## Justification:

The FY 2019 funding request was reduced by \$1.152 million to account for the availability of prior year execution balances.

## Description:

Communications Data Link System Technical Refresh (CDLS TR) provides fielding link management computer upgrades to meet Fleet Windows 10 Operating System IA requirements, a second 360 degree data link, as well as the inclusion of digital distribution of Intelligence Surveillance and Reconnaissance (ISR), Full Motion Video (FMV), and Anti-Submarine Warfare (ASW) data in both Cypher Text (CT) and Plain Text (PT) to Automated Digital Network System (ADNS) for shipboard dissemination to support Anti-Access/Area Denial (A2AD). CDLS TR supports various Common Data Link (CDL) air platforms including MH-60R, MQ-4 Triton, MQ-8B/C Fire Scout, P-3, P-8, and MQ-25 Stingray, to include command and control of the aircraft during flight operations. The CDLS TR upgrade includes a Flight Deck Checkout test link between aircraft on the deck through CDLS to end-user prior to flight operations to ensure end-to-end connectivity of organic assets prior to missions.

| <p><b>Justification:</b><br/> FY19 Funding supports procurement and installation of 3 Communication Data Link System (CDLS) Technical Refresh (TR) systems for CVN platforms. Due to increased fleet Common Data Link (CDL) operations and obsolescence issues, a technical refresh is required to extend the life of the system beyond its intended design. CDLS TR addresses whole system reliability, sub-component obsolescence, and emerging Anti-Access/Area Denial (A2AD) Fleet requirements that are significantly degrading Fleet readiness, including Operational Availability (Ao), and system supportability. CDLS TR also provides IA/Cyber security upgrades to Windows 10 OS.</p> |                                         |                    |                                                    |                       |                                                                                        |                                              |                                              |                                              |                                              |                                              |

**Description:**

Communications Data Link System Technical Refresh (CDLS TR) provides fielding link management computer upgrades to meet Fleet Windows 10 Operating System IA requirements, a second 360 degree data link, as well as the inclusion of digital distribution of Intelligence Surveillance and Reconnaissance (ISR), Full Motion Video (FMV), and Anti-Submarine Warfare (ASW) data in both Cypher Text (CT) and Plain Text (PT) to Automated Digital Network System (ADNS) for shipboard dissemination to support Anti-Access/Area Denial (A2AD). CDLS TR supports various Common Data Link (CDL) air platforms including MH-60R, MQ-4 Triton, MQ-8B/C Fire Scout, P-3, P-8, and MQ-25 Stingray, to include command and control of the aircraft during flight operations. The CDLS TR upgrade includes a Flight Deck Checkout test link between aircraft on the deck through CDLS to end-user prior to flight operations to ensure end-to-end connectivity of organic assets prior to missions.

| <b>Footnotes:</b><br><sup>(1)</sup> Production and DSA costs were reduced as the program plans to leverage top side studies and ship installation drawings (SIDs) created for FY18 for similarly configured CVN platforms. The higher FY18 installation cost is attributed to first of class install for CDLS TR; FY19 and out cost reflect anticipated learning curve going forward. |            |                                |                                |           |                                |                |                                |           |                                |                                                                                        |                                |           |                                |                |                                    |           |                                |                |                                |                                                              |                                |                |                                |           |            |                |           |           |           |           |            |

| Flyaway Unit Cost (\$ in Dollars)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | -           | -       | -                                      | -            | -           | -             | -                                                                         | -                                   | -       | -       | -           | -          |
| Gross/Weapon System Unit Cost (\$ in Dollars)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | -           | -       | -                                      | -            | -           | -             | -                                                                         | -                                   | -       | -       | -           | -          |
| Description:<br>The FY 2019 funding request was reduced by \$.033 million to reflect the Department of Navy’s effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.<br><br>This program supports various Navy Land Based Test Sites (LBTS) required to support integration and interoperability testing. Sites include, but are not limited to: Naval Surface Warfare Center (NSWC) Dahlgren, Surface Combat System Center (SCSC) Wallops Island, and NSWC Dam Neck.<br><br>The United States Navy has a requirement to fully test and certify computer programs for maturity, Interoperability and Integration (I&I) prior to delivery to the Fleet. Commander, U.S. Fleet Forces Command (CFFC) provided specific direction to develop a unified modernization process and certify all combat system baselines for integration and interoperability as an integral step in the CNO Optimized Fleet Response Plan (O-FRP). Various Navy facilities, serving as LBTS, conduct the required testing in support of CVN, DDG, CG, LHD, LHA, LPD17 and LSD class ships. These sites also comprise the Navy’s Distributed Integration & Interoperability Assessment Capability (DIIAC) (supported through the use of JMETC network) alliance, which performs Interoperability Assessment and Systems Engineering Events (SEEs) for deploying Strike Groups.<br><br>These facilities also provide combat system in-service support to respond to emergent fleet problems. This capability tests and certifies new combat system baseline in a lab based environment, which has significantly reduced the cost of corrective action and shifted the burden of problem discovery away from the operator at sea. It also provides support to the acquisition community to conduct interoperability (shift to the left) testing earlier in the acquisition cycle.<br><br>As existing system experience parts obsolescence issues and tech refresh updates, the LBTS must procure and install existing test beds to accurately replicate the Command, Control, Communication, Computer, Combat System and Intelligence (C5I) configuration that are designed for the fleet. In addition, new combat systems architectures are under development for new ship classes such as LCS, CVN 78, DDG 1000, as well as new Open Architecture (OA) variants of legacy suites. Procurement of production representative systems of these OA combat systems being delivered to operational fleet units is critical to ensure that testing and subsequent certification of both current and newly installed combat systems is in accordance with NAVSEAINST 9410.2 Naval Warfare Systems Certification Policy (NWSCP) and the O-FRP Program. |             |         |                                        |              |             |               |                                                                           |                                     |         |         |             |            |

| <p>The basic procurement outlined herein is directed at expanding various facilities capability to support Interoperability Integration and Stressful Endurance testing. Procurement requirements are directly tied to the interoperability testing schedule and establish independence between test beds allowing for parallel certification efforts. Procurements are required to build the necessary test beds and for laboratory support equipment. This budget procures lab support equipment that various facilities are able to support the new tactical subsystems that use COTS equipment.</p> <p>In addition, the basic program provides for equipment/upgrades for the Navy's Distributed Integration &amp; Interoperability Assessment Capability (DIIAC) needed to conduct interoperability assessment testing. The DIIAC consists of 14 land based sites networked to certify computer programs prior to their delivery to the fleet and provides support to the acquisition community to conduct interoperability and integration (shift to the left) testing earlier in the acquisition cycle. Interoperability Assessment and Stressful Endurance testing is required for all deploying strike groups per the Joint Fleet Instruction.</p> <p>[P40A / M8400 - SESEF Electronic Equipment]: The Shipboard Electronic Systems Evaluation Facilities (SESEF) are Navy owned and operated test sites. The SESEF Program mission is to provide electromagnetic system tests and evaluations to afloat and shore commands for upgraded systems, to validate system performance following new construction and overhaul/availability, and to provide real-time assessment of material readiness in an operational environment. Also provided are: system modernization and integration, system and equipment component procurement and software (S/W) upgrades for test systems to include for Tactical Control and Navigation (TACAN), Antenna Radiation Pattern systems (ARP), Information Friend or Foe (IFF), Direction Finder (DF)/Radio Direction Finder (RDF), LINK 11/16, Electronic Warfare/ Electronic Attack (EW/EA) and HF/VHF/UHF communication systems including secure voice. SESEFs have been used effectively to conduct TACAN certifications, support AN/SLQ-32 Electronic Warfare (EW) Planned Maintenance System (PMS), Ship Signals Exploitation Equipment (SSEE) and to detect and isolate shipboard system deficiencies leading to maintenance action to increase ship material readiness at the completion of construction, delivery availabilities, during routine ship operations, and prior to deployment.</p> <p>[P40A / M8500 - Interoperability Assessment Equipment]: M8500 - INTEROPERABILITY ASSESSMENT EQUIPMENT KNOWN AS DISTRIBUTED INTEGRATION &amp; INTEROPERABILITY ASSESSMENT CAPABILITY (DIIAC) Procures upgrades to support the 14 sites that comprise the Navy's DIIAC sites. Procures hardware that provides the DIIAC Operations Center (DOC) the ability to support monitoring and execution of events providing data collection and distribution. Funds are also allocated for site upgrades to meet current standards and allow scalability for DIIAC requirements to enable the DIIAC to maintain efficiency and product improvement to interface with other Joint communities using Joint Mission Environment Test Community (JMETC) network. Focused on the force-level impact of new systems and platforms under development, the DIIAC supports testing that ensures NAVSEA/PEOs are delivering mature and interoperable warfare systems at the Platform and Strike Group levels, with NAVSEA providing Strike Force Interoperability Certification and Assessments. This is the only such testing of combat systems and C5I configuration items prior to shipboard delivery for operational use.</p> |                                        |                                                                           |

**Justification:**  
 Funding supports procurements and installations for the modernization of the eight operational sites across the AORs to support the surface fleet spectrum requirements. FY17 and follow on funding requirements are to maintain the upgrades conducted in FY16 and the addition of the 8th site in Guam.

**Footnotes:**

<sup>(1)</sup> The SESEF program funding increased in FY16 through the FYDP for site upgrades for procurement and installation of Ship's Signals Exploitation Equipment (SSEE) and Electronic Warfare (EW) Radar and EW Threat Simulation equipment. FY16 also funded the 8th SESEF site in Guam to meet PACFLT emergent threats. These efforts will continue over the next several years in order to continue modernization of the eight operational facilities.

| Flyaway Unit Cost ( <i>\$ in Dollars</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | -                  | -              | -              | -                                             | -                  | -                    | -                                                                          | -                                          | -              | -                          | -                  | -             |
| Gross/Weapon System Unit Cost ( <i>\$ in Dollars</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | -                  | -              | -              | -                                             | -                  | -                    | -                                                                          | -                                          | -              | -                          | -                  | -             |
| <p><b>Description:</b></p> <p>The FY 2019 funding request was reduced by \$.027 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.</p> <p>The EMI Control Instrumentation Program is supported by OPNAV N2N6, OPNAV N95, OPNAV N96, OPNAV N97 and OPNAV N98. The EMI Control Instrumentation Program provides Cradle to Grave Systems Engineering for Mission Assurance by implementing Electromagnetic Compatibility (EMC) hardware solutions, Spectrum Management (SM) software solutions, and by procuring specialized test equipment used in the characterization/quantification of EMI problems aboard US Navy platforms. This ensures equipment, systems, and platforms meet their Operational Mission Requirements and goals within their intended operational Electromagnetic (EM) environment.</p> <p>MA004 - EMI (HARDWARE) FIXES: Procurement and installation of Electromagnetic Interference (EMI) Hardware Solutions (i.e. Fixes) will achieve Electromagnetic Compatibility (EMC) among and between shipboard electronic/electric systems and/or equipment. This will be accomplished by determining the optimal EMI fix hardware, evaluating the effectiveness of the EMI solution, then procuring and installing the required hardware with full integrated logistic support (ILS) as part of the system hardware (ECP, OA, FC, etc). The fixes may include various types of radio frequency (RF) filters, limiters, blankers, radar absorbing material (RAM) and shielding methods. MA004 - EMI (Hardware) Fixes is supported by OPNAV N95, OPNAV N96, OPNAV N97 and OPNAV N98.</p> <p>MA104 - EMI (SOFTWARE) FIXES: Procurement and installation of EMI Software Fixes for platform/strike group/Area of Operation. These specific spectrum procedures (software application capabilities) and frequency management techniques (software modules) will be used to eliminate and reduce EMI when hardware solutions are unacceptable. Funds will also be used to provide engineering support to the enhancement of spectrum software applications through the procurement of models and other capabilities, including ILS for software tools/utilities/applications that correct/mitigate operational EMI. MA104 - EMI (Software) Fixes are supported by OPNAV N95, OPNAV N96, OPNAV N97 and OPNAV N98.</p> <p>MA204 - EMI CONTROL INSTRUMENTATION: EMI Control Instrumentation will procure specialized test equipment used in the characterization and quantification of EMI problems aboard US Navy platforms. In addition, instrumentation will be procured for use in identifying the sources of EMI and determining the extent of EMI so that effective corrective measures can be applied. The instrumentation procured will include automated and special EMI test equipment (e.g., for spectrum analysis, mapping field intensities, etc.). EMI Control Instrumentation can include both hardware and software products that will enhance or streamline data collection efforts, including the ability to provide remote access capability. MA204 - EMI CONTROL INSTRUMENTATION are supported by OPNAV N2N6.</p> |                    |                |                |                                               |                    |                      |                                                                            |                                            |                |                            |                    |               |

