<b>LIST OF FIGURES</b> .....	xvi
<b>LIST OF TABLES</b> .....	xxvi
<b>PREFACE</b> .....	xxix
<b>CHAPTER 1. ROCKS AND MINERALS</b> .....	1-1
Section I. Minerals .....	1-1
Physical properties .....	1-1
Hardness .....	1-1
Crystal form .....	1-2
Cleavage .....	1-2
Fracture .....	1-3
Luster and color .....	1-3
Streak .....	1-3
Specific gravity .....	1-3
Common rock-forming minerals .....	1-3
Quartz .....	1-4
Feldspars .....	1-4
Micas .....	1-4
Amphiboles .....	1-4
Pyroxenes .....	1-4
Olivine .....	1-4
Chlorite .....	1-4
Calcite .....	1-5
Dolomite .....	1-5
Limonite .....	1-5
Clay minerals .....	1-5
Section II. Rocks .....	1-5
Formation processes .....	1-5
Igneous .....	1-6
Sedimentary .....	1-6
Metamorphic .....	1-8

---

DISTRIBUTION RESTRICTION: Approved for public release; distribution is unlimited.

*\*This manual supersedes FM 5-541, 27 May 1986.*

- Classification . . . . .
- Igneous . . . . .
- Granite . . . . .
- Felsite . . . . .
- Gabbro and diorite . . . . .
- Basalt . . . . .
- Obsidian . . . . .
- Pumice . . . . .
- Scoria . . . . .
- Sedimentary . . . . .
- Conglomerate and breccia . . . . .
- Sandstone . . . . .
- Shale . . . . .
- Tuff . . . . .
- Limestones . . . . .
- Dolomite . . . . .
- Chert . . . . .
- Metamorphic . . . . .
- Slate . . . . .
- Schist . . . . .
- Gneiss . . . . .
- Quartzite . . . . .
- Marble . . . . .
- Identification . . . . .
- Field identification . . . . .
- General categories . . . . .
- Foliated . . . . .
- Very fine-grained . . . . .
- Coarse-grained . . . . .
- Engineering properties . . . . .
- Toughness . . . . .
- Hardness . . . . .
- Durability . . . . .
- Crushed shape . . . . .
- Chemical stability . . . . .
- Surface character . . . . .
- Density . . . . .

**CHAPTER 2. STRUCTURAL GEOLOGY**

- Section I. Structural features in sedimentary rocks . . . . .
- Bedding planes . . . . .
- Folds. . . . .
- Types . . . . .
- Symmetry . . . . .
- Cleavage and schistosity . . . . .
- Faults. . . . .
- Recognition . . . . .
- Terminology . . . . .
- Types. . . . .
- Joints . . . . .
- Formation . . . . .

	<b>Page</b>
Significance .....	2-9
Strike and dip .....	2-10
Section II. Geologic maps .....	2-11
Types .....	2-11
Bedrock or aerial maps .....	2-13
Surficial maps .....	2-13
Special purpose maps .....	2-13
Symbols. ....	2-14
Formations .....	2-14
Contacts .....	2-14
Fault lines and fold axes .....	2-14
Attitudes .....	2-14
Cross sections .....	2-14
Outcrop patterns .....	2-14
Horizontal strata .....	2-19
Inclined strata .....	2-22
Domes .....	2-22
Basins .....	2-22
Plunging folds .....	2-22
Faults .....	2-22
Normal and reverse .....	2-22
Thrust .....	2-23
Intrusions .....	2-23
Surficial deposits .....	2-23
Section III. Engineering considerations .....	2-23
Rock distribution .....	2-23
Rock fragmentation .....	2-23
Rock slides and slumps .....	2-24
Weak rocks .....	2-25
Fault zones .....	2-25
Groundwater .....	2-25
Road cut alignment .....	2-26
Quarry faces .....	2-26
Rock deformation .....	2-26
Earthquakes (fault movements) .....	2-26
<b>CHAPTER 3. SURFICIAL GEOLOGY .....</b>	<b>3-1</b>
Fluvial process .....	3-1
Drainage patterns .....	3-1
Rectangular .....	3-2
Parallel .....	3-2
Dendritic .....	3-2
Trellis .....	3-2
Radial .....	3-2
Annular .....	3-2
Braided .....	3-2
Density .....	3-2
Stream evolution .....	3-2
Youth .....	3-2

