program is investigating a further extension of service life.
- <sup>(5)</sup> The reduction in SLEP units does not translate fully into new units because some funding is being used to fund the TI to investigate the 16 year SLEP study in FY17 & FY18 second ISEA support, IMA Tech support, ILS, and etc. An effort to more accurately define the requirements and inventory levels that started in FY17 has led to a rebalancing effort within the program element to achieve the NMRP levels by recurring SLEP. The increase in SLEP procurements, more actual SLEP quantities were reduced from the plan due to an unavailability of assets to SLEP.
- <sup>(6)</sup> The budget for NAE Beacons is no longer necessary due to ADC MK2 MOD7 incorporating NAE Beacon functionality.
- <sup>(7)</sup> Quantity in FY19 is increased to attain inventory objective as well as maintain cost within step ladder pricing in conjunction with Surface Ship ADC procurements.
- <sup>(8)</sup> Cost of MK77 reflects only unit cost of MK77 MOD1 in new production. MK77 MOD1 GGs are procured as wholly new devices; Unit cost includes prorated share of management and engineering oversight. MK77 MOD1 new production is broken out for clarification of units and unit cost where MK77 MOD0 rework is planned. The increase in APUC by 10% is the historical amount that has been added to the unit price to cover the engineering efforts of the ISEA and TDA. This has normally been spread out across all devices.
- <sup>(9)</sup> MK77 GGs Mod0 are broken out for clarification of units and unit cost because they are reworked units, not wholly new units.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Description:**

The Acoustic Augmentation Support Program (AASP) provides acoustic augmenting systems in appropriate configurations for all submarine classes (except SEAWOLF) installed as temporary equipment (a TEMPALT). A permanently installed Ship Alteration (SHIPALT) configuration for VIRGINIA Class Block I/II/III was developed and installations will start in FY17 (delayed from FY16 due because budget insufficient for installation cost estimates). A permanent SHIPALT for VIRGINIA Class Block IV will be developed in FY17 and installations will start in FY26, gradually phasing out the TEMPALTs on VIRGINIA Class. Reliability and refresh upgrades sustain current in-service AASP systems with new components and software updates to maintain reliability.

[WM018 AASP Support] Includes production support for BLK I-IV SHIPALTS and the AASP reliability and refurbishment upgrade.

[WM018 AASP (Acoustic Augmentation Support Program)] AASP includes costs of procuring new systems and reuse of available components, including the HLF-1, for SHIPALT installation such that "unit cost" is a mix of new and used components. An additional HLF-1 transducer (not a complete full system) is procured in FY17 (\$587K) and FY19 (\$610K).

[WM018 AASP Reliability and Refurbishment Upgrade] Reliability and refurbishment upgrade to sustain current in-service AASP systems.

[WM018 AASP (Acoustic Augmentation Support Program)] Non-recurring costs to produce AASP SHIPALT Package.

| <b>Footnotes:</b><br><sup>(10)</sup> Includes production support for SHIPALT 4678. FY17 Increased 1.1.1 with funds from 1.1.3. This increase is due to the Information Assurance (IA) effort. FY19 increase in 1.1.1 is due to installations and support. These costs are for 2 FTE to manage the effort (including the IA requirements) and match with the SWFTS upgrade cycle.<br><sup>(11)</sup> An additional HLF-1 transducer is procured in FY19 (\$610K) which increases the unit cost per system. Anticipated cost for installation in FY16 exceeded available funds, consequently, the installation was shifted to FY17 with the additional funding identified.<br><sup>(12)</sup> Installations will occur one or two years after procurement due to long term availabilities scheduling. Installation quantities updated in order to accommodate the current budget with the new increased installation cost. FY17 Installations used FY16 funds and FY17 Installation funds. A second AASP SHIPALT installation accomplished in FY17 with available funds due to NRE Cost reduction. One installation is planned in FY18 and two in FY19. |            |                                       |                                       |                                       |                                       |                                       |                                       |                                       |                                       |                                                                                  |                                       |                                       |                                       |                                       |                        |           |           |                |           |                                                       |           |                |           |           |           |                |           |           |           |           |            |

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |         |         |                                                                           |             |               |                 |                                               |         |         |             |            |
| WM019 - The Countermeasure Set, Acoustic (CSA) program procures and supports the inboard electronic system necessary for preparing and launching 6" Acoustic Device Countermeasures (ADCs) from all 688i and newer U.S. submarines. This inboard system consists of the Torpedo Defense Controller (TDC), Launch Control Panels (LCPs), and associated cabling, in a class-by-class configuration. The CSA program provides obsolescence support for legacy systems and engineering changes to accommodate modified and planned new devices, such as the ADC MK5. Four efforts are supported: (1) the "Technology Refresh" effort is designing, building, testing and certifying replacement components for obsolete CSA MK2 systems (MOD0/3/4) on 688i SSN and OHIO SSBN submarines, with the refresh occurring in FY17-FY20. (2) The "CSA MK3 Technology Insertion" effort is federating the CSA MK3 system with Submarine Warfare Federated Tactical System (SWFTS) to facilitate the ADC MK5 and Submarine Torpedo Defense Tactical Decision Aid (SubTDS TacDA) upon introduction. A phased approach was taken to allow a more efficient incremental implementation of initial capabilities. Required funding is expected to level off after ADC MK5 device fielding and address recurring upgrades with Technology Insertion/Advanced Processor Build (TI/APB). (3) The "CSA MK4 Technology Insertion" effort replaces CSA MK2 MOD2 with CSA MK4 as a "SWFTS-federated" system on VIRGINIA Class Block I and II submarines (10 hulls) to accommodate the introduction of ADC MK5 devices. Non-recurring engineering, production testing, EQT and SHIPALT/Logistics documentation will continue in FY18, with installs starting in FY19 to better align with overall submarine availabilities scheduling. (4) The fourth effort is the ongoing support of engineering issues across all CSA systems as they arise. |             |         |         |                                                                           |             |               |                 |                                               |         |         |             |            |
| [WM019 CSA MK3 Engineering Changes (LAN, SWFTS, TDA)] WM019 CSA MK3 Engineering Changes - (LAN, SWFTS, TacDA) - Organic] Technology insertion effort that supports and designs engineering changes for SSGN, SEAWOLF, and VA Blk III and follow ships, including the Countermeasures Set Acoustic (CSA) system, Torpedo Defense Controller (TDC), and Launch Control Panels (LCPs). This supports changes to correct obsolescence, and engineering changes necessary to accommodate modified devices and new devices, such as the ADC MK5.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             |         |         |                                                                           |             |               |                 |                                               |         |         |             |            |
| [WM019 ECPs CSA MK2 MOD 2 Conversion to MK 4] WM019 - ECPs CSA MK2 MOD2 Conversion to CSA MK4 - Organic] Technology insertion effort that converts CSA MK2 MOD2 to CSA MK4 to accommodate introduction of ADC MK5 to Virginia Class Block 1 and 2 Ships (10 hulls). Proofing will complete in FY18, with replacement installations starting in FY19 to better align with overall submarine availabilities scheduling.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |             |         |         |                                                                           |             |               |                 |                                               |         |         |             |            |
| [WM019 CSA MK2 MOD 0 OBSOLESCENCE] WM019 - CSA MK2 MOD0 Obsolescence - NonOrganic Technical refresh effort that designs, builds, tests and certifies replacement components for obsolete CSA MK2 MOD4 on 688i ships and CSA MK2 MOD0 and 3 on SSBNs. Upgrades will occur in FY16-FY20.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |             |         |         |                                                                           |             |               |                 |                                               |         |         |             |            |
| [WM019 CSAMK2 MOD2 CONVERSION to CSA MK4] WM019 - CSA MK2 MOD2 Conversion to CSA MK4 - Non Organic Technology Insertion effort that procures engineering change kits and systems including Countermeasures Set Acoustic (CSA) system, Torpedo Defense Controller (TDC), Launch Control Panels (LCPs), and CSA support system assets to correct obsolescence, including engineering changes necessary to accommodate modified devices and new devices, such as the ADC MK5.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             |         |         |                                                                           |             |               |                 |                                               |         |         |             |            |

