

Ukraine Contracting Actions

January 31, 2023

The Department of Defense is delivering security assistance to Ukraine through two main authorities:

Ukraine Security Assistance (USAI):

- Under USAI, the Department procures defense articles directly from industry to support Ukraine.
- Congress has appropriated \$6.3 billion in USAI funding in fiscal year 2022 (FY22) and \$12.3B FY23 to date. The Department has committed \$7.1 billion through notifications to Congress since FY22 and \$2.9 billion has been awarded on contract.
- USAI packages underscore the continued U.S. commitment to supporting Ukraine by meeting their most urgent needs, while also building the capacity of Ukraine's Armed Forces to defend its sovereignty over the long term.

Presidential Drawdown Authority (PDA):

- PDA allows the Department to deliver equipment to Ukraine by drawing down from DoD stocks.
- Congress has appropriated \$12.5 billion in FY22 to replace these stocks and \$13.4B in FY23. The Department has to-date identified \$9 billion in replacement actions, of which \$4.5 billion have been awarded on contract.
- Replacement contracts are expected to deliver over multiple years, as many capabilities delivered to Ukraine, such as advanced munitions, have two- to three-year production times.

The Department is working closely with industry to produce these systems under both USAI and replacement contracts as quickly as possible, using Undefined Contract Actions (UCAs), Indefinite Delivery / Indefinite Quantity (IDIQ) contracts, and other tools that accelerate acquisition timelines.

In addition to procurement funding, some replacement contracts also include investments in the industrial base to expand or accelerate production throughput.
