Department of Defense Appropriations Act, 2020

Aircraft Procurement, Navy

For construction, procurement, production, modification, and modernization of aircraft, equipment, including ordnance, spare parts, and accessories therefore; specialized equipment; expansion of public and private plants, including the land necessary therefore, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway, \$18,641,249,000, to remain available for obligation until September 30, 2022.

FY 2020 Overseas Contingency Operations funding can be separated into the following categories:

- OCO for Direct War Costs (\$102,211,000): Direct War costs are those combat or direct combat support costs that will not continue to be expended once combat operations end at major contingency locations.
- OCO for Enduring Requirements (\$16,834,000): OCO for Enduring Requirements are enduring in-theater and in-CONUS costs that will likely remain after combat operations cease, and have previously been funded in OCO.
- OCO for Base Requirements (\$0): OCO for Base Requirements is OCO funding for base budget requirements in support of the National Defense Strategy. The Budget requests these funds in OCO to comply with the base budget defense caps included in the Budget Control Act of 2011.

Description:

All aviation spares requirements are developed using accredited sparing models. Funding requirements for major avionics are calculated on an item-by-item basis where possible. APN-6 is a "follower" account providing spares for end-items and modifications procured under APN Budget Activity (BA)'s 1-5 and 7, and follows program changes in end-item quantities, basing scenarios, and maintenance data.

The Initial spares category includes all repairable and consumable allowances to support the quantity and Type/Model/Series (T/M/S) of aircraft in new procurement, during Interim Contractor Support (ICS) to support the Repair of Repairables (ROR) prior to Material Support Date (MSD) and to support aircraft modifications.

Initial spares supporting aircraft procured under APN BA-1 through BA-4 are based on the number of aircraft being procured, basing plans, flying hours, maintenance data, and a number of other data elements derived from the Weapon System Planning Documents and Aircraft Program Data File that are fed into the Readiness Based Sparing model and the Retail Inventory Model for Aviation for the determination of spare engine requirements. Spare engines and engine modules are procured under initial spares during the production of the aircraft and do not transition to Navy Working Capital Funds (NWCf).

The Initial spares category funds the ROR (9401) via contractor support, prior to the MSD, at which time repairs are turned over to the organic depots.

Modification spares (9504) follow the APN BA-5 Modification budget for all T/M/S supporting various Engineering Change Proposals (ECPs) and Operational Safety Improvement Program (OSIP) initiatives.

Spares for Aircraft Support Equipment and Facilities follow the APN BA-7 budget for all T/M/S providing spares for training devices and support equipment (9705-9709).

Replenishment spares provides initial sparing for 6K cognizance material (Cog) containers (9710), Adversary (9711) and Headquarters Replenishment for various programs (9712). Due to the nature of Adversary and Headquarters Replenishment programs, initial spares requirements are supported for the life of the program by APN-6 funding and are not transferred to the Navy Supply System.

The Replenishment category also funds the Aviation Outfitting Account for Repairables (AOA) (9713) and Aviation Outfitting Account for Consumables (ACA)(9714) for initial sparing and range/depth increases.

The Outfitting spares element of the budget is comprised of the Aviation Outfitting Account (AOA), which sources spares utilizing Defense Working Capital Fund and NWCf subsequent to MSD, as well as a limited number of Headquarters Replenishment Accounts for spares procured at Naval Air Systems Command headquarters to support Executive Mission helicopters, inter-service support requirements, and

miscellaneous aircraft systems. Successful execution of AOA and meeting Fleet requirements depends heavily on the synchronization between NWCF Buy-In and APN-6 Buy-Out which requires stability of funding levels for both accounts. AOA fills Aviation and Shore Consolidated Allowances (AVCAL/SHORCAL). AVCALs support carriers and L-decks conducting deployed operations.

Justification: Aviation sparing supports the Chief of Naval Operations' (CNO's) strategy to strengthen naval power at and from sea by maintaining and modernizing a Navy and Marine Corps partnered fleet that is trained and ready to operate and fight decisively in an information domain. Aviation sparing provides the initial plane-side sparing to fill allowances for authorized allowance listings to better meet today's force demands, to meet naval platform support in a highly data-driven, informational environment, and to meet combatant commander needs. AVCAL/SHORCAL requirements enable carriers/L-decks to conduct deployed operations. Initial contractor spares and engine spares are major cost drivers as new Type/Model/Series (T/M/S) continue to be introduced, procured, and modified for technological improvements in FY20. To field new aircraft, aviation spares support the stand-up of new basing plans and additional support packages. The aviation spares budget further supports the Secretary of Defense's strategy to improve warfighting readiness by addressing urgent warfighting readiness shortfalls. (1) Initial Spares: FY2020 Initial spares funding is required for Joint Strike Fighter (JSF) Short Takeoff and Vertical Landing (STOVL) (0152) and JSF Carrier Variant (CV) (0147) to support Initial Operational Capability, meet parts availability, resupply response times, and maintenance requirements, and to continue to progress toward Full Operational Capability. The funding will procure Afloat Spares Packages, Deployment Spares Packages, Base Spares Packages, and the Navy and Marine Corps share of the JSF Global Spares Pool (GSP). The GSP is a foundational tenet of this joint program, whereby the Air Force, Navy, Marine Corps, and eight international countries share the cost of spares, eliminating need for individual entities to procure full depth and range of spares. These initial spares and repair parts are critical to establishing depot maintenance capability and meeting sustainment milestones for all partners. FY2020 Initial spares funding includes required support of the following aircraft platforms: CH-53K (0158) - FY20 increase is associated with additional engine and Contractor spares requirements (LAIRCM AAQ-24, Crypto MODs, and ARC-210). V-22 (0164) - FY20 funding required for spare engines & components as well as contractor spares requirements aligned to the APN-1 aircraft buys, much of which is due to the Navy variant, CMV-22. P-8 (0193) - FY20 funding supports procurement of Large Aircraft Infrared Counter Measure System Processor Replacement (LAIRCM) Contractor spares. E-2D AHE (0195) - FY20 funding required for spare engines & components as well as contractor spares requirements aligned to the APN-1 aircraft buys. Advanced Helicopter Training System (0344) - funding for engine and contractor spares to align to the APN-3 procurement for the training system. KC-130J (0416) - FY20 funding increase due to increase of spare engine and propeller requirements. MQ-4C TRITON (0442) - FY20 increase is due to a shift in Material Support Date (MSD) from 4QFY20 to 1QFY23 to align to the Initial Operational Capability (IOC), funding will support initial sparing levels for engines, Contractor spares, and PSE requirements. MQ-8 UAV (0443) - FY20 funding required for engine and PSE spares related to the UAV APN-4 budget. VH-92A (0455) - FY20 increased funding supports procurement of Contractor spares, Engines, and Peculiar Support Equipment (PSE) aligned to the APN-4 aircraft buys. FY2020 funding required for Repair of Repairables (ROR) (9401). ROR increase is due to anticipated additional repairs on new parts based on increased number of aircraft in the fleet for platforms such as for MQ-4 TRITON, F/A-18E/F, VH-92, E-2, P-8 and CH-53K. FY2020 funding for Spares for Modification (9504) supports the modifications for Next Generation Jammer, P-8, Common ECM equipment, V-22, Trainer Aircraft, and AV-8B modifications.