| <b>Footnotes:</b><br><sup>(13)</sup> For FY18, accommodated internal shifts to address continuing TI/APB changes: Increased VIRGINIA Block I/II OPN procurements of CSA MK4 systems as part of the Economical Order Quantity (EOQ) maximization and increase CSA MK3 Engineering Change Instruction (ECI) will be installed and 3 CSA MK4 installation are funded and the SEAWOLF SHIPALT NRE will begin.<br><sup>(14)</sup> The changes needed to include SEAWOLF submarine class to the CSA MK3 connection to SWFTS in FY21.<br><sup>(15)</sup> FY18 accommodated increase in Installation and Checkout (INCO) spares reducing the FY19 costs to support the FY19 installations.<br><sup>(16)</sup> Economic order quantities in FY18 afforded us the ability to procure 3 additional CSA MK4 units for installation in FY19. FY20 reflects an additional full new system procurement (restored from previous FY17 reduction (\$430K of the \$1.0M shown)). The balance of (\$570K) procures six (6) upgrade kits and software at EOQ pricing of approx. \$95K/kit. Cost estimate for upgrade kits from FY21-23 changed to \$168K due to anticipated increased complexity and assumed actual unit costs. Two units were procured in FY16 but they were environmental qualification test (EQT) units that were never delivered to the Fleet.<br><sup>(17)</sup> Procurement of CSA MK3 kits was updated in order to support planned installations, upgrades and modernizations of fielded systems on SSGN and VIRGINIA Block III/IV.<br><sup>(18)</sup> In FY19, NRE for CSA MK4 not needed and was reallocated within CSA Subhead.<br><sup>(19)</sup> Installations were updated to reflect the current install schedule on Naval Tool for Interoperability Risk Assessment (NTIRA).<br><sup>(22)</sup> VIRGINIA Block I/II OPN procurements of initial CSA MK4 to maximize the Economical Order Quantities (EOQ) from 10 systems in FY17-FY20 at \$5.65M to equivalent 10 systems in FY17-FY19 at \$4.65M. |            |                                       |                                       |                                       |                                       |                                       |                                       |                                       |                                       |                                                                                  |                                       |                                       |                                       |                                       |                        |           |           |                |           |                                                      |           |                |           |           |           |                |           |           |           |           |            |

## Description:

The FY 2019 funding request was reduced by \$0.234 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

Surface Ship Torpedo Defense (SSTD) provides a layered torpedo defense capability to protect surface ships. Under the OPN appropriation, SSTD funds the AN/SLQ-25 (NIXIE) system and the Torpedo Warning System (TWS). The AN/SLQ-25 (NIXIE) system provides towed persistent countermeasure capability. The TWS provides automated torpedo detection, classification, localization, and alertment capability.

WL101 AN/SLQ-25A UPGRADE KITS: Procures the upgrade of the AN/SLQ-25 (NIXIE) towed acoustic countermeasure system to the AN/SLQ-25C configuration. The AN/SLQ-25C enhances ship survivability against future torpedo threats. No future AN/SLQ-25C upgrade kit procurement is planned.

WL102 Torpedo Warning System (TWS): Procures the Torpedo Warning System (TWS). TWS is an automated Torpedo Detection, Classification, and Localization (TDCL) system that generates warning alerts on incoming threat torpedoes. The TWS consists of towed active acoustic source and receive sensors, processing cabinets and workstations, and Countermeasure Anti-Torpedo (CAT) ready stows mounted port and starboard. The TWS subfunctional groups are called the Target Acquisition Group (TAG), Tactical Control Group (TCG), and Ready Stow Group (RSG).

WL106 AN/SLQ-25 ENGINEERING CHANGES: The AN/SLQ-25 NIXIE is the Navy's primary Surface Ship Torpedo Defense (SSTD) system, providing towed persistent countermeasure capability to protect over 185 surface ships from torpedoes. WL106, AN/SLQ-25 ENGINEERING CHANGES, consists of two major efforts in FY 2019: (1) Engineering Changes for AN/SLQ-25C and earlier variants and (2) continuation of the system technical refresh, started in FY 2018, that will result in the new configuration baseline, AN/SLQ-25E. The following details each of the two major efforts. (1) Funding for AN/SLQ-25 Engineering Changes provides for hardware and software configuration changes to current production baselines to resolve emergent hardware obsolescence issues, provides for software updates, and provides for cyber security and program protection updates. These recurring efforts include investigation and resolution of AN/SLQ-25 Trouble Reports, including those resulting from service-identified issues, some of which could render key system functions inoperable if not corrected. These efforts are critical to the extension of the military service life of the system until all AN/SLQ-25C systems are modified to AN/SLQ-25E. (2) As a result of costly hardware obsolescence issues with the AN/SLQ-25C baseline that have precluded the continued production of this variant, a technical refresh began in FY 2018 under the nomenclature AN/SLQ-25E. The AN/SLQ-25E updates the hardware and software architecture to a Commercial Off The Shelf (COTS-based), open, and modular configuration. The nonrecurring design efforts in FY 2019 are needed to deliver AN/SLQ-25E systems to new construction ships starting in FY 2020. The following new construction ships will be the first groups to receive the AN/SLQ-25E system: LPD-29 and T-AO 207

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

**Footnotes:**

<sup>(1)</sup> Moved WL101. WL103, WL104 from P-3a to P-40A since funding is in prior years.

<sup>(2)</sup> Moved WL 106 to P-3a after FY 17 to show all AN/SLQ-25 engineering change costs in one exhibit. After FY17 AN/SLQ-25 EC-1 Update and Tech Refresh moved to the P-3a Exhibit for WL106 to show all AN/SLQ-25 engineering change costs in one exhibit.

**Description:**

[WL106 Engineering Changes SLQ-25] WL106 AN/SLQ-25 ENGINEERING CHANGES: The AN/SLQ-25 NIXIE is the Navy's primary Surface Ship Torpedo Defense (SSTD) system, providing towed persistent countermeasure capability to protect over 185 surface ships from torpedoes. WL106, AN/SLQ-25 ENGINEERING CHANGES, consists of two major efforts in FY 2019: (1) Engineering Changes for AN/SLQ-25C and earlier variants and (2) continuation of the system technical refresh, started in FY 2018, that will result in the new configuration baseline, AN/SLQ-25E. The following details each of the two major efforts. (1) Funding for AN/SLQ-25 Engineering Changes provides for hardware and software configuration changes to current production baselines to resolve emergent hardware obsolescence issues, provides for software updates, and provides for cyber security and program protection updates. These recurring efforts include investigation and resolution of AN/SLQ-25 Trouble Reports, including those resulting from service-identified issues, some of which could render key system functions inoperable if not corrected. These efforts are critical to the extension of the military service life of the system until all AN/SLQ-25C systems are modified to AN/SLQ-25E. (2) As a result of costly hardware obsolescence issues with the AN/SLQ-25C baseline that have precluded the continued production of this variant, a technical refresh began in FY 2018 under the nomenclature AN/SLQ-25E. The AN/SLQ-25E updates the hardware and software architecture to a Commercial Off The Shelf (COTS-based), open, and modular configuration. The nonrecurring design efforts in FY 2019 are needed to deliver AN/SLQ-25E systems to new construction ships starting in FY 2020. The following new construction ships will be the first groups to receive the AN/SLQ-25E system: LPD-29 and T-AO 207 in FY 2020; and DDG 128, T-AO 208, DDG 129, and T-AO 209 in FY 2021. Procurement of AN/SLQ-25E system upgrade kits begins in FY2020 to resolve AN/SLQ-25C obsolescence issues by back fitting systems.

**Description:**

The FY 2019 funding request was reduced by \$1.380 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

**Description:**  
 The FY 2019 funding request was reduced by \$.395 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

PROGRAM COVERAGE: Surveillance Towed Array Sensor System (SURTASS) is the mobile, tactical, and strategic arm of the Navy's undersea surveillance capability that provides deep ocean and littoral acoustic detection and cueing for tactical weapon platforms against diesel and nuclear submarines as well as surface vessels in any given Area of Operations worldwide. Dedicated Anti-Submarine Warfare (ASW) T-AGOS ships tow long acoustic arrays that collect acoustic data and relay that data to shore facilities via satellites for processing and fusion of the resulting contact data with other sensors. Currently, there are five Small Waterplane Area Twin Hull (SWATH) T-AGOS ships operating in the Pacific area. Ship configurations are:

T-AGOS 22 USNS LOYAL (1), supports passive operations using the TB-29A Twinline (TL-29A) array, providing improved detection and classification capability. This ship class uses the Integrated Common Processor (ICP) signal processing and display system common with the SSN Advanced Rapid Commercial Off the Shelf (COTS) Insertion (ARCI) Sonar Processing System;

Three (3) T-AGOS SWATH-P platforms, T-AGOS 19 USNS VICTORIOUS, T-AGOS 20 USNS ABLE, and T-AGOS 21 USNS EFFECTIVE, supporting passive/active operations, configured with the ICP processing and display system, the TL-29A array, and the Compact Low Frequency Active (CLFA) transmit capability;

One (1) Low Frequency Active (LFA) equipped ship, T-AGOS 23 USNS IMPECCABLE, configured with the ICP Processing and Display system, the TL-29A array, and the Low Frequency Active (LFA) transmit capability. The active capability provides greatly improved detection against diesel submarines as well as the quiet nuclear submarine threat.

