Actual and Projected Illicit Payments on Contracts for Humanitarian Goods Summary by Supplier (All Amounts in USD)

Referenced in the Report as "Committee humanitarian summary kickback table."

Supplier	Mission Country	Goods Categories	Number of Qualifying Contracts	Contract Face Value	Contract Disbursements	Levied ASSF	Paid ASSF	Inland Transportation Fees	Company Response (see note)
----------	-----------------	------------------	--------------------------------	---------------------	------------------------	-------------	-----------	----------------------------	-----------------------------

General Notes:

- For reporting purposes, all amounts are presented in USD. Contract disbursement amounts were converted using rates provided by the currency website, www.OANDA.com, on the payment date of each disbursement. ASSF and Inland transportation fee amounts were converted using one of the following methods: (a) if an amount was denominated in the same currency as the associated contract, the conversion rate applied was the same as used by the United Nations to convert the contract value into USD; (b) if an amount was denominated in a currency other than that of the associated contract, the conversion rate applied was based on the average United Nations rate for that currency for the phase under which the contract was executed; or (c) in relatively few instances where an amount was not associated with a specific Programme related contract but a payment date was available, the conversion rate applied was based on the daily rate provided by the currency website, www.OANDA.com.
- United Nations OFFP records – Refers to databases and records maintained by the United Nations, specifically, the Office of the Iraq Programme (OIP) and the United Nations Treasury Department.

Column Descriptions:

- Supplier – The name of the contracting entity for the supply of humanitarian goods procured by the Government of Iraq. Some of these entities are no longer active or have been dissolved; others are subsidiaries of other organizations. Entities are listed in alphabetical order by their known legal name at the time in which the contract was executed and number 2,078. Goods were primarily procured for the central and southern governorates of Iraq, but also consisted of purchases of bulk commodities and spare parts, a portion of which was allocated to and paid for from the account designated to purchase humanitarian goods for the northern governorates. (Source: United Nations OFFP records)
- Mission Country – The country, or countries, with which the supplier registered to provide goods to Iraq. (Source: United Nations OFFP records)
- Goods Category – The description of the goods provided to Iraq (Source: United Nations OFFP records)
- Number of Qualifying Contracts – The number of contracts for the supplier listed in which direct or indirect evidence exists of an illicit payment. For all suppliers listed, this totals 8,319 contracts. For a contract to be listed, payments to the supplier on the contract must have been made prior to July 1, 2003, at which time the CPA amended contracts to remove their illicit payment components. However, included on this list are an additional twelve companies with evidence of an illicit payment, but where the goods under those contracts were not delivered. (Source: United Nations OFFP records)
- Contract Face Value – The aggregate contract value by supplier in USD equivalents as stated in the OIP database for the humanitarian contracts for which evidence exists of the collection of an illicit kickback. For all the suppliers listed in the table, the contract face value totals \$17.6 billion in contract value. (Source: United Nations OFFP records)
- Contract Disbursements – The total in USD equivalents paid to the supplier on contracts for which evidence exists of the collection of an illicit kickback. Only payments made on a contract prior to July 1, 2003 (the CPA Adjustment Date) are aggregated. For listed suppliers, contract disbursements total \$15.9 billion. (Source: United Nations OFFP records)
- Levied ASSF – The total amount of ASSF estimated to have been levied by Iraq on the related supplier for the qualifying contracts. The total amount levied for all suppliers is estimated at \$1.2 billion. This amount is comprised of either actual levy data or is estimated. An asterisk (*) in this field indicates that the amount reported is based entirely on actual data. A detailed accounting of fees levied for each of the contracts, its source and basis of quantification are described in Table 8.
- Paid ASSF – The total amount of ASSF estimated to have been collected by the Government of Iraq from the supplier on the qualifying contracts (including amounts collected by payment agent such as Alia Transportation). The total amount collected from all suppliers is estimated at \$1.02 billion. This amount is comprised of either actual payment data or is estimated. An asterisk (*) in this field indicates that the amount reported is based entirely on actual data. A detailed accounting of fees collected for each of the contracts, its source and basis of quantification are described in Table 8.
- Inland Transportation Fees (Amount) – Indicates the amount paid on the contract for inland transportation fees for goods delivered through Umm Qasr. The total amount collected from all suppliers is estimated at \$527 million. This amount is comprised of actual data where available. Actual figures have been obtained from CBI documents, Alia Company for Transport and General Trade statements, ISCWTT documentation, company correspondence and bank statements. The Committee has found evidence indicating that some shipments through land crossings were also assessed a minor inland transportation fee. However, there is insufficient evidence to suggest that the practice was systemic; therefore, the Committee has not included any contract level quantification of them. A detailed accounting of fees collected for each of the contracts, where quantified, and their source and basis of computation are included as part of Table 8.
 - A cross (†) indicates that the supplier had at least one contract that was assessed a fee, but there was insufficient available data to determine or estimate the amount of fees. The computation of inland transportation fees on many contracts was hindered from the lack of specific shipping information such as its weight or number of containers since such information was not captured by OIP in its contracts

Note: For a description of references and other information, refer to the explanation of Committee tables and the accompanying notes at the end of this table.

**Actual and Projected Illicit Payments on Contracts for Humanitarian Goods
Summary by Supplier (All Amounts in USD)**

Referenced in the Report as "Committee humanitarian summary kickback table."

Supplier	Mission Country	Goods Categories	Number of Qualifying Contracts	Contract Face Value	Contract Disbursements	Levied ASSF	Paid ASSF	Inland Transportation Fees	Company Response (see note)
----------	-----------------	------------------	--------------------------------	---------------------	------------------------	-------------	-----------	----------------------------	-----------------------------

database. It was also hindered by the absence of rate assessment tables beyond Phase VIII.

- b. An amount with a cross, e.g. "1,237 †", represents that the supplier had at least one contract that was assessed an inland transportation fee, and at least one contract with inland transportation fees based on actual data.
 - c. An amount without a cross represents inland transportation fees paid by the supplier based on actual inland transportation data. This also indicates that the Committee has complete actual inland transportation data for this supplier.
10. Company Response— Prior to the issuance of these tables, the Committee attempted to notify each company for which there was evidence of payment of a kickback in connection with one or more of its contracts to invite any response or information. Company responses were classified into the following categories:
- Category A: Company admits that it knowingly made illicit payments to the Government of Iraq or its agents.
 - Category B: Company denies that it made payments to the Government of Iraq or its agents in violation of the Programme.
 - Category C: Company acknowledges payments were made or may have been made but denies knowing at the time that its agents or employees made illicit payments.
 - Category D: Company acknowledges that payments were made or may have been made, but contends that payment was made with the belief that it was authorized under the Programme or for actual services performed by legitimate private contractors.
 - Category E: Company acknowledges receipt of the Committee's letter and takes no position or has expressly requested that its response not be disclosed.
 - Category F: Company did not respond.
 - Category G: Company was not noticed by the Committee or subsequent information was identified and it was no longer appropriate to list the company.

Note: For a description of references and other information, refer to the explanation of Committee tables and the accompanying notes at the end of this table.