Exhibit P-40, Budget Line Item Justification: PB 2020 Navy		Date: March 2019
Appropriation / Budget Activity / Budget Sub Activity: 1506N: Aircraft Procurement, Navy / BA 06: Aircraft Spares and Repair Parts / BSA 1: Aircraft Spares and Repair Parts		P-1 Line Item Number / Title: 0605 / Spares and Repair Parts
ID Code (A=Service Ready, B=Not Service Ready): A	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
FY2020 funding required for Aircraft Support Equipment and Facilities provides initial spares for Training Devices (9705), Common Support Equipment (CSE) (9707), Consolidated Automated Support Equipment (CASS) (9708), and Tactical Combat Training System (TCTS) (9709). These accounts are critical and tied directly to enabling T/M/S mission success by training pilots and maintainers and ensuring maintenance and planeside support of the aircraft. (2) Replenishment: FY2020 funding increase for 6K (Cog) (9710) due to correlation of container requirement increase as the spares being procured increases. Adversary (9711) increase due to increased flight hours of the T-38. Headquarters Replenishment (9712) includes the following platforms: Executive Helicopter Mission, Project Beartrap, E-6B, Direct Support Squadron, and Manned Reconnaissance. Increase in (9712) FY20 is due to the extension of the E-6 service life and prolonged services hours as well as the number of Executive Helicopter variants that will be in the fleet in FY20 during the transition to the new variant. FY2020 funding is required for replenishment of the Aviation Outfitting Account (AOA) and ACA (9713/9714) spares. The AOA Repairable account is integral in providing sustainment requirements that maintain current operational and wartime readiness for legacy systems such as F/A-18, AV-8B, EA-6B, H-1, MH-53E, MV-22, Common Avionics and Special Programs. Specifically, Aviation Outfitting procures critical initial spare parts to fill AVCAL and SHORCAL requirements in support of the CNO's strategy. Through Outfitting; AOA/ACA funding supports improved aviation operational readiness across the Fleet, fulfilling carrier/amphibious landing deck as well as Naval Air Station allowance growth and supporting repair of AOA assets. Outfitting requirements increase in FY20 due to CMV-22, F/A-18, H-53, H-60, and Common Avionics requirements increasing to support deployed operations.

Description:

The Common Ground Equipment line funds procurement of Automatic Test Equipment (ATE), various aircraft systems trainers and training aids, the Consolidated Automated Support System Family of Testers (CASS FOT), support equipment for the Rapid Deployment Force, mobile maintenance facilities for Marine expeditionary forces, and other aircraft ground support equipment that is either peculiar to out-of-production aircraft or common in applicability to more than one aircraft. The requiring managers responsible for these procurements and the funds presently assigned to them are as follows: Ground Support Equipment, Mobile Maint Facilities, General Skills Training, Topscene, and Other Flight Training.

[P40A / AUTOMATIC TEST EQUIPMENT]: This sub-line provides for the transition of current Automated Test Equipment (ATE) Test Program Sets (TPSs) to AN/USM-636 Consolidated Automated Support System (CASS), AN/USM-702 Reconfigurable Transportable CASS (RTCASS) and AN/USM-730 electronic CASS (eCASS), the acquisition/modification of associated test routines of common ATE to meet operational requirements identified in the Fleet-concurred Common Support Equipment Operational List and the acquisition/modification of associated ancillary assets for CASS/RTCASS/eCASS to extend testing capability to meet these requirements.

TEST PROGRAM SETS (TPSs) TRANSITION TO CASS, RECONFIGURABLE TRANSPORTABLE CASS (RTCASS) AND eCASS: TPSs are support equipment consisting of hardware, software and documentation required to automatically fault isolate defective weapon system components and qualify them Ready-For-Issue (RFI). The budget requests funds for the procurement of TPSs to offload support from existing legacy ATE to CASS, RTCASS and eCASS as well as support of GFE requirements and CASS Family of Testers (FOT) stations at designated test integration facilities.

COMMON ATE ACQUISITION, MODIFICATION AND TEST ROUTINES: System acquisition and modification is necessary to replace obsolete and unsupportable equipment, support current technology, incorporate necessary reliability and maintainability improvements and correct Fleet-reported problems as a result of engineering investigations/Quality Deficiency Reports. Without these modifications, replacement parts will not be available and common ATE will not remain operational.

ASSOCIATED ANCILLARY ASSETS: CASS Family Ancillary assets extend the capabilities of CASS, RTCASS and eCASS to meet Unit Under Test (UUT) testing requirements where it is not feasible to upgrade the entire inventory of CASS Family testers. The budget requests funds for the acquisition and modification of these CASS ancillary assets. Without these modifications, these assets and the associated UUTs they support will not remain operational.