In addition to the five platforms described above, two (2) shore sites are configured with the ICP processing and display suites to receive the T-AGOS acoustic data via SHF satellite communication links. One of the two shore sites is equipped with two (2) SURTASS Team Trainers (STTs) to support Home Port Training Periods.

A cost sharing agreement with Japan also provides a shore site and two Japanese SWATH ships with similar capability to the T-AGOS SWATH ships for the Western Pacific region. The Japanese Auxiliary Ocean Surveillance (JAOS) ships are being upgraded to the TL-29A array in FY17. A third Japanese SWATH ship is planned for delivery in 2021 with mission equipment funding programmed in FY19.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**  
FY 2019 requests funding (\$29.000 million) for Japanese Auxiliary Ocean Surveillance (J-AOS) Ships and funding (\$10.000 million) for Expeditionary Surveillance Towed Array Sensor System (E-SURTASS).  
Details are in individual exhibit P-3As.

**Description:**

FY17 and out-year funding continues cyclical ICP technical refresh of hardware.

ICP system configuration varies from ship to ship depending upon the type of arrays used (passive only, or passive and active). Additionally, Tech refresh efforts can be more significant in some years than others based on a range of factors, which include end of life components that require refresh; the need to incorporate significant cyber security and program protection improvements to reduce existing and projected threat vectors as well as the overall program protection posture and related requirements; inspections and testing into a particular ICP system undergoing refresh; or the need to update Configuration Control Models (CCMs) or Engineering Measurements Program (EMP) systems for each major hardware refresh. Accordingly, the procurement and installation costs will vary from one platform to another, depending on the configuration and the ship.

**Footnotes:**

<sup>(1)</sup> ICP system configuration varies from ship to ship depending upon the type of arrays used (passive only, or passive and active). Additionally, Tech refresh efforts can be more significant in some years than others based on a range of factors, which include end of life components that require refresh; the need to incorporate significant cyber security and program protection improvements to reduce existing and projected threat vectors as well as the overall program protection posture and related requirements; inspections and testing into a particular ICP system undergoing refresh; or the need to update Configuration Control Models (CCMs) or Engineering Measurements Program (EMP) systems for each major hardware refresh. Accordingly, the procurement and installation costs will vary from one platform to another, depending on the configuration and the ship. Installation cost variance: The 9.1% unit installation cost increase from FY17 to FY18 is due to 1) constraints and additional installation requirements based upon ship availability and 2) the additional installation requirements needed to support the active/passive arrays vice the passive systems.

**Description:**

The Expeditionary Surveillance Towed Array Sensor System (SURTASS-E) is a Rapid Prototyping, Experimentation and Demonstration (RPED) project, tasked to re-package, test and demonstrate a SURTASS-like acoustic surveillance system which can be used as a surrogate for some of the capabilities provided by traditional T-AGOS class vessels. The \$10M in FY19 provides for procurement of a production TL-29A Twin Line Towed Array plus supporting towed array assemblies and components required to provide the expeditionary capability to the fleet for extended testing and development. Initial program investment funding includes \$1.0M FY17 RDTEN and \$20.0M FY18 RDTEN.

**Description:**

The TL-29A Twinline is a shallow water variant of the common array produced by NAVSEA. The array consists of 2 shorter array lengths and array support equipment, and is designed for increased surveillance capability in high clutter environments and littoral areas. Funding in FY18-FY23 is also provided to refurbish existing TL-29A array legs. Support equipment procurement is for ancillary test sets, array headline and roll control systems, tow cables, and array leader cables.

| <b>Footnotes:</b><br><sup>(2)</sup> The TL-29A Twinline is a shallow water variant of the common array produced by NAVSEA. The array consists of two shorter array lengths and array support equipment, and is designed for increased surveillance capability in high clutter environments and littoral areas. Support equipment procurement is for ancillary test sets, array headline and roll control systems, tow cable, and leader cables. Installation funding is not required for the support equipment. FY17 funded two U.S. rotational pool arrays. FY18-FY23 funds refurbishment of one (1) array leg per year, which is less costly than procurement of new arrays. Installation Remarks: Installation only occurs on six T-AGOS platforms, and as of FY17, a TASW SURTASS platform. Historically, an array is lost or severely damaged every 18 months. Last array was lost |            |                                |           |                                |           |                                |           |                                |           |                                                        |           |                                |           |                                |                                     |                                |           |                                |           |                                                                                |           |                                |           |                                |           |                |           |           |           |           |            |

**Description:**

New P-3A to break out the J-AOS TL-29A array requirements from the U.S. requirements.

The J-AOS TL-29A procurement costs are associated with upgrading to a new array type and array support infrastructure, including two complete towed arrays and associated tow hardware and dry end equipment. A third rotational pool array, modules, dry side equipment and support equipment procurement was moved from FY21 to FY19. A third J-AOS ship is being constructed with commissioning scheduled for FY21. The ship requires outfitting with a mission system with procurement of a TL-29A array system and associated tow hardware, dry end equipment and installation. The program is funded with both FMS and OPN, and the \$15M in FY17 and the \$9.4M in FY19 represent the U.S. share of the total cost of the J-AOS TL-29A upgrade program. The U.S. cost share for the outfitting of the new J-AOS platform (J-3) is \$19.6M. All installation costs are paid via FMS funds.

**Description:**

The SURTASS Team Trainer (STT) provides SURTASS crews with three high fidelity synthetic and live playback training capabilities to support Home Port Training Periods (HPTP) and Pre-Deployment Certification Periods (PDCP). Each STT will receive a hardware tech refresh on a six-year cycle and receive a major software update installation on a two-year cycle, so that 3 STTs hardware tech refreshes and 9 major software installations would be performed over a given six-year period. Tech refresh and software updates for the STTs will continue on this cycle. The 4-7% procurement cost growth between FY18, FY20, and FY22 accounts for the additional STT capabilities incorporated to provide operators with the means to address more sophisticated threat targets and environments. Similarly, installation costs increase slightly from FY17 to FY19 as a result of additional integration and testing considerations related to increasingly more sophisticated and capable STT suites.

**Description:**

Field Changes/Modifications for correction of deficiencies identified by Fleet use, array support, communications equipment and replacement of aging/unsupportable equipment. Additional FY19-FY23 funding will facilitate transition to an upgraded command and control system, including installation of the Consolidated Afloat Network Enterprise System (CANES). Other aging End-of-life systems, including Global Command and Control System-Maritime (GCCS-M), UHF Line-of-sight Satellite (LOS/SAT), and ship's gyros will need to be replaced in order to ensure continuity of operations should the primary acoustic path to shore become inoperable.

Cost growth is reflective of funding for C4I Modernization added in POM-18. Costs for individual C4I systems being procured are varied, resulting in the variability in individual unit costs across the fiscal years, with the primary procurements occurring in FY18.

**Description:**  
 The FY 2019 funding request was reduced by \$19.630 million to account for the availability of prior year execution balances.

The AN/SLQ-32(V) provides a family of modular ship born electronic warfare equipment which is installed on all surface combatants, aircraft carriers, amphibious ships and auxiliaries in the surface Navy. The system provides early detection, analysis, threat warning and protection from anti-ship missiles. The OPN 2312 budget supports the AN/SLQ-32(V)6 and AN/SLQ-32(V)7 variants through procurement and installation. The SEWIP Block 1B3 and Block 2 units are installed conjunctively and comprise the AN/SLQ-32(V)6 system. The SEWIP Block 1B3, Block 2 and Block 3 units are installed conjunctively and comprise the AN/SLQ-32(V)7 system.

TC056: SURFACE ELECTRONIC WARFARE (EW) IMPROVEMENTS BLOCK 1  
 The Surface Electronic Warfare (EW) Improvement Program (SEWIP) will develop a modern, highly capable family of EW systems by block upgrade of the current AN/SLQ-32 system that is robust in detecting and countering current and future threats and will extend the service life of AN/SLQ3-2(V) systems. Funding procures upgrades to the current AN/SLQ-32 system.

