This quarter, SIGIR revises its record of ESF appropriations, resulting in a net decrease in total appropriations to the fund. The biggest change was removal of $50 million previously recorded as appropriated to the ESF in Iraq in FY 2003. The change reflects audit findings and agency reporting. In addition, SIGIR changed the fiscal year in which a rescission under P.L. 110-161 was recorded from FY 2007 to FY 2006. SIGIR may make further refinements in coming quarters as additional data becomes available.
70. In the fourth quarter of FY 2008, the rate of obligation exceeded $6.2 million per day on average and dropped to approximately $2.2 million per day on average in the fourth quarters of FY 2009 and FY 2010. The average obligation rate for the first three fiscal year quarters of FY 2006–FY 2011 was $1.2 million per day.

The average oil price for 2011 was derived by dividing total revenues by the number of barrels exported. Not all oil export revenue accrues to the GOI; 5% is paid in war reparations to Kuwait. Reparations paid to Kuwait for 2011 totaled $1.92 billion through 6/30/2011. Crude oil production and export figures calculated by NEA-I and U.S. Treasury frequently differ because of different methodologies.