[P40A - 2 / A/C COMMON SUPPORT EQUIPMENT]: This budget sub-line provides for the acquisition of Support Equipment (SE) end items under the inventory and technical management of NAVAIR. These SE end items are required for ground testing handling, and maintenance of aircraft and their systems. Examples of SE items acquired under this budget line item include aircraft propulsion test systems, mobile air conditioners and generators and aircraft handling equipment. Also included are common avionics support equipment (ASE) items which are too complex technically to be transitioned to the inventory control point for acquisition. The ASE included is managed by NAVAIR and supported through the Navy Inventory Control Point. [P40A - 3 / ICP/HEADQUARTERS MANAGED SUPPORT EQUIPMENT]: This budget sub-line funds the procurement of end items of Peculiar Support Equipment (PSE) for out-of-production weapon systems, and Common Support Equipment (CSE) under the budget, procurement, and inventory control of the Naval Inventory Control Point (NAVICP). PSE and CSE end items are normally introduced into the fleet through NAVAIR development and initial procurement. When design is stabilized and procurement packages are available, these items then migrate to NAVICP management, and are funded under this sub-line. NAVICP currently manages over 11,000 individual repairable SE end items. This subline also funds initial outfitting of new construction ships. This sub-line also provides for the replacement of certain in-use PSE that are now marginally effective, due to obsolescence, or to the unavailability of associated logistics support. As a consequence, a logistically supportable replacement item must be designed and produced. This budget sub-line provides replacement of PSE support for out-of-production aircraft requirements only. In addition, this sub-line provides for the completion of the design and production of: (1) certain PSE items that were not funded during the production phase of the weapon system, and (2) modifications to out-of-production aircraft PSE to extend its useful service life. COMFRC CSE Investment funding is required to replace aging and obsolete support equipment that has reached it's useful life at all depot fleet response centers (FRCs) that is negatively impacting both component and aircraft production and throughput. Replacement of this aging and obsolete equipment will support the recovery of Ready Based Aircraft (RBA) rates in the fleet for both USN and USMC aircraft. [P40A - 4 / CONSOLIDATED AUTOMATED SUPPORT SYSTEM]: The electronic Consolidated Automated Support System (eCASS) program is chartered to replace CASS MainFrame (MF) test stations in the Navy's inventory. CASS, RTCASS, and eCASS continue to replace 30+ different types of computer-based Automatic Test Equipment (ATE) with a single modern family of testers (FOT), which are cost effective COTS/NDI-based ATE systems designated as the Navy's Standard Family of ATE. There are four configurations of eCASS that will be fielded, which support the entire spectrum of electronics testing requirements from direct current to light: Hybrid [tests digital and analog], Radio Frequency (RF) [tests radars and electronic warfare systems], Electro-Optics (EO3) [tests FLIRs and LASERs], and High Power [high energy radar systems]. Reconfigurable Transportable Consolidated Automated Support System (RTCASS) [a man-transportable version of RF CASS] is currently used for USMC forward deployed expeditionary maintenance. eCASS, with its advanced capability to support legacy and emerging platforms, and reduced logistics footprint, will replace the existing configurations of both CASS and RTCASS. The CASS FOT supports intermediate and depot level repair of aircraft, ship, submarine and other weapon system electronics. The CASS FOT performs fault detection and diagnostic testing of almost 3,000 different "black boxes" and associated circuit cards from F/A-18A/B/C/D/E/F, T-45, AV-8B, EA-6B, H-60, H-3, E-2, C-2, and V-22 as well as several NAVSEA/SPAWAR weapon systems. eCASS, which is now in full-rate production, reached IOC in in 4QFY17. CASS FOT replaces older, legacy ATE systems that have become obsolete (parts are no longer available) and too expensive to maintain. CASS FOT reduces afloat CVN ATE manning from 104 to 54 billets and reduces the size of the AVCAL (spare parts) from 30,000 to 3,500. CASS FOT also reduces technician Naval Enlisted Classifications (NECs) types, along with their training courses, from 32 to only 5. Each CVN will deploy with 14 eCASS stations and each LHD/LHA will deploy with two (2) stations. CASS FOT is utilized at intermediate and depot level maintenance facilities afloat and ashore to include Marine Aviation Logistics Squadrons (MALs), and Navy Fleet Readiness Centers (FRCs). RTCASS supports USMC V-22 and fixed wing aircraft. Current and budget year requirements are needed for CASS FOT support of new and transitioning weapon systems. New Requirements: F/A-18E/F/G (multiple), P-8 (multiple), E-2C/D (multiple), MIDS (multiple), V-22, ATFLIR (F/A-18), MH-60R/S (multiple systems), UH-1Y and AH-1Z, EGI (multiple aircraft). Transitioning Legacy Testers: 30 legacy automatic testers that support Navy and USMC tactical aircraft. In addition to production costs for the newest member of the CASS FOT (eCASS), program costs include: (1) incorporation of ECPs to permit systematic insertion of new technology to meet requirements of new weapon system avionics, (2) incorporation of test technologies required to offload Test Program Sets (TPSs) from legacy ATE, (3) efforts to ameliorate obsolescence and improve system reliability, maintainability and supportability, (4) rehosting existing TPSs to leverage increased capabilities of new software technology, (5) providing support of CASS FOT installations at fleet sites afloat and ashore, (6) maintaining items