	<b>Page</b>
Maturity . . . . .	3-5
Old age . . . . .	3-5
Stream deposits . . . . .	3-6
Point bars . . . . .	3-6
Channel bars . . . . .	3-10
Oxbow lakes . . . . .	3-10
Natural levees . . . . .	3-10
Backswamps/floodplains . . . . .	3-14
Alluvial terraces . . . . .	3-14
Deltas . . . . .	3-14
Alluvial fans . . . . .	3-17
Glacial process . . . . .	3-18
Types of glaciation . . . . .	3-18
Continental . . . . .	3-18
Alpine . . . . .	3-18
Glacial deposits . . . . .	3-18
Stratified . . . . .	3-18
Unstratified . . . . .	3-27
Eolian process . . . . .	3-28
Types of eolian erosion . . . . .	3-30
Deflation . . . . .	3-30
Abrasion . . . . .	3-30
Modes of transportation . . . . .	3-30
Bed load . . . . .	3-30
Suspended load . . . . .	3-30
Eolian features . . . . .	3-32
Lag deposits or desert pavement . . . . .	3-32
Sand dunes . . . . .	3-33
Loess deposits . . . . .	3-35
Sources of construction aggregate . . . . .	3-36
<b>CHAPTER 4. SOIL FORMATION AND CHARACTERISTICS . . . . .</b>	<b>4-1</b>
Section I. Soil formation . . . . .	4-1
Weathering . . . . .	4-1
Physical processes . . . . .	4-1
Unloading . . . . .	4-1
Frost action . . . . .	4-1
Organism growth . . . . .	4-2
Temperature changes . . . . .	4-2
Crystal growth . . . . .	4-2
Abrasion . . . . .	4-2
Chemical processes . . . . .	4-2
Oxidation . . . . .	4-2
Hydration . . . . .	4-2
Hydrolysis . . . . .	4-2
Carbonation . . . . .	4-2
Solution . . . . .	4-2
Discontinuities and weathering . . . . .	4-2
Effects of climate . . . . .	4-3
Effects on relief features . . . . .	4-3
Soil formation methods . . . . .	4-3

	Page
Residual soil . . . . .	4-3
Transported soil . . . . .	4-3
Soil profiles . . . . .	4-4
<b>Section II. Soil Characteristics . . . . .</b>	<b>4-5</b>
Physical properties . . . . .	4-5
Grain or particle size . . . . .	4-6
Determination . . . . .	4-6
Reports . . . . .	4-7
Gradation . . . . .	4-7
Effective size . . . . .	4-7
Coefficient of uniformity . . . . .	4-7
Coefficient of curvature . . . . .	4-7
Well-graded soil . . . . .	4-7
Poorly graded soil . . . . .	4-10
Bearing capacity . . . . .	4-10
Particle shape . . . . .	4-10
Bulky . . . . .	4-10
Platy . . . . .	4-12
Needlelike . . . . .	4-12
Structure . . . . .	4-12
Specific gravity . . . . .	4-12
Volume ratios . . . . .	4-12
Weight ratios . . . . .	4-13
Relative density . . . . .	4-14
Soil-moisture conditions . . . . .	4-14
Adsorbed water . . . . .	4-15
Plasticity and cohesion . . . . .	4-15
Clay minerals and base exchange . . . . .	4-16
Capillary phenomena . . . . .	4-16
Shrinkage . . . . .	4-17
Swelling and slaking . . . . .	4-17
Bulking of sands . . . . .	4-17
Consistency (Atterberg) limits . . . . .	4-17
Test procedures . . . . .	4-18
Liquid limit . . . . .	4-18
Plastic limit . . . . .	4-18
Plasticity index . . . . .	4-18
<b>CHAPTER 5. SOIL CLASSIFICATION . . . . .</b>	<b>5-1</b>
Section I. Unified Soil Classification System . . . . .	5-1
Soil categories . . . . .	5-1
Course-grained soils . . . . .	5-2
Fine-grained soils . . . . .	5-4
Highly organic soils . . . . .	5-5
Laboratory testing . . . . .	5-5
Desirable soil properties for roads and airfields . . . . .	5-5
Strength . . . . .	5-6
Coarse-grained soils . . . . .	5-6
Fine-grained soils . . . . .	5-6
Frost action . . . . .	5-13