| <p><b>Justification:</b></p> <p>MA004 (EMI HDW Fixes), Increased from \$2.547 million in FY18 to \$3.267 million in FY19: OPN Funds are used to procure and install (P/I) EMI Fixes on deploying ships and submarines. The number of EMI Fixes procured (MA004 Hardware Fixes) are dependent on the number of ships/submarines in the fleet and when they deploy.</p> <p>Increases in the MA004 Budget (between FY2018 and FY2019), corresponds to the Navy Force Structure and Shipbuilding Plans: Background and Issues for Congress (December 22, 2017) Congressional Research Service (CRS) Report; the Navy's FY2018-FY2022 five-year shipbuilding plan, as assembled from data in the Navy's FY2018 budget-justification documentation reflect the shipbuilding plans by all ship and submarine types/classes, and shows on average 8 additional platforms per year. EMI Hardware fixes vary in cost; based on complexity, and ship/submarine class/types. The increase in cost for MA004 will cover the projected increase in EMI Fix P/I requirements for the new platforms.</p> <p>MA104 (EMI SFW Fixes), Decreased from \$1.091 million in FY18 to \$0.363 million in FY19: MA104 procures and installs SFW Fixes, i.e. the Afloat Electromagnetic Spectrum Operations Program (AESOP). AESOP is transitioning to a new program called Real-Time Spectrum Operations (RTSO). RTSO is currently in development, therefore the AESOP production aspects are being de-scoped (hence MA104 reductions, starting in FY19).</p> |                                       |             |       |                                               |                                          |                                                                            |                                            |                                          |                                          |                                          |

| Gross/Weapon System Unit Cost ( <i>\$ in Dollars</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | -           | -       | -                                      | -            | -           | -             | -                                                                   | -                                   | -       | -       | -           | -          |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |             |         |                                        |              |             |               |                                                                     |                                     |         |         |             |            |
| <p>[P40A / DC004 CALIBRATION STANDARDS]: These funds procure Calibration Standards equipment to execute a detailed, multi-year sustainment and modernization plan for intermediate, organizational and depot level maintenance activities. Calibration Standards equipment is employed to ensure the accuracy of test equipment used to install, align, and maintain all Navy weapons systems ashore and afloat. The Navy's inventory of Calibration Standards equipment is approaching obsolescence and requires modernization to avoid deterioration in accuracy and calibration of weapons systems. Many of the original Calibration Standards equipment is no longer in production, so replacement of the equipment must be purchased from newer model inventory, some of which have a greater unit cost. A defined, complex and multi-year modernization plan for Calibration Standards equipment is in place. The unit cost of the replacement Calibration Standards equipment to be procured, range from \$11K (general purpose power meter) to \$350K (vector network analyzer); whereas the unit cost of older standards procured in prior years ranged from \$18K to \$52K. This change in unit cost is attributable to the diversity and varying complexity of Calibration Standards equipment to be procured and their measurement requirements. Increased funding in FY19 is in response to aging, obsolete Calibration Standards equipment within Depot, Intermediate and Organizational maintenance support activities. NAVSEA has calibration equipment in excess of 25 years of typical "Life-Expectancy". Original Equipment Manufacturers (OEM) do not support a majority of the current legacy equipment in inventory. This in return has impacted calibration facilities to support certain fleet workload and often overflowing to other organic labs that have limited support or pushing to outside OEM/Industry support which has driven support costs up, in return impacting Ship/Sub availabilities. Currently there is a 30% obsolescence challenge that severely impacts weapon system readiness ultimately degrading warfighting capability and deploy-ability. Funding in FY19 and beyond has therefore been increased to stabilize the infrastructure in an effort to maintain a healthy support posture.</p> |             |         |                                        |              |             |               |                                                                     |                                     |         |         |             |            |
| <p>[P40A / DC019 RADAR RESTORATION AN/SPS-67 ANTENNA]: Funding in this line establishes an antenna manufacturing capability at Naval Surface Warfare Center (NSWC) Crane needed to provide additional rotatable pool antennas and associated engineering changes for the AN/SPS-67(V)3 to support the restoration of installed fleet antennas. The current number of available antennas is insufficient to support the fleet population. This has led to antennas operating in the field beyond their periodicity, resulting in decreased detection and tracking capability.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |             |         |                                        |              |             |               |                                                                     |                                     |         |         |             |            |
| <p>[P40A / DC020 DUAL BAND RADAR (DBR)]: Funding is required to establish the In-Service Engineering Agent (ISEA), Original Equipment Manufacturer (OEM) production services and support for Configuration Management. Funding also implements the DBR Life Cycle Sustainment Plan (LCSP) and infrastructure, Diminishing Manufacturing Sources and Material Shortages (DMSMS) Plan, associated hardware and software obsolescence mod kits, procurement of Engineering Change Proposals (ECPs), associated logistics products and on-board allowance requirements to enable system operation. Production Support is also required to assist with DBR Combat System Integration and Technical Documentation. Additional limitations will be identified during CVN78/DDG1000 Shipboard Activation, Integration and At-Sea Testing. Additionally, as a result of DBR land based testing at the Wallops Island Engineering Test Center (WIETC) limitations were identified in the Dual Band Radar (DBR) performance that directly impacted CVN 78 and DDG 1000 class readiness. These limitations require ECPs to correct the performance areas of the radar for Air Traffic Control and Integrated Combat Systems (e.g., False Clutter Tracks, Short Range Tracking, General Tracking, Slow Air Tracking, Waveform Scheduling, and code stability). The Prime Contractor and Government Technical Team have documented critical radar issues that require correction via ECPs in FY17-FY23. Funding for these ECP efforts increases starting in FY18 due to the engineering and technical complexity of the change proposals needed to satisfy combat system qualification</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |             |         |                                        |              |             |               |                                                                     |                                     |         |         |             |            |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                               |                                                                            |
| <p>requirements. DBR was reviewed by an Independent Review Team (IRT) chartered by the Under Secretary of Defense (Acquisition, Technology and Logistics) to assess specific CVN 78 systems. The IRT recommended that the Navy establish infrastructure and mechanisms to accelerate the acquisition of spares for DBR and develop a repair capability for DBR parts from the Fleet. DBR Special Test Equipment and Infrastructure funding from FY19 - FY23 provides for (1) test equipment and support for a repair depot for assemblies and subassemblies for DBR components, including Common Array Power System (CAPS), and Common Array Cooling System (CACS); (2) resolution of system obsolescence that will degrade system Ao; and, (3) establishment of product support engineering infrastructure. FY19 procures critical equipment needed to build DBR unique Receiver Exciter (REX) test equipment for acceptance testing of spare REX modules required to sustain DBR systems on CVN 78 and the DDG 1000 Class ships. The DBR program support infrastructure will be improved in FY19 through the development of resolution strategies for outstanding obsolescence issues. The additional DBR sustainment and infrastructure efforts will facilitate the transition of material sparing support of DBR to NAVSUP.</p> <p>[P40A / DC021 AN/SPS-67(V)5 MARITIME RADAR PROCESSOR (MRP)]: The Maritime Radar Processor (MRP) was developed to improve the detection of small boats/targets by USN ships. Funding in this line will be used to integrate and field small boat detection software improvements to AN/SPS-67(V)5 Surface Search Radar.</p> <p>[P40A / DC022 RADAR RESTORATION MATERIAL]: DC022 - Radar Restoration funding in this line procures components to support radar restoration (AN/SPS-48 Arrays and miscellaneous Antenna Sub-Assemblies) and Engineering Change Proposals (ECPs) to address obsolescence and improve supportability.</p> <p>[P3A / DC001 - SPS-73 RADAR]: The AN/SPS-73(V) Radar provides navigation and general surface search radar functionality on all U.S. Navy ships. The AN/SPS-73(V)12 is the Program of Record (POR) Automatic Radar Plotting Aid (ARPA) Navigation Radar for the U.S. Navy. Funding will be utilized for engineering changes which will improve surface combatant's ability to engage fast attack craft/fast in shore attack craft (FAC/FIAC) tracking and periscope detection and discrimination, as well as address cybersecurity shortfalls and Commercial-Off-The-Shelf (COTS) obsolescence of the legacy AN/SPS-73 systems. The AN/SPS-73 Next Generation Surface Search Radar (NGSSR) will update the current AN/SPS-73(V)12 and replace the AN/SPS-67(V) and all commercially provided Navigation Radars fielded in the fleet. NGSSR non-recurring engineering (NRE) is required in FY17-FY20 due to the program direction to mitigate FAC/FIAC and cybersecurity shortfalls, and to capitalize on periscope detection and discrimination capabilities. The FY19 funding increase will complete software development; procure and test NGSSR qualification units; and finalize NGSSR hardware configuration. This will also accelerate initial procurement of NGSSR production units as recommended by the CNO as a result of the October 2017 Commander Fleet Forces Comprehensive Review which was directly related to the McCain and Fitzgerald collisions.</p> <p>[P3A - 2 / DC009 - AN/SPS-48G RADAR OBSOLESCENCE AND AVAILABILITY RECOVERY (ROAR)]: The AN/SPS-48G 3-D Air Surveillance Radar is a follow-on to the existing AN/SPS-48E onboard Aircraft Carriers and large-deck Amphibious ships. AN/SPS-48G was initiated in response to Fleet complaints regarding AN/SPS-48E reliability and supportability. Upgrade of the AN/SPS-48E with the AN/SPS-48G remains a high Fleet priority as it will reduce Operation and Support (O&amp;S) costs and improve Operational Availability. Both factors are cited by the Fleet as unsatisfactory for the AN/SPS-48E. The goal is to replace the AN/SPS-48E as rapidly as possible so the Fleet can realize this cost avoidance. Current efforts include the manufacturing of the AN/SPS-48G upgrade kits with associated production support as well as modifications to the AN/SPS-48G brought about by initial Fleet introduction and Fleet operations. Production lead time is 24 months for the initial unit with subsequent units delivered at two month intervals after initial delivery. Equipment delivery for installation is required thirty days prior to FMP availability start in accordance with Navy Modernization Process Management. Engineering Change Order funding is required to address Fleet recommended modifications/requirements and Information Assurance, Obsolescence, and Diminishing Manufacturing Sources (DMS) issues. Engineering Change Proposal funding is required to initiate incorporation of High Diver Detection and Tracking functionality. This capability was designed and incorporated into the AN/SPS-48E after design of the AN/SPS-48G had been initiated. This change needs to be translated into the different hardware and software architectures of the AN/SPS-48G. FY18 is the last year of AN/SPS-48G procurements.</p> <p>[P3A - 3 / DC015 - TACTICAL ENVIRONMENTAL PROCESSOR (TEP)]: Provides real-time valunumeric wind profiles, convective weather detection/display, and radar refractivity assessments from AN/SPY-1 radar returns. TEP will be an adjunct processor and display, tapping radar data from weather and refractivity data, with users able to access information through Secret Internet Protocol Router (SIPR). Commercial Off The Shelf (COTS) refresh funding in FY18-FY23 is to address cyber security requirements.</p> <p>[P3A - 4 / DC018 - AN/SPY-1 RM&amp;A IMPROVEMENTS]: DC018 AN/SPY-1 RM&amp;A IMPROVEMENTS - These Reliability, Maintainability, and Availability (RM&amp;A) improvements are intended to reduce cascading failures, mitigate obsolescence issues, and improve reliability in support of Anti-Air Warfare (AAW) and Ballistic Missile Defense (BMD) missions while still providing AN/SPY-1 Radar Total Ownership Cost (TOC) reductions. The improvements include, but are not limited to, installation for Sidewall Capacitor Circuit Protection and 10kW Traveling Wave Tube (TWT) Monitoring Circuits Ordnance Alterations (ORDALTS) for AN/SPY-1; B (V), D, D (V), CG and DDGs. Solid State Switch Assemblies (SSSA) will replace legacy switch tube modulator deck via an ORDALT. Multi-Mission Signal Processor (MMSP) is the signal processor for the AN/SPY-1 radar. MMSP Refresh (MMSP-R) cabinets will be procured to provide production representative configurations for land-based testing and training to support AEGIS ships at AEGIS Training and</p> |                                               |                                                                            |