Exhibit P-40, Budget Line Item Justification: PB 2020 Navy		Date: March 2019
Appropriation / Budget Activity / Budget Sub Activity: 1506N: Aircraft Procurement, Navy / BA 07: Aircraft Support Equip & Facilities / BSA 1: Aircraft Support Equip & Facilities		P-1 Line Item Number / Title: 0705 / Common Ground Equipment
ID Code (A=Service Ready, B=Not Service Ready): B	Program Elements for Code B Items: N/A	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
contractually required to be provided to contractors as Government Furnished Equipment, (7) maintaining supporting equipment used at CASS FOT laboratory and testing facilities, and (8) providing ancillary equipment necessary for functionality of CASS FOT.		
The purpose of the Fourth-Generation Electro-Optics (EO4) program is to replace aging and obsolete third-generation electro-optic (EO3) consoles with a modernized variant. There are 65 existing Third-Generation Electro-Optics (EO3) systems located at both shore-based and afloat activities. The EO3 systems are hosted by the Consolidated Automated Support System (CASS/eCASS) family of test systems and are used to provide for maintenance, diagnosis, and repair of the H-60R/S Multi-spectral Targeting System (MTS) and the F/A-18C/D/E/F Advanced Targeting Forward Looking Infrared (ATFLIR) weapon systems. The fielded EO3 systems are experiencing increased failure rates and reduced weapon system availability due to obsolescence issues. The EO4 program will replace the existing EO3 systems with a modernized next-generation electro-optics system that is designed and developed as either a new design or an Engineering Change Proposal (ECP) to the existing system, as determined by the competitive procurement process. The EO4 system will meet all existing weapons system requirements, as well as the anticipated emerging requirements of new or upgraded FLIR, laser and optical weapons systems. Full Rate Production (FRP) is planned in FY23. In addition to production costs, the EO4 program costs also include: (1) incorporation of ECPs to permit systematic insertion of new technology to meet requirements of emerging electro-optic weapon system avionics(2) incorporation of test technologies required to support emerging Test Program Sets (TPSs), (3) efforts to mitigate future obsolescence and improve system reliability, maintainability and supportability, (4) migration of existing TPSs from EO3 to EO4 to leverage increased capabilities of new software and technology, (5) providing support for EO4 installations at fleet sites afloat and ashore, (6) maintaining any contractually provided Government Furnished Equipment. The EO3 obsolescence issues and increased failure rates are causing degradation to H-60 MTS and F/A-18 ATFLIR weapons system readiness, which results in a Non-Mission Capable (NMC) aircraft status. Without resolution of these issues, availability of these critical weapons systems will continue to degrade. The Center for Naval Analyses (CNA) released a report in March 2016 that strongly recommended proceeding with a next-generation EO4 variant and presented a cost benefit analysis that projected significant (potentially > 60%) EO4 life-cycle cost savings. Historical data depicts that this fielded EO test capability results in \$140M of annual cost avoidance for H-60 MTS and F/A-18 ATFLIR weapons system support costs. [P40A - 5 / MOBILE MAINTENANCE FACILITIES]: The Mobile Facility (MF) Program provides the overarching management construct to ensure configuration management and life cycle logistics for the Fleet MF inventory. The program provides engineering design solutions, production efforts and life cycle logistics in support of Navy and Marine Corps logistics requirements. The primary component is the MF, a 20'x8'x8' tactical shelter that meets structural and dimensional requirements of the International Organization for Standardization (ISO), the American National Standards Institute (ANSI), and the American Society for Testing and Material (ASTM). Designed for a 20-year service life, MF's are heated and cooled by Environmental Control Units, which the program procures and logistically supports. In tactical environments, electrical power required to support MF complexes is provided by DOD standard generator sets. The Naval Air Systems Command (NAVAIR) acts as the Primary Inventory Control Activity (PICA) for multi-service procurement of NAVAIR MFs and related ancillary equipment. MF's are an Air Combat Element (ACE) Aviation Logistics (AVLOG) integration enabler, which make the Marine Air Ground Task Force (MAGTF) more responsive, agile, flexible and lethal via support and sustain operations in austere expeditionary environments. This supports the Naval Air Enterprise (NAE) Strategic Plan, Marine Corps Vision & Strategy 2025, and the USMC Long War Concept. MFs provide containerized aviation logistics support to the operational commander that can be rapidly deployed by all transportation modes to any location in the world. Operationally, MFs provide the Navy and Marine Corps with a quick response stand-alone capability to meet worldwide operational commitments. Economically, MFs reduce the need for MILCON and allow for worldwide transportability. Key Attributes: - Fully integrated and expeditionary logistics capability deployable via ship, airlift or truck. Operationally deployable aboard Transport-Aviation Logistics Support Ship (TAVB) And Maritime Prepositioning Ships (MPS). - Provides an effective, reliable and affordable self-contained aircraft maintenance capability (avionics, airframes, et. al.) - Provides for supply support functions (work space, parts storage & parts transport) [P40A - 6 / GENERAL SKILLS TRAINING]: General Skill Training provides for the procurement of aviation training systems, including training devices and associated courseware, which are not associated with a specific aircraft platform. As required, includes modifications and updates to reflect changes in technology or operating environment.		

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2020 Navy		Date: March 2019
Appropriation / Budget Activity / Budget Sub Activity: 1506N: Aircraft Procurement, Navy / BA 07: Aircraft Support Equip & Facilities / BSA 1: Aircraft Support Equip & Facilities		P-1 Line Item Number / Title: 0705 / Common Ground Equipment