	<b>Page</b>
Compression .....	5-13
Drainage .....	5-14
Compaction .....	5-14
Desirable soil properties for embankments and foundations .....	5-14
Soil graphics .....	5-17
Field identification .....	5-17
Procedures .....	5-17
Equipment .....	5-18
Factors .....	5-18
Tests .....	5-19
Visual examination test .....	5-19
Breaking or dry strength test .....	5-21
Roll or thread test .....	5-22
Ribbon test .....	5-23
Wet shaking test .....	5-23
Odor test .....	5-24
Bite or grit test .....	5-24
Slaking test .....	5-25
Acid test .....	5-25
Shine test .....	5-25
Feel test .....	5-25
Hasty field identification .....	5-25
Optimum moisture content (OMC) .....	5-29
Section II. Other soil classification systems .....	5-29
Commonly used systems .....	5-29
Revised Public Roads System .....	5-29
Basis .....	5-30
Procedure .....	5-30
Agricultural Soil Classification System .....	5-31
Textural classification .....	5-31
Pedological classification .....	5-31
Geological soil classification .....	5-32
Typical soil classification .....	5-32
Unified Soil Classification System .....	5-33
Soil number 1 .....	5-33
Soil number 2 .....	5-33
Soil number 3 .....	5-33
Soil number 4 .....	5-33
Revised Public Roads Classification System .....	5-35
Soil number 1 .....	5-35
Soil number 2 .....	5-35
Soil number 3 .....	5-35
Soil number 4 .....	5-36
Agricultural Soil Classification System .....	5-36
Soil number 1 .....	5-36
Soil number 2 .....	5-36
Soil number 3 .....	5-36
Soil number 4 .....	5-36
Comparison of classification systems .....	5-36

	<b>Page</b>
<b>CHAPTER 6. CONCEPTS OF SOIL ENGINEERING</b> .....	6-1
Section I. Settlement .....	6-1
Factors .....	6-1
Compressibility .....	6-1
Compressive load behavior .....	6-1
Cohesionless soils .....	6-2
Consolidation .....	6-2
Cohesive soils .....	6-2
Consolidation tests .....	6-2
Section II. Shearing resistance .....	6-3
Importance .....	6-3
Laboratory tests .....	6-3
California Bearing Ratio .....	6-3
Airfield Index (AI) .....	6-4
Airfield cone penetrometer .....	6-4
Description .....	6-4
Operation .....	6-4
Maintenance .....	6-5
Soil-strength evaluation .....	6-5
Fine-grained soils .....	6-5
Coarse-grained soils .....	6-6
Correlation between CBR and AI .....	6-6
Section III. Bearing capacity .....	6-7
Importance .....	6-7
Foundations .....	6-7
Shallow foundations .....	6-7
Deep foundations .....	6-8
Piles .....	6-8
Piers .....	6-9
Section IV. Earth-retaining structures .....	6-9
Purpose .....	6-9
Types .....	6-9
Retaining walls .....	6-9
Backfills .....	6-11
Drainage .....	6-11
Frost action .....	6-13
Timber crib .....	6-13
Other timber walls .....	6-14
Gabions .....	6-14
Excavation bracing system .....	6-16
Shallow excavations .....	6-16
Narrow shallow excavations .....	6-16
Wide shallow excavations .....	6-17
<b>CHAPTER 7. MOVEMENT OF WATER THROUGH SOILS</b> .....	7-1
Section I. Water .....	7-1
Sources of water .....	7-1
Surface water .....	7-1