BLOCK 1B1 - SMALL SHIP ELECTRONIC MEASURES SYSTEM (SSESM):  
 Small Ship Electronic Support Measures System (SSESM) provides Specific Emitter Identification (SEI) capability to various ships/ship classes in a stand-alone configuration. Tech Refresh funding is provided to address obsolescence and reliability issues presenting affecting fielded systems.

BLOCK 1B2 - FEDERATED SPECIFIC EMITTER IDENTIFICATION (SEI):  
 The federated SEI, consisting of SEI hardware plus an ICAD modification kit, fully integrates SEI functionality with the ICAD/Q-70 console. Tech Refresh funding is provided to address obsolescence and reliability issues affecting fielded systems.

BLOCK 1B3 - HIGH GAIN HIGH SENSITIVITY (HGHS):  
 High Gain High Sensitivity (HGHS) Adjunct Sensor is a critical improvement for threat correlation, situational awareness, and extending the battle space. Engineering Change Proposal (ECP) funding is provided to support changes resulting from software and hardware trouble reports from production, shipboard installations and/or land based testing. Tech Refresh funding is provided to address obsolescence and reliability issues affecting fielded systems. The SEWIP Block 1B3 and Block 2 units are installed conjunctively to compose the AN/SLQ-32(V)6 system. The SEWIP Block 1B3, Block 2 and Block 3 units are installed conjunctively to compose the AN/SLQ-32(V)7 system. The SEWIP Block 1B3 P-3a funding has been broken out to separately show systems installed with SEWIP Block 2 (FMP Block 1B3 for SLQ-32

| (V)6 ) and systems installed with SEWIP Block 2 and Block 3 (FMP Block 1B3 for SLQ-32 (V)7). For FMP Block 1B3 systems for SLQ-32 (V)7, production lead times for Block 1B3 are 15 months and these systems are then delivered to the Block 3 Integration Facility, NSWC Crane, 6 months (180 days) prior to delivery as part of an integrated SLQ-32 (V)7 system. The 180 days is required for integration and testing with SEWIP Block 3 at the NSCW Crane Integration Facility.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                             |                                                   |
| TC059: SURFACE ELECTRONIC WARFARE (EW) IMPROVEMENTS BLOCK 2<br>Block 2 will provide AN/SLQ-32(V) an upgraded antenna, receiver, and combat systems interface. The upgrades will pace the threat, improve detection and accuracy and mitigate Electromagnetic Interference (EMI). The Block 2 hardware cost includes the SEWIP Block 2 ES system, SLA-10D blanker, Common Processing System, Common Display System, Liquid Conditioning Unit and Data Adaptation Processor. The SEWIP Block 1B3 and Block 2 units are installed conjunctively and compose the AN/SLQ-32(V)6 system. The SEWIP Block 1B3, Block 2 and Block 3 units are installed conjunctively to compose the AN/SLQ-32(V)7 system. The SEWIP Block 2 P-3a funding has been broken out to separately show systems installed with SEWIP Block 1B3 (FMP Block 2 for SLQ-32 (V)6 ) and systems installed with SEWIP Block 1B3 and Block 3 (FMP Block 2 for SLQ-32 (V)7). For FMP Block 2 systems for SLQ-32 (V)7, production lead times for Block 2 are 17 months and these systems are then delivered to the system integrator, NSWC Crane, 6 months (180 days) prior to delivery as part of an integrated SLQ-32 (V)7 system. The 180 days is required for integration and testing with SEWIP Block 3 at the NSWC Crane Integration Facility. |                                             |                                                   |
| TC060: SURFACE ELECTRONIC WARFARE (EW) IMPROVEMENTS BLOCK 3:<br>Block 3 will provide an Electronic Attack (EA) capability improvement required for the AN/SLQ-32(V) system to keep pace with the threat. SEWIP Block 3 will provide a common EA capability to surface combatants (CVN, DDG, LHD) outfitted with the active variant of the AN/SLQ-32, mainly the (V)3 and (V)4, as well as select new-construction platforms. The program builds on the EW Electronic Support (ES) capability delivered by Blocks 1 and 2. Development Status/Major Milestones are: Long Lead Material (LLM) was procured Q4 FY17, Milestone C Low Rate Initial Production (LRIP) Q4 FY18, IOT&E Q1 FY21, FRP is Q2 FY22. The SEWIP Block 1B3, Block 2 and Block 3 units compose the AN/SLQ-32(V)7 system. This may be accomplished as a conjunctive installation with all SEWIP components installed at the same time or as a non-conjunctive installation by installing the SEWIP Block 3 on a ship with SEWIP Block 1B3 and 2 previously installed.                                                                                                                                                                                                                                                                       |                                             |                                                   |
| Block 3T (AN/SLQ-59) will provide an Electronic Attack (EA) capability improvement required for the AN/SLQ32(V) system to keep pace with the threat. Block 3T provides initial, limited interim capability of a focused application of the Naval Research Lab (NRL) Transportable EW Module (TEWM) system to meet an urgent operational needs (UON) statement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                             |                                                   |

| TC6IN: NON-FMP INSTALLATIONS<br>Installation of AN/SLQ-32(V) ECP/Field Changes and the Surface EW Improvements Blocks 1, 2 and 3 at Shore Site Facilities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                             |                                                   |
| [P40A / TC956 - USCG WMSL AN/SLQ-32 B(V)2]: TC956 - UNITED STATES COAST GUARD (USCG) WMSL AN/SLQ-32B(V)2:<br>This is a new requirement at PB19 to support USCG WMSL 758 and 759 and is in accordance with the requirements of OPNAVINST 4000.79A for Navy Type - Navy Owned (NTNO) material. NTNO material is procured by the Navy and installed by the USCG.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                             |                                                   |
| [P40A / TC959 - SEWIP BLOCK 2 LITE FOR USCG OPC SHIPS]: TC959 - SEWIP BLOCK 2 LITE FOR UNITED STATES COAST GUARD (USCG) OPC SHIPS:<br>This details the requirements for SEWIP Block 1B2 and SEWIP Lite systems in support of USCG OPC ships. These requirements were included in the SEWIP Block 1B1, TC056, and SEWIP Block 2, TC059, P-3a budget exhibits at PB18. OPNAVINST 4000.79A for Navy Type - Navy Owned (NTNO) material applies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                             |                                                   |
| Block 2 Lite is a variant of the Block 2 specifically tailored for the needs of small ships, such as LCS, OPC and the Fast Frigate, to address fleet emergent needs for a robust, capable, and sustainable EW system that meets the space, weight and power limitations of these smaller ships.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                             |                                                   |

| <p>(1) This line was previously located in "TC056 - BLOCK 1B2 FEDERATED SEI" but was split out due to OPNAVINST 4000.79A for Navy Type - Navy Owned material (NTNO). NTNO material is procured by the Navy and installed by the USCG.</p> <p>(2) Cost increase from FY20-FY21 is a result of redesign due to multiple obsolescence issues.</p> <p>[P40A / SEWIP BLOCK 1B2 UNITS USCG SHORE UNITS]: Note:</p> <p>(1) This line was previously located in "TC056 - BLOCK 1B2 FEDERATED SEI" but was split out due to OPNAVINST 4000.79A for Navy Type - Navy Owned (NTNO) material. NTNO material is procured by the Navy and installed by the USCG.</p> <p>[P40A / SEWIP BLOCK 2 LITE USCG SHIP UNITS]: Notes:</p> <p>(1) This line was previously located in "TC056 - BLOCK 1B3 HGHS" but was split out due to OPNAVINST 4000.79A for Navy Type - Navy Owned material (NTNO). NTNO material is procured by the Navy and installed by the USCG.</p> <p>(2) The Block 2 Lite - OPC requirements have changed since PB18. The two units procured in prior year are now shown as shore units; these were depicted as one ship and one shore at PB18. These units are required for one shore site unit and an Environmental Test Qualification (EQT) unit. One ship unit has been added in FY18 and FY19 to support OPC 1 and OPC 2, respectively, based on in yard need dates for these ships.</p> <p>[P40A / SEWIP BLOCK 2 LITE USCG SHORE UNITS]: Note:</p> <p>This line was previously located in "TC059 - BLOCK 2 ELECTRONIC SUPPORT (ES) SYSTEM" but was split out due to OPNAVINST 4000.79A for Navy Type - Navy Owned (NTNO) material. NTNO material is procured by the Navy and installed by the USCG.</p> <p>[P40A / SEWIP BLOCK 2 LITE USCG SHORE INSTALL]: Note:</p> <p>This line was previously located in "TC056 - BLOCK 2 ELECTRONIC SUPPORT (ES) SYSTEM" Shore Site Installs will be funded through the SEWIP Program.</p> <p>[P40A / TC960 - SOLID STATE PRODUCT SUPPORT INTEGRATOR (PSI)]: TC960 - SOLID STATE PRODUCT SUPPORT INTEGRATOR (PSI)</p> <p>The Solid State Product Support Integrator (PSI) for Radio Frequency (RF) funding line supports the stand-up of this capability for select components of SEWIP Block 3. The Solid State PSI, will provide engineering analysis and product support strategies as well as test and repair capabilities for the high band (HB) and low band (LB) transmit (Tx) and receive (Rx) components of SEWIP Block 3. Solid State PSI funding supports the procurements (investment expense) of HB and LB Tx and Rx module test and repair equipment in FY20-24. The Solid State PSI capability is shared with AMDR.</p> <p>Note:</p> <p>(1) TC960 Solid State PSI Procurements provide the following, Test Fixture (FY20), Text Set (FY21), Repair Equipment (FY22), and Calibration Equipment (FY23).</p> <p>[P40A / TC960 - MULTIPURPOSE RECONFIGURABLE TRAINING SYSTEM]: TC960 - MULTIPURPOSE RECONFIGURABLE TRAINING SYSTEM (MRTS)</p> <p>The Multipurpose Reconfigurable Training System (MRTS) is a new requirement at PB19 and provides support for Fleet maintenance training for SEWIP Block 2 and SEWIP Block 3. MRTS simulates the tactical system's components and subcomponents necessary for training without requiring the procurement of a full SEWIP Block 1B3, Block 2, or Block 3 system. This has resulted in an overall reduction of one shore site unit for each Block (procurement and installation) since PB18.</p> |                                             |                                                   |