| <p>*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</p> |                                                                                  |                    |                                               |                       |                                              |                                                                            |                                              |                                              |                                              |                                              |

**Justification:**

The FY 2019 funding request was reduced by \$0.594 million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

(†) indicates the presence of a P-5a

**Footnotes:**

- (1) DC004 - Calibration Standards equipment unit costs and quantities varies due to the diversity and varying complexity of Calibration Standards equipment being procured from year to year; the requested funding addresses calibration and maintenance operational requirements across shipboard/shore-based activities and programs.
- (2) DBR Special Test Equipment and Infrastructure funding from FY19 - FY23 provides for (1) test equipment and support for a repair depot for assemblies and subassemblies for DBR components, including Common Array Power System (CAPS), and Common Array Cooling System (CACS); (2) resolution of system obsolescence issues that will prevent a degradation of system Ao; and, (3) establishment of product support engineering infrastructure. FY19 procures critical equipment needed to build DBR unique Receiver Exciter (REX) test equipment for acceptance testing of spare REX modules required to sustain DBR systems on CVN 78 and the DDG 1000 Class ships. The DBR program support infrastructure will be improved in FY19 through the development of resolution strategies for outstanding obsolescence issues. The additional DBR sustainment and infrastructure efforts will facilitate the transition of material sparing support of DBR to NAVSUP.
- (3) DC022 - Radar Restoration funding in this line procures components to support radar restoration (AN/SPS-48 Arrays and miscellaneous Antenna Sub-Assemblies) and Engineering Change Proposals (ECPs) to address obsolescence and improve supportability.

**Description:**

The AN/SPS-73(V) Radar provides navigation and general surface search radar functionality on all U.S. Navy ships. The AN/SPS-73(V)12 is the Program of Record (POR) Automatic Radar Plotting Aid (ARPA) Navigation Radar for the U.S. Navy. Funding will be utilized for engineering changes which will improve surface combatant's ability to engage fast attack craft/fast in shore attack craft (FAC/FIAC) tracking and periscope detection and discrimination, as well as address cybersecurity shortfalls and Commercial-Off-The-Shelf (COTS) obsolescence of the legacy AN/SPS-73 systems. The AN/SPS-73 Next Generation Surface Search Radar (NGSSR) will update the current AN/SPS-73(V)12 and replace the AN/SPS-67(V) and all commercially provided Navigation Radars fielded in the fleet. NGSSR non-recurring engineering (NRE) is required in FY17-FY20 due to the program direction to mitigate FAC/FIAC and cybersecurity shortfalls, and to capitalize on periscope detection and discrimination capabilities. The FY19 funding increase will complete software development; procure and test NGSSR qualification units; and finalize NGSSR hardware configuration. This will also accelerate initial procurement of NGSSR production units as recommended by the CNO as a result of the October 2017 Commander Fleet Forces Comprehensive Review which was directly related to the McCain and Fitzgerald collisions.

**Footnotes:**

- (4) Non-Recurring Engineering (NRE) funding is required to accelerate updating the aging and obsolete SPS-73 to the Next Generation Surface Search Radar (NGSSR) configuration which will address Cyber and Electro-magnetic Warfare threats that did not exist at the time of the original SPS-73 design. NRE funds will be utilized for government efforts to finalize NGSSR specifications, including design/cost trade-offs to assess different features that could affect cost/schedule such as dual system Installations, track fusion, tactical training, AEGIS and SSDS combat system interfaces, and cyber security. The FY19 funding increase will complete software development; procure and test NGSSR qualification units; and finalize NGSSR hardware configuration. Qualification testing includes navigation radar International Maritime Organization (IMO) and Safety Of Life At Sea (SOLAS) compliance, Periscope Detection and Discrimination (PDD) interface, Combat System Interface validation, Surface Search Radar validation, cyber security, shock, Electromagnetic interference (EMI) and environmental.
- (5) These funds will accelerate initial procurement of NGSSR production units as directed by the CNO as a result of the October 2017 Commander Fleet Forces Comprehensive Review; this priority requirement is directly related to the McCain and Fitzgerald collisions.
- (6) The increase in Production Support in FY19 and out provides support for the significantly increased production of hardware and hardware components and is composed primarily of Warfare Center Activity support, Software Support Activity (SSA), Integrated Logistics Agent (ILA), Acquisition Engineering Agent (AEA), Technical Design Agent (TDA) and Professional Support Services (PSS). Also includes support for cybersecurity compliance and software certification.
- (7) Miscellaneous ECP support is required to address hardware and software obsolescence/availability issues which requires research and investigation by the ISEA to locate, test, and provide suitable substitutes to maintain Fleet Navigation Readiness and Safety of Life at Sea (SOLAS). Miscellaneous ECP funding will continue to be required throughout the outyears until sufficient quantities of NGSSR are fielded, reducing the burden of the legacy systems.

The corresponding budget requests are documented elsewhere.)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |             |         |         |                                                                     |             |               |                 |         |                                                                                                                  |         |             |         |
| Initial Spares (\$ in Millions)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | -           | -       | -       | -                                                                   | -           | -             | -               | -       | -                                                                                                                | -       | -           | -       |
| Gross/Weapon System Unit Cost (\$ in Dollars)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | -           | -       | -       | -                                                                   | -           | -             | -               | -       | -                                                                                                                | -       | -           | -       |
| Description:<br>The AN/SPS-48G 3-D Air Surveillance Radar is a follow-on to the existing AN/SPS-48E onboard Aircraft Carriers and large-deck Amphibious ships. AN/SPS-48G was initiated in response to Fleet complaints regarding AN/SPS-48E reliability and supportability. Upgrade of the AN/SPS-48E with the AN/SPS-48G remains a high Fleet priority as it will reduce Operation and Support (O&S) costs and improve Operational Availability. Both factors are cited by the Fleet as unsatisfactory for the AN/SPS-48E. The goal is to replace the AN/SPS-48E as rapidly as possible so the Fleet can realize this cost avoidance. Current efforts include the manufacturing of the AN/SPS-48G upgrade kits with associated production support as well as modifications to the AN/SPS-48G brought about by initial Fleet introduction and Fleet operations. Production lead time is 24 months for the initial unit with subsequent units delivered at two month intervals after initial delivery. Equipment delivery for installation is required thirty days prior to FMP availability start in accordance with Navy Modernization Process Management. Engineering Change Order funding is required to address Fleet recommended modifications/requirements and Information Assurance, Obsolescence, and Diminishing Manufacturing Sources (DMS) issues. Engineering Change Proposal funding is required to initiate incorporation of High Diver Detection and Tracking functionality. This capability was designed and incorporated into the AN/SPS-48E after design of the AN/SPS-48G had been initiated. This change needs to be translated into the different hardware and software architectures of the AN/SPS-48G. FY18 is the last year of AN/SPS-48G procurements.<br><br>Installation funding for advanced planning (AP) and planning yard design services allocation (DSA) is required up to one year prior to the year of installation. DSA funds are used for Ship Installation Drawings (SIDs), Alteration Installation Team (AIT) contracting fees, and shipchecks. The FY17 \$4M reduction to installation has resulted in movement of LHA-6 to outside the FYDP, LPD-23 to FY22 and LPD-22 to FY21. |             |         |         |                                                                     |             |               |                 |         |                                                                                                                  |         |             |         |

## Footnotes:

<sup>(8)</sup> Installation funding for advanced planning (AP) and planning yard Design Services Allocation (DSA) is required up to one year prior to the year of installation. DSA funds are used for Ship Installation Drawings (SIDs), Alteration Installation Team (AIT) contracting fees, and shipchecks. Although on the P-3a it may appear that the unit installation cost has increased significantly in FY17, and from FY18 to FY19, this is misleading due to the combination of installation, AP, and DSA costs into one single figure. Additionally, installations costs vary by ship class. Specifically, in FY17, there is one installation at a cost of \$1.412M, plus \$0.511M in DSA costs and \$1.33M in AP costs. In FY18, there are four installations with a combined cost of \$5.4M (\$1.350M average), plus \$0.6M in AP costs and \$1.9M in DSA costs. In FY19, there is one installation with a cost of \$1.45M, plus \$1.95M in AP costs and \$0.82M in DSA costs.

<sup>(9)</sup> Engineering Change Proposal funding is primarily to incorporate High Diver Detection and Tracking functionality. This capability was designed and incorporated into the AN/SPS-48E after design of the AN/SPS-48G had been initiated. This change now needs to be translated into the different hardware and software architectures of the AN/SPS-48G.

<sup>(10)</sup> Production Support provides for Government oversight of production, Government and Original Equipment Manufacturer (OEM) support of production related software and hardware problems, and engineering as well as Integrated Logistics Support (ILS) efforts in support of production and fielding.

| <b>Description:</b><br>Provides real-time valunumeric wind profiles, convective weather detection/display, and radar refractivity assessments from AN/SPY-1 radar returns. TEP will be an adjunct processor and display, tapping radar data from weather and refractivity data, with users able to access information through Secret Internet Protocol Router (SIPR). Commercial Off The Shelf (COTS) refresh funding in FY18-FY23 is to address cyber security requirements. |                    |                |                |                                                                            |                    |                      |                        |                |                |                                                                                              |                    |               |

**Footnotes:**

(11) The change in TEP unit costs and quantity since PB18 for FY18-19 is due to lower costs based on actual contract pricing. Due to the lower actual contract pricing, the program plans to procure three units at a unit cost of \$241.7K.

(12) COTS Refresh funding includes replacement of Commercial Off-The-Shelf (COTS) components such as processors, displays, computer operating systems, commercially available software and also addresses emerging cyber security requirements.