Subsurface water . . . . . 7-1

    Free, or gravitational, water . . . . . 7-1

    Hygroscopic moisture . . . . . 7-2

    Capillary moisture . . . . . 7-2

Permeability . . . . . 7-4

Drainage characteristics . . . . . 7-4

    Well-drained soils . . . . . 7-4

    Poorly drained soils . . . . . 7-6

    Impervious soils . . . . . 7-6

Filter design . . . . . 7-6

Section II. Frost action . . . . . 7-7

    Problems . . . . . 7-7

        Freezing . . . . . 7-7

        Thawing . . . . . 7-8

    Conditions . . . . . 7-10

    Effects . . . . . 7-12

        Heaving . . . . . 7-12

        Loss of pavement strength . . . . . 7-12

            Rigid pavements (concrete) . . . . . 7-13

            Flexible bituminous pavements . . . . . 7-13

        Slopes . . . . . 7-13

    Investigational procedures . . . . . 7-13

    Control . . . . . 7-14

        Base composition requirements . . . . . 7-14

        Pavement design . . . . . 7-16

            Control of surface deformation . . . . . 7-16

            Provision of adequate bearing capacity . . . . . 7-17

**CHAPTER 8. SOIL COMPACTION . . . . . 8-1**

Section I. Soil properties affected by compaction . . . . . 8-1

    Advantages of soil compaction . . . . . 8-1

    Settlement . . . . . 8-1

    Shearing resistance . . . . . 8-2

    Movement of water . . . . . 8-2

    Volume change . . . . . 8-2

Section II. Design considerations . . . . . 8-2

    Moisture-density relationships . . . . . 8-2

        Compaction characteristics of various soils . . . . . 8-3

        Other factors that influence density . . . . . 8-4

        Addition of water to soil . . . . . 8-5

        Handling wet soils . . . . . 8-6

        Variation of compactive effort . . . . . 8-6

    Compaction specifications . . . . . 8-6

        CBR design procedure . . . . . 8-7

        Subgrade compaction . . . . . 8-9

            Expansive clays . . . . . 8-11

            Clays and organic soils . . . . . 8-11

            Silts . . . . . 8-11

        Base compaction . . . . . 8-11

	Page
Maintenance of soil density .....	8-11
<b>Section III. Construction Procedures .....</b>	<b>8-12</b>
General considerations .....	8-12
Selection of materials .....	8-12
Dumping and spreading .....	8-12
Compaction of embankments .....	8-15
Density determinations .....	8-15
Field control of compaction .....	8-16
Determination of moisture content .....	8-16
Field examination .....	8-16
Field drying .....	8-16
"Speedy" moisture content test .....	8-17
Nuclear densimeter .....	8-17
Determination of water to be added .....	8-17
Compaction equipment .....	8-17
Pneumatic-tired roller .....	8-18
Pneumatic roller .....	8-18
Self-propelled, pneumatic-tired roller .....	8-18
Sheepsfoot roller .....	8-19
Tamping-foot roller .....	8-20
Steel-wheeled roller .....	8-20
Self-propelled, smooth-drum vibratory roller .....	8-20
Other equipment .....	8-20
Compactor selection .....	8-20
Availability .....	8-21
Efficiency .....	8-21
<b>Section IV. Quality control .....</b>	<b>8-21</b>
Purpose .....	8-21
Quality-control plan .....	8-22
Lot size .....	8-22
Random sampling .....	8-22
Test tolerance .....	8-22
Penalty system .....	8-23
Theater-of-operations quality control .....	8-23
Corrective actions .....	8-23
Overcompaction .....	8-23
Undercompaction .....	8-23
Too wet .....	8-24
Too dry .....	8-24
<b>CHAPTER 9. SOIL STABILIZATION FOR ROADS AND AIRFIELDS .....</b>	<b>9-1</b>
<b>Section I. Methods of stabilization .....</b>	<b>9-1</b>
Basic considerations .....	9-1
Mechanical stabilization .....	9-2
Uses .....	9-3
Objective .....	9-3
Limitations .....	9-3
Soil base requirements .....	9-4
Soil surface requirements .....	9-4
Proportioning .....	9-4

	<b>Page</b>
Use of local materials . . . . .	9-4
Blending . . . . .	9-5
Numerical proportioning . . . . .	9-5
Specified gradation . . . . .	9-5
Graphical proportioning . . . . .	9-5
Arithmetical proportioning . . . . .	9-6
Plasticity requirements . . . . .	9-8
Field proportioning . . . . .	9-8
Waterproofing . . . . .	9-8
Sources of water . . . . .	9-9
Objectives of waterproofer . . . . .	9-9
Chemical admixture stabilization . . . . .	9-10
Cement . . . . .	9-10
Modification . . . . .	9-11
Stabilization . . . . .	9-14
Lime . . . . .	9-18
Modification . . . . .	9-19
Stabilization . . . . .	9-19
Other additives . . . . .	9-21
Fly-ash . . . . .	9-21
Class C . . . . .	9-21
Class F . . . . .	9-21
Lime-fly ash mixtures . . . . .	9-21
Lime-cement-fly ash (LCF) mixtures . . . . .	9-22
Bituminous materials . . . . .	9-22
Soil gradation . . . . .	9-22
Types of bitumen . . . . .	9-22
Mix design . . . . .	9-23
Section II. Design concepts . . . . .	9-26
Structural categories . . . . .	9-26
Stabilized pavement design procedure . . . . .	9-28
Thickness design procedures . . . . .	9-29
Roads . . . . .	9-30
Single-layer . . . . .	9-30
Multilayer . . . . .	9-32
Airfields . . . . .	9-36
Single-layer . . . . .	9-36
Multilayer . . . . .	9-42
Examples of design . . . . .	9-45
Example 1 . . . . .	9-45
Example 2 . . . . .	9-46
Example 3 . . . . .	9-47
Example 4 . . . . .	9-47
Example 5 . . . . .	9-48
Example 6 . . . . .	9-48
Theater-of-operations airfield considerations . . . . .	9-48
Functions of soil stabilization . . . . .	9-48
Design requirements for strength improvement . . . . .	9-51