Line Item MDAP/MAIS Code: N/A		
Major Programs: The 'A' School Program's function is to provide initial foundational and theoretical skills training to all Navy/Marine Corps Officer and Enlisted personnel. It provides training for 20 aviation ratings, supporting 196 Navy Enlisted Classifications (NEC), 96 USMC Military Occupational Specialties (MOS) and 17 USN/USMC Officer Designators/MOS's. The Maintenance Computer Based Training (MCBT) program's emphasis is on Fleet In-Service Training using Advance Skills Management System (ASM). ASM is a software application designed to identify job task requirements, assist in determining proficiencies, document qualification/certifications, track completed technical training and aviation maintenance personnel progress across an individual's career within their respective Maintenance Personnel Readiness (MPR)/Marine Corp Training & Readiness (T&R) in support of the Naval Aviation Enterprise (NAE). The Air Traffic Control (ATC) program provides the necessary simulated training for control tower operations, Carrier Air Traffic Control Center operations, Amphibious Air Traffic Control Center operations and shore based RADAR operations. The Landing Signal Officer (LSO) Program enables proficiency at visual aircraft recoveries while at sea, through the use of an aircraft carrier landing area trainer. The Naval Aviation Survival Training Program (NASTP) provides mission critical survival training systems and systems support for Navy and Marine Corps Aircrew and selected DoD personnel. The Air Combat Training Continuum (ACTC) Program provides the framework for post-Fleet Replacement Squadron (FRS) tactical aircrew training. The mission of ACTC is to provide Fleet, Joint, and Allied Force Commanders with quality combat-ready Naval Aviators capable of effectively executing in all mission areas. The Air Combat Training System (ACTS) is a Training Management System (TMS) that operates in a secure environment, ashore, and afloat, to deliver training content to the aviator as well as track and report his/her progress through the ACTC curriculum. Common ASW (CASW) produces airborne ASW training systems for officer and enlisted Aircrew for all ASW platforms (including P-3, H-60, P-8 and Triton) teaching critical analysis skills using computer courseware, table top trainers and ONI analysis products. [P40A - 7 / TOPSCENE]: TOPSCENE is a mission planning requirement that provides realistic 3D mission rehearsal, training, and reusable visual terrain databases to the Navy Fleet, Fleet Marine Forces, major war fighting commands, and unified commanders. TOPSCENE/Tactical Terrain Visualization System (TTVS) includes a range of programs including mission rehearsal tools, part simulation, and target database production tools. TOPSCENE/TTVS provides time critical mission rehearsal visual database of sensitive target areas for effective preparation of the battlefield. TOPSCENE/TTVS is a standalone application that may also be integrated with mission planning systems (JMPS) and contributes to satisfying the mission rehearsal requirement in the JMPS Operational Requirements Document. [P40A - 8 / OTHER FLIGHT TRAINING]: Other Flight Training procures upgrades/modernization to operational trainers not driven by retrofit changes to aircraft driven by an Operational Safety and Improvement Program (OSIP) or forward-fit changes made during the production of the aircraft classified as an investment cost. Also, trainer procurements to replace obsolete/beyond capability of repair trainers if classified as an investment cost are included. Navy Aviation Simulation Master Plan (NASMP) investments modernize multiple Navy platform training systems through obsolescence mitigation and fidelity improvements. Recent efforts through FY20 have focused on closing F/A-18 and H-60 training system performance gaps in accordance with the NASMP to enable higher quality Virtual-Constructive (VC) training. Follow-on NASMP requirements for FY20 through the FYDP will fund fidelity improvements, obsolescence upgrades and distributed mission training (DMT) connectivity across all Navy Aviation T/M/S trainers. NASMP procures expanded Integrated Training capabilities for the Fleet at the Naval Air Warfare Development Center (NAWDC) at Fallon, NV, through the Integrated Training Facility (ITF), Air Wing Training Facility (AWTF), and Air Defense Strike Group Facility (ADSGF). Expansion of the Navy Aviation Distributed Training Center (NADTC) will provide multi-level security and capability to conduct two distributed mission training events in parallel. The Headquarters, Marine Corps (HQMC) Federation will invest in modernization of USMC KC-130, H-1, CH-53, V-22, F/A-18C/D, AV-8B, Presidential Helicopters, Marine Air Ground Task Force (MAGTF) Integration, Aviation Command and Control, Close Air Support/Joint Terminal Attack Controller (CAS/JTAC), and common systems training devices as planned in the HQMC Aviation Plan (AVPLAN). The Aviation Distributed Virtual Training Environment (ADVTE) infrastructure, along with the Tactical Environment (TEn) software will be modernized for existing 2nd and 3rd Marine Air Wing (MAW) sites; while ADVTE capability will be procured and installed for 1st and 4th MAW sites. Live Virtual Constructive (LVC) requirements will establish persistent integrated training between Naval Forces (Navy and Marine Corps); Joint, Interagency, International, Multinational (JIIM) partners; AEGIS; Carrier Air Wing; Maritime; and Unmanned Aerial Systems (UAS) aircraft, equipment, platforms, systems, and their respective training assets by enabling an LVC capability with live aircraft on various Department of Defense range facilities. To facilitate LVC integration into the USMC training systems, Marine Virtual Warfare Center (MVWC), and Common Virtual Training Environment (CVAT) will be required. Training courseware and curriculums will be procured for transformational Marine Corps Aircraft.

Justification: AUTOMATIC TEST EQUIPMENT: FY20 provides funding to offload multiple weapon system Operation Test Program Sets (OTPSs) to CASS, RTCASS, eCASS and funds production of several High Speed Subsystem (HSS) ancillary assets. A/C COMMON SUPPORT EQUIPMENT: FY20 provides funding to procure: Shore 1000/2000 Gallon Lox Tanks, V35 Dynamometer Replacement, SD2 Replacement, 1500lb Utility Maintenance Crane, Diesel & Electric Servicing Platform, Medium Capacity MEPP, First Destination Transportation Cost for hardware, Engineering Change Proposals to address minor CSE performance and obsolescence issues and associated support cost. ICP/HEADQUARTERS MANAGED SUPPORT EQUIPMENT: FY20 provides funding for the procurement of end items of Peculiar Support Equipment(PSE) for out-of-production weapon systems and Common Support Equipment (CSE) under the budget, procurement and inventory control of Naval Inventory Control Point (NAVICP). CONSOLIDATED AUTOMATED SUPPORT SYSTEM: FY20 provides funding to procure (28) eCASS systems and associated ancillary equipment. MOBILE MAINTENANCE FACILITIES: Investment in the MF Program ensures a fully deployable logistics capability that can be deployed in a building block fashion across the battle space, whether at sea or on land, in support of aircraft maintenance and supply support operations. The Program of Record inventory objective is 3,531 MFs. This objective is based on the Marine Corps Table of Basic Allowance (TBA) and Weapon System Planning Documents (WSPD), which find their roots in the various operational plans supporting the National Defense Strategy. Current active inventory is 3,119 MFs. GENERAL SKILLS TRAINING: ACTS: Upgrades 50 Air Combat Training System (ACTS) expeditionary Laptops that provide a mobile ACTC training capability to deploying Aircrew. ATC: Provides for the upgrade and modernization of 39 15G34 Tower Simulation Systems (TSS) which provide realistic on-site Air Traffic Control training at Navy and Marine Air Stations and other facilities.

