MARINE CORPS ORDER 8010.1E

From: Commandant of the Marine Corps
To: Distribution List

Subj: CLASS V(W) PLANNING FACTORS FOR FLEET MARINE FORCE COMBAT
OPERATIONS

Ref: (a) Marine Corps Ground Ammunition War Materiel
Requirement (WMR) Determination (1995-1996) Study
Final Report (NOTAL)
(b) MCO P4400.39G (NOTAL)
(c) FMFM 4-1
(d) FM 9-6
(e) FM 9-13

Encl: (1) Explanation of the Scenario-Base Combat Planning
Factors Tables
(2) Infantry-Heavy Threat Combat Planning Factors Table
(3) Armor-Heavy Threat Combat Planning Factors Table
(4) Composite Combat Planning Factors Table
(5) Combat Planning Factors for Special Operations

(6) Artillery Ancillary Items

1. Purpose. To promulgate Class V(W) combat planning factors (CPF's) to support Fleet Marine Force (FMF) combat operations.

2. Cancellation. MCO 8010.1D.

3. Background. Reference (a) reports the results of the Marine Corps Class V(W) WMR Study (1995-1996). Reference (b) establishes Marine Corps policy governing requirements determination, acquisition, management, and distribution of war reserve materiel. References (c), (d) and (e) provide logistical doctrine and associated tactics, techniques, and procedures for Class V(W) support during combat operations.

4. Planning Factors. Factors to be used during initial planning for combat operations are explained in enclosure (1) and shown in enclosures (2) through (5).

a. CPF's reflect the anticipated expenditure of ground ammunition over designated time periods of combat operations. These rates represent the unconstrained requirement. Unconstrained requirements are based on approved force structure, weapon mix, anticipated duration of combat, and the anticipated intensity of conflict. Once Version 2.1 of the Ammunition Prepositioning and Planning System (APPS) is fielded, the APPS

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

can be used in conjunction with MAGTF II to determine Class V(W) requirements for operational plans.

b. CPF's shown in the enclosures were derived from the Class V(W) WMR Study 1995-1996 (reference (a)). Two Major Regional Contingencies (MRC), derived from the Defense Planning Guidance Illustrative Planning Scenarios (DPG IPS) developed by the Joint Chiefs of Staff, were modeled during the study update. Separate factors developed for each contingency, as outlined in enclosures (2) and (3), reflect Marine Corps units in combat against infantry-heavy and armor-heavy major ground forces in mid-intensity conflict. In addition, enclosure (4) provides a composite CPF of the two MRC's modeled, for use when the type of conflict is not well defined. The Composite CPF is an average of the CPF's of the two modeled scenarios, weighted by the densities of the weapons in the scenarios and by the durations of the scenarios. More detailed descriptions of the scenarios and threats modeled are contained in enclosure (1). Factors for items for which the requirements are unaffected by the particular scenario are included in enclosure (1). Enclosure (5) includes CPF's for special operations by Marine Expeditionary Units (Special Operations Capable) (MEU(SOC)). The data in enclosure (5) is a compilation of the MEU(SOC) requirements derived from the tables in enclosures (2), (3), and (4). Enclosure (5) is not additive to the other enclosures. Enclosure (6) displays the specific artillery ancillary item multipliers by Department of Defense Identification Code (DODIC).

c. The separate factors developed, based on either an infantry-heavy or an armor-heavy threat, will give Force Commanders the ability to more accurately match ammunition requirements to specific threats. This ability, in turn, will assist in determining the most effective use of limited amphibious lift and transportation resources.

5. War Reserve. Chapter 6 of reference (b) deals specifically with Class V(W) war reserve policy. Marine Corps Combat Development Command (MCCDC) calculates the Class V(W) War Reserve Munitions Requirement using the Infantry-Heavy Threat and Armor-Heavy Threat rates in enclosures (2) and (3).