(13) Production support includes engineering services, Integrated Logistics Support (ILS) documentation updates, ORDALT instructions, engineering change proposals, and Diminishing Manufacturing Sources and Material Shortages (DMSMS) analysis.

| <p><b>Description:</b></p> <p>DC018 AN/SPY-1 RM&amp;A IMPROVEMENTS - These Reliability, Maintainability, and Availability (RM&amp;A) improvements are intended to reduce cascading failures, mitigate obsolescence issues, and improve reliability in support of Anti-Air Warfare (AAW) and Ballistic Missile Defense (BMD) missions while still providing AN/SPY-1 Radar Total Ownership Cost (TOC) reductions. The improvements include, but are not limited to, installation for Sidewall Capacitor Circuit Protection and 10kW Traveling Wave Tube (TWT) Monitoring Circuits Ordnance Alterations (ORDALTS) for AN/SPY-1; B (V), D, D (V), CG and DDGs. Solid State Switch Assemblies (SSSA) will replace legacy switch tube modulator deck via an ORDALT. Multi-Mission Signal Processor (MMSP) is the signal processor for the AN/SPY-1 radar. MMSP Refresh (MMSP-R) cabinets will be procured to provide production representative configurations for land-based testing and training to support AEGIS ships at AEGIS Training and Readiness Center (ATRC) and Surface Combat System Center (SCSC) Wallops Island. Increased funding in FY18 includes the procurement of two MMSP-R cabinets for Virginia sites, procurement of assets and shock qualification testing of SSSA and SPY-1D(V) Final Power Amplifier (FPA) cabinet required by MILSPEC 901-D.</p> <p>Since PB18, procurement and installation of SSSA for DDG ships, shore sites and spares have been adjusted to align with changes to DDG Modernization availability periods in FY19-22.</p> |                    |                |                |                     |                                                                            |                      |                        |                |                |                                                                               |                    |                |

| <b>Method of Implementation (Organic):</b> SOLID STATE SWITCH ASSEMBLY FINAL POWER AMPLIFIER ENV/QUAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                            | <b>Installation Quantity:</b> 1                                               |
| <p><b>Footnotes:</b></p> <p>(14) Sidewall and 10KW ORDALT kit costs vary depending on ship and radar configurations and the mix of 10KW TWT monitoring circuit and Sidewall Capacitor kits.</p> <p>(15) The change in unit costs for CG Sidewall Capacitors (SWCs) and Traveling Wave Tubes (TWTs) since PB18 in FY18 is due to realized lower costs based on actual SSSA contract pricing, which allowed accelerated procurement of six CG SWCs/TWTs from FY18 to FY17.</p> <p>(16) The change in the SPY-1 Solid State Switch Assembly (SSSA) unit cost and quantity since PB18 for FY17-19 is due to realized lower costs based on actual contract pricing. The program plans to procure 3 SSSA shore sites in FY19 at a unit cost of \$4.2M based on the actual awarded contract pricing.</p> <p>(17) SSSA Spares include initial spares and INCOs which are required for installations.</p> <p>(18) Funding is required to conduct Environmental/Qualification testing of the SPY-1 transmitter Final Power Amplifier (FPA), with installed components, as required by MILSPEC 901-D. Effort includes procurement or use of equipment (i.e., Final Power Amplifier (FPA) cabinet, High Voltage Power Supply (HVPS), cabling and ancillary equipment), test plans, engineering and test facility to support shock qualification test. Budget basis includes cost estimates of hardware and test equipment required to conduct the test. The cost for the FPA Environmental Qualification was reduced from PB18 due to the use of some existing equipment, instead of procurement of new hardware that was included in the original estimate. Due to cost avoidance from FPA Qualification, this enabled the procurement of two additional DDG SSSAs in FY18 to align with DDG Modernization schedules/availability periods.</p> <p>(19) Funding is required to procure MMSP-R equipment for two Virginia shore sites. MMSP-R contains distinct equipment sets and is not comparable to costs of other items of hardware or components.</p> <p>(20) Production support includes installation engineering services, Integrated Logistics Support (ILS) documentation updates, ORDALT instructions, engineering change proposals and Diminishing Manufacturing Sources and Material Shortages (DMSMS) analysis.</p> |                                                                            |                                                                               |

**Description:**

Funding provides for the procurement and installation of Integrated Waveform (IW) and Mobile User Objective System (MUOS) capable Digital Modular Radio (DMR) systems and IW and MUOS capable upgrade kits. DMR with IW and MUOS capable hardware is a four-channel software defined radio that provides satellite communications, Line of Sight (LOS) and High Frequency (HF), Very High Frequency (VHF) and Ultra High Frequency (UHF) communication capability to surface, submarine, and shore facilities. This variant of the DMR, including upgrade kits, provides hardware that is IW/MUOS compatible, and will allow for IW and MUOS software update when the development and integration is complete.

| <p><b>Justification:</b><br/>         The FY 2019 funding request was reduced by \$4.1 million to account for the availability of prior year execution balances.</p> <p>The Integrated Waveform (IW) and Mobile User Objective System (MUOS) capability is available for integration into the Digital Modular Radio (DMR) hardware in FY19 now that the software development is complete. FY19 funding provides for the procurement of 24 IW/MUOS capable DMR systems and 34 IW/MUOS capable upgrade kits. This procurement quantity increase is to provide delivery of the IW/MUOS capability to the fleet at the earliest opportunity.</p> |                                                    |                    |                                               |                       |                                              |                                                                         |                                              |                                              |                                              |                                              |

| Gross/Weapon System Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | -                  | -              | -              | -                   | -                                                                       | -                    | -                      | -              | -              | -                                                                                   | -                  | -                 |
| <p><b>Description:</b></p> <p>Integrated Waveform (IW) and Mobile User Objective System (MUOS) capable Digital Modular Radio (DMR) Systems. Quantities between radios and kits may change from year to year as a result of ship availabilities and fleet priority.</p> <p>[DMR IW and MUOS System Procurement - Afloat] FY 19 is procuring twenty-four (24 QTY) Afloat units of DMR IW &amp; MUOS capable Systems. The ramp up of procurement quantities is to provide delivery of the IW/MUOS capability to the fleet at the earliest opportunity. Annual Unit Cost variances for procurements and installations are driven by system configurations. There are 3 different afloat configurations of DMR IW &amp; MUOS System (2 surface &amp; 1 subsurface) and 5 different afloat configurations of DMR IW &amp; MUOS Upgrade Kit (3 surface &amp; 2 subsurface). Additionally, shore sites do not have a standard configuration and are unique to each individual shore site. For shore, the budget reflects individual radios vice afloat configurations.</p> <p>For the DMR IW &amp; MUOS System, the configuration ranges from 1 - 3 DMR radios and requires a unique set of ancillary equipment dependent upon ship class (racks, power amplifiers &amp; antenna upgrades). For example, a CVN requires 3 DMR radios and would need 4 racks to complete installation. When comparing to a small ship such as LCS, which needs only 1 DMR radio and 2 racks to complete installation. One (1) DMR system will range in cost depending on the configuration and Economic Order Quantity Pricing relevant at time of contract award.</p> <p>All ancillary equipment is procured via separate contracts that will be subject to re-compete over the next two years. Components are provided to SPAWAR Systems Center (SSC) Pacific for integration, assembly and test which comprises the 24 month lead time.</p> <p>In FY19 DMR program plans to procure 24 DMR IW &amp; MUOS capable Systems (8 subsurface and 16 surface). Q1FY20 installations are budgeted in FY20 vice FY19.</p> <p>Twenty four (24) month Production Lead Time (PLT) for DMR System delivery due to varying PLT's from multiple sub-component vendors that are then integrated into the final product. Seven (7) month Administrative Lead Time (ALT) for DMR System procurements allows for the identification and receipt of other customer funds in order to take advantage of favorable quantity pricing.</p> |                    |                |                |                     |                                                                         |                      |                        |                |                |                                                                                     |                    |                   |

**Footnotes:**

(1) Unit Cost variances for procurements are driven by afloat system configurations and ancillary equipment (racks, power amplifiers & antenna upgrades), which is dependent upon ship class. There are 3 different afloat configurations of DMR IW & MUOS System (2 surface & 1 subsurface) where each configurations ranges from 1 - 3 DMR radios and a unique set of ancillary equipment.

(2) DSA cost variance is due to the different DSA requirements for multiple shore, surface, and subsurface configurations.

| Initial Spares ( <i>\$ in Millions</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | -                  | -              | -              | -                                                                       | -                  | -                    | -                      | -              | -              | -                                                                                | -                  | -                 |
| Gross/Weapon System Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | -                  | -              | -              | -                                                                       | -                  | -                    | -                      | -              | -              | -                                                                                | -                  | -                 |
| <p><b>Description:</b></p> <p>Integrated Waveform (IW) and Mobile User Objective System (MUOS) capable Digital Modular Radio (DMR) Upgrade Kits. Quantities between radios and kits may change from year to year as a result of ship availabilities and fleet priority.</p> <p>[DMR IW and MUOS Upgrade Kits Procurement] FY19 is procuring thirty-four (34 QTY) Afloat units of DMR IW &amp; MUOS capable Upgrade Kits. These procurements will provide delivery of the IW/MUOS capability to the fleet at the earliest opportunity. Annual Unit Cost variances for procurements and installations are driven by system configurations. There are 3 different afloat configurations of DMR IW &amp; MUOS System (2 surface &amp; 1 subsurface) and 5 different afloat configurations of DMR IW &amp; MUOS Upgrade Kit (3 surface &amp; 2 subsurface). Additionally, shore sites do not have a standard configuration and are unique to each individual shore site. For shore, the budget reflects individual radios vice afloat configurations.</p> <p>For the DMR IW &amp; MUOS Upgrade Kit, the configuration ranges from 1 - 3 DMR upgrade kits and requires a unique set of ancillary equipment dependent upon ship class (racks, power amplifiers &amp; antenna upgrades). One (1) DMR upgrade kit will range in cost depending on the configuration and Economic Order Quantity Pricing relevant at time of contract award.</p> <p>All ancillary equipment is procured via separate contracts that will be subject to re-compete over the next two years. Components are provided to SPAWAR Systems Center (SSC) Pacific for integration, assembly and test which comprises the 24 month lead time.</p> <p>In FY19 DMR program plans to procure 34 DMR IW &amp; MUOS capable Upgrade Kits (18 subsurface and 16 surface).</p> <p>Twenty four (24) month Production Lead Time (PLT) for DMR Upgrade Kit delivery due to varying PLT's from multiple sub-component vendors that are then integrated into the final product. Seven (7) month Administrative Lead Time (ALT) for DMR Upgrade Kit procurements allows for the identification and receipt of other customer funds in order to take advantage of favorable quantity pricing.</p> |                    |                |                |                                                                         |                    |                      |                        |                |                |                                                                                  |                    |                   |

| <sup>(3)</sup> Unit Cost variances for procurements are driven by afloat upgrade kit configurations and ancillary equipment (racks, power amplifiers & antenna upgrades), which is dependent upon ship class. There are 5 different afloat configurations of DMR IW & MUOS Upgrade Kit (3 surface & 2 subsurface) where configurations range from 1 - 3 DMR upgrade kits and a unique set of ancillary equipment. Individual unit cost is not decreasing but the combination of configurations purchased per year gives the appearance of an average unit cost decrease. |            |                                |                                |           |                                                                         |                |                                |                |                                |                                            |                                |           |                                |                |                                                                                  |           |                                |                |                                |                |                                |                |                                |           |           |                |           |           |           |           |            |       |

| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | -           | -       | -                                      | -            | -           | -                                                                      | -       | -                                        | -       | -       | -           | -          |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |             |         |                                        |              |             |                                                                        |         |                                          |         |         |             |            |
| Ship Communication Automation (52PQ): With the evolution of afloat networks programs migrating into the Consolidated Afloat Networks and Enterprise Services (CANES) program , the Ship Communications Automation budget line will continue to support Automated Digital Network System (ADNS), Legacy Network Operation Rolling Tide (ORT), Command and Control Official Information eXchange (C2OIX) (formerly Tactical Messaging), and Shore Tactical Assured Command and Control (STACC) (formerly Tactical Switching) programs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |         |                                        |              |             |                                                                        |         |                                          |         |         |             |            |
| Automated Digital Network System (ADNS): ADNS provides routing, switching, baseband, configuration and monitoring capabilities for interconnecting naval and coalition enclaves worldwide. ADNS utilizes Commercial Off the-Shelf/ Government Off-the-Shelf (COTS/GOTS) equipment and network protocols as specified by the joint technical architecture. ADNS Increment (INC) I provides ship to shore Internet Protocol (IP) connectivity, separation of enclaves, reuse of unused enclave bandwidth, and ship to tactical shore IP connectivity. ADNS INC II provides capabilities of network to Satellite Communications, Load Balancing, Radio Frequency (RF) restoral, and Quality of Service (QoS) to include application prioritization, Traffic Management, compression and enhancements designed to maximize use of "effective" available bandwidth for surface, shore, and airborne platforms. ADNS INC III combines all Navy Tactical Voice, secure Communications Interoperability Protocol Inter-Working Function, Video, data requirements into a converged IP data stream, and Assured Command and Control (C2) capabilities. This includes Secure Communication Interoperability- Protocol Interworking Function (SCIP-IWF) for secure telephony over IP. In addition, the INC III architecture will incorporate an IPv4/IPv6 dual stack and a Cipher-Text security architecture to align to the Global Information Grid (GIG) in order to mesh Navy tactical surface, subsurface, airborne platforms, and Aegis Ashore sites into a single IP environment with gateway functions to joint and coalition networks. Technical Insertions are minor upgrades to existing system hardware and software baseline that are required to maximize C4ISR capability and interface functionality between ADNS and applicable programs. |             |         |                                        |              |             |                                                                        |         |                                          |         |         |             |            |
| Legacy Network Cyber Resiliency/Operation Rolling Tide (ORT): ORT is a Navy-wide cyber remediation effort to secure government databases and improve the overall security protocols for Navy computer networks. Specifically, Legacy Network Cyber Resiliency/ORT will fund planned legacy network upgrades and mitigate security vulnerabilities on the highest End of Life (EOL) platforms that are not targeted to be replaced by a CANES system. These upgrades will mitigate known targeted cyber vulnerabilities and include eradication of old Windows Operating Systems, critical EOL firewalls and routers and improved anti-malware solutions. Legacy Network Cyber Resiliency/ORT will improve the networks ability to detect known and unknown vulnerabilities and attacks by upgrading sensor and monitoring technologies and accelerating post-attack containment and recovery.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |             |         |                                        |              |             |                                                                        |         |                                          |         |         |             |            |
| Command and Control Official Information eXchange (C2OIX): C2OIX consolidates the Tactical Messaging and Defense Messaging System (DMS) programs and manages the Official Information Exchange (OIX) of organizational record message traffic, providing sustainment support and modernization for all afloat and ashore platforms. The modernization effort within C2OIX for afloat platforms replaces older Naval Modular Automated Communication System (NAVMACS) that lacked adherence to current cyber security requirements. It also automates and increases the speed and efficiency of handling organizational message traffic aboard ships and submarines, as well as replaces ten NAVMACS surface shipboard variants distributed across United States Navy (USN), Military Sealift Command (MSC) and United States                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |             |         |                                        |              |             |                                                                        |         |                                          |         |         |             |            |

| <p>Coast Guard (USCG) ships with a single shipboard variant. The ashore component of C2OIX Project is the IP-based C2OIX Shore Gateway system. C2OIX will virtualize all Government Official Information Exchange System (GOES) software suites on shore gateway UNCLASSIFIED, SECRET and TOP SECRET message enclaves and provide an integrated Cross Domain Solution (CDS) at the two Naval Computer Telecommunication Area Master Stations (NCTAMS PACIFIC and NCTAMS ATLANTIC). C2OIX shore and afloat will satisfy Navy record messaging requirements and implement products that are developed with an open system architecture.</p> <p>Shore Tactical Assured Command and Control (STACC) is the Navy's Program of Record to consolidate and modernize the ashore wide area network services infrastructure supporting afloat forces and shore commands assigned with tactical, operational, and strategic missions. STACC directly supports afloat legacy networks (e.g., ISNS), Consolidated Afloat Networks and Enterprise Services (CANES) and Automated Digital Network System (ADNS) and all associated systems installed on those networks by providing direct interfaces to the Defense Information Systems Network (DISN), thus enabling interoperability within Navy tactical forces and with combatant commands, joint forces, coalition/mission partners, and other Services/Agencies. STACC fields capability at five regions, covering over 40 facilities in both CONUS and OCONUS locations. STACC supports over 410 surface and subsurface platforms. The STACC portfolio includes wide area terrestrial transport services, core network services, network monitoring and management, and is comprised of hardware, software, computing/processing, network, and storage technologies. These services span several security classification levels to include unclassified, secret, Combined Enterprise Regional Information Exchange System - Maritime (CENTRIXS-M), Sensitive Compartmented Information (SCI), and Virtual Secure Enclave (VSE). VSE is a new security enclave designed to support highly contested cyber operations providing proactive network defense.</p> <p>The network management service provides users with access to near real time situational awareness of the health and status of the network. STACC enables operators the ability to understand what is and is not normal on the network and provides a pre-emptive cyberspace capability to fight and win in a cyber-denied information environment. The STACC's network monitoring and management system is also a critical and foundational data set provider to the Navy's Cyber Situational Awareness (NCSA) program/system which performs further processing, correlation, and impact assessment. The STACC network core service offerings provide afloat platforms reach back services such as email, chat, Domain Name System (DNS), patching and C2 application hosting services for programs that need to be in a tactical environment. The hosting services include Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) offerings.</p> <p>STACC's systems are located in 5 regions: 1)Eastern Pacific supporting Commander Pacific Fleet and Commander Third Fleet (Naval Computer &amp; Telecommunications Area Master Station Pacific (NCTAMS PAC) and Naval Computer &amp; Telecommunications Station San Diego (NCTS San Diego); 2) Western Pacific supporting Commander Seventh Fleet; 3) Indian Ocean supporting Commander Fifth (NCTS BAHRAIN); 4) European supporting Commander Sixth Fleet (NCTS NAPLES); and 5) Atlantic supporting US Fleet Forces Command, Commander Tenth Fleet and Commander Fourth Fleet (NCTAMS LANT); to include Joint and Coalition Partners within each region. STACC systems will also be procured in support of NCTAMS LANT's new integrated Communications Center.</p> |                                        |                                                                        |

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

The FY 2019 funding request was reduced by (\$1.644) million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.

In FY19, ADNS begins integration of Assured Command and Control capabilities to meet fleet requirements as well as fielding at Aegis Ashore sites. In FY19, ADNS funds are for the procurement of (33) INC III Afloat units, (49) INC III Afloat Technical Insertion units, (4) Ashore INC I/INC II units, and (6) Ashore INC III units (to include one Aegis Ashore system), with integration, and associated costs for pre-installation design. In addition, the FY19 ADNS investment will fund installation of (28) INC III Afloat units, (49) INC III Afloat Technical Insertion units, (4) Ashore INC I/INC II units, and (6) Ashore INC III units. The increase in ADNS technical insertion units is driven by the need to field additional ADNS capabilities required by other programs.

FY19 C2OIX will procure(63), install & integrate(37) C2OIX Afloat (NAVMACS) units. Associated costs for pre-installation design to replace old legacy equipment onboard ships and submarines. FY19 and FY20 increase is to modernize NAVMACS components on 72 legacy systems to eliminate a legacy cross domain solution mandated by the DoD Information Security risk management Committee (ISRMC). FY19-FY23 Fluctuation in installation costs is due to cost decrease when C2OIX installations are combined with CANES installations.

**Description:**

Command and Control Official Information eXchange (C2OIX) (formerly Tactical Messaging): C2OIX consolidates the Tactical Messaging and Defense Messaging System (DMS) programs and manages the Official Information Exchange (OIX) of organizational record message traffic, providing sustainment support and modernization for all afloat and ashore platforms. The modernization effort within C2OIX for afloat platforms replaces older Naval Modular Automated Communication System (NAVMACS) that lacked adherence to current cyber security requirements. It also automates and increases the speed and efficiency of handling organizational message traffic aboard ships and submarines, as well as replaces ten NAVMACS surface shipboard variants distributed across United States Navy (USN), Military Sealift Command (MSC) and United States Coast Guard (USCG) ships with a single shipboard variant. The ashore component of C2OIX Project is the IP-based C2OIX Shore Gateway system. C2OIX will virtualize all Government Official Information Exchange System (GOES) software suites on shore gateway UNCLASSIFIED, SECRET and TOP SECRET message enclaves and provide an integrated Cross Domain Solution (CDS) at the two Naval Computer Telecommunication Area Master Stations (NCTAMS PACIFIC and NCTAMS ATLANTIC). C2OIX shore and afloat will satisfy Navy record messaging requirements and implement products that are developed with an open system architecture.

**Footnotes:**

<sup>(4)</sup> ADNS INC III Afloat procurement cost range: \$.5M - \$1.5M; installation cost range: \$.3M - \$1.0M. Average unit cost fluctuations for procurement and installation are due to varying system configurations required for surface and submarine platforms. INC III units require 3 months integration, assembly, testing and shipping after delivery, prior to installation start. Installs do not begin until 10 months after procurement contract award (7 months production lead time + 3 months integration).

| <p><sup>(5)</sup> FY19: Technical Insertions (TI) will be fielded to include hardware and software baseline updates to Afloat units required to maximize C4ISR capability and interface functionality between ADNS and applicable Satellite Communications (SATCOM) systems such as Navy Multi-Band Terminal(NMT), Global Broadcast System(GBS) and Battle Force Tactical Network (BFTN). Tech Insertion unit cost includes production engineering/integration requirements associated with the initial fielding of tech insertion capability. TI(s) require (1) month administrative lead time and (2) months production lead time.</p> <p><sup>(6)</sup> -DSA in FY18 is disproportionately lower compared to the other years due to having a greater proportion of submarines and backfits being installed that year. DSA costs per unit fluctuates based on the type of platform (submarine vs CVN) and the type of system (Backfit vs new install) and can vary between \$15K - \$200K.</p> <p><sup>(7)</sup> ADNS: Full Production Contract has 4 possible vendors on MAC award: SERCO, Inc, SAIC, DRS Laurel Technologies, and Leidos. Contract will be used for Increment III production units.</p> |                                                                               |                                                                                                   |