Line Item MDAP/MAIS Code: N/A		
NASTP: Upgrades the 9H1 Helo Hoist Trainer (Helo dunker) and 9F9A Parachute Over Water Survival Trainer (POST) to eliminate obsolescence issues and provide safe survival training for Aircrew. CASW: Upgrades the Interactive Multi-Sensors Analysis Trainer (IMAT) trainer courseware to incorporate the latest learning technology and ASW threat analysis. OTHER FLIGHT TRAINING: Increase in FY20 represents a significant investment in Naval Aviation training to reduce obsolescence, modernize existing hardware/software and provide a broad and robust increase in both individual and unit training capabilities at all levels and reduce operating costs to the Naval Aviation Enterprise. NASMP/LVC Programs: CNATRA: Upgrade Chief of Naval Aviation Training (CNATRA) Simulators and Ground Based Training Systems (GBTS). Investment is necessary to address obsolescence issues and keep CNATRA simulators operable for a continuous 16 hours a day, 252 days per year to meet pilot and Naval Flight Officer production goals. FY20 efforts include tech refresh of T-45C OFT at Kingsville, tech refresh of the T-45C aft cockpit Virtual Mission Training System (VMTS) OFT at Pensacola, and tech refresh of T-45C Virtual Mission Training System (VMTS) Instructor Ground Station (IGS) at Pensacola. NADTC and Distributed Mission Training: Procure Strike Distributed Mission Training (DMT) capability enhancements to ensure electronic warfare/threat simulation is common across all mission participants, resolve simulator network discrepancies, address platform trainer limitations that prevent repeatable distributed training capability, voice communications upgrades, and jamming. Includes updated hardware and software for Navy Aviation Distributed Training Center (NADTC) to provide simultaneous operations, expanded training support, and multi-level security architecture. NCTE: Procurement of Navy Continuous Training Environment (NCTE) nodes to increase Fleet Live, Virtual and Constructive training capabilities. Cross Domain Solutions: Upgrade to Cross Domain Solution (CDS) to meet multi-level security requirements for unit level and distributed mission training events. FA/EA-18: Procure F/A-18 cockpit hardware upgrades, aero model upgrades, own ship upgrades, console and display upgrades, and audio control upgrades necessary to meet NASMP end-state requirements for simulation fidelity, allowing more training and readiness to be conducted in simulators and reducing costs in the flying hour program. Procure F/A-18 Low Cost Trainers (LCTs) to address simulator training capacity requirements for Naval Integrated Fire Control (NIFC) distributed training and NASMP end-state requirements at East and West coast sites. LCTs will be integrated with common NCTE. P-8A: Upgrade P-8A training devices at NAS Jacksonville, FL and NAS Whidbey Island, WA to Windows 10 to meet cybersecurity requirements necessary to retain Authority to Operate (ATO) and Authority to Connect (ATC) to the NCTE. E-2D: Upgrade E-2D Hawkeye Integrated Training System (HITS) to Windows 10 to meet cybersecurity requirements necessary to retain Authority to Operate (ATO) and Authority to Connect (ATC) to the NCTE. Upgrade is required to enable Distributed Mission Training and support Fleet NIFC and LVC training requirements. Upgrade obsolete E-2D Simulated Maintenance Trainer (SMT). Upgrade common NGTS Synthetic Environment Generator to most up-to-date version to model friendly and adversary aircraft, ground units, ships, submarines, associated weapons, sensors and subsystems. E-6B: Modernize the E-6 Operational Flight Trainer (OFT) to increase maintainability and availability for Fleet training requirements which include maneuvers and flight situations that cannot be performed safely in the aircraft. MH-53E: Modernize MH-53 Airborne Mine Counter Measures (AMCM) Stream and Recovery Module (ASRM) to increase Fleet Anti Mine training capability. Naval Air Warfare Development Facility (NAWDC)/LVC/Air Defense Strike Group Facility (ADSGF): Procure LCTs for fielding and integration within the Integrated Training Facility (ITF) Fallon, NV and integrate training system architectures at both the ITF and ADSGF.

HQMC Federation Programs: FA-18C/D: Modernize F/A-18C/D Tactical Operational Flight Trainers (TOFT) to reduce obsolescence, increase maintainability/operability and to provide increased Training and Readiness capabilities for Marine Aircrews. Increases in trainer T&R can provide for the reduction in aircraft flying hour costs and improve mission readiness. MV-22: MV-22 Containerized Flight Training Device (CFTD) modernization will upgrade obsolete components and improve trainer availability (less down time). Over 50% of Aircrew flight training is conducted in the CFTD directly reducing flying hour costs and improving mission readiness of aircraft. Aviation Distributed Virtual Training Environment (ADVTE): Expansion and modernization of ADVTE, to include implementation of a Common Virtual Training Area (CVTA), upgrading of the Tactical Environment network (Ten), Marine Virtual Warfare Center (MVWC) and Common Virtual Training Environment (CVAT).

(†) indicates the presence of a P-5a

Footnotes:

- (1) Due to performance issues, Vibration Analyzer program scope changed from replacing the legacy test set to modifying the test set to remove obsolete parts resulting in a unit cost and quantity adjustment. FY18 unit cost includes non-recurring efforts to identify replacement parts and update technical documentation.
- (2) FY18 Platform Support - SD2 Replacement procuring Pilot Production Units that will undergo Test and Evaluation. FY20 Platform Support - SD2 Replacement First Production Year awarded upon completion of Testing.
- (3) FY20 Platform Support - 1500lb Utility Maintenance Crane procuring Pilot Production Units that will undergo Test and Evaluation. FY22 Platform Support - 1500lb Utility Maintenance Crane First Production Year awarded upon completion of Testing.
- (4) Transportation Code in prior years was budgeted under Production Engineering Support. Transportation Cost are not included in Unit Price in prior years or within the Future Year Defense Plan (FYDP).
- (5) Engineering Change Proposal (ECP) line created to address CSE emerging obsolescence issues identified requiring immediate support to maintain fleet capability.
- (6) The FY19 non-recurring for 2.6 COMM/NAV ID, 2.9 Cryogenics, 2.10 Hydraulics, and 2.13 Electrical includes technical drawings, maintenance plans, contractor performed testing, technical manuals and provisioning data.