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**  
The increase from FY 2018 to FY 2019 is attributed to the procurement of six additional Block 2 units, two additional Block 3 units, and eight Block 2 installations.

| Footnotes:<br><sup>(1)</sup> TC956 - USCG WMSL AN/SLQ-32B(V)2: This is a new requirement at PB19 to support United States Coast Guard (USCG) WMSL 758 and 759 and is in accordance with the requirements of OPNAVINST 4000.79A for Navy Type - Navy Owned (NTNO) material. NTNO material is procured by the Navy and installed by the USCG.<br><sup>(2)</sup> TC959 - SEWIP BLOCK 2 LITE FOR USCG OPC SHIPS: This details the requirements for SEWIP Block 1B2 and SEWIP Lite systems in support of USCG OPC ships. These requirements were included in the SEWIP Block 1B1, TC056, and SEWIP Block 2, TC059, P-3a budget exhibits at PB18. OPNAVINST 4000.79A for Navy Type - Navy Owned (NTNO) material applies. Block 2 Lite is a variant of the Block 2 specifically tailored for the needs of small ships, such as LCS, OPC and the Fast Frigate, to address fleet emergent needs for a robust, capable, and sustainable EW system, that meets the space, weight and power limitations of these smaller ships. OPC requirements have changed since PB18. The two units procured in prior year are now shown as shore units; these were depicted as one ship and one shore at PB18. These units are required for one shore site unit and an Environmental Test Qualification (EQT) unit. See P40A note on Page 3 for additional details.<br><sup>(3)</sup> TC960 - MULTIPURPOSE RECONFIGURABLE TRAINING SYSTEM (MRTS): The Multipurpose Reconfigurable Training System (MRTS) is a new requirement at PB19 and provides support for Fleet maintenance training for SEWIP Block 2 and SEWIP Block 3. MRTS simulates the tactical system's components and subcomponents necessary for training without requiring the procurement of a full SEWIP Block 1B3, Block 2, or Block 3 system. This has resulted in an overall reduction of one shore site unit for each Block (procurement and installation) since PB18. |             |                     |                                          |                                                   |                      |               |                              |                                |                          |                        |                               |                   |

**Description:**

Small Ship Electronic Support Measures System (SSES) provides Specific Emitter Identification (SEI) capability to various ships/ship classes in a stand-alone configuration. Tech Refresh funding is provided to address obsolescence and reliability issues affecting fielded systems.

**Footnotes:**

(4) Fifteen (15) units procured by Chief Naval Security Group (CNSG)

(5) Additional Tech Refresh procurements were required in FY16-FY18 to implement tech refresh changes. The Tech Refresh hardware consists of circuit cards and an Operating System update. The tech refresh applies to all in-service CG, DDG, and Amphibious ships with SEI systems (114 ships).

**Description:**

Block 1B3: High Gain High Sensitivity (HGHS)

High Gain High Sensitivity (HGHS) Adjunct Sensor is a critical improvement for threat correlation, situational awareness, and extending the battle space. Engineering Change Proposal (ECP) funding is provided to support changes resulting from software and hardware trouble reports from production, shipboard installations and/or land based testing. Tech Refresh funding is provided to address obsolescence and reliability issues affecting fielded systems. The SEWIP Block 1B3 and Block 2 units are installed conjunctively to compose the AN/SLQ-32(V)6 system. The SEWIP Block 1B3, Block 2 and Block 3 units are installed conjunctively to compose the AN/SLQ-32(V)7 system. The SEWIP Block 1B3 P-3a funding has been broken out to separately show systems installed with SEWIP Block 2 (FMP Block 1B3 for SLQ-32 (V)6 ) and systems installed with SEWIP Block 2 and Block 3 (FMP Block 1B3 for SLQ-32 (V)7). For FMP Block 1B3 systems for SLQ-32 (V)6 and (V)7, production lead time for Block 1B3 is 15 months and these systems are then delivered to the system integrator, NSWC Crane, 6 months (A-180 days) prior to the start of the installation availability for integration into a SLQ-32 (V)6 or (V)7 system. 135 days is required for integration and testing with SEWIP Blocks 1B2 and 1B3 for SLQ-32 (V)6 and SEWIP Blocks 1B2, 1B3 and 3 for SLQ-32(V)7, 15 days for preparation for shipment and delivery to the shipyard 30 days prior to the start of the availability (A-30).

**Notes:**

(1) Production Support provides for Government oversight of production, Government and Original Equipment Manufacturer (OEM) support of production related software and hardware problems, and engineering as well as integrated logistics support efforts in support of production and fielding.

(2) Engineering Change Proposal (ECP) funding is to address reliability, obsolescence, and other issues associated with production, and is estimated at 3% of the total hardware cost.

(3) Installation cost estimates have been revised based on actual costs of installations to date.

(4) Total SEWIP Block 1B3 quantities being procured are the same as PB18. As a result, FMP Block 1B3 for SLQ-32(V)6 increased by seven units due to the acceleration of the SLQ-32(V)6 installation schedule. FMP Block 1B3 for SLQ-32(V)7 decreased by six units due to the decision to install six systems as non-conjunctive. One shore site system was eliminated due to the adoption of MRTS for training.

(5) Funding for Installation and Check Out (INCO) spares to support FY18-FY23 procured units is called out separately in the SEWIP Block 1B3 Support line 2.4. The increase from FY18 to FY19 is to address the INCO spares deficiencies caused by higher than anticipated failure rates.