6. Marine Ammunition Requirements Support Order (MARSO). Commander, Marine Corps Systems Command (COMMARCORSSYSCOM), Ammunitions Directorate (AM) apportions a "starter stock" of ammunition to be prepositioned by each Marine Expeditionary Force (MEF) to support operational planning. Marine Forces Reserve (MARFORRES) is apportioned distinct war reserve stocks to support such planning which is controlled by COMMARCORSSYSCOM (AM). This starter stock is based on current personnel strengths, weapon densities, and the Composite CPF's in enclosure (4). MEF commanders spreadload their starter stock apportionments between supporting lift capabilities to develop the prepositioning objectives. Additionally, COMMARCORSSYSCOM (AM) calculates a "swing stock" of ammunition prepositioned to support the FMF,

above and beyond the starter stock apportionment. COMMARCORSYSCOM (AM) then promulgates the prepositioning objectives for each MEF by publishing the Apportioned War Reserve (AWR) MARSO.

a. COMMARCORSYSCOM (AM), in coordination with the Commanding General, MCCDC (0465), calculates and promulgates Available Supply Rates (ASR), as required, when specific inventory resources are insufficient to support the Total Munition Requirements (TMR). Shortages can be caused by budgetary constraints, limitations of the production base or rework facilities, or other restrictions. ASR rates may also be imposed when current starter stock requirements exceed newly issued War Reserve requirements. ASR's are promulgated as percentages of the allocated quantities. The ASR message includes the identification of suitable substitutes for preferred items.

b. Force Commanders may redistribute available resources between their supporting lift capabilities as necessary, but may not exceed the total quantity apportioned as supportable in the AWR MARSO. If a MEF's total operational requirement exceeds its apportioned quantity, the MEF commander may request redistribution of Marine Corps resources; such requests should be forwarded by message to Commandant of the Marine Corps (L) for approval, and coordinated through COMMARCORSYSCOM (AM) for action.

7. Action

a. Commanders, Marine Forces Atlantic, Pacific, and Reserve

(1) Per the guidance in reference (b) and the CPF's in enclosures (1) through (6), review operational plans and logistics annexes for Class V(W) requirements.

(2) Coordinate the withdrawal of war reserve materiel in accordance with reference (b) and additional service guidance to be issued in support of the specific crisis or contingency.

b. Commanding Generals, Marine Corps Bases and Air Stations

(1) Maintain and report Class V(W) war reserve materiel as directed by the applicable AWR MARSO.

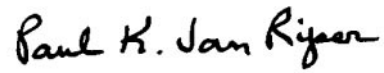

(2) Support plans for the withdrawal of Class V(W) war reserve materiel as required by the Force Commanders.

(3) Coordinate the loading and transportation of materiel as required.

8. Recommendations for Changes. Submit comments or recommended changes to this Order to the Commanding General, Marine Corps Combat Development Command (C 392).

MCO 8010.1E
15 Apr 97

9. Reserve Applicability. This Order is applicable to the Marine Corps Reserve.

A handwritten signature in black ink that reads "Paul K. Van Riper". The signature is written in a cursive, slightly slanted style.

PAUL K. VAN RIPER
By direction

DISTRIBUTION: PCN 10210530000

EXPLANATION OF THE SCENARIO-BASED
COMBAT PLANNING FACTORS TABLES

1. Tables of CPF's are provided in enclosures (2) through (4) to assist Force Commanders in more closely matching ground ammunition requirements to specific threats. Tables of associated ancillary items (propellant charges, fuzes, etc.) for artillery projectiles are also provided in these enclosures. Enclosures (2) and (3) reflect combat against an infantry-heavy and an armor-heavy threat and are based on JCS-developed MRC's. CPF's contained in enclosure (4) represent a weighted average of the two scenarios modeled, and are used to determine the Residual Readiness Requirements, the Strategic Readiness Requirement, and the AWR MARSO requirement.

2. Each set of CPF's in enclosures (2), (3), and (4) is presented twice. The first table in each enclosure displays the CPF's in weapon system/platform Weapon Identifier (ID) sequence. The second table in each enclosure displays the CPF's in DODIC sequence.

a. To determine total requirements for a particular ammunition item, the DODIC Sequence Table is more useful. To determine total ammunition requirements for a particular weapon system/platform, the Weapon ID Sequence Table should be used.

b. CPFs for ancillary items for artillery projectiles are included in the CPF tables. Multipliers for calculating the numbers of ancillary items required for different quantities of projectiles are shown in enclosure (6), as are suitable substitutes (if any) for the preferred ancillary items.

3. Brief descriptions of the scenarios used to derive the CPF's in the tables are provided below.

a. The Infantry-Heavy Threat Combat Planning Factors (enclosure (2)) are based on a scenario involving a Marine Air-Ground Task Force (MAGTF) stopping the advance of an opposing force within an assigned sector; defending in place while forces are built up in the area of operations; and then conducting offensive operations, including an amphibious assault. The opposing force is a regularly organized infantry-heavy combined arms army supported by modern air forces.

b. The Armor-Heavy Threat Combat Planning Factors (enclosure (3)) are based on a scenario involving a MAGTF stopping the advance of an opposing force within an assigned sector; defending in place while forces are built up in the area of operations; and then conducting offensive operations, including an amphibious assault. The opposing force is a regularly organized armor-heavy combined arms army supported by modern air forces.

