

PREFACE

This field manual (FM) establishes medical doctrine and provides principles for conducting combat stress control (CSC) support operations from forward areas to the continental United States- (CONUS) based medical facilities. This manual sets forth tactics, techniques, and procedures (TTP) for CSC units and elements operating within the theater of operations (TO). This TTP is applicable to operations across the operational continuum. It is important that the users of this manual be familiar with FM 22-51. This manual supports the Army Medical Department's (AMEDD) keystone manual, FM 8-10. Readers should have a fundamental understanding of FMs 8-10-3,8-10-5,8-10-6, 8-10-8,8-10-14,8-10-24, 8-42,8-55,63-20, 63-21, 100-5, and 100-10.

The staffing and organization structure presented in this publication reflects information in the most current living tables of organization and equipment (TOE) as of calendar year 1993. However, staffing is subject to change to comply with manpower requirements criteria outlined in AR 570-2. Your TOE can be subsequently modified.

This publication is in agreement with the American, British, Canadian, and Australian (ABCA) Quadripartite Standardization Agreement (QSTAG) 909, Principles of Prevention and Management of Combat Stress Reaction, Edition 1.

The proponent of this publication is the United States (US) Army Medical Department Center and School (AMEDDC&S). Send comments and recommendations on Department of Army (DA) Form 2028 directly to Commander, AMEDDC&S, ATTN: HSMC-FCD, Fort Sam Houston, Texas 78234-6123.

Unless this publication states otherwise, masculine nouns and pronouns do not refer exclusively to men.