(6) For FMP Block 1B3 systems, the production lead time is 15 months, and these systems are then delivered to the system integrator, NSWC Crane, 6 months prior to the start of the installation availability (A-180 days) where integration, testing, and preparation for shipment is conducted. 135 days are required for integration and testing of the SEWIP Blocks 1B2, 1B3 and 2 into an SLQ-32(V)6 system, preparation

| Gross/Weapon System Unit Cost (\$ in Dollars)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | -              | -       | -       | -                                                 | -              | -                | -               | -       | -                                                                                     | -       | -              | -        |
| Description:<br>TC059 - BLOCK 2 ELECTRONIC SUPPORT (ES) SYSTEM<br>Block 2 will provide AN/SLQ-32(V) an upgraded antenna, receiver, and combat systems interface. The upgrades will pace the threat, improve detection and accuracy and mitigate Electromagnetic Interference (EMI). The Block 2 hardware cost includes the SEWIP Block 2 ES system, SLA-10D blanker, Common Processing System, Common Display System, Liquid Conditioning Unit and Data Adaptation Processor. The SEWIP Block 1B3 and Block 2 units are installed conjunctively and compose the AN/SLQ-32(V)6 system. The SEWIP Block 1B3, Block 2 and Block 3 units are installed conjunctively to compose the AN/SLQ-32(V)7 system. The SEWIP Block 2 P-3a funding has been broken out to separately show systems installed with SEWIP Block 1B3 (FMP Block 2 for SLQ-32 (V)6 ) and systems installed with SEWIP Block 1B3 and Block 3 (FMP Block 2 for SLQ-32 (V)7). For FMP Block 2 systems for SLQ-32 (V)6 and (V)7, the production lead time is 17 months and these systems are then delivered to the system integrator, NSWCC Crane, 6 months (A-180 days) prior to the start of the installation availability for integration into a SLQ-32 (V)6 or (V)7 system. 135 days is required for integration and testing with SEWIP Blocks 1B2 and 1B3 for SLQ-32 (V)6 and SEWIP Blocks 1B2, 1B3 and 3 for SLQ-32(V7), 15 days for preparation for shipment and delivery to the shipyard 30 days prior to the start of the availability (A-30).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                |         |         |                                                   |                |                  |                 |         |                                                                                       |         |                |          |
| Notes:<br><br>(1) Production Support provides for Government production oversight and original equipment manufacturer (OEM) support of production. This includes software, hardware problems, and integrated logistics support for production and fielding. Production support cost has increased from FY18 to FY19 due to additional Government oversight requirements and additional Government and OEM support for unplanned efforts including Environmental Qualification Test (EQT) fixes, retrofit of an upgraded Liquid Conditioning Unit (LCU), and next Generation VME replacement. These fixes and upgrades impact both new systems as well as previously fielding systems, resulting in an increase level of effort.<br><br>(2) Tech Refresh funding in FY19-FY23 will provide for the procurement and retrofit of an upgraded Liquid Cooling Unit (LCU), implement enhanced cybersecurity safeguards and upgrade to the Next Generation VME system replacement. Tech Refresh of the LCU will address reliability and support cost drivers of the current configuration. Enhanced cybersecurity safeguards are required for the AN/SLQ-32(V)6 system to continue to be part of the integrated combat system. The next Generation VME system replacement will update SEWIP Block 2 to VPX (also known a VITA 46) to correct VMEbus bandwidth limitations, which will address obsolescence and reliability issues affecting fielded systems.<br><br>(3) Engineering Change Proposal (ECP) funding addresses reliability, obsolescence, and other issues associated with production, and is estimated based on historical SEWIP Block 2 ECP expenditures. SEWIP Block 2 ECP funding supports the Non-Recurring Engineering for anticipated hardware and software combat system integration issues and Fleet reported trouble reports. FY19 ECP increases due to the incorporation of the cost of the Design Agent services contract. Design agent services in FY19 are necessary to address hardware configuration changes necessary to address and correct producibility, reliability and maintainability, as well as, Diminishing Manufacturing Sources and Material Shortages (DMSMS) issues with the SEWIP Block 2 ES system and associated equipment. |                |         |         |                                                   |                |                  |                 |         |                                                                                       |         |                |          |

| <p>(4) Procurement of SEWIP Block 2 Lite systems in support of USCG OPC Class ships has been moved into a P-40a exhibit (TC959) within this budget in accordance with OPNAVINST 4000.79A for Navy Type - Navy Owned material. The total SEWIP Block 2 quantities being procured is the same as PB18. As a result, FMP Block 2 for SLQ-32(V)6 increased by seven units due to the acceleration of the SLQ-32(V)6 installation schedule. FMP Block 2 for SLQ-32(V)7 decreased by six units due to the decision to install six systems as non-conjunctive. One shore site system was eliminated due to the adoption of MRTS for training.</p> <p>(5) Installation costs have been reduced to reflect the actual costs for SEWIP Block 2 installations to date.</p> <p>(6) Funding for Installation and Check Out (INCO) spares to support FY18-FY23 procured units is called out separately in the SEWIP Block 2 hardware line as 1.1.5.</p> <p>(7) SEWIP Block 2 H/W unit cost increase from FY18 to FY19 is due to increased Common Processing Solution (CPS) and Common Display Solution (CDS) price increases due to multiple contract modifications for obsolescence resolution and transitioning from the TI-12 configuration in FY18 to the TI-16 configurations in FY19.</p> <p>(8) The SEWIP Block 2 MRTS (shown on the P-40a exhibit TC960) eliminates the need for an SLQ-32(V)6 shore system (Block 1B3 and Block 2) at Corry Station which was planned for installation in FY19.</p> <p>(9) For FMP Block 1B3 systems, the production lead time is 15 months and these systems are then delivered to the system integrator, NSWC Crane, 6 months prior to the start of the installation availability (A-180 days) where integration, testing, and preparation for shipment is conducted. 135 days are required for integration and testing of the SEWIP Blocks 1B2, 1B3 and 2 into an SLQ-32(V)6 system, preparation for shipment (15 days) and delivery to the shipyard 30 days prior to the start of the availability (A-30). The four FY19 units installed in Q1FY22 are scheduled for delivery to the Government between 15 Mar 2021 and 3 May 2021. The integration start dates for these units are required to start no later than 15 Aug - 15 Sep 2021 in order to prepare the systems for installation.</p> |                                                          |                                                                                              |

Description:

Block 3 will provide an Electronic Attack (EA) capability improvement required for the AN/SLQ-32(V) system to keep pace with the threat. SEWIP Block 3 will provide a common EA capability to surface combatants (CVN, DDG, LHD) outfitted with the active variant of the AN/SLQ-32, mainly the (V)3 and (V)4, as well as select new-construction platforms. The program builds on the EW Electronic Support (ES) capability delivered by Blocks 1 and 2. Development Status/Major Milestones are: Long Lead Material (LLM) was procured Q4 FY17, Milestone C Low Rate Initial Production (LRIP) Q4 FY18, IOT&E Q1 FY21, FRP is Q2 FY22. The SEWIP Block 1B3, Block 2 and Block 3 units compose the AN/SLQ-32(V)7 system. This may be accomplished as a conjunctive installation with all SEWIP components installed at the same time or as a non-conjunctive installation by installing the SEWIP Block 3 on a ship with SEWIP Block 1B3 and 2 previously installed.

Notes:

(1) Production Support provides for Government oversight of production, Government and original equipment manufacturer (OEM) support of production related software and hardware problems, and engineering as well as integrated logistics support efforts in support of production and fielding. Funding for installation and Check Out (INCO) spares to support procured units previously included as part of production support has been called out separately in the SEWIP Block 3 hardware line as 1.1.3.

(2) INCO spares requirements are based on the updated Program Support Data sheets, SEWIP Block 3 hardware reliability projections, and the level at which SEWIP INCO spares requirements have been funded via the OPN 9020 budget. The increase in SEWIP Block 3 INCO requirements from FY18 to FY19 is due to the increase in the number of supported systems from two (2) in FY18 to four (4) in FY19 based on current hardware reliability projections.

(3) SEWIP Block 3 Engineering Change Proposal (ECP) funding amounts are estimated based on the current maturity of the design and the anticipated changes during production. ECP costs are higher in FY19-23 due to the inclusion of design agent services requirements to address hardware configuration changes necessary for installation on CVN and LHD class ships.

(4) The total lead time for production of FY17 units is 22 months, due to the procurement of long lead time materials, while the production lead time for FY18-FY21 units is 18 months.

