

Index

B

Biological vulnerability analysis, 2-9
 Biological agents (Bacteria), Possible military significant (table), F-6
 Biological agents (Rickettsia), Possible military significant (table), F-8
 Biological agents (Chlamydia and Fungi), Possible military significant (table), F-9
 Biological agents (Viruses), Possible military significant (table), F-10
 Biological agents (Toxins), Possible military significant (table), F-12
 Biological attack risk (figure), 2-10
 Biological attack risk checklist, B-1
 Biological effects of nuclear radiation (table), F-4
 Biological vulnerability rating matrix (table), 2-11
 Biological employment indicators, D-1

C

Chemical, 2-12
 Blister agent casualties (table), 2-17
 Chemical attack risk (figure), 2-13
 Chemical attack risk checklist, C-0
 Determine casualty estimate, 2-16
 Enemy use of nonpersistent agents, 2-12
 Enemy use of persistent agents, 2-12
 Estimate delivery capability, 2-13
 Generate effects information, 2-15
 Sarin casualties (table), 2-16
 Thickened Soman (table), 2-17
 Chemical employment indicators, E-1
 Conversion factors (table), F-20

D

Defense, major differences between biological and chemical (table), F-18
 Depleted uranium vulnerability analysis, 2-8
 Depleted uranium reduction measures, 3-5

E

Echelons above corps, G-1
 Electromagnetic pulse vulnerabilities, equipment (table), F-19

I

Industrial chemicals. See Toxic industrial chemicals.
 Industrial hazards, common, F-16

Intelligence preparation of the battlefield, 1-1

- Define the battlefield environment, 1-2
- Describe the battlefield's effects, 1-4
- Evaluate the threat, 1-5
- Determine threat courses of action, 1-6
- Summary, 1-9

L

- Low-level radiation vulnerability analysis, 2-8
 - Vulnerability reduction measures, 3-5

N

- Nuclear vulnerability analysis, 2-1
 - Blast or shock wave, 2-3
 - Electromagnetic pulse, 2-4
 - Initial radiation, 2-4
 - Residual radiation, 2-4
 - Thermal radiation, 2-3
- Nuclear attack risk checklist, A-0
- Nuclear radiation, biological effects of, F-4

R

Reduction. See Vulnerability reduction measures.

S

- Sarin casualties (table) 2-16

T

- Toxic Industrial Chemicals vulnerability analysis, 2-18
 - Hazard assistance information (table), 3-8
 - Vulnerability reduction measures, 3-6

V

- Vulnerability reduction measures, 3-0
 - Deterrence measures (table), 3-5
 - Nuclear, biological, chemical (active), 3-0
 - Nuclear, biological, chemical (passive), 3-0

W

- Weather factors, biological agent employment, F-13
- Weather factors, chemical agent employment (nonpersistent), F-14
- Weather factors, chemical agent employment (persistent), F-15