ENCLOSURE (1)

c. The Composite Combat Planning Factors (enclosure (4)) were determined by using weighted averages of the CPF's in the two scenario-based tables. This table is useful for planning in an uncertain environment in which the probability is that the threat will be primarily infantry, but may be reinforced by unknown forces.

4. The data in each column of the CPF tables is explained below:

<u>COLUMN HEADING</u>	<u>EXPLANATION</u>
WEAPON	
- WEAPON ID	<p>Identifies the weapon system/platform on which the rates are based. For example, rates for A131 (CTG, 7.62MM LINKED 4&1) are shown separately for the different Light Armored Vehicle variants, rather than for the M240 machine gun. If a weapon platform has multiple machine guns mounted, do not multiply the rate assigned to that platform. For example, the rate for 7.62mm ammunition for the M1A1 Tank already accounts for the presence of two machine guns.</p> <p>The weapon ID will normally be the Table of Authorized Materiel Control Number (TAMCN) but may include any of the following:</p> <p>ENGBN - The rates are shown as the number of rounds per Engineer Battalion in the MAGTF.</p> <p>EODTM - The rates are shown as the number of rounds per 7 Man EOD Team in the MAGTF element.</p> <p>GUNNR - The rates are shown as the number of rounds per STINGER gunner in the MAGTF element.</p> <p>INDIV - The rates are shown as the number of rounds per individual in the MAGTF element. Note: When the Basis of Issue for daily rates does not match the Basis of Issue for the Basic Allowance/Combat Load and the computation system</p>

ENCLOSURE (1)

being used requires that these bases match, use the following table:

DODIC	GCE	NGCE
G881	.2406	.0180
G900	.0032	.0016
G930	.0096	.0032
G940	.0096	.0032
G945	.0096	.0032
G950	.0096	.0032
G955	.0096	.0032
L306	.0072	.0024
L307	.0072	.0024
L311	.0072	.0024
L312	.0072	.0024
L314	.0072	.0024
L323	.0072	.0024
L324	.0072	.0024
L495	.0064	.0449

INFBN - The rates are shown as the number of rounds per Infantry Battalion or Reconnaissance Battalion/Company in the MAGTF.

MARDV - The rates are shown as the number of rounds per Marine Division.

RECON - The rates are shown as the number of rounds per Reconnaissance Battalion or separate Reconnaissance Company in the MAGTF.

SPOPS - The rates are shown as the number of rounds per Marine Expeditionary Unit (Special Operations Capable) (MEU(SOC)).

SRAW - The rates are shown as the number of rounds per Short Range Antiarmor Weapon in the MAGTF element.

- NOMENCLATURE

Identifies, by standard nomenclature, the weapon system upon which the rates are based.

AMMUNITION

- DODIC

Identifies, by DODIC, the applicable ammunition item.

- NOMENCLATURE

Identifies, by standard nomenclature, the applicable ammunition item.

ENCLOSURE (1)

- GCE RATEES
- The Daily Assault Rate, Daily Sustaining Rate, and Basic Allowance (BA) are shown for weapons (or individuals, etc.) in the Ground Combat Element (GCE) of the MAGTF.
- DAILY ASSAULT
- The rate is shown as the number of rounds per day per weapon (or individual, etc.) in the GCE during the assault (intense) phase of combat.
- DAILY SUSTAIN
- The rate is shown as the number of rounds per day per weapon (or individual, etc.) in the GCE during the sustaining phase of combat.
- BASIC ALLOWANCE
- Indicates the BA of the ammunition item recommended to be carried within the means normally available to an FMF unit embarking and debarking for combat operations. Such means include (but are not limited to) self-propelled vehicles and authorized prime movers. The BA's shown in the tables are provided only as guides and are not directive in nature. The BA is included in the computation of the unconstrained requirement and is not additive to it. The BA is also known as Combat Load. The BA is intended to correspond to the term Combat Load which is used in DOD publications.
- OTHER-THAN GCE RATES
- The Daily Assault Rate, Daily Sustaining Rate, and Basic Allowance are shown for weapons (or individuals, etc.) in the Command Element (CE), Aviation Combat Element (ACE), and Combat Service Support Element (CSSE) of the MAGTF.
- DAILY ASSAULT
- The rate is shown as the number of rounds per day per weapon (or individual, etc.) in the CE, ACE, and CSSE during the assault (intense) phase of combat.
- DAILY SUSTAIN
- The rate is shown as the number of rounds per day per weapon (or individual, etc.) in the CE, ACE, and CSSE during the sustaining phase of combat.
- BASIC ALLOWANCE
- Indicates the BA of the ammunition item recommended to be carried within the means normally available to an FMF unit

