Pentagon Official Calls for Total Force Focus on Emerging Biothreats

«... Biodefense is no longer something that's the purview of just specialised units who have traditionally been worried about these threats...»

«These threats certainly impact the readiness and resilience of our military forces...»

«Integrated deterrence requires a combat credible force...»

Earlier this month, the Pentagon released its updated Biodefense Posture Review which lays out the strategy aimed at positioning the Department to counter biothreats through 2028.

Biodefense Council

William A. LaPlante
U.S. Undersecretary of Defence for Acquisition and Support (USD(A & S)), Chairman of the Biological Defence Board

Office of Pandemic Preparedness and Response Policy - OPRP

Paul Friedrichs

Special Assistant to the President and Senior Director for Global Health Security and Biosecurity at the National Security Council

Since 7 August 2023, Director of the Office of Pandemic Preparedness and Response Policy - Principal Advisor for Pandemic Preparedness and Response

Main tasks

Coordinate the internal response of the Executive Office of the President of the United States to public health threats that have pandemic potential

Directing and coordinating federal science and technology efforts related to pandemic preparedness

Development and submission of periodic reports to Congress

Bureau of Global Health Security and Diplomacy - GHSD

John N. Nkengasong

Special envoy, U.S. Global AIDS Coordinator, Global AIDS Coordinator for the United States.

Since 1 August 2023, Director of the Bureau for Global Health Security and Diplomacy

Main tasks

Strengthening the global health security architecture, including the potential modernisation of the World Health Organization and the establishment of a world pandemic fund

Leveraging U.S. capabilities abroad to strengthen public health systems, including laboratories and supply chains

Enhancing health care security as a major focus of U.S. foreign policy, both in diplomatic relations and in domestic policymaking

FACT SHEET: White House Launches Office of Pandemic Preparedness and Response Policy

Statement Establishing the Office of Pandemic Preparedness and Response Policy on the White House website dated 21.07.2023

The Biden-Harris Administration has made history by giving our own nation's ability to respond to COVID-19 as that it no longer overwhelmingly disrupts the lives of the United States. Under President Biden's leadership, the Administration takes the values of our nation and works to ensure all health leaders have a coordinated system to address the greatest threat to our health, to our people, and to our way of life.

UNAIDS welcomes the launch of the Bureau of Global Health Security and Diplomacy at the U.S. Department of State

UNAIDS welcomes the launch of the Bureau of Global Health Security and Diplomacy at the U.S. Department of State. The Bureau will lead the U.S. effort to strengthen global health security and foreign policy. Secretary Blinken said the Bureau will be led by Ambassador John Nkengasong, serving as Ambassador-at-Large, U.S. Global AIDS Coordinator, and Senior Bureau Officer for Global Health Security and Diplomacy, reporting directly to the U.S. Secretary of State.

U.S. Department of State Proposals for Implementation 'Biosafety Enhancement Programme' (BEP) for 2016

Background and Program Description

The Office of Cooperative Threat Reduction (OCTR), part of the Department's Bureau of International Security and Nonproliferation (ISN), sponsors foreign assistance activities funded by the Nonproliferation, Anti-terrorism, Demining and Related Programs (NADR) accounts and focuses on mitigating proliferation risk in frontier states and regions where the terrorist threat is on the rise, such as South Asia, the Middle East, and North Africa.

ISN/CTR administers the Biosafety Engagement Program (BEP) program as part of the OCTR portfolio. BEP's mission includes strengthening biosafety management best practices and ensuring life science institutions and programs, decreasing the risk that scientists with dual-use expertise will misuse pathogens, and promoting adoption of and compliance with comprehensive international frameworks that advance U.S. biological nonproliferation objectives, including United Nations Security Council Resolution (UNSCR) 1540, the Biological Weapons Convention (BWC), the World Health Organization's International Health Regulations, and the European Convention for the Protection of Cultural Heritage (ECHR).

ISN/CTR has approximately \$40,000,000 available in the current fiscal year to award multiple grants and cooperative agreements in this field...

Funding Priorities

While global in scope, ISN/CTR focuses its resources on prioritized countries in support of one of following biological risks: During the current fiscal year, BEP's highest priority countries for engagement are Iraq, Turkey, and Yemen. BEP's second highest priority countries are Afghanistan, Egypt, India, Indonesia, Jordan, Kenya, Lebanon, Libya, Morocco, Oman, Philippines, Saudi Arabia, Somalia, and Uganda. The programme will also consider project proposals for other countries in the Middle East and North Africa, South Asia, Ukraine, sub-Saharan Africa, Southeast Asia, and Latin America.

The recipient shall leverage relevant infrastructure to create, develop, and implement projects that advance the BEP mission.

BEP generally funds activities in three primary pillars and has a focus on long-term sustainability. The first pillar focuses biosafety and biosecurity through technical consultation, risk assessment, and training courses that develop expertise to create sustainable culture of laboratory biosafety management. As a part of BEP's biosafety efforts, the program also sponsors efforts to train foreign law enforcement and security forces on approaches for detecting, investigating, and disrupting bioterrorism plots.

... ISN/CTR has approximately \$40,000,000 available in the current fiscal year to award multiple grants and cooperative agreements in this field...

... During the current fiscal year, BEP's highest priority countries for engagement are Iraq, Turkey, and Yemen. The programme will also consider project proposals for other countries in the Middle East and North Africa, South Asia, Ukraine, sub-Saharan Africa, Southeast Asia, and Latin America...