^(†) indicates the presence of a P-21

Footnotes:

⁽⁷⁾ The Vibration Analyzer program change to implement an ECP to remove obsolete parts resulted in a contract method change to award a sole source contract to the Original Equipment Manufacturer, ACES Systems. The test set is proprietary to ACES Systems who is the only source capable of implementing the required changes.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

(†) indicates the presence of a P-5a																				
Footnotes:																				
(8) There are four (4) different configurations of eCASS with the RF configuration being the costliest. In FY19 the total quantity of eCASS stations consists of a higher number of RF stations which led to higher unit cost.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.																				
(†) indicates the presence of a P-5a																				
Footnotes:																				
⁽⁹⁾ Applies to all Hardware Upgrades/Modernization efforts: Total quantity and cost of device Upgrades/Modernization may vary year to year. These Upgrades/Modernization efforts do not increase inventory since they are on existing devices (cost of Upgrading/Modernization of individual devices may vary due to various factors such as age, condition or current device capability) except for the following line items that do increase inventory quantities: 1.8, 1.28, 1.37, 1.45.																				
⁽¹⁰⁾ ATC - Standard Terminal Automation Replacement System (STARS) in Advanced Radar Air Traffic Control (ARATC) Upgrades																				
⁽¹¹⁾ Name changed from Mixed Gas Hypoxia Chambers to Normobaric Hypoxia Chambers.																				
⁽¹²⁾ Name changed from Mixed Gas Hypoxia Chamber Upgrades to Normobaric Hypoxia Chamber Upgrades

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.																				
(†) indicates the presence of a P-5a																				
Footnotes:																				
(13) Applies to all Hardware Upgrades/Modernization efforts: Total quantity and cost of device Upgrades/Modernization may vary year to year. These Upgrades/Modernization efforts do not increase inventory since they are on existing devices (cost of Upgrading/Modernization of individual devices may vary due to various factors such as age, condition or current device capability) except for the following line items that do increase inventory quantities: 1.30, 1.52, 1.71, 1.76, 1.131, 1.137, 1.140.																				
(14) USMC Fed Sim - Aviation Dist Virtual Trng Environ (ADVTE) Modernization. ADVTE is a System-of-System consisting of Marine Aviation Training System (ATS) training devices, centralized Network Exercise Control Centers and networking equipment necessary to deliver virtual and constructive simulation based training. FY19 contract is base award with FY20 and out being options. FY19 funding will be used to modernize existing ADVTE equipment and components initially fielded in March 2013 at 2nd and 3rd Marine Aircraft Wing (MAW) Aviation Training Sites (ATS). The increase in cost from FY19 to FY20 represents the current FY20 cost estimate to install new ADVTE capability at 1st MAW. The USMC budget has funding in FY21-23 to implement the Common Virtual Training Area (CVTA) that will be used across the ADVTE network.																				
(15) FY18 Congressional Add funding supporting HQMC FA-18C/D Training Systems.																				
(16) FY18 Congressional Add funding supporting HQMC FA-18C/D Training Systems.																				
(17) Instructor Operator Station (IOS)-Brief Debrief Station (BDS)-Mission Operations Center (MOC)																				
(18) NASMP - CNATRA - T-45 Virtual Mission Training System (VMTS) Instructor Ground Station (IGS) Upgrades																				
(19) This line funds procurement of various equipment necessary to create an Integrated Training Facility at the Naval Aviation Warfighting Development Center (NAWDC), Fallon. Fluctuations in funding from year to year are based on the individual Fleet training requirements for multiple aircraft Type/Model/Series.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description: Calibration Equipment Description: The objective of the Metrology/Calibration (METCAL) Program is to maintain required accuracy and consistency in Navy measurements. This ensures the required measurement accuracy of Test and Measurement Systems (TAMS) and Aviation Support Equipment (SE) used to test, repair and maintain Aviation Weapon Systems is adequate. Calibration is an on-cycle maintenance action and can be described as the comparison of a measurement device/system of unverified/unknown accuracy (TAMS or SE) to a device of known and greater accuracy (Calibration Standard). Fleet Readiness Centers (FRC) Support Equipment (SE)/Industrial Equipment Description: The Objective of the FRC SE/Industrial Equipment Investment program is to increase Ready Basic Aircraft (RBA). The purchase of equipment for the Fleet Readiness Centers will increase the agility, capability, and capacity to perform the critical mission of repair, overhaul and modification of aircraft, engines, and components while maintaining the organic industrial capacity to meet current and future requirements.

Justification: Calibration Equipment: Funds are used to procure Calibration Standards (CALSTDs) and ancillary equipment for Aviation Fleet Intermediate Calibration Activities, Fleet Training Activities, Aviation Navy Calibration Laboratories (NCLs), and the Navy Primary Standards Laboratory (NPSL). CALSTDs procured for Fleet 'I' level use are to replace obsolete and/or irreparable equipment, expand technical measurement capabilities to decrease Depot support costs, reduce out-of-service turn around times, provide enhanced forward deployed geographic support and reduce/control the Naval Air Systems Command (NAVAIR) cost of ownership associated with Calibration. Fleet 'I' level calibration activities support 70% of the total Fleet calibration workload. Maintenance of Fleet calibration capability through this funding results in the release of more expensive Depot level support man-hours for more complex calibration maintenance and calibrations where economy of scale costs dictate single site or geographic calibration center capability. CALSTDs procured for NCLs and the NPSL allow for the automation and improvement of calibration procedures in order to reduce Fleet asset out-of-service and Turn around Time, expand technical calibration capabilities for enhanced in-theater Fleet support, and replace obsolete and high support cost CALSTDs. FRC SE/Industrial Equipment: There are 71,000 pieces of equipment at the three industrial FRC sites. 59% are greater than 15 years old and 39% are greater than 25 years old. Capital equipment at the industrial FRCs average more than 25 years in age compared to its 10-year depreciation life. The APN-7 funding will be used to purchase the equipment necessary to support 4th and 5th generation aircraft and component depot level repairs. Funding will be used to purchase capital equipment, non-capital equipment, and tooling, replacing obsolete and/or irreparable equipment, expanding technical capabilities decreasing Depot support costs, and reducing out-of-service turnaround times. Equipment investment is an essential element of the 10 to 15-year infrastructure optimization plan in development. The equipment investment plan will move the Depots from an analog to digital infrastructure allowing for increased automation and improvement of procedures increasing capability and production throughput. This funding will help bring the Commander, Fleet Readiness Centers industrial FRC budgets more in-line with the Navy's six percent reinvestment requirement.