	<b>Page</b>
Section III. Dust control .....	9-54
Effects of dust .....	9-54
Dust formation .....	9-54
Dust palliatives .....	9-55
Intensity of area use .....	9-55
Nontraffic areas .....	9-55
Occasional-traffic areas .....	9-55
Traffic areas .....	9-56
Topography .....	9-56
Soil type .....	9-56
Soil surface features .....	9-56
Loose and dry or slightly damp soil .....	9-56
Loose and wet or scurry soil .....	9-56
Firm and dry or slightly damp soil .....	9-56
Firm and wet soil .....	9-56
Climate .....	9-56
Dust-control methods .....	9-57
Agronomic .....	9-57
Grasses .....	9-57
Shelter belts .....	9-57
Rough tillage .....	9-57
Surface penetrant .....	9-57
Bitumens .....	9-58
Resins .....	9-59
Salts .....	9-59
Water .....	9-60
Admix .....	9-60
In-place admixing .....	9-60
Off-site admixing .....	9-61
Surface blanket .....	9-61
Minerals (aggregates) .....	9-62
Prefabricated membrane .....	9-62
Prefabricated mesh .....	9-62
Bituminous liquid .....	9-62
Polyvinyl acetate (DCA 1295) (without reinforcement) .....	9-62
Polyvinyl acetate (DCA 1295) (with reinforcement) .....	9-63
Polypropylene-asphalt membrane .....	9-63
Selection of dust palliatives .....	9-63
Application rates .....	9-70
Placement .....	9-70
Dilution .....	9-70
Prewetting .....	9-71
Curing .....	9-71
Dust control on roads and cantonment areas .....	9-71
Dust control for heliports .....	9-71
Control of sand .....	9-71
Fencing .....	9-71
Paneling .....	9-75
Bituminous materials .....	9-76
Vegetative treatment .....	9-76
Mechanical removal .....	9-76

	<b>Page</b>
Trenching . . . . .	9-77
Water . . . . .	9-77
Blanket covers . . . . .	9-77
Salt solutions . . . . .	9-77
<b>Section IV. Construction procedures . . . . .</b>	<b>9-77</b>
Mechanical soil stabilization . . . . .	9-77
On-site blending . . . . .	9-77
Preparation . . . . .	9-77
Addition of imported soil materials . . . . .	9-78
Mixing . . . . .	9-78
Compaction . . . . .	9-78
Off-site blending . . . . .	9-78
Preparation . . . . .	9-78
Addition of blended soil materials . . . . .	9-78
Lime stabilization . . . . .	9-78
Preparation . . . . .	9-78
Spreading . . . . .	9-78
Preliminary mixing, watering and curing . . . . .	9-78
Final mixing and pulverization . . . . .	9-79
Compaction . . . . .	9-79
Final curing . . . . .	9-79
Cement stabilization . . . . .	9-79
Preparation . . . . .	9-79
Spreading . . . . .	9-79
Mixing . . . . .	9-79
Compaction . . . . .	9-79
Curing . . . . .	9-79
Fly-ash stabilization . . . . .	9-79
Preparation . . . . .	9-79
Spreading . . . . .	9-79
Mixing . . . . .	9-80
Compaction . . . . .	9-80
Curing . . . . .	9-80
Bituminous stabilization . . . . .	9-80
Traveling plant mixer . . . . .	9-80
Rotary mixer . . . . .	9-80
Blade mixing . . . . .	9-80
Central plant construction methods . . . . .	9-81
Storing . . . . .	9-81
Mixing . . . . .	9-81
Hauling . . . . .	9-81
Placing . . . . .	9-81
Compacting . . . . .	9-81
Curing . . . . .	9-81
Surface waterproofing . . . . .	9-81
Preparation . . . . .	9-81
Mixing . . . . .	9-81
Compaction . . . . .	9-81
Membrane placement . . . . .	9-81