ENCLOSURE (1)

embarking and debarking for combat operations. Such means include (but are not limited to) self-propelled vehicles and authorized prime movers. The BA's shown in the tables are provided only as guides and are not directive in nature. The BA is included in the computation of the unconstrained requirement and is not additive to it. The BA is also known as Combat Load.

5. The data in each column of the artillery ancillary items table is explained below:

<u>COLUMN HEADING</u>	<u>EXPLANATION</u>
PROJECTILE	
- DODIC	Identifies, by DODIC, the artillery projectile for which the ancillary items are required.
- NOMENCLATURE	Identifies, by standard nomenclature, the artillery projectile for which the ancillary items are required.
ANCILLARY ITEM	
- DODIC	Identifies, by DODIC, an ancillary item that should be associated with the projectile identified.
- NOMENCLATURE	Identifies, by standard nomenclature, an ancillary item that should be associated with the projectile identified. Suitable substitutes for each ancillary item are shown in parentheses in this column.
- MULTIPLIER	Indicates the number of rounds of the ancillary item that should be provided for each round of the projectile identified. To determine the total required quantity of the ancillary item multiply the projectile quantity by the MULTIPLIER in this column.

6. The CPF's for some ammunition items are not scenario-dependent, but are constant for all types of combat. They are dependent on the density of their associated equipment. The CPFs for these items are shown in Table 1, on the following page.

APR 15 1997

TABLE 1. SCENARIO-INDEPENDENT COMBAT PLANNING FACTORS

1. Aerial Delivery Items

a. The Basis of Issue for these rates is per PARACHUTE CARGO 5000-LB CAPACITY.

<u>DODIC</u>	<u>NOMENCLATURE</u>	<u>DAILY ASSAULT</u>	<u>DAILY SUSTAIN</u>	<u>BASIC ALLOWANCE</u>
M308	CARTRIDGE, DELAY; PARACHUTE CGO RELEASE	12	16	6

b. The Basis of Issue for these rates is per G11B CARGO PARACHUTE, TAMCN C5540.

<u>DODIC</u>	<u>NOMENCLATURE</u>	<u>DAILY ASSAULT</u>	<u>DAILY SUSTAIN</u>	<u>BASIC ALLOWANCE</u>
M500	CUTTER CTG POWDER ACTUATED 2-SEC DELAY	24	32	4

2. Destructive Devices. The Basis of Issue for these items is per Cryptographic Equipment Item for the following TAMCN's:

A8037	A8060	A8069
A8040	A8067	A8087
A8043	A8068	A8095

The rates are one-time allowances only, not daily rates.

<u>DODIC</u>	<u>NOMENCLATURE</u>	<u>BASIC ALLOWANCE</u>
M598	CRYPTO EQUIP. DESTROYER	1.0
M814	DOCUMENT DESTROYER	0.7

3. Controlled Release Items. These items require National Command Authority (NCA) release prior to employment. Items may be deployed without NCA release. The Basis of Issue for these items is as shown for each item.

<u>DODIC</u>	<u>NOMENCLATURE</u>	<u>BASIS OF ISSUE</u>	<u>DAILY ASSAULT</u>	<u>DAILY SUSTAIN</u>	<u>BASIC ALLOWANCE</u>

COMBAT PLANNING FACTORS FOR SPECIAL OPERATIONS

Explanation of Table 2

CPF's for Marine Expeditionary Units (Special Operations Capable) (MEU(SOC)) are consolidated as bulk quantities per MEU(SOC), rather than as rates per weapon, individual, or unit. Accordingly, Table 2 is made up of only three columns, as follows:

<u>COLUMN HEADING</u>	<u>EXPLANATION</u>
DODIC	Identifies the ammunition item by DODIC.
NOMENCLATURE	Identifies the ammunition item by standard nomenclature.
QUANTITY	The number of basic issue units of the ammunition item is shown for one MEU (SOC). Because of the nature of special operations, assault and sustaining rates are not shown.

Table 2 is added as information for rapid requirements estimation. The rates for the items in this table are included in enclosures (2), (3), and (4) under Weapon ID "SPOPS".