Description: The WAR CONSUMABLES P-1 line item has two subcategories: Common Aircraft Ancillary Equipment (AAE) and Aerial Refueling Stores (ARS). The Common AAE program procures, modifies and upgrades common bomb racks, peculiar bomb racks, missile launchers and related support for USN/USMC platforms. The ARS program procures, modifies, and upgrades aerial refueling stores, External Fuel Tanks (EFT) and related support. COMMON AIRCRAFT ANCILLARY EQUIPMENT (AAE) As directed by OPNAVINST 8000.16B (Naval Ordnance Maintenance Management Program (NOMMP)), the appropriation provides for procurement of new AAE to replace attrition losses, provides for production engineering support and satisfies commonality policy goals set forth by the Navy's Strike Warfare Master Plan. Specifically, the following equipment is funded as AAE within the War Consumables budget: - Upgrades, modifications and reliability improvements to common and peculiar bomb rack. - Upgrades, modifications and reliability improvements to various missile launchers and associated equipment that support the following platforms: F/A-18 A-F, EA-18G, AV-8B, P-3C, EA-6B, AH-1W/Z, UH-1N/Y and MH-60R/S. - Upgrades, modifications and reliability improvements to Pure Air Generating Systems (PAGS). There are two variants of PAGS, Marotta Pure Air Compression Technology (MPACT)/High Pressure Pure Air Generators (HiPPAG), currently in use as on-board coolant generator for missile launchers carrying infrared (IR) seeking missiles. - The BRU-55 is an upgrade to the BRU-33 CVER (Canted Vertical), with electronic upgrades, which allows for the carriage and release of two MIL-STD-1760 weapons from a single F/A-18 A-F station. The BRU-55 was developed as part of the Mk-82 JDAM program. - Digital Improved Triple Ejector Rack (DITER) increases the capability of the existing BRU-42 for the AV-8B by adding a smart carriage capability for weapons such as the Joint Direct Attack Munition (JDAM). - A Type 2 carriage is required for operation and carriage of the Small Diameter Bomb II (SDB II) weapon on the threshold aircrafts F-35B and F-35C and the objective aircraft F/A-18 E/F for the Department of the Navy (DoN). DoN will be using BRU-61 to support the SDB II warfighter requirements, Initial Operating Capability (IOC), and schoolhouse requirements. - The LAU-127 is to replace launchers that are beyond capable maintenance (BCM) and are removed from the fleet. AERIAL REFUELING STORES (ARS) The ARS program finances Aerial Refueling Systems, EFT and related support. Requirements are determined by an inventory objective, which supports peacetime/wartime needs. Aircraft equipped with the A/ A42R-1 Aerial Refueling Stores (ARS) are required for all carrier based tanking missions overhead tanking (primarily recovery focused), strike and yo-yo tanking. Total reliance on the ARS and integration in the

ID Code (A=Service Ready, B=Not Service Ready): B	Program Elements for Code B Items: 0204164N, 0204161N, 0604329N	Other Related Program Elements: 0205633N
Line Item MDAP/MAIS Code: N/A		
F/A-18E/F requires substantial improvements to the existing stores to ensure their viability through 2040. Investigation of major subsystems in pursuit of life cycle cost savings, mitigation of flight safety risk and reliability enhancements have identified a large dollar value return on investment for service life extension, reduction in flight safety risk and areas where reliability improvements can be realized. - ARS upgrade to the avionics/electrical system - ARS upgrade to the drogue system - Replacement of External Fuel Tanks for F/A-18 (A-D variants), required to meet the Fleet Response plan and replace original equipment due to fatigue issues. - ARS Support Equipment - External Fuel Tank Support Equipment - Provides production support, modification, and modernization of ARS and EFT products.

Footnotes:

- (1) Fluctuations in funding from year to year are based on the required modifications and upgrades to support multiple aircraft T/M/S. Additionally, any decrease in funding causes increased requirements in the out years to maintain fleet readiness. The fluctuations in requirements and funding forces the budget line to exceed the OSD standard inflation rate.
- (2) Fluctuations in funding from year to year are based on the required modifications and upgrades to support multiple aircraft T/M/S. Additionally, any decrease in funding causes increased requirements in the out years to maintain fleet readiness. The fluctuations in requirements and funding forces the budget line to exceed the OSD standard inflation rate.
- (3) FY 2020 increase in BRU-61 to support the SDB II warfighter requirements, Initial Operating Capability (IOC), and schoolhouse requirements.
- (4) Fluctuations in funding from year to year are based on the required modifications and upgrades to support multiple aircraft T/M/S. Additionally, any decrease in funding causes increased requirements in the out years to maintain fleet readiness. The fluctuations in requirements and funding forces the budget line to exceed the OSD standard inflation rate.
- (5) The amount identified against this cost element reflects total prior year funding associated with equipment no longer procured.
- (6) Fluctuations in funding from year to year are based on the required modifications and upgrades to support multiple aircraft T/M/S. Additionally, any decrease in funding causes increased requirements in the out years to maintain fleet readiness. The fluctuations in requirements and funding forces the budget line to exceed the OSD standard inflation rate.

Description:

The Other Production Charges line provides funds for miscellaneous production support and testing services, aircraft pods, and instrumentation packages supporting tactical aircrew combat training and mobile sea range systems. The budget request supports the following efforts:

TACTICAL COMBAT TRAINING SYSTEM (TCTS):

The TCTS program will procure fixed, transportable and mobile range equipment for the Navy for both shore-based (aircrew training) and deployable (ship/aircrew training) applications. TCTS instrumentation will transmit and track instrumented exercise participants and events (e.g., weapons engagements), and provide accurate, realistic, and timely exercise feedback. TCTS is building on technology developed for existing tactical training range systems. Increment I procurement primarily acquires airborne instrumentation Participant Subsystems (PS) for F/A-18 and other tactical aircraft via Airborne Subsystems (AS). Beginning in FY 2021, Increment II will procure new PS to include Airborne Subsystem (AS) to provide encryption capability for Fleet training exercises. The program will also procure Peculiar Support Equipment (PSE).

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

Footnotes:

⁽¹⁾ Participant Subsystems (PS) for TCTS Increment II was broken down to further define the specific instrumentation form factors required for each aircraft Type/Model/Series. Participant Subsystems (PS) consists of Airborne Subsystem (AS), Internal Mount (IM), Rack Subsystem Internal Mount (RS) and Peculiar Support Equipment (PSE). Changes to quantities and unit costs for procurements beginning in FY21 reflect detailed breakout of form factors, latest cost estimates, and Fleet fielding plan.

Description: This line finances the movement of newly procured equipment and material from the contractor's plant to the initial point of receipt by the Government.												
Justification: The FY 2020 funding request was reduced by \$1.009M to account for the availability of prior year execution balances. FY 2020 funds the First Destination Transportation requirements.