| Gross/Weapon System Unit Cost ( <i>\$ in Thousands</i> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | -                  | -              | -              | -                                                                             | -                  | -                    | -                      | -              | -              | -                                                                                                                                    | -                  | -                 |
| <p><b>Description:</b></p> <p>Shore Tactical Assured Command and Control (STACC) is the Navy's Program of Record to consolidate and modernize the ashore network infrastructure supporting afloat forces and shore commands assigned with tactical, operational, and strategic missions. STACC directly supports afloat legacy networks (e.g., ISNS), CANES and ADNS and all associated systems installed on those networks by providing direct interfaces to the Defense Information Systems Network (DISN), thus enabling interoperability within Navy tactical forces and with combatant commands, joint forces, coalition/mission partners, and other Services/Agencies. STACC fields capability at five regions, covering over 40 facilities in both CONUS and OCONUS locations, to include Naval Computer and Telecommunications Area Master Stations (NCTAMS), Naval Computer and Telecommunications Stations (NCTS), Maritime Operations Centers (MOCs), Fleet Network Operations Centers, Satellite Gateways, and Broadcast Control Authorities (BCAs). STACC supports over 410 surface and subsurface platforms. The STACC portfolio includes transport services, core network services, and network monitoring and management and is comprised of hardware, software, computing/processing, network, and storage technologies. These services span several security classification levels to include unclassified, secret, Combined Enterprise Regional Information Exchange System - Maritime (CENTRIXS-M), Sensitive Compartmented Information (SCI), and Virtual Secure Enclave (VSE). VSE is a new security enclave designed to support highly contested cyber operations providing proactive network defense.</p> <p>The network management service provides users with access to near real time situational awareness of the health and status of the network. STACC enables operators the ability to understand what is and is not normal on the network and provides a pre-emptive cyberspace capability to fight and win in a cyber-denied information environment. The STACC's network monitoring and management system is also a critical and foundational data set provider to the Navy's Cyber Situational Awareness (NCSA) program/system which performs further processing, correlation, and impact assessment. The STACC network core service offerings provide afloat platforms reach back services such as email, chat, Domain Name System (DNS), patching and C2 application hosting services for programs that need to be in a tactical environment. The hosting services include Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) offerings.</p> <p>[MILCON P913:Shore Based Enterprise Network Enhancements] Shore Tactical Assured Command and Control (STACC) new suite of systems for the outfitting of the MILCON P-913 NCTAMS LANT new communication facility. The new NCTAMS LANT building will provide a secure, efficient, sustainable and adaptable communications facility to support all telecommunications requirements within the Atlantic Area of Operations.</p> |                    |                |                |                                                                               |                    |                      |                        |                |                |                                                                                                                                      |                    |                   |

| <p><b>Footnotes:</b></p> <p><sup>(8)</sup> FY19 STACC decrease from FY18 to FY19 is due to the completion of the procurement and installation of Sensitive Compartmental Information (SCI) Tech Refresh the Pacific Region Network Operational Center (PRNOC) and Unified Atlantic Region Network Center (UARNOC) and the completion of Build 1.0 Tech Refresh and installation for the Indian Ocean Region Network Operations Center (IORNOC) and European Central Region Network Operations Center (ECRNOC) Secret and Unclassified networks.//FY19 funding will engineer, integrate, procure, and install hardware and software to: transition legacy serial transport to an IP environment; expand IP services (Unclassified, SECRET, CENTRIXS-M NOC, SCI NOC and VSE ASP) to include application hosting services and expand storage capability; and enhance Network Operations monitoring and management, ORT cyber remediation solutions to detect, deter and mitigate network threats and for Assured Command and Control to support terrestrial communications and routing changes. STACC's Unit and installation cost vary each year depending on what modernization must be done to maintain the cyber resiliency of the network and what site(s) within each region is included in the modernization effort. Factors that relate to the cost include whether or not the modernization addresses increased bandwidth, risk vulnerabilities, and/or increased survivability and reliability.// Increment II quantities represent 5 major shore regions: 1)Eastern Pacific supporting Commander Pacific Fleet and Commander Third Fleet (Naval Computer &amp; Telecommunications Area Master Station Pacific (NCTAMS PAC) and Naval Computer &amp; Telecommunications Station San Diego (NCTS San Diego); 2) Western Pacific supporting Commander Seventh Fleet; 3) Indian Ocean supporting Commander Fifth (NCTS BAHRAIN); 4) European supporting Commander Sixth Fleet (NCTS NAPLES); and 5) Atlantic supporting US Fleet Forces Command, Commander Tenth Fleet and Commander Fourth Fleet (NCTAMS LANT); and Joint and Coalition Partners within each region.</p> <p><sup>(9)</sup> The various STACC systems, which make up the network, will be procured and installed in two phases to align with the P-913 MILCON transition plan.</p> <p><sup>(10)</sup> Manufacturer for MILCON P-913 STACC equipment. Integration efforts required prior to installation FY20 Q3 installation.</p> |            |                                                                                                                                      |           |           |           |                |           |           |           |                |           |           |           |                |           |           |           |                |           |           |           |                |           |           |           |                |           |           |           |           |            |  |                                  |  |  |  |

**Description:**

Legacy Network Cyber Resiliency/Operation Rolling Tide (ORT): ORT is a Navy-wide cyber remediation effort to secure government databases and improve the overall security protocols for Navy computer networks. Specifically, Legacy Network Cyber Resiliency/ORT will fund planned legacy network upgrades and mitigate security vulnerabilities on the highest End of Life platforms that are not targeted to be replaced by a Consolidated Afloat Networks & Enterprise Services (CANES) system. These upgrades will mitigate known targeted cyber vulnerabilities and include eradication of old Windows Operating Systems, critical End of Life (EOL) firewalls and routers and improved anti-malware solutions. Legacy Network Cyber Resiliency/ORT will improve the networks ability to detect known and unknown vulnerabilities and attacks by upgrading sensor and monitoring technologies and accelerate post-attack containment and recovery.

**Footnotes:**

(11) Average unit cost fluctuations are attributable to variances in system configuration requirements among platforms. The average procurement unit cost for larger deck unit level platforms range: \$.1M-\$5.7M. Smaller deck unit level platforms range: \$.1M-\$6M. Installation cost fluctuations are attributed to and dependent on class, level of the platform, variant of predecessor system the hull currently has installed, geographic location of the installation, and length of the availability. Installation cost range: \$.1M - \$2.8M.

| Initial Spares (\$ in Millions)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | -           | 0.024   | -                                      | -            | -           | -             | -                                                                       | -                                        | -       | -       | -           | 0.024      |
| Flyaway Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | -           | -       | -                                      | -            | -           | -             | -                                                                       | -                                        | -       | -       | -           | -          |
| Gross/Weapon System Unit Cost (\$ in Thousands)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | -           | -       | -                                      | -            | -           | -             | -                                                                       | -                                        | -       | -       | -           | -          |
| Description:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |             |         |                                        |              |             |               |                                                                         |                                          |         |         |             |            |
| <p>[P5 / NU019 EPLRS-DR/EMUT]: Enhanced Position Location Reporting System - Data Radio (EPLRS-DR)/Enhanced Man-Pack UHF Tactical (EMUT) is a Blue in Support of Green (BISOG) program that provides secure Anti-Jam (AJ), Ultra High Frequency (UHF) (420-450 MHz) and Line of Sight (LOS) data communications in support of amphibious operations at throughputs of up to 54Kbps. EPLRS-DR provides embedded Position Location Information (PLI) between shipboard networks and the shore-based Marine Tactical Data Network (TDN) and the Army Tactical Internet (TI). To meet a National Security Agency (NSA) mandate, KOK13 cryptographic equipment was replaced with KOK23/CKG cryptographic equipment. EPLRs and EMUT efforts will include antenna upgrades. EPLRS-DR will also include Landing Force Iridium infrastructure.</p> |             |         |                                        |              |             |               |                                                                         |                                          |         |         |             |            |
| <p>[P5 / NU239 PORT NSW]: Portable Radio/Naval Special Warfare (PORT NSW) tactical radio: PORT NSW procures hand held and man pack/vehicular radios for NSW. Procurement needed to support Force Protection operations, especially with joint forces. NSW operational elements (SEAL platoons and Combatant Craft Detachments) rely on tactical communications and electronics equipment to accomplish all missions assigned in support of the Joint and Fleet commanders. Navy resourced tactical communications equipment is considered mission essential and will be employed by individual SEAL personnel and NSW combat elements in man pack configurations as well as onboard tactical vehicles and NSW combatant craft in tactical operations centers in fixed mount configurations.</p>                                           |             |         |                                        |              |             |               |                                                                         |                                          |         |         |             |            |
| <p>[P5 / NU295 BFTN]: Battle Force Tactical Network (BFTN): BFTN enables delivery of Internet Protocol (IP) based collaboration services over legacy High Frequency (HF) assets. The intent is to provide an interoperable, low data rate, multi-node, Beyond-Line-of-Sight tactical edge networking capability using existing HF radio infrastructure. Supports Tactical Edge Networking and provides data path backbone for both airborne and afloat forces and supports increased data exchange with Allied Coalition forces. BFTN provides National, Allied, and Coalition maritime units with a medium band IP-based, tactical ship-ship at-sea networking capability, using legacy half-duplex UHF Line-of-Sight. BFTN will provide a bridge between legacy radio systems and future emerging wideband networking technologies.</p> |             |         |                                        |              |             |               |                                                                         |                                          |         |         |             |            |
| <p>[P5 / NU790 Navy Expeditionary C4I]: Navy Expeditionary Command, Control, Communications, Computers, &amp; Intelligence (C4I): Provides procurement and integration for outfitting Table of Allowance (TOA) buy lists within the Expeditionary forces. Ensures common C4I solutions are being coordinated, tracked, procured and integrated across Navy Expeditionary Combat Command (NECC) forces. The increase in funding reflects establishment, approval and funding of NSW service-common Table Of Allowance to begin correcting shortfalls and bring NSW forces into alignment with required outfitting standards in accordance with SOCOM-USN Memorandum of Agreement.</p>                                                                                                                                                      |             |         |                                        |              |             |               |                                                                         |                                          |         |         |             |            |
| <p>[P5 / ESB SOF (BSO 24)]: Expeditionary Mobile Base Special Operations Forces (ESB SOF) - The SOF component requires an ESB (a type of boat)to have the capability for planning and conducting Intelligence, Surveillance, and Reconnaissance (ISR) for Boat Assault Force (BAF) and Helicopter Assault Force (HAF) missions. These funds procure and install equipment to support SOF communications, consisting of a radio backbone infrastructure and increasing the bandwidth to support SOF missions. These additional capabilities will be back fitted during ESB 4's Post Shakedown Availability.</p>                                                                                                                                                                                                                            |             |         |                                        |              |             |               |                                                                         |                                          |         |         |             |            |

| <small>*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.</small>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                       |             |                                               |                |                                          |                                                                                |                                          |                                          |                                          |                                          |
| <small>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</small>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                       |             |                                               |                |                                          |                                                                                |                                          |                                          |                                          |                                          |
| <p><b>Justification:</b></p> <p>The FY 2019 funding request was reduced by (\$0.145) million to reflect the Department of Navy's effort to support the Office of Management and Budget directed reforms for Efficiency and Effectiveness that include a lean, accountable, more efficient government.</p> <p>NU239 - PORT NSW: The FY19 budget request funds the initial procurement of 372 radios to jump start the procurement and modernization level of effort, and incrementally achieve approved inventory threshold (874 radios) by the end of the FYDP. Thereafter, the focus will be on technical refresh and sustainment of the inventory based on assembly service lifecycle projections. The requirements for the radios is driven by communications requirements and deployment cycles. The total inventory of 874, as derived from the Force Readiness Manual (FRM), establishes the table of allowance requirements for training and operational inventory thresholds. Additionally, FY19 increase is due to equipment required for US Navy Special Forces End Strength Growth.</p> <p>NU295 / NU777 - Battle Force Tactical Network (BFTN): FY19 OPN funds the procurement of twelve (12) BFTN systems required to meet emerging communications threat environment and engineering changes to strengthen cyber security posture by implementing WIN 10 upgrades on previously fielded systems.</p> <p>NU019 - EPLRS-DR/EMUT: FY19 funding procures and installs 8 Enhanced Position Location Reporting System - Data Radio (EPLRS-DR)/Enhanced Man-Pack UHF Tactical (EMUT). A complete unit consists of one AN/VRC-114(V)2 radio mount, one RF-5051PS power supply, and associated equipment. The quantity procured in any given year is determined by the Fleet's demand signal and platform availability.</p> <p>NU385 - FY19 funding is for the procurement and installation of the remaining components to provide Special Operations Forces (SOF) capability on Expeditionary Mobile Base (ESB) 4. These funds will procure one Commercial Broadband Satellite Program (CBSP), one UHF SATCOM antenna, two HF antennas, one UHF/VHF System, two VHF Lo Antenna, two VHF Hi antennas and two UHF antennas.</p> <p>The cost delta between ESB 3 and ESB 4 are for the refurbished CBSP asset (ESB 3) vs new system (ESB 4) and the difference in labor rates (East Coast vs West Coast) for the Post Shakedown Availability (PSA) Efforts.</p> <p>NU790 - Navy Expeditionary FY19 funding is for procurement of service-common support communications and Automated Data Processing (ADP) equipment which directly supports forward deployed SEALs. Investment in communications equipment, to include but not limited to, portable hand held devices, man pack radios, ruggedized laptops, and encryption-decryption devices are essential to the readiness and battlefield effectiveness of NSW in winning the current fight against ISIS and other extremist elements. Additionally, it ensures the warfighter is optimally equipped with cutting edge communications equipment for the future fight.</p> |                                       |             |                                               |                |                                          |                                                                                |                                          |                                          |                                          |                                          |