<b>CHAPTER 10. SLOPE STABILIZATION</b> .....	10-1
Geologic features .....	10-1
Faults .....	10-1
Bedding plane slope .....	10-2
Soil mechanics .....	10-2
Slope gradient .....	10-2
Normal force .....	10-3
Downslope force .....	10-3
Shear strength .....	10-3
Groundwater .....	10-7
Uplift force .....	10-7
Seepage force .....	10-8
Slope failure .....	10-8
Rockfalls and rockslides .....	10-8
Debris avalanches and debris flows .....	10-10
Slumps and earthflows .....	10-11
Surface drainage .....	10-12
Groundwater level .....	10-12
Rock riprap or buttresses .....	10-13
Interceptor drain .....	10-14
Fills .....	10-14
Soil creep .....	10-14
Stable slope construction in bedded sediments .....	10-16
Sandstone - Type I .....	10-16
Unstable-slope indicators .....	10-18
Road-location techniques .....	10-18
Construction techniques .....	10-18
Sandstone - Type II .....	10-20
Unstable-slope indicators .....	10-20
Road-location techniques .....	10-21
Construction techniques .....	10-21
Deeply weathered siltstone .....	10-21
Unstable-slope indicators .....	10-21
Road-location techniques .....	10-22
Construction techniques .....	10-22
Sandstone adjoining ridges of igneous rock .....	10-22
Unstable-slope indicators .....	10-22
Road-location techniques .....	10-22
Construction techniques .....	10-22
<b>CHAPTER 11. GEOTEXTILES</b> .....	11-1
Applications .....	11-1
Reinforcement .....	11-1
Separation .....	11-2
Bypass .....	11-2
Remove and replace .....	11-2
Build on directly .....	11-2
Stabilize .....	11-2
Drainage .....	11-2
Filtration .....	11-2
Unpaved aggregate road design .....	11-3

	<b>Page</b>
Site reconnaissance . . . . .	11-3
Subgrade soil type and strength . . . . .	11-3
Subgrade soil permissible load . . . . .	11-3
Wheel loads, contact pressure, and contact area . . . . .	11-3
Aggregate base thickness . . . . .	11-4
Aggregate quality . . . . .	11-5
Service life . . . . .	11-5
Selecting a geotextile . . . . .	11-5
Roadway construction . . . . .	11-8
Prepare the site . . . . .	11-8
Lay the fabric . . . . .	11-8
Lay the base . . . . .	11-8
Earth retaining walls . . . . .	11-9
Construction on sand . . . . .	11-9
Procedures . . . . .	11-12
Maintenance . . . . .	11-12
<b>CHAPTER 12. SPECIAL SOIL PROBLEMS . . . . .</b>	<b>12-1</b>
Aggregate behavior . . . . .	12-1
Soil-aggregate mixtures . . . . .	12-1
Laterites and lateritic soils . . . . .	12-1
Laterites . . . . .	12-2
Lateritic soils . . . . .	12-2
Location . . . . .	12-2
Profiles . . . . .	12-2
Engineering classification . . . . .	12-2
Compacted soil characteristics . . . . .	12-2
Pavement construction . . . . .	12-3
Subgrade . . . . .	12-3
Base course . . . . .	12-3
Subbase . . . . .	12-3
Surfacing . . . . .	12-4
Stabilization . . . . .	12-4
Slopes . . . . .	12-5
Coral . . . . .	12-5
Types . . . . .	12-5
Pit-run coral . . . . .	12-5
Coral rock . . . . .	12-5
Coral sand . . . . .	12-5
Sources . . . . .	12-5
Uses . . . . .	12-6
Fills, subgrades, and base courses . . . . .	12-6
Surfacing . . . . .	12-6
Concrete aggregate . . . . .	12-6
Construction . . . . .	12-6
Desert soils . . . . .	12-6
Arctic and subarctic soils . . . . .	12-7
Surface thawing index . . . . .	12-7
Ecological impact of construction . . . . .	12-13
