Humanitarian Goods Purchased by the Government of Iraq by Supplier (All Amounts in USD)

Referenced in the Report as "Committee humanitarian contractor table."

Supplier	Mission Country	Goods Categories	Number of Contracts	Contract Face Value	Contract Disbursements	Evidence of Illicit Payments
----------	-----------------	------------------	---------------------	---------------------	------------------------	------------------------------

General Notes:

1. For reporting purposes, all amounts are presented in USD. Contract disbursement amounts were converted using rates provided by the currency website, www.OANDA.com, on the payment date of each disbursement.
2. United Nations OFFP records – refers to databases and records maintained by the United Nations, specifically, the Office of the Iraq Programme (OIP) and the United Nations Treasury Department.

Column Descriptions:

1. Supplier – The name of the contracting entity for the supply of humanitarian goods procured by the Government of Iraq. Some of these entities are no longer active or have been dissolved; others are subsidiaries of other organizations. Entities are listed in alphabetical order by their known legal name at the time in which the contract was executed and number 3,614. Goods were primarily procured for the central and southern governorates of Iraq, but also consisted of purchases of bulk commodities and spare parts, a portion of which was allocated to and paid for from the account designated to purchase humanitarian goods for the northern governorates. (Source: United Nations OFFP records)
2. Mission Country – The country, or countries, with which the supplier registered to provide goods to Iraq. (Source: United Nations OFFP records)
3. Goods Category – Description of the goods provided to Iraq. The descriptions are as stated in the OIP database and have not been modified or standardized for purposes of this listing. (Source: United Nations OFFP records)
4. Number of Contracts – The number of separate contracts for which goods were delivered and paid for from the Escrow Account. Total number of contracts represented for all suppliers in this table is 18,458. (Source: United Nations OFFP records)
5. Contract Face Value – The aggregate contract value by supplier in USD equivalents as stated in the OIP database for contracts for which goods were funded and delivered. For all suppliers listed, contract face value totals \$34.6 billion. This amount does not include the contract value for which evidence existed of an illicit payment but the goods were not delivered. (Source: United Nations OFFP records)
6. Contract Disbursements – The aggregate amount by supplier in USD equivalents of payments paid from the Escrow Account to the supplier for the delivery of procured goods. For all contracts, disbursements total \$34.5 billion. This amount, for each supplier and each contract, may differ from the contract face value primarily due to (a) differences in quantity between what was contracted and what was delivered, (b) cancellation of portions of the contract, and (c) fluctuations in foreign exchange rates for goods contracted in currencies other than USD, which in many cases caused the contract disbursement amount to be higher than the contract face value. (Source: United Nations OFFP records)
7. Evidence of Illicit Payments – A company that has at least one contract for which direct or indirect evidence exists of illicit payments. A code of "A" in this field represents evidence of illicit payments based in whole or in part on actual payment data. A code of "P" represents evidence based entirely on projected amounts. Companies found to have evidence of illicit payments total 2,253, or 62% of the 3,614 companies participating in the Programme. Not included on this list are 175 companies that were not noticed and 12 companies with evidence of an illicit payment, although the goods were delivered. The twelve, however, are included on Tables 7 and 8.

Note: For a description of references and other information, refer to the explanation of Committee tables and the accompanying notes at the end of this table.