(t) indicates the presence of a P-5a

## Footnotes:

- (1) Funding in FY19 includes procurement and installation for Enhanced Position Location reporting System - Data Radio (EPLRS-DR), Enhanced Man-Pack UHF Tactical (EMUT) MUOS antennas, and Landing Force Iridium to meet Marine Embarked Units (MEU) to support HF/UHF communications between the Landing Force Operations Center (LFOC) and Marines ashore to ensure interoperability between the Navy and Marine Corps. The quantity procured and installed (in any given year) is determined by the fleet's demand signal and platform availability and leverages the ISEA to combine installs.
- (2) FY19 Increase due to equipment required for US Navy Special Forces End Strength Growth
- (3) PORT NSW Hand Held and Man Pack radios do not require installation, also FY19 increase due to equipment required for US Navy Special Forces End Strength Growth.
- (4) Funding in FY19 is for the procurement of twelve (12) Battle Force Tactical Network (BFTN) systems required to meet emerging communications threat environment.
- (5) Funding in FY19 for engineering changes required to strengthen cyber security posture by implementing WIN 10 upgrades on previously fielded BFTN systems.
- (6) Quantities are not provided since various communications and Automated Data Processing equipment is being procured. Increase reflects establishment, approval and funding of NSW service-common Table Of Allowance to begin correcting shortfalls and bring NSW forces into alignment with required outfitting standards in accordance with SOCOM-USN Memorandum of Agreement (MOU).
- (7) Quantities are not provided since various equipment is being procured to provide Special Operations Forces (SOF) capability on Expeditionary Mobile Base (ESB) 4. Cost increase is to procure remaining SOF components to include several VHF and UHF antennas to be installed during the boats Post Shakedown Availability.
- (8) The installations costs are being broken out for transparency. The last time an installation occurred was in FY16. In FY 16 the installation cost (for ESB 3) were included in the recurring cost.
- (9) Funding in FY19 is for the installation of twelve (12) BFTN systems required to meet emerging communications threat environment.
- (10) Funding in FY19 is for the procurement and installation of twelve (12) BFTN systems required to meet emerging communications threat environment.
- (11) Consolidated prior years for PORT RAD - Hand Held Procurement, Hydra Procurement, NAVSEA HYDRA Requirement, DAMA IW Procurement, Hydra Installations FMP, HF SAR Installations FMP, and Navy Expeditionary C4I Production Support

## Description:

The Submarine Broadcast program modernizes communication elements which support Navy Nuclear Command, Control, and Communications (NC3) strategic requirements, connecting the President of the United States (POTUS) and senior leadership with the ability to send (NC3) Emergency Action Messages (EAMs) to Ballistic Missile Submarines (SSBN) and tactical National level tasking to deployed Attack Submarines (SSN) and Guided Missile Submarines (SSGN) operating covertly around the globe via the Fixed Submarine Broadcast System (FSBS). This portfolio provides integration, production and installations for shore-to-ship transmit and receive communications systems.

[P3A / W4010 Legacy NC3 NMHS]: FY14-FY18 Legacy Nuclear Command, Control and Communication Navy Modernized Hybrid Solution (NC3 NMHS): The Legacy NC3 NMHS messaging hardware and software will provide accurate and reliable delivery of time-critical messages for command and control of nuclear forces in a pre-attack environment for force direction, force management, situation monitoring and planning. The NC3 NMHS hardware and software upgrade at all sites will replace Navy Information eXchange Terminal(NIXT) at shore communications stations supporting NC3.

(P5 / W4010 NC3 NMHS Technical Refresh - FY19-FY23 Nuclear Command, Control and Communication Navy Modernized Hybrid Solution (NC3 NMHS) is the modernization of the Nova Software and NIXT hardware to eliminate obsolesce issues, address cyber security vulnerabilities, and enable Network Defense and Network Monitoring functions.

[P5 / W4009 Low Band Universal Communications System (LBUCS), Receive]: LBUCS will upgrade receive subsystems of Fixed Submarine Broadcast Systems (FSBS), which are approaching their operational end of life. LBUCS will ensure operational capability through the VLF architecture by providing system life extension and flexibility of submarine broadcast reception to submarines operating in a stealth posture. Unit costs for procurement and installation of LBUCS Receive vary due to unique platform and equipment configurations.

[P5 / W4011 Submarine Operating Authority (SUBOPAUTH)]: SUBOPAUTH will modernize and standardize the aging command, control and communication (C3) infrastructure and several critical C3 systems at all seven worldwide Broadcast Control Authority (BCA) sites made up of four regional SUBOPAUTH BCA sites and three Take Charge and Move Out (TACAMO) BCA sites. Different equipment is procured and installed each fiscal year and varies by site.

[P5 / W4012 Take Charge and Move Out (TACAMO)]: TACAMO's primary mission is to receive and retransmit EAMs to United States strategic forces. The TACAMO Ground Communication Program will procure the necessary fixed and mobile communications equipment to support the TACAMO mission each fiscal year. For this reason, different systems will be procured from year to year. In FY18 TACAMO will procure two (2) High Electromagnetic Pulse (HEMP) protected Extremely High Frequency (EHF) mobile shelters. In FY19 TACAMO will procure the first Mobile Advanced Extremely High Frequency (AEHF) Terminal (MAT) and fund the associated Non-Recurring Engineering (NRE) efforts.

| <b>Line Item MDAP/MAIS Code:</b> N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                               |                                                                            |
| <p>[P3A / W4008 Transmission Equipment]: Transmission Equipment consists of two (2) major systems, Antennas and Transmitters, which are located at ten (10) Broadcast Transmitter Stations (BTS) sites worldwide. Transmission Equipment program modernizes the aging and obsolete equipment of the submarine broadcast transmission systems, which include the high power transmitters and antennas located at the Broadcast Transmitter Station (BTS) sites. Different equipment are procured each year for this effort depending on modernization requirements. In FY18, one (1) Bushing, one (1) Insulator, one (1) Tower Lighting Isolation Transformer (TLIT) Base Housing, one (1) AN/FRT-95 Conversion to AN/FRT-95D, four (4) Network Tech Upgrade Kits, four (4) Solid-State Variable PA Plate Power Supplies, and (1) UV Arc Sensor were procured. In support of the replacement of the damaged Fixed Submarine Broadcast System (FSBS) antenna and transmitter at the NRTF Aguada, PR site, the Tower Lighting Isolation Transformer (TLIT) Base Housing, the AN/FRT-95 Conversion to AN/FRT-95D and the Insulator were procured in FY18 with the FY18 Hurricane Amendment funding. In FY19, one (1) Base Insulator Assembly (BIA), one (1) Bushing, one (1) Insulator, one (1) Tower Lighting Isolation Transformer (TLIT) Base Housing, two (2) Auto-tune Power Amplifiers, two (2) Auto-tune Systems, two (2) Tap Changer Under Load (TCUL) Transformers, and one (1) Transmission Line Impedance Matching Network (TLZN) will be procured.</p> <p>[P3A - 2 / W4009 Low Band Universal Communications System (LBUCS) Transmit]: LBUCS Transmit will modernize the low power transmit subsystem hardware, software and waveform components at Broadcast Transmitter Stations (BTS) and Broadcast Control Authority (BCA) sites including the VLF Broadcast Builder, AN/URT-30B Integrated VLF Transmit Terminal (IVTT), IVTT Proxy, the MD-1310, MD-1315, and MD-1316 Modulators, and the North Atlantic Treaty Organization (NATO) Interoperable Submarine Broadcast System (NISBS). Production costs for LBUCS equipment vary due to unique site configurations. Cost and duration for LBUCS Broadcast Control Authority (BCA) installations are greater than Broadcast Transmitter Stations (BTS) due to complexity of the BCA system. Install costs for BCA equipment vary due to unique site configuration and mix of CONUS and OCONUS locations.</p> |                                               |                                                                            |

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

LBUCS Receive: FY19 funding will provide for the procurement and installation of LBUCS Receive shore and submarine units.

LBUCS Transmit: FY19 funding will provide for the installation of LBUCS Transmit units.

Submarine Operating Authority (SUBOPAUTH): FY19 funding will provide for the procurement of the BCA sites; and for the installation of SUBOPAUTH Modernization Unified Computing System (UCS) at seven worldwide Broadcast Control Authority (BCA) sites made up of four regional SUBOPAUTH BCA sites and three Take Charge and Move Out (TACAMO) BCA sites.

Take Charge and Move Out (TACAMO): FY19 funding will provide for the procurement of the first Mobile Advanced Extremely High Frequency (AEHF) Terminal (MAT) and associated Non-Recurring Engineering (NRE) efforts to support the Navy's TACAMO mission.

Transmission Equipment: FY19 funding will provide eleven (11) procurements and seven (7) installations at five (5) different Broadcast Transmitter Station (BTS) sites. Procurement and Installation unit costs vary due to procuring and installing different equipment each fiscal year. FY18 procured one (1) Bushing, one (1) Insulator, one (1) Tower Lighting Isolation Transformer (TLIT) Base Housing, one (1) AN/FRT-95 Conversion to AN/FRT-95D, four (4) Network Tech Upgrade Kits, four (4) Solid-State Variable PA Plate Power Supplies, and (1) UV Arc Sensor. \$15.000 million added in FY18 to address the replacement of the Hurricane Maria damaged Fixed Submarine Broadcast System (FSBS) antenna and transmitter at the NRTF Aguada, PR site, the Tower Lighting Isolation Transformer (TLIT) Base Housing, the AN/FRT-95 Conversion to AN/FRT-95D and the Insulator were procured in FY18 with the FY18 Hurricane Amendment funding. FY19 will procure one (1) Base Insulator Assembly (BIA), one (1) Bushing, one (1)

(†) indicates the presence of a P-5a

Footnotes:

(1) Unit costs for Low Band Universal Communications Systems (LBUCS) Receive equipment vary due to economic order quantities and learning curve as well as inflation adjustments. Delays to procurement schedule are associated with system of systems integration delays.