(5) SEWIP Block 3 installation costs include the procurement of four (4) quad plates per shipset to mount the SEWIP Block 3 antennas. The installation costs also include the procurement of High Efficiency, Super Capacity (HES-C) chiller unit upgrades required for certain DDG, LHD, and CVN ships (18 of the 49 SEWIP Block 3 installations). The quad plates and HES-C chiller unit upgrades are required two (2) years ahead of shipboard installation to support integration at NSWC Crane.

| <p>(6) The requirement for SEWIP Block 3 Large Radar Cross Section (LRCS) systems have been eliminated since PB18 as it has been determined that the SRCS system can meet the SEWIP Block 3 operational requirements. All units procured will be SEWIP Block 3 Small Radar Cross Section (SRCS) systems.</p> <p>(7) The current SEWIP Block 3 development contract was awarded in FY15 and includes fixed price production options for FY17 and FY18 which were bid in a competitive environment prior to the start of system development. The program will procure FY17 and FY18 units at these contract prices. A new competitive contract will be awarded for FY19-FY23 production requirements. The estimated FY19-FY23 Block 3 unit costs are based on actuals from the current SEWIP Block 3 development contract which reflect the current bill of material and labor costs and are higher than the production unit costs included in the current competitively awarded contract at award.</p> <p>(8) The SEWIP Block 3 MRTS (P-40A exhibit TC960) eliminates the need for an SLQ-32V(7) shore system at Corry Station which was planned for an FY19 installation.</p> <p>(9) For FY18 and forward, the FMP Block 3 systems production lead time is 18 months, and these systems are then delivered to the system integrator, NSWC Crane, 6 months prior to the start of the installation availability (A-180 days) where integration, testing, and preparation for shipment is conducted. 135 days are required for integration and testing of the SEWIP Blocks 1B2, 1B3, 2 and 3 into an SLQ-32(V)7 system, preparation for shipment (15 days) and delivery to the shipyard 30 days prior to the start of the availability (A-30).</p> |                                                          |                                                                                             |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                          |                                                                                             |

| <b>Description:</b><br>Block 3T (also referred to as nomenclature AN/SLQ-59) will provide an Electronic Attack (EA) capability improvement required for the AN/SLQ32(V) system to keep pace with the threat. Block 3T provides initial, limited interim capability of a focused application of the Naval Research Lab (NRL) Transportable EW Module (TEWM) system to meet an urgent operational needs statement. |                    |                |                |                                                          |                    |                      |                        |                |                |                                                                                               |                    |                |

| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |         |                                        |              |             |               |                                                              |                                     |                     |         |             |            |
| The FY19 funding request was reduced by \$2.722M to account for the availability of prior year execution balances.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |             |         |                                        |              |             |               |                                                              |                                     |                     |         |             |            |
| [P5 / 1U013 SSEE Increment E ECP]: Engineering Change Proposal (ECP)/Obsolescence procures Commercial Off-The-Shelf/Non-Developmental Item (COTS/NDI) equipment to replace obsolete and unsupportable equipment for the Ships Signal Exploitation Equipment (SSEE) Increment E program and incorporates Pre-Planned Product Improvements (P3I) for the acquisition and localization of Signals of Interest (SOI) and Electronic Warfare (EW). These changes allow for a common logistic support baseline and provide the hardware and software to incorporate P3I/new COTS base technologies. Specifically, this funds field change kits/ECPs that may also include all or some of the following upgrades; Tapered Slot Antennas (TSA), Hostile Force Integration Targeting Subsystems (HITS) hosted on Digital Receiver Technology (DRT), Radio Frequency Distribution Unit (RFDU) Backfits, Digital Tuners, Global Positioning System (GPS) Selective Availability Anti-Spoofing Modules (SAASM), Medusa, various antenna types(including Red Falcon), various hardware (to include blade servers) and software upgrades, and equipment to provide Information Operation (IO)/EW acquisition capabilities and localization of modern threat communications and SOI.                                                                                                                                                                   |             |         |                                        |              |             |               |                                                              |                                     |                     |         |             |            |
| [P5 / 1U016 Spectral]: The Spectral Program is an incremental acquisition, Government Off-The-Shelf/Commercial Off-The-Shelf (GOTS/COTS) program that provides cryptologic signals exploitation capabilities designed to meet the requirements for shipboard cryptologic operations within the Ship's Signal Exploitation Space (SSES) aboard a variety of ship classes and shore facilities. The Spectral system will provide a mobile, passive capability to detect, classify, track, and determine the intent of enemy units through exploitation of their command and control emissions. The system searches the Radio Frequency (RF) spectrum based on operator-defined search strategies with the receivers under computer control, alerts the operator when a signal is detected and creates signal files to be used for on-line and post processing. The Spectral System will leverage existing architectures and support the integrated fires construct with Shipboard Combat Systems providing non-kinetic engagement to enhance combat effectiveness. The system will be scalable, reconfigurable to mission, modular, remotable and dynamically reprogrammable in response to new threats and capabilities. The system is upgraded incrementally as improvements are developed. The Spectral System will deliver improved information/cyber Warfare planning, exploitation, and attack capabilities across Naval platforms. |             |         |                                        |              |             |               |                                                              |                                     |                     |         |             |            |
| [P5 / 1U020 SSEE Modifications Engineering Change Proposal - Ship]: Engineering Change Proposal (ECP)/Obsolescence procures COTS/Non-Developmental Item (COTS/NDI) equipment to replace obsolete and end-of-life (EOL) equipment for the SSEE MODS program. ECP incorporates Pre-Planned Product Improvements (P3I) for the acquisition and localization of the latest Signals of Interest (SOI) and Information Operations (IO). ECP maintains and improves upon SSEE MODS capability and relevance within a rapidly evolving threat environment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |             |         |                                        |              |             |               |                                                              |                                     |                     |         |             |            |
| [P5 / 1U029 Information Warfare (IW) Training Equipment]: IW training equipment provides operator, unit or multi-unit level training on SSEE Increment F V 7/8 (Tactical Cryptologic Systems) (TCS). This equipment enhances initial skills, provides refresher training and increases proficiency of the operator on TCS through the generation and replay of operational scenarios by software simulation versus hardware                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             |         |                                        |              |             |               |                                                              |                                     |                     |         |             |            |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                        |                                                              |
| <p>simulation. IW training equipment is updated based on new variants of Ships Signal Exploitation Equipment (SSEE) systems. Additionally this line supports the procurement of the STALLION (formerly known as Cryptologic On-Line Trainer) hardware for shipboard IW team training. Stallion is a web-based/Service Oriented Architecture (SOA) scenario training system that emulates Navy tactical Signal Intelligence (SIGINT)/Information Operations (IO) system functionality. Stallion is delivered turnkey to the Center for Information Dominance Learning Sites (CIDLS).</p> <p>[P5 / 1U060 ICADS]: Integrated Communications and Data System (ICADS) ((AN/URC-148(V)) is a Chief of Naval Operations (CNO) directed mission critical system providing advanced simulation capabilities and limited back-up communications for Naval platforms. The two Increments provide scalable capability dependent on host platform requirements. Specific program details held at a higher classification.</p> <p>[P5 / 1U014 SSEE Increment F (All Variants) ECP]: Engineering Change Proposal (ECP)/Obsolescence procures Commercial Off-The-Shelf/Non-Developmental Item (COTS/NDI) equipment to replace obsolete and end-of-life (EOL) equipment for the Ship's Signal Exploitation Equipment (SSEE) Increment F program (All Variants). ECP incorporates Pre-Planned Product Improvement (P3I) for the acquisition and localization of the latest Signals of Interest (SOI) and Information Operations (IO). ECP's maintain and improve upon SSEE Increment F's (All Variants) capability and relevance within a rapidly evolving threat environment. ECP equipment will also be used to enable SSEE Increment F(V)7/8 (TCS) to meet its scalable and modular capacity. Anti-Access, Area Denial (A2AD) capabilities integrated into the SSEE Systems will enable maritime power projection in enabling surface vessels to disrupt, deny, degrade and defeat adversary (state and non-state) use of the radio frequency spectrum, improving the Fleet's ability to communicate and operate therein. These systems will be deployed supporting Assured Command and Control, Battlespace Awareness, and Integrated Fires. INMARSAT Antenna ECP to replace obsolete and end-of-life (EOL) antenna. This antenna fulfills a High Gain Aperture requirement across the fleet as well as expandability to GX coverage and availability to interchangeable RF modules to support current CONOPs. This antenna will also increase DoD's cybersecurity posture while ensuring all SSEE systems and their components operate with latest supported hardware. Procurement profile to support new construction Navy ships. Flexibility to integrate and deliver capability under the P3I construct is maximized using the SSEE Collaborative Development and Integration Environment which utilizes the Amazon WebServices.gov (AWS) cloud infrastructure as the independent medium by provisioning capability of a Virtual Private Cloud architecture to automatically provision, deploy, and configure user capability for integration. The Navy Tactical Data Network (NTDN) is a cybersecurity initiative enabling National/Tactical Integration with US Navy Surface Cryptologic Systems by deploying NSANet afloat with special SIGINT processing capabilities, enterprise services, and a mission data repository allowing automated synchronization with (National Security Agency (NSA) databases. This Engineering Change Proposal (ECP) will back-fit force-level SSEE Increment F(V)1/2 systems as well as integrating the shore component with CLASSIC REACH. NTDN Network &amp; Information Technology (IT) infrastructure (afloat &amp; shore) that will be connected to the Automated Digital Network System (ADNS) Increment 3 Routers, Switch, Tac Lane, Wide Area Network (WAN) Optimizer, &amp; Server, Cross Domain Solutions (CDS) appliance between NTDN and SCI-Networks, Certification and Accreditation of SSEE FoS on peer-intranet NSA enclave afloat. In addition, an NTDN shore component will be deployed to support data flow to/from appropriate NSA data bases. Bladecenter replacement kits address obsolescence and resolve cybersecurity posturing while workstation upgrades place necessary technology updates to maximized operator performance. The Next Generation Chassis modifications provide enhanced data processing and greater exposure to existing system services while meeting constricting size, weight, power, and cooling requirements.</p> <p>[P3A / 1U017 SSEE Increment F (All Variants) Ship]: The SSEE Increment F program (All Variants) is an incremental acquisition, Commercial Off-The-Shelf/Government Off-The-Shelf (COTS/GOTS) program designed as the building block to improve the Information Warfare (IW) exploitation / Information Operations (IO) / non-kinetic and subsequent tactical cryptologic capability across Navy surface combatant platforms. SSEE Increment F (All Variants) provides the afloat IW / cryptologist with IO / non-kinetic capabilities and subsequent threat identification and analysis of Communications Intelligence as well as queuing of radio direction finding assets. Equipment includes receivers, Radio Frequency management systems, recorders, audio distribution systems, computers, antennas and ancillary hardware. The system is upgraded incrementally as improvements are developed. SSEE Increment F (All Variants) employs the Maritime Cryptologic Strategy for the 21st century concept of a single core architecture that is easily modernized and scaled in capability. The system design permits the rapid insertion of new and emerging Pre-Planned Product Improvement (P3I) to address the evolving threat. The system utilizes generic processor technology to counteract obsolescence issues with digital signal processing /field programmable gate array technologies and provide software receivers for ease of modification to deal with known and projected threat Signals of Interest (SOI). Automated signal acquisition and integrated radio direction finding are incorporated into the SSEE Increment F(V)1/2 system. SSEE Increment F (All Variants) also includes a small form factor variant, SSEE Increment F(V)7/8 Tactical Cryptologic System (TCS) to meet IW / IO / non-kinetic and subsequent tactical cryptologic capability onboard Arleigh Burke Class Destroyers (DDG) Flight I platforms and as a replacement for select SSEE Increment E variants and older signals intelligence systems.</p> <p>SSEE Increment F (V)7/8 (TCS) is a scalable, modular variant of SSEE Increment F(V)1/2 that allows configuration to meet platform mission requirements. SSEE Increment F (V)7/8 (TCS) leverages SSEE Increment F(V)1/2 common software, training, and logistics. SSEE Increment F (V)7/8 (TCS) consists of infrastructure (Topside Antennas) which will be permanently installed on 41 Unit Level ships. The Below Deck Core system includes a modular component to all Mission Tailorable upgrades to increase capabilities. The modularity and scalability of SSEE Increment F (V)7/8 (TCS) is delivered using Engineering Change Proposal (ECP). The Next Generation Chassis modifications provide enhanced data processing and greater exposure to existing system services while meeting constricting size, weight, power, and cooling requirements.</p> |                                        |                                                              |