Award Amount: Approximately \$40,000,000 is available for this program during the current fiscal year. OCTR will prioritize proposals that efficiently meet RFP and programmatic goals at the lowest technically acceptable cost.

Application Submission Process: Applicants should submit project proposals electronically using Grants.gov. Through responses on the Grants.gov application process are available at <http://www.grants.gov>. For questions relating to Grants.gov, please call the Grants.gov Contact Center at 1-800-458-5230. For questions about this solicitation, contact:

David Jackson, Program Advisor
Office of Cooperative Threat Reduction
U.S. Department of State
Email: DavidJ@state.gov
Phone: (202) 673-4740

Application Deadline: All applications must be submitted on or before February 12, 2016, 11:59 p.m. eastern time. Applications submitted after 11:59 p.m. will not be eligible for consideration. **Begin the application process early**, as this will allow time to address any technical difficulties that may arise in advance of the deadline. There will be no exceptions to this application deadline.

All applicants must register with Grants.gov prior to submitting an application. **Registering with Grants.gov in a new state requires a credit check, which takes an average of 10 business days to complete, and verification, which takes an average of 10 business days to complete.** In order to ensure that you meet all requirements, you will need to be issued a user password for Grants.gov, which is required for application submission. There are four steps that you must complete before you are able to register: (1) Obtain a Data Universal Numbering System (DUNS) number from Dun & Bradstreet; (2) If your organization does not have one already by calling 1-800-777-7777; (3) Register with Central Computer Registry (CCR) if your organization is an Authorized Organization Representative (AOR); and (4) be authorized as an AOR by your organization. For more information, go to www.grants.gov. Please note that your OCTR registration must be manually reviewed. Failure to renew your OCTR registration may preclude submission of an application through Grants.gov.

Application Content: Applicants must follow the RFP instructions and conditions contained herein and supply all information that is requested. **Failure to include all information as requested, with stated exceptions, will result in disqualification from the competition.** Applicants must not furnish false, inaccurate, and complete information as required by this RFP. The penalty for making false statements in proposals to the U.S. Government is provided in 18 U.S.C. 1011.

Unsuccessful applicants: will receive the following information:

Explosive: RFK Jr. Tells Tucker How Fauci's US Bioweapons Research Caused the Covid Pandemic

By Richard Abelson Aug 15, 2023 6:30 pm 289 Comments

Shi Zhengli who is famous as the bat lady and her assistant, Ben Hu and a couple of other scientists at the Wuhan lab.

TUCKER ON TWITTER

«...RFK Jr. tells Tucker how Fauci's US Bioweapons Research caused the Covid pandemic ...»

<https://www.thegatewaypundit.com/2023/08/explosive-rfk-jr-tells-tucker-how-faucis-us/>

... That is the greatest threat to the US. If we lose that status as the worlds reserve currency, the Great Depression will look like a cakewalk.

"We have biolabs in Ukraine because we're developing bioweapons"

RFK also unpacked the issue of US biolabs in Ukraine, detailing how Richard Nixon had shut down the US bioweapons program in **Fort Detrick**, Maryland 1973, until the Patriot Act had effectively eliminated the punishment for US officials for violating the Bioweapons Act.

"We have biolabs in Ukraine because we're developing bioweapons", Kennedy told Carlson, "using all kinds of new synthetic biology and CRISPR technology and genetic engineering techniques that were not available to previous generation. You can make frightening stuff."

"When the Patriot Act reopened the bioweapons arms race in 2001, the Pentagon began putting a lot of money into bioweapons, but they were nervous because if you violate the Geneva Convention, it's a hanging offense. And they weren't sure that the provision in the Patriot Act would actually hold up as a loophole."

Therefore the Pentagon outsourced the bioweapons program to HHS and the National Institute for Infectious Diseases run by Anthony Fauci, Kennedy explained, repeating territory already covered in his book, "The Real Anthony Fauci."

"So Anthony Fauci got all the responsibility for bioweapons development and a 68% raise from the Pentagon in order to do that work," Kennedy charged, which is the reason Fauci became the most highly-paid employee of the US government, over even the President, earning \$450,000 a year.

"Every bioweapon needs a vaccine, because in 100% of cases when you deploy a bioweapon, there's blowback. Your side gets it too." This is the reason for gain-of-function research, which was then banned by the Obama administration 2014 and instead outsourced to Dr. Shi Zhengli's Wuhan, Kennedy stated.

"Fauci built labs all of the country, BSL-3 and BSL-4, we don't even know how many there are. In 2014, three bugs escaped from three different labs. They were high-profile breaks and they were very dangerous: Smallpox and other bad microbes. 300 scientists wrote president Obama and said, you've got to shut down Anthony Fauci because he's going to create a microbe that will cause global pandemic. So Obama signed a moratorium that shut down the worst of Anthony Fauci's experiments. Most of them were taking place in Galveston and in North Carolina, by a scientist called Ralph Baric," Kennedy said.

Instead of obeying the law, Fauci shifted his operation off-shore"

"Instead of obeying that law, Fauci shifted his operation off-shore. Most of those (experiments) ended up in the Wuhan lab, run by the People's Liberation

«... 'We have biolabs in Ukraine because we're developing bioweapons', Kennedy told Carlson, 'using all kinds of new synthetic biology and CRISPR technology and genetic engineering techniques that were not available to previous generation. You can make frightening stuff' ...»

"Baric taught them two things: He taught them how to engineer the spike with a Furin cleavage site, that could attach to the ACE2 receptors in the human lungs, and spread through the air. He taught them another technique which has nothing to do with public health, which is called seamless ligation, which is a technique for disassemble the proteins of human genome