(2) Ashore install costs for LBUCS Receive equipment vary due to unique site and system configurations at a mix of Continental United States (CONUS) and Outside of the Continental United States (OCONUS) locations. For example, OCONUS (Japan, England, Italy, and Hawaii) install costs are higher due to international coordination, travel and shipping.

| <p><sup>(3)</sup> Afloat install costs for LBUCS Receive equipment vary due to varying platform (five different classes of submarines) and system configurations. For example, an SSBN requires three units installed while an SSN requires one, making the install cost lower on a per-receiver basis for an SSBN due to consolidated labor efforts.</p> <p><sup>(4)</sup> Submarine Operating Authority (SUBOPAUTH) equipment procurement costs vary due to unique equipment configurations and different equipment being procured each year. FY18 procures nine (9) SOA Modernization Unified Computing Systems (UCS). FY19 will procure remaining two (2) SOA Modernization UCS with an average unit cost of \$306K and two (2) Keyboard Video Mouse (KVM) modernization units, which provide human-machine interface (HMI) and have an average unit cost of \$960K.</p> <p><sup>(5)</sup> Submarine Operating Authority (SUBOPAUTH) equipment installation costs vary due to unique equipment configurations at each site. FY19 will install SOA modernization UCS.</p> <p><sup>(6)</sup> Unit cost fluctuates because the Take Charge and Move Out (TACAMO) program procures different systems each fiscal year. In FY18 TACAMO will procure two (2) HEMP protected EHF mobile shelters. In FY19 TACAMO will procure the first Mobile Advanced Extremely High Frequency (AEHF) Terminal (MAT) and fund the associated Non-Recurring Engineering (NRE) efforts. Installation costs are not applicable to the EHF mobile shelters or to MAT as these systems are delivered turnkey.</p> <p><sup>(7)</sup> NC3 NMHS hardware and software upgrades at all sites to enable enterprise Network Monitoring (NETMon), enterprise Computer Network Defense (CND), and Cyber situational awareness tools to correlate cyber threats in the FSBS network and map the best path to deliver EAMs. Quantity represents Various Sites. (4 Hub, 2 Monitor, 7 Spoke)</p> <p><sup>(8)</sup> Unit cost fluctuation is due to procurement of variable systems to support SW/HW configurations &amp; the addition of Network Monitoring/Computer Network Defense (NETMon/CND) capability requirement to meet cyber security requirements. Quantities represent various sites. (4 Hub, 2 Monitor, 7 Spoke) Installation costs vary due to unique site configurations.</p> <p><sup>(9)</sup> TACAMO Non-Recurring Engineering (NRE) costs include start up efforts to establish a production capability for the terminals as well as engineering of the HEMP hardened transit cases, HEMP filter selection, component integration, testing, production design data and documentation.</p> |                                                                            |                                                                        |

**Description:**

Transmission Equipment program modernizes the aging and obsolete equipment of the submarine broadcast transmission systems, which include the high power transmitters and antennas located at the Broadcast Transmitter Station (BTS) sites. Different equipment are procured each year for this effort depending on modernization requirements. In FY18, one (1) Bushing, one (1) Insulator, one (1) Tower Lighting Isolation Transformer (TLIT) Base Housing, one (1) AN/FRT-95 Conversion to AN/FRT-95D, four (4) Network Tech Upgrade Kits, four (4) Solid-State Variable PA Plate Power Supplies, and (1) UV Arc Sensor were procured. In support of the replacement of the damaged Fixed Submarine Broadcast System (FSBS) antenna and transmitter at the NRTF Aguada, PR site, the Tower Lighting Isolation Transformer (TLIT) Base Housing, the AN/FRT-95 Conversion to AN/FRT-95D and the Insulator were procured in FY18 with the FY18 Hurricane Amendment funding. In FY19, one (1) Base Insulator Assembly (BIA), one (1) Bushing, one (1) Insulator, one (1) Tower Lighting Isolation Transformer (TLIT) Base Housing, two (2) Auto-tune Power Amplifiers, two (2) Auto-tune Systems, two (2) Tap Changer Under Load (TCUL) Transformers, and one (1) Transmission Line Impedance Matching Network (TLZN) will be procured.

| <p><b>Footnotes:</b></p> <p><sup>(10)</sup> ANTENNA Transmission Equipment funds modernize the aging and obsolete antenna equipment used in the Submarine Broadcast. Procurement and Installation unit costs vary due to procuring and installing different equipment each fiscal year. FY18 Hurricane Amendment funding is in support of the replacement of damaged Fixed Submarine Broadcast (FSBS) antennas and transmitters equipment at NRTF Aguada, PR site. These replacement efforts are essential to Nuclear Command, Control, and Communication (NC3) readiness, since the primary mission of the FSBS is NC3, providing 24/7 one-way Low Frequency/Very Low Frequency (LF/VLF) transmission of strategic and tactical messages to submarines operating in a stealth posture. FY18 ANTENNA funding procured three (3) equipment items: one (1) Bushing, one (1) Insulator, and one (1) Tower Lighting Isolation Transformer (TLIT) Base Housing utilizing a task order contract which was awarded in January 2018. The Bushing delivers eleven (11) months after contract award. The Bushing will be installed in FY19 due to the assembly requirements prior to installation, weather conditions and operational availability at NCTAMS LANT Cutler, ME. The procurement of one (1) Tower Lighting Isolation Transformer (TLIT) Base Housing and one (1) Insulator will replace the damaged equipment sustained during the Hurricane at the NRTF Aguada, PR site. The TLIT Base Housing delivers five (5) months after contract award, and the Insulator delivers twelve (12) months after contract award. Both TLIT Base Housing and Insulator will be installed in FY19 due to the procurement lead time, shipment requirements, and assembly requirements at the NRTF Aguada, PR site. FY19 ANTENNA funding will procure four (4) equipment items: one (1) Base Insulator Assembly (BIA), one (1) Bushing, one (1) Insulator, and one (1) Tower Lighting Isolation Transformer (TLIT) Base Housing all on one task order of the same contract which is expected to be awarded in January 2019. The TLIT Base Housing will be installed utilizing FY19 funding and are subject to site availabilities. The BIA delivers nine (9) months after contract award and the Insulator delivers twelve (12) months after contract award. Both BIA and Insulator will be installed in FY20 due to the procurement lead time, shipment requirements, weather conditions, and operational availability at NCTAMS LANT Det LaMoure, ND.</p> <p><sup>(11)</sup> TRANSMITTERS Transmission Equipment funds modernize the aging and obsolete transmitter components used in the Submarine Broadcast. Procurement and Installation unit costs vary due to procuring and installing different components each fiscal year. FY18 Hurricane Amendment funding is in support of the replacement of damaged Fixed Submarine Broadcast (FSBS) antennas and transmitters equipment at NRTF Aguada, PR site. These replacement efforts are essential to Nuclear Command, Control, and Communication (NC3) readiness, since the primary mission of the FSBS is NC3, providing 24/7 one-way Low Frequency/Very Low Frequency (LF/VLF) transmission of strategic and tactical messages to submarines operating in a stealth posture. FY18 TRANSMITTER funding procured ten (10) components: one (1) AN/FRT-95 Conversion to AN/FRT-95D, four (4) Network Tech Upgrade Kits, four (4) Solid-State Variable Power Amplifier Plate Power Supplies, and one (1) UV Arc Sensor. The procurement of one (1) AN/FRT-95 Conversion to AN/FRT-95D will replace the damaged equipment sustained during the Hurricane at the NRTF Aguada, PR site. The AN/FRT-95 Conversion to AN/FRT-95D delivers twelve (12) months after contract award and will be installed in FY19 due to the procurement lead time, shipment requirements, and assembly requirements at the NRTF Aguada, PR site. The Network Tech Upgrade and UV Arc Sensor will be installed using FY18 funding and are subject to site availabilities. The Solid-State Variable Power Amplifier Plate Power Supplies will be installed in FY19 due to the assembly and shipment requirements prior to the installation. FY19 TRANSMITTER funding will procure seven (7) components: two (2) Auto-tune Power Amplifiers, two (2) Auto-tune Systems, two (2) Tap Changer Under Load (TCUL) Transformers, and one (1) Transmission Line Impedance Matching Network (TLZN). The Auto-tune System and the TLZN will be installed utilizing FY19 funding and are subject to site availabilities. The TCUL will be installed in FY20 due to the assembly and shipment requirements prior to the installation.</p> <p><sup>(12)</sup> Antenna equipment (various components) is procured on one contract award in January 2018. Delivery dates vary between nine (9) and twelve (12) months.</p> |            |                |           |           |           |                |           |           |           |                                                                            |           |           |           |                |                        |           |           |                |           |                                                                         |           |                |           |           |           |                |           |           |           |           |            |

**Description:**

Low Band Universal Communication System (LBUCS) Transmit will modernize the transmit subsystem hardware, software, and waveform components at Broadcast Transmitter Stations (BTS) and Broadcast Control Authority (BCA) sites including the Very Low Frequency (VLF) Broadcast Builder (VBB), AN/URT-30B Integrated VLF Transmit Terminal (IVTT), IVTT Proxy, the MD-1310, MD-1315, and MD-1316 Modulators, and the North Atlantic Treaty Organization (NATO) Interoperable Submarine Broadcast System (NISBS).

| <p>unique site configuration and mix of CONUS and OCONUS locations. For example, OCONUS (Puerto Rico, Australia, Japan, Iceland, Hawaii, and Italy) install costs are higher due to international coordination, modifications (e.g. international power modifications, travel and shipping.) With FY17 funds, LBUCS will install 10 production and installation support facility systems for which the cost is significantly lower than the operational BCAs and BTSS, as no international coordination, modification, shipping or travel will be required. These production and installation support facility systems installs can occur upon delivery, and no full deployment decision required. Additionally, several FY17 funded sites leverage LRIP equipment and require minimal modification to the existing structure. LBUCS Transmit equipment and cables will be installed in racks and must go through acceptance and integration testing prior to installation. This process can take up to 15 months due to complexity of each site's unique system configuration and special considerations (For example, international power modifications, adjustments for space availability, and extended shipping times for OCONUS sites). Installation schedule was arranged to accommodate sites with shorter integration timelines first and longer integration timelines later. The 14 installations taking place in FY17 have shorter integration timelines. Nearly all of the installations taking place in FY18 and FY19 are at OCONUS sites which require additional integration time, coordination, travel, and shipping, and therefore must be procured and installed in different years. LBUCS delayed the installation schedule due to factors including an emergent requirement to verify correction of cyber deficiencies prior to install, projected lack of availability of system-wide transmitter downtime (downtime is required to complete installations) in the wake of Hurricane Maria's impact on the Puerto Rico transmitter, as well as an emergent requirement for LBUCS to independently stand-up point-to-point connectivity between the BCA and BTS sites.</p> <p><sup>(14)</sup> The LBUCS Transmit BTS production cost increased from PB18 due to an emergent requirement for LBUCS to independently stand-up turn-key point-to-point connectivity between the BCA and BTS sites. This requirement emerged because of a policy change by the Defense Information Systems Agency (DISA).</p> |                                                                            |                                                                                                            |

**Description:**

[P3A / W4010 Legacy NC3 NMHS]: FY14-FY18 Legacy Nuclear Command, Control and Communication Navy Modernized Hybrid Solution (NC3 NMHS): The Legacy NC3 NMHS messaging hardware and software will provide accurate and reliable delivery of time-critical messages for command and control of nuclear forces in a pre-attack environment for force direction, force management, situation monitoring and planning. The NC3 NMHS hardware and software upgrade at all sites will replace Navy Information eXchange Terminal(NIXT) at shore communications stations supporting NC3.