| <p>[P3A - 2 / 1U018/1U019 SSEE Modifications]: SSEE Modifications is a classified Navy tactical signals intelligence frequency extension capability that will be integrated into SSEE systems. This capability provides simultaneous detection, collection, processing, IO and display of communication intelligence data from hostile, high threat and adversary platforms in select frequency ranges that are not prosecuted or countered today.</p> <p>It includes the Graywing subsystem which is an advanced common data link system that will be integrated into SSEE systems. It is a critical component of "Ballistic Missile Defense, Executive Committee, Anti-Submarine Warfare, Chief of Naval Operations, Executive Board IO Countermeasure Red Flash" initiative (details held at a higher classification level).</p> <p>[P3A - 3 / 1U014 Engineering Change Proposal (ECP) SSEE Increment F (All Variants)]: Engineering Change Proposal (ECP)/Obsolescence procures Commercial Off-The-Shelf/Non-Developmental Item (COTS/NDI) equipment to replace obsolete and end-of-life (EOL) equipment for the Ship's Signal Exploitation Equipment (SSEE) Increment F program (All Variants). ECP incorporates P3I for the acquisition and localization of the latest Signals of Interest (SOI) and Information Operations (IO). ECP maintains and improves upon SSEE Increment F's (All Variants) capability and relevance within a rapidly evolving threat environment. ECP equipment will be used to enable SSEE Increment F(V)7/8 (TCS) to meet its scalable and modular capacity.</p> |                                               |                                                                     |  |

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

The FY 2019 funding request was reduced by (\$2.519) million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

The FY19 funding request was reduced by \$2.722M to account for the availability of prior year execution balances.

Transfer of \$4.637 million from OPN to RD TEN for Integrated Communications and Data System (ICADS) Increment II. Details held at a higher classification.

The Shipboard IW budget supports SSEE (Ship's Signal Exploitation Equipment) Increment F(V)1/2 and SSEE Increment F(V)7/8 (Tactical Cryptologic System (TCS)), Anti-Access Area Denial (A2AD), Integrated Communications and Data System (ICADS) (AN/URC-148(V)), Afloat Cyber efforts, and Navy Tactical Data Network (NTDN). SSEE Increment F(V)7/8 (TCS) is a scalable, modular variant of SSEE Increment F(V)1/2 that allows configuration to meet platform mission requirements. SSEE Increment F(V)7/8 (TCS) leverages SSEE Increment F(V)1/2 common software, training, and logistics. SSEE Increment F(V)7/8 (TCS) consists of infrastructure (Topside Antennas) which will be permanently installed on 41 Unit Level ships. The Below Deck Core system includes a modular component for mission adaptable upgrades for increased capabilities. The modularity and scalability of SSEE Increment F(V)7/8 (TCS) is delivered using Engineering Change Proposal (ECP). Anti-Access Area Denial (A2AD) funding will procure Anti-Access Area Denial (A2AD) capabilities for the Ship's Signal Exploitation Equipment (SSEE) Increment F(V)1/2, Spectral(SSEE Increment G) and SSEE Modifications systems. A2AD capabilities integrated into the SSEE Systems will enable maritime power projection in enabling surface vessels to disrupt, deny, degrade and defeat adversary (state and non-state)

| <p>use of the radio frequency spectrum, improving the Fleet's ability to communicate and operate therein. These systems will be deployed supporting Assured Command and Control, Battlespace Awareness, and Integrated Fires.</p> <p>ICADS ((AN/URC-148(V)) is a Navy directed mission critical system providing advanced simulation capabilities and limited back-up communications for Naval platforms. The two Increments provide scalable capability dependent on host platform requirements. Specific program details held at a higher classification.</p> <p>Afloat Cyber provides for the ability to continue and extend the Fleet's afloat cyber operations for the SSEE Family of Systems and includes procurement of Commercial off the Shelf hardware solutions (further details are held at a higher classification level and can be provided upon request).</p> <p>TCS has been broken out from SSEE Increment F(V)1/2 to better identify the individual costs for each system. Procurements are tied to ship availabilities balanced against the 12 month production lead time.</p>                          |                                        |                                                              |

**Remarks:**  
 [Hardware] Engineering Change Proposal (ECP)/Obsolescence procures Commercial Off-The-Shelf/Non-Developmental Item (NDI) equipment to replace obsolete and end-of-life (EOL) equipment for the Ship's Signal Exploitation Equipment (SSEE) MODS program. ECP incorporates Pre-Planned Product Improvements (P3I) for the acquisition and localization of the latest Signals of Interest (SOI) and Information Operations (IO). ECP maintains and improves upon SSEE MODS capability and relevance within a rapidly evolving threat environment.

(t) indicates the presence of a P-5a

**Footnotes:**  
 (1) SSEE Inc E ECP prior year Procurements (includes DRT and Medusa)  
 (2) Upgrades provide necessary hardware improvements to Integrated Communications and Data System (ICADS) Increment I system performance in alignment with Fleet requirements. The Engineering Changes modernize the original prototype system hardware and software components to improve the accuracy and modification of simulation capabilities. ICADS was previously funded under BLI 2188.  
 (3) SSEE Increment F (All Variants) ECP prior year Procurements (includes CUB Replacement and LBTF Refresh Kits)  
 (4) Prior year Production Support (Includes SSEE Increment F (V)1/2 Shore, SSEE Increment E ECP, and SSEE Modifications ECP Production Support Costs).  
 (5) Prior year Install/DSA Costs (includes SSEE Modifications Shore, SSEE Increment F(V)1/2 Shore and SSEE Increment E ECP Install/DSA Costs).
